ASTROBIOLOGY
and Life Beyond Earth

April 8th and 9th, 2016
J.C. Penney Conference Center, UMSL

We bring together world-class researchers in the field of Astrobiology to discuss issues related to the search for life in our Galaxy, as investigated in diverse environments ranging from planets and comets in our own solar system to planets around other stars and the disks of gas and dust from which they formed.

Our new planetarium will be open for conference participants

Dr. Peter Plavchan
Assistant Professor, Department of Physics, Astronomy and Materials Science
Missouri State University

Dr. Boncho Bonev
Research Associate
NASA Goddard Space Flight Center
Catholic University of America

Dr. Avi Mandel
Research Scientist
NASA Goddard Space Flight Center

Dr. David Horne
Assistant Teaching Professor
Department of Physics & Astronomy
University of Missouri–St. Louis

Dr. Erika Gibb
Professor and Chair
Department of Physics & Astronomy
University of Missouri–St. Louis

Dr. Ray Arvidson
James S. McDonnell Distinguished University Professor, Department of Earth and Planetary Science
Washington University

Dr. William McKinnon
Professor
Department of Earth & Planetary Science
Washington University

Dr. Rachel Whitaker
Associate Professor, Microbiology and Institute for Genomic Biology
University of Illinois
