

Information Systems and Technology

Administrative Information

When proposing additions or changes to the information below please add the following information to the justification:

- Proposed Effective Date
- Whether there will an impact to Employee/Tree Changes in PeopleSoft

The Organization Code will be added by the Registrar.

Department Name

Information Systems **and Technology**

Sign-offs from other departments affected by this proposal

None

Rationale

The degrees and certificates offered by the Information Systems Department are classified as STEM (CIP 52.1301) due to the technological nature of courses in areas such as cybersecurity, business intelligence, and enterprise systems. The addition of the word "Technology" in the names of the department and its degrees will reflect this STEM focus and will facilitate the department's application for STEM-designated public and private grants for student scholarships, laboratory equipment, and faculty development.
