UMSL e-Consent

All students signing in to MyView for the first time will be prompted to e-Consent. When students agree to e-Consent, they are granting the University permission to communicate student records, financial aid and billing information with them electronically. MyView is an electronic form of communication so students must first agree to the UMSL e-Consent policy before they can access their student records, financial aid and billing information in their MyView Student Center.

Students who have not agreed to the e-Consent policy have a ‘No Consent’ service indicator on their student account. This is an informative service indicator and has no impact on student registration or other services outside of MyView. The ‘No Consent’ service indicator is removed from the students account once the student agrees to the e-Consent policy.

Agree to e-Consent

Once a student has signed in to Myview (myview.umsl.edu) with their MyGateway ID and password, the welcome page shown below will be displayed.

The student should click one of the UM e-Consent links, read the policy (below) and click the agree button at the bottom of the page.
After the student clicks the agree button, they will be signed out of MyView. The student should then sign back into MyView with their MyGateway ID and password. Once a student has signed back into Myview, a new welcome page (shown below) will be displayed. This is the welcome page that the student will see from now on.

Agreeing to the e-Consent policy grants the student access to their Student Center. From the welcome screen above, the student can get to their Student Center from the Self Service link on the menu bar or by clicking the Student Center link at the bottom of the page.
