Award Criteria and Form

Two awards will be given in the following categories:

- Traditional – These are classes that meet face to face. They may contain blended or flipped components, but they have established meeting times that occur in a physical classroom.
- Online – These are classes that take place online. They don't have established meeting times, nor do they meet in a physical classroom.

The two awards will be given to the recipients who best demonstrate pedagogically sound and innovative uses for educational technology in their teaching.

Eligibility Requirements

The nominee must be a higher education instructor and a registered attendee of the conference.

Nomination Criteria

Nominations can be made online using the link below. Each nominee must provide examples of how s/he:

1. Creates and implements useful and creative ways to incorporate technology into course design and instruction.
2. Demonstrates an 'innovative' approach to teaching within their discipline through the use of technology.
3. Provides and maintains an engaging student learning experience through active learning and technology integration.

As you write the nomination, gather evidence that addresses these guiding questions:

- How does the nominee engage with students?
- How does the nominee integrate technology into student learning?
- How has the nominee shared what s/he has created/learned?

Scope of Award

For the purpose of the award, the term "innovation" will be loosely defined by the nominees. "Technology" can be anything from computer-based learning devices, software, course design, application of technology in the learning environment. "Instruction / Teaching" is defined as teaching an undergraduate or graduate course in higher education.

Deadline

Deadline for nominations is October 1, 2016 by end of business day. Award selection will be made by FTTC Teaching Award Committee members. Awards will be presented before Friday's keynote address at 12:30.
