Work Auth: No Sponsor

Locations: Bloomfield, CT | St. Louis, MO | Philadelphia, PA | Denver, CO | Franklin Lakes, NJ | Nashville, TN | Eden Prairie / Bloomington, MN

Job id: 19011256

Why a career with Cigna Technology Services (TS)?

Cigna is a global health service company dedicated to improving the health, well-being, and peace of mind of those we serve by making health care simple, affordable, and predictable. Due to the rapidly changing environment and Cigna's growing businesses, we are seeking the best and brightest candidates to join our Technology Services team to help develop and support the future state of Cigna’s technology solutions. The ideal summer internship candidate has a passion for helping people and for technology.

Do you have a passion for technology?

Cigna Technology Services is looking for technology-focused individuals to join the Technology Early Career Development Program (TECDP) summer internship program. The TECDP mission is to support the professional development needs of early career Technology Services associates, as well as Technology Services talent requirements by providing summer interns with challenging technology assignments, formalized training and guided mentorship. The committed partnership between interns, program management and leadership is a testament to the value of the TECDP and the critical role it plays in developing Cigna's future Technology Services professionals.

The TECDP summer internship offers students interested in the field of technology a realistic experience of what it’s like to work in Technology Services at Cigna. The internship is designed to further develop an individual’s technical skills aligned with their interests. The TECDP program manager will work with the interns to determine the best role for them prior to starting. In addition to their role work, summer interns will have the opportunity to participate in an innovations project to solve a real-world Technology Services challenge.

Opportunities for interns are available in many areas of Technology Services. Our interns are treated as if they were full-time program associates and this opportunity could lead to full-time employment following graduation.

Summer Internship Opportunities: (include but are not limited to)

- Application Developer
• Infrastructure Engineer
• Network Engineer
• Product Owner
• Scrum Master
• Release Train Engineer
• Business or Systems Analyst
• Project Manager
• Information Protection Specialist
• Software Engineer
• Data Analyst

Length of Internship: 12 weeks

Locations: Bloomfield, CT | St. Louis, MO | Philadelphia, PA | Denver, CO | Franklin Lakes, NJ | Nashville, TN | Eden Prairie / Bloomington, MN

*Housing is available for summer interns who live more than 25 miles from their office.

Qualifications:

• **Internship** candidates must be pursuing a Bachelor’s Degree in a technical program at time of hire. Desired degrees include, but are not limited to, Computer Science and Computer/Software Engineering. Degrees related to business technology disciplines such as Management Information Systems, Computer Information Systems, and Business Information Systems may be considered based on depth of technology experience. All backgrounds require, at minimum, a working knowledge of programming basics.

• Ability to effectively communicate
• Team player with strong interpersonal skills
• Excellent analytical/technical skills and knowledge
• Innovative thinker and problem solver
• Energetic, motivated and career-driven
• Seeks learning opportunities
• 3.0 or better overall GPA preferred

A goal of this internship program is to prepare and identify qualified candidates for roles with Cigna post-graduation. Therefore, this temporary internship is open only to individuals who are eligible for employment in the United States and who would not require visa sponsorship now or in the future.
