Where's the SCENE? by Bruce Sommer

Robert Hellrung, St. Louis' 54th District. This action by SCENE has been welcomed by Hellrung and has proven to be highly successful.

These students are performing important organizational and effective grass-roots functions which have given them a feeling of real contribution and accomplishment. There is much work to be done and many more concerned individuals are needed on the SCENE, but the dilemma has been offered an effective solution.

Anyone who also feels the desire to be "effective now," is encouraged to contact UMSL student Bruce Sommer at YO 3-2639, or John Allhoff at ST 1-8423.

Committee Selects Campus Leaders

Thirteen UMSL students were selected as outstanding campus leaders of 1967-68 by a student-faculty-administration committee which was composed of:

Those chosen are: Sue Eates, John Gragnani, Dennis McCarthy, Mary Killenberg, Randy Kote, Rick Gallo, Pat Soltys, Sharon Della, Jan Moore, Beverly Kerr, Tony Bagan, Mary Burton and Allen Shearin. Those awarded honorable mention in the campus-wide contest are: Ed Bellamy, Linda Kahler, Fran LaGree, Phyllis Brandt, Mike Genovese and Beverly Bricker.

The student-faculty-administration committee that made the selections considered only those students nominated in writing by any student, faculty member or administrator.

Eligibility of nominees was based on: 1) scholastic accomplishment - a minimum 2.5 cumulative grade point average for at least 30 hours of credited work at UMSL; 2) participation and leadership in academic and extracurricular activities; 3) service to the institution or the achievement of a distinction which has brought recognition to the University.

Tom Eagleton Talks on War

1A. Governor Thomas F. Eagleton, in speaking to a student gathering on May 17, stated that the war negotiations in Paris would not be quick. 

Eagleton said: "The road ahead will be less painful if we reaffirm our foreign policy that each nation can determine how it wants to live. We have to reaffirm the right of self-determination."

In addressing an overflow crowd in room 114, Eagleton also turned his attention to the question of civil disorders. The lieutenant governor feels that law and order must be maintained, "we have to try to understand the root of the disorder. You don't even have to live there, to perceive the frustration of ghetto life. Their education is inferior, their housing is inferior, their job opportunities are inferior, and they live with these things day in and day out."

Bader Heads Arts and Sciences

Dr. Robert B. Bader will become dean of the College of Arts and Sciences at UMSL, beginning September 1, 1968. The new dean was approved May 10 by the Board of Curators.

Dr. Bader, who is currently professor of zoology at the University of Illinois, has more than 16 years of teaching, research and administrative experience. His teaching experience ranges from courses in introductory biology to evolutionary theory courses on the graduate level. He has served on numerous departmental, college and university committees and has been associate head and acting head of the Zoology Department at the University of Illinois. Dr. Bader has also served as a consultant evaluating many accrediting teams for the North Central Association, evaluating colleges, universities and academic programs in the North Central region of the United States.

He has been the recipient of two grants from the National Science Foundation, three grants from the University of Illinois Research Board and has authored more than 17 articles for scholarly publications.

He has participated in a workshop on pre-medical education for Negroes at Fisk University, the president of the University of Illinois' Albion conference on undergraduate education and a conference of the Commission for Undergraduate Education in Biological Sciences, sponsored by the National Science Foundation. He was nominated in 1966 for the Cleveland Newcomb Prize, awarded by the American Association for the Advancement of Science. The annual award is based on scholarly papers presented every year at the meeting of A.A.A.S.

Dr. Bader will succeed Dr. Glen R. Driscoll as dean of the College of Arts and Sciences. Dr. Driscoll, who has been dean of the college since his formation in 1965, will become dean of faculties at UMSL, effective July 1, 1968.

Dr. Bader's primary research interest is in the genetic variation of the development and character of teeth in rodents, with particular reference to evolutionary theory. His work combines the techniques and theory of evolution, genetics, anatomy and statistics. He is currently supervising the work of four graduate students in this area of research.

Dr. Bader received his B. et degree from Kansas State University in 1949 and his Ph.D. from the University of Chicago in 1954. He has been at the University of Illinois since 1955. As new dean, he will be responsible for the supervision of the 11 departments of the college.

The Wall Street Journal and other major papers in our country have recently published many articles concerning the inability of the business community to attract college graduates. Usually the main theme is that more and more students want to find means to work on many of our great social problems, rather than participate in an enterprise which merely has a profit motive. A student group at UMSL feels it has found a realistic answer to this dilemma.

In one of Dr. Kramer's latest urban sociology classes at UMSL, an article written by Robert J. Hellrung, a young attorney who is actively seeking solutions to our inner city problems, was read and led to a vigorous discussion. In his article, Hellrung stated as a central theme, "Individual initi­ative and that of the Community must be rekindled to meet the ur­ban challenge. Creative solutions should be explored privately as a time-saving lead to governmental implementations, and also as a possible alternative to government­al involvement."

The Biology Department has for­mulated a plan to beautify the pond near Benton Hall.

A very small capital outlay, student labor and plants supplied by the Missouri Conservation Commission will be enough to transform the pond into a multi-use recreation and education facility, according to Dr. James Helsinger, who calls for re-inforcing and enlarging the dam at the west end of the pond. Some minor land­scaping and planting will complete the perimeter. It is hoped that small mammals will frequent the area.

The pond will be an outdoor classroom for biology students, who are unable to go on field trips in the urban environment of the university. It will also provide an example of the proper management of natural resources. Possibly there will also be fishing, as simulated a plan to beautify the pond end of the pond. Some minor land­scaping and planting will complete the perimeter. It is hoped that small mammals will frequent the area.

Dr. Robert S. Bader will become dean of the College of Arts and Sciences at UMSL, beginning September 1, 1968. The new dean was approved May 10 by the Board of Curators.

Dr. Bader, who is currently professor of zoology at the University of Illinois, has more than 16 years of teaching, research and administrative experience. The Role of a Student Newspaper

The Current has finally completed its first full year of weekly publication. However, we feel there is still some ambiguity and disagreement in the minds of many as to the role that a student newspaper should play.

We admit we have not always fulfilled the function of a college paper even as we see it, but we feel that it is important nevertheless to have a clear idea of how and why we are in existence.

As we see it, there are choices available to the editorial staff of a paper like the Current. First, and perhaps easiest for all concerned, is to serve as a mouthpiece for the Administration. This would mean parroting everything under the sun. We are aware that many people feel this accurately describes the Current we have had ourselves in contention with the Administration.

And we feel this is good, because we feel that it is the purpose of a student newspaper to let students know what is happening on campus beyond this or that lecture in room 103. We feel that a student newspaper should be the mirror of the academic atmosphere of the University. We feel it should reflect the changes seen to be happening on campus.

We feel students should be aware of the facts, ideas, and proposals which are being developed to shape the future of their University. Too often students here don't even know what is going on until it's over, or, like in the situation with student government, until it explodes dramatically in their faces. Student unawareness is the cause of much of the dissatisfaction and plagiarism in our school today.

There is the great possibility that students will not be given the responsibility for their own government and funds. If negotiations of responsible students and faculty members fail, there is the unfortunate alternative of demanding such governmental independence. Yes, “this smacks of student power,” but it can be avoided by civility on the part of the University community.

For the present, the surface of student opinion seems apathetic and disinterested. It would be well to look beneath the surface where growing student activism can be found. If editors are not made increasingly active, increasing enrollment of student activists and the present conditions will lead to a Columbia University type student-administrative confrontation within a few years, “Rock it to ‘em.”

Curators May Open Meetings

The Globe-Democrat recently reported with some astonishment that the Board of Curators of the Missouri University system is perhaps the only state university governing body that meets behind closed doors. This was no surprise to us.

We feel that while the Board of Curators now has control over a four campus system with over 35,000 students and a budget of over $123,000,000, that their decision making meetings should be open to the general press. The former system of gradual diffusion of facts through the press and free "discussion of this disagreement stimulates intellectual growth and thus contributes to the process of higher education. We see no purpose in stifling controversy when it exists. We see no harm in a student newspaper freely discussing and analyzing even touchy situations as long as the reporting is accurate and the sources reliable. We do not see a system by which certain subjects are released first to retard the progression and development of the academic atmosphere of the University.

We understand that the president, Oliver Ferguson, has initiated a move to open the meetings. Perhaps the people of Missouri would pay more attention to the curriculum if they were made more aware of it and its problems through the frequent coverage of Curator's board meetings.

We certainly wish we had been present at that historic meeting when the "att" was officially dropped from the University of Missouri at St. Louis. C.W.

UMSL Current is the official student publication of the University of Missouri at St. Louis. It is a periodical published under the auspices of the Entertainment Activities Fee. The Current office is located in the University Administration Building, Room 207, 801 North Grand. Advertising and subscription rates are on request.

Afterthought: 1967-1968

by Michael Hughes

If any of the 1968 graduates have not received a questionnaire from the University Placement Office (UPO), please stop by Room 117, Administration Bldg., and pick one up. We would be most appreciative of your cooperation with this request.

Attention '68-'69 Graduates

We again urge the 1969 graduates to pick up forms for their Placement File. Remember, recruiters will be on campus in October 1968 and you may not interview with them until your file is complete.

Student government should be an independent organization within the University structure. To encourage independent thought, student activity must also be independent and run by student government. The use of such funds should be directed by a freely elected student government and based upon the philosophy of providing activities for the total spectrum of student interest.

There is the great possibility that students will not be given the responsibility for their own government and funds. If negotiations of responsible students and faculty members fail, there is the unfortunate alternative of demanding such governmental independence. Yes, “this smacks of student power," but it can be avoided by civility on the part of the University community.

For the present, the surface of student opinion seems apathetic and disinterested. It would be well to look beneath the surface where growing student activism can be found. If editors are not made increasingly active, increasing enrollment of student activists and the present conditions will lead to a Columbia University type student-administrative confrontation within a few years, “Rock it to ‘em.”
Mowrer Dean of Education

Dr. George E. Mowrer became dean of the School of Education on May 23, 1968. He first joined UMSL's faculty as a professor in September of 1966.

Prior to joining the faculty, Mowrer has been Director of Guidance, Education Services for the Board of Education, St. Louis Public School System. He has also been a member of the faculties of Western Michigan University and the University of Missouri-Columbia.

Editorial, Photo Win at MCNA

Rich Daggar and Rich Watts got awards for outstanding entries in the Missouri College Newspaper Association spring competition. Daggar, editor-in-chief of the Current, wrote the best editorial on 10,000 dollars in the field of photography. Watts expressed photo of a peacock, which appeared in the Green Insert, was the outstanding entry in the field of photography.

Candidate Backs Professional Army

Hugh Scott, candidate in the Republican primary for Congressman of the Second District, suggested a professional army as a possible alternative to the present draft and the proposed lottery system at a lecture here on Thursday afternoon, May 16.

"We must question the hit-or-miss system where some serve and some do not," the chairman of the St. Louis County Council said. "The issue should be brought now to the halls of Congress." Scott said that the present draft system is "somewhat archaic." He noted that dependence on local draft boards has led to inequities in selecting draftees.

He recalled that the proposed lottery system had failed in a limited effort in the 1940's, but although conceding the possibility of acceptance of this plan, he indicated that he favored student deferments.

"The country can change its thinking and demand a professional army," he said, "He suggested wages comparable to salaries in private firms for the professional soldier. The wage increase for this program would be less than the cost now for training new inductees, he said.

During a discussion period following the lecture, Scott charged that the military has opposed the professional army and insisted on the draft.

In answer to a question, Scott also said that "past commitments to foreign policy are absolute." He cited BEAUC as an organization dominated by Western nations, but intended to aid Asian countries.

"We refuse to get our feet out of the clay and move around," he said.

In 1941, Scott enlisted in the American Field Service, where he aided the British Ambulance Corps in the Middle East. Later he returned to the United States and enlisted in the Marines, serving on the Pacific front. He also served in Korea.

The lecture was sponsored by the Young Republicans.

Fire Destroys Cooling Unit

A fire which broke out May 7 in the new cooling unit building on the west central portion of the campus destroyed the availability of air conditioning for both the new library and mathematics-language buildings. The cooling unit was in the final stages of construction.

The building was almost totally destroyed, and damage was assessed by the contractor at $50,000. Since the structure was still under construction at the time of the fire, it had not formally become the property of the University.

Youth Forum Needs Leaders

UMSL and the University Extension Office is sponsoring Metropolitan Youth Forum, a leadership training program for 250 high school sophomores of diverse economic, ethnic and racial groups August 20, 21 and 22.

The program, for St. Louis and Kansas City youths, will be presented at Trout Lodge in Potot, Missouri, and will consist chiefly of discussions and experiences with outstanding personalities from the entertainment, sports and business worlds.

A significant part of this program will be reserved for group discussions in which the youth delegates will examine and assess their experiences. For this purpose, the Forum needs 17 able, mature, college students to serve as aid or dormitory leaders.

The project does not have funds to pay for these services. However, its sponsors suggest that a very educational experience will provide rich rewards for all who participate, and all costs are provided by the Forum's funds.

Those interested and available should contact Mr. Norstrom, School of Education, Casey House, EV 9 2070, Extension 54, either by phone or in person, Monday through Wednesday, between 8:30 a.m. and 4:00 p.m.
Athletics Advanced Despite Lack of Facilities on Campus

Despite very limited facilities, the intercollegiate program has taken great strides forward during the 1967-68 school year. This success can be attributed to the fine young men who make up the athletic teams. Following is a detailed account of the teams.

Cross-Country Coach Larry Berres - Won 3, lost 15 squad members - 6 lettermen.

Junior Varsity Basketball - Coach Carl Brummett - Won 2, lost 12 squad men - 6 lettermen.

Varsity Basketball - Coach Chuck Smith - Won 12, lost 1 squad men - 6 lettermen.

Tennis - Coach Carl Brummett - Won 5, lost 10 squad men - 7 lettermen.

by Chuck Smith, Athletic Director

lost record total , won 8, lost 1 overall varsity and junior varsity won-lost total . . . . won 32, lost 29

INTRAMURAL ATHLETICS

Intramural activities provide one of the major outlets of physical activity on any university campus, and UMSL has no exception. With the absence of a mandatory physical education program on our campus, the intramural program takes on an even more significant role in providing the student with the opportunity for physical activity.

An intramural program, however, is no better than the students make it, and its success is most accurately measured through the amount of participation. During the past school year we accommodated nearly 800 students in our program of organized activity including such activities as flag football, basketball, women's volleyball, tennis, cross country, softball, co-ed volleyball and men's volleyball. Even with the extremely limited facilities we have at present on our campus, this number indicates a level of participation in the area of 20%, which is significantly higher than the average of other commuter campuses.

With the construction of the new multipurpose building taking up some of our intramural activities on the back of the campus, we will be under some additional handicaps for the next few years, but in spite of this fact we hope to not only continue the programs we already have, but also to institute new activities to meet the needs of our increasing student body and their widening variety of interests.

Shown below are the organized intramural activities conducted at UMSL during the past school year and the approximate number of students enrolled in these activities:

<table>

Members of UMSL's first golf team are left-to-right: first row, Bob Griffin, Steve Loughner, Ron Brewer, Dennis Chester, and Coach Larry Berres; second row, Steve Chamberlin, Bill Bridgeforth, Tom Cladick, and Kent Auf Der Heide.

SPEED READING

College students should have a reading rate of 400 words per minute with 75% cent comprehension on standard college material or they will experience academic difficulty. The average college student, however, reads only 250 words per minute.

If you are an average, or above average, reader, you can improve your grades by increasing your rate of reading and comprehension this summer at the:

DeCoursey Reading Improvement Laboratory
TWO SUMMER SESSIONS
First Session: June 10 through July 15. Second Session: July 22 through August 26.
These sessions meet twice per week for 2 hours, 15 minutes:
Mon. and Wed. or Tues. and Thurs.

Choice of Three Times
9:15-11:30 A.M. - 1:30-3:45 P.M. - 7:15-9:30 P.M.

REGISTRATION MAY 20 THROUGH JUNE 6
PHONE OR COME IN TO INSURE A TIME OF YOUR CHOICE

Golf Ends First Season Tuesday
by Jim Mantia

The UMSL golf team has just closed out its first season. The final match on Tuesday against St. Louis University was played too late for the results to be published; however, the Rivermen went into that game with a 5-6 regular season record and a 0-1 record in tournament play.

Although the record is not spectacular, Coach Larry Berres feels that the team did well and he was much impressed by the progress they made during the season. For example, they won 4 of their last 7 regular season matches, all against good competition, after a slow 1-4 start.

Player's Scores

Ron Brewer, who led the team all year, was the top scorer with 23 points, Steve Loughner was second with 15 1/2 points. A complete list of individual scoring is as follows:

<table>
<thead>
<tr>
<th>Player</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kent Auf Der Heide</td>
<td>14 1/2</td>
</tr>
<tr>
<td>Ron Brewer</td>
<td>12</td>
</tr>
<tr>
<td>Steve Loughner</td>
<td>11 1/2</td>
</tr>
<tr>
<td>Bob Christ</td>
<td>11</td>
</tr>
<tr>
<td>Denny Chester</td>
<td>10 1/2</td>
</tr>
<tr>
<td>Bill Bridgeforth</td>
<td>8</td>
</tr>
<tr>
<td>Tom Crandix</td>
<td>8 1/2</td>
</tr>
<tr>
<td>Steve Chamberlin</td>
<td>4</td>
</tr>
<tr>
<td>Joe Mathias</td>
<td>1 1/2</td>
</tr>
</tbody>
</table>

The netmen started the season without two victories but then lost their next seven matches in a row. The team scored six points in the entire season and only five in their seven losses, while their opponents scored 58 points during the season. In their two year history the tennis team has a combined record of 4-15.

Dr. Brummett felt that the Rivermen were "ever so close" for their inexperienced team which included the freshmen and two sophomores. The coach did not name an outstanding player for the post season award program because he did not feel that there was a most valuable player on the team. Brummett named Washington University and McKendree as UMSL's toughest and easiest opponents respectively. He felt that the team should have performed better against Millikin and Concordia. Dr. Brummett has told each player what to work on for next year. He expects the players to keep in shape over the summer by playing in tournaments.

Caldwell Picked by San Diego Rockets

Chuck Caldwell, a 6'4" guard on the UMSL basketball team, received word May 16 that he had been drafted by the San Diego Rockets of the National Basketball Association. Caldwell was not notified of his selection by Jack McMahon, head coach and general manager of the Rockets, before his services were lost to the Rivermen due to scholastic difficulties shortly before the end of the 1967-68 season. Caldwell was the squad's second leading scorer with an 18.4 p.p.g. average. He was also regarded by Coach McMahan, head coach and general manager of the Rockets, as the team's best defensive player. Caldwell is the first UMSL basketball player to be drafted by a professional team. Not a regular "round" draft pick, Caldwell will go to the Rockets' pre-season training camp this summer on the club's "supplementary" draft list, and no other professional basketball team will be able to review his talents unless he is released by the San Diego franchise.

STUDENT FAPES WITHOUT STUDENT STAND-BY.

Braniff International's new Youth Fare lets anyone under 22 fly for 1/3 off. At any time of the day, night, or year.

But instead of having to hang around the airport hoping there'll be a seat, you'll have a confirmed reservation.

Providing you have a Youth Card.
Which is easy enough.

Present any proof of age, $3.00, and yourself at the Braniff Ticket Counter before you board the plane.

Then, fly.

Braniff International

*No departures on Fridays between 12:00 PM and 9:00 PM.
Me attend a Reading Dynamics demonstration?

I don't have time!

Are you up to your ears in fallout from the information explosion? How much of what you want to read do you read? Today's businessman or student is expected to read about 20 times as much material as he did only 10 years ago. And he reads only about 250 to 400 words a minute, on an average. This means that he needs a 400-hour day, just to keep up! If you're in this predicament . . . struggling to keep up with your work, with no time for your family, no time for pleasure . . . it's no wonder you think you don't have time to find out about Reading Dynamics.

The fact is, you can't afford not to take time!

Learn to Read 3 to 10 Times Faster
You can't add hours to your day, but you can multiply your reading speed . . . 3 to 10 times, in eight short weeks . . . by learning to read Dynamically. Think of it! Read the average novel in less than two hours. A newspaper, cover to cover, in 20 minutes. A magazine in 10 minutes or less. This is in 10 seconds!

Without skipping, skimming, machines or tricks. And you'll understand and recall more of what you read than before.

Incredible?
True! If you don't at least triple your reading speed, with good comprehension, the course won't cost you a cent!

Dynamic Reading Will Change Your Life
It isn't easy. Nothing worthwhile ever is. Learning to read Dynamically means work. Once a week in class, plus practice every day. But at the end of eight weeks, you will have changed your life!

You'll read more, understand more, enjoy more, be enjoyed more, cross undreamed-of horizons to a happier, more fruitful life!

Come to a Reading Dynamics demonstration. See someone just like you read two, three, four thousand words a minute, with excellent comprehension and recall . . . someone who did well eight weeks ago to read much faster than a fourth-grader.

Ask any questions which occur to you. We'll answer them all with facts. And we won't sell you. You'll sell yourself, as you imagine what Dynamic Reading can mean for you.

Plan now to attend a Reading Dynamics demonstration near you. There's no obligation at all . . . except the obligation to yourself.

COMING TO A FREE DEMONSTRATION, THERE'S ONE NEAR YOU. YOU COULD WIN A SCHOLARSHIP

Special Student Demonstrations
