25Live PRO (by CollegeNet)
Classroom Reservation Request for Special Events
*New features in 25Live Pro

25Live is our official room reservation system for course breakout sessions and ad hoc event requests.

UMSL Faculty and Staff can submit reservation requests for centrally scheduled classrooms (those that are not department owned) using 25Live. All faculty and staff have access to submit reservation requests in 25Live.

Students will not be able to submit requests for classrooms, including student employees that are categorized in HR as type “student” (i.e. TA’s, lab assistants, student clerical). Faculty or staff sponsors will be required to make reservation requests on behalf of students who would like to schedule an event in a classroom. In doing so, those faculty or staff sponsors assume responsibilities for the event.

The Registrar’s Office will review and approve all room reservation requests and will contact you if there are any issues or concerns. Please note, that classes are given precedence over ad hoc requests.

Instructional Computing Support Services (ic@umsl.edu) provides support for any of the classroom technology available and for the locking/unlocking of rooms.

As has always been the case, classroom reservation requests during a semester cannot be made until the course schedule for that semester is complete and all courses are assigned to rooms. Once that is finalized, individual room requests can be submitted. For example, the spring schedule must be finalized before you can make a reservation request for any date within that term.

Please note that reservations happening within two days of the request cannot be submitted in 25Live. Please contact 25Live@umsl.edu to submit your request.

Prepare Your Information
You will need the following information to request and create an event.

- Event Name (i.e. New Student Orientation)
- Event Type (i.e. Orientation)
- Expected Head Count or unknown
- Event Description (i.e. Orientation for new students)
- Dates, Times, and Occurrences (June 17, 19, 21 MWF, 3-5PM)
- Location(s) Preferred Building/Room (i.e. Benton 101)

Access 25Live PRO

1. Access 25Live at https://25live.collegenet.com/pro/umsl#!/home/dash. Firefox and Chrome are the recommended browsers. You may need to clear your browser’s history and temporary files (cache) for best results.
2. Sign in (link at top right) using your SSO username and password.
3. You will see the main dashboard.
4. For tips on setting options on your Home tab, see Home Tab Tips.
Request an Event

1. To create an event, either click on the Create an Event button in the middle of the screen or select the Event Form button in the top bar. Both buttons are circled in red below.
2. Creating your event should be very easy. Start by inputting in the event information in the following fields as you scroll down this single page.

a. **Event Name** - Enter the name of your event (40 characters max). Naming your event with a unique and easily recognizable name is recommended. This will allow you to easily search for your event in the Event Search. Including the class or event name, or the last name of the requestor/instructor is suggested.

b. **Event Type** - Select an event type from the drop down menu. You can select your Event Type by typing or selecting the options thru the scroll bar.

c. **Expected Head Count** - You can enter the expected head count number if you know how many people plan on attending the event, however, this field can also be left blank. Entering a headcount can be helpful if you would like to search rooms by enforcing the headcount, which is a feature you can select when searching for available locations.

d. **Event Description** - Type a description of your event. Information entered here will appear in the 25Live Event Detail view. While this field is optional, we highly recommend entering information that is critical to the booking. If the requestor differs from the point of contact, please list the point of contact's name in this box. This will allow our office to find someone to contact in case of an emergency. If you are booking a learning studio and need access to the laptop cart, please indicate that in this box as well.

e. **Event Date and Time** - Select the dates and times of first occurrence of the actual event. This field is required.
f. The “This event begins and ends on the same day” box is checked by default and should remain checked, even if your event occurs on multiple dates. You will select those additional dates in the following steps. If your event spans 24 hours, please contact our office for assistance with scheduling this event.

g. Additional time – refers to set up and tear down time. Do you need additional pre- or post-time for your event? You can indicate that using these fields or you can build that time into the start and end time of your event.

h. To enter additional dates to your reservation you now have two options:

a. Repeating Pattern button (IE: daily, weekly, monthly or Ad Hoc) - This brings up the pattern picker screen where you can select the patterns in a variety of ways. You can select the pattern, then the day of the week and the end date, or you can pick the day of the week and then just select ends after # iterations, and it will auto-fill the calendar.
2h.a

b. You can also just use the calendar and simply click the dates you want to meet.

Then click *View All Occurrences* to see a list of all of the dates that are selected.
If all of the occurrences are needed, then hit close. If you need to remove one of your occurrences, you will do so on the above screen by selecting the remove button next to the occurrence you do not wish to book.

i. **EVENT LOCATIONS** - There are several different options to search for rooms (see these listed below). If the default is *your starred locations*, you can cancel by hitting the X, and a general search option will replace it.
Type in the location choice using the building name or abbreviation only. If you are unsure of the room but do know the specific building, type the building only for a choice of available rooms as shown below.

- Under the **Availability Column** it shows if a room is available for all dates or only some dates. A 0/1 indicates that the room is not available for any of the 1 dates.
  a. Select the room using the Request button.

**NOTE** If you need to change your time frame before you save the event, you can scroll up to item e. to change your times, and get a new set of available spaces.

Below is the list of additional ways to search for rooms within the time frames you have indicated in the Event Form.

- You can choose more than one room at a time (multiple rooms for the same day/same time). To do this, just click the request button on all of the rooms you are wanting to reserve and each room will be listed out below.
- You can select “Hide Locations with Conflicts” in the Location Search box. You may want to check this box if you are searching a building with a lot of classrooms. This will hide any locations that have at least one conflict for a date or time that you have selected.
- You can select Enforce Headcount, if you have entered that in the Expected Head Count field. This allows you to only see the locations that have enough space for your expected amount of attendees.
❖ **Starred Searches** - These are searches you have had in the past and marked them as starred or commonly used.

❖ **Search by Location Name** - Will allow you to type a building name. You will have options under this feature to enforce the head count. This will use the number of expected persons to determine if there is a space available. Unchecking enforce head count will allow you to see that building’s availability and all capacities.

❖ **Saved Searches** - Are any of your searches that you have created and saved, similar to Starred Locations. This will include any locations that you have created a saved search for.

❖ **More options** – This can be very helpful in finding a room that meets your specific needs. You can select a room by searching a Feature, Category or Capacity. Click on any of those fields from a drop down menu of those options. Below is a snapshot of the list of Features to choose from. Popular ones include Student Stations and Student Stations with Laptops if you are wanting a room that has laptops or computers for each student/attendee.
The room(s) selected will populate below the list of choices, as shown below.

Clicking the View Occurrences box, reveals the screen below. This screen allows you to uncheck a room for a specific date if it is not needed.
j. Please read the terms and then click in the I Agree check box under the Terms and Conditions. If you do not select the “I agree” option, you will not have the option to save.

k. You can now click SAVE. This will officially request your event and send it the Registrar’s Office for approval. Please make note of the Event Reference number listed in the Event Status box on the top left of the page. This is the reference number you will need if you need to edit or cancel your event. You will receive an email confirming that your request was successfully submitted. Please print that email confirmation and take it with you on the day of your event. In the event of a conflict, this will serve as proof that you have the room booked.

3. The Registrar’s Office will review and approve room reservation requests, and will contact you if there are any issues with the date or room you have requested. Please allow 24-48 hours to process your requests.

25 Live Tips
You can start an event creation and bring in a location by clicking on the pencil icon wherever you see it. If you are on the Locations tab and are viewing a location’s availability, you can hover over any available day/time and the pencil icon will appear. Or you can click on the More Actions menu and select the “Create an Event in this Location” option. You can also use the More Actions menu to Star this location. Starred locations appear on your Home tab in the “Your Starred Locations” sections. When you star an item you need to click the refresh button to see it listed in the appropriate section on your Home tab. At any time when you’re logged in you can click the pencil icon for a starred location to start creating an event for that location. You can also now utilize the Back button to back and forth between screens.
Copy an Event

You can add a similar event with different start and end times by copying an existing event. You can also relate events which will allow you to see all events in order of date ranges and all spaces assigned with various time frames (i.e. for a conference with various break-out sessions).

You can **copy** an event from the summary page that is displayed when you save your event, or when you are viewing the event after a search you can select the More Actions menu and then select Copy this Event option.

Home Tab Tips

When you star an event, location, or search, it is added to the appropriate section on your Dashboard (Home tab). You can then click on the link for that starred item as a shortcut for creating an event, or finding the availability of a location or to perform a specific search. **When you add or remove a starred item, you need to click the refresh button to update the displayed information.**

The dashboard below shows two starred locations. Having these locations starred allows for the ability to click the link for one of the locations and check its availability, or to click the pencil icon and start creating an event in that location.
