

Bharath Mukka is a Graduate student in Cybersecurity at UMSL. He received his undergraduate degree in Computer Science and Engineering in 2018 and worked for 18 months as a cybersecurity engineer at Tata Consultancy Services primarily in Identity and Access Management. His goal is gain expertise in networking, communication protocols, and security architecture in order to become a Penetration Tester for networks, web applications, and computer systems.

Jianyu Wang is a Ph.D. student in the Computer Science Department at UMSL, where he does research on Internet of Things (IoT) and edge computing security. At UMSL, Jianyu has worked as a graduate research assistant for the last four years. He is especially interested in network intrusion prevention, device behaviour monitoring, and user credit fraud detection. Starting from the 2020 Fall semester, Jianyu will work as a graduate teaching assistant and share his knowledge about cybersecurity with students. After graduation, Jianyu plans to work in R&D engineering in the IoT or financial industry.
