

## University-Wide Service Indicators

Final

March 29, 2016

**Overview:** In some situations, it is important that records or holds preventing certain actions be maintained in student records across the four campuses in the University of Missouri System. For instance, if a student is sanctioned with University Dismissal, University Suspension, University Expulsion or other sanctions / agreements that extend beyond a given campus, a mechanism to enforce such agreements or sanctions is needed.

**Mechanism:** A university/system –wide service indicator or hold may be placed within the student information system (e.g. PeopleSoft) that will enforce the policy. These are placed and removed by authorized individuals on each campus and will automatically be added or removed from impacting students on all campuses.
