**Controversy Ends Student Survey**

By Doug Sutton, Managing Editor

A cloud of controversy has surrounded the move by Chancellor James L. Bugg, Jr., last month to cancel the student surveys. The cancellation means that the entire $11,000 of student funds allotted for the survey has been wasted because only the students who pre-registered have been polled. The survey was cancelled before the late registrants and James L. Bugg, Jr., last month to be questioned. Dr. Richard polled. The survey was cancelled $11,000 entirely.

The petition contained 21 signatures, opportunity to respond to the surveys during pre-registration-faculty Senate to discuss both the survey-in the form of questionnaire could make." Dr. Richardson said that most of the complaints concerned the "loss of anonymity" of the in

**Bommarito Promises Campaign To Improve Cafeteria Facilities**

by Ron Brown, News Editor

Students still lunch almost anywhere on campus: the stairways of Benton Hall, the lobby next to the cashier's office, the Noon Day Forum and the library. Some leave campus for hamburgers at McDonald's or White Castle.

San Bommarito, chairman of the Central Council, said he plans a campaign to improve present cafeteria facilities in the basement of the Administration Building and in the blue building.

In the next two years the university plans an increase in enrollment of 1600," Bommarito said, "but this increase in students will be made without an increase in facilities." Renoted that the multi-purpose building and the student center, for which funds have been approved, have not been constructed.

In a letter to Bommarito, Richard E. Dunlap, Assistant to the Chancellor, said candy and coffee machines will be installed in Room 201, Benton Hall, for a 60-day trial period.

"If students will cooperate in keeping the area clean, the arrangement will be made permanent," the letter said, "but if the room becomes messy and coffee cups begin to appear in classes, the machines will be removed at the end of the 60-day trial period."

The letter, although not setting a date for installation, said similar facilities will be available in the Math-Language Building.

Bommarito said the basic requirement in "most" cafeteria facilities is to allow 15-square feet per person, but that the existing facilities "come nowhere near this." An Angel Flight survey estimated that 2300 students use the Administration Building facilities.

"No fire lanes have been set aside for lunch hour traffic, although in some places a fire lane is required," Bommarito said. "We've already had one fire in the Administration Building.

Bommarito was referring to an early morning fire in the Business Department last semester that was caused by a short circuit from a coffee percolator.

"My main concern is not so much the fear of fires," the Council chairman said, "but the fear of any panic that might cause serious injuries."

Bommarito asserted that he will ask the Board of Curators to investigate and take action and that he will "not let up until something definite is done."

**Organizations Active at Homecoming**

by Adrienne Beaudoin

Loops of sleep and hard work paid off as members of the Steamer's Club, Pi Kappa Alpha, Sigma Tau Gamma, Sigma Pi, Angel Flight, and Newman House staged an active homecoming for the 1968-69 Rivermen. The Rivermen responded to the efforts on their behalf by defeating the Pershing Guards 92-45.

Eight organizations competed in the "create your own cheer" contest at the Noonday Forum pep rally. Sigma Tau Gamma and Newman were to go to the tied and both did their cheers at the game.

Thirty-eight decorated cars and one truck which had driven by Adrienne Beaudoin's Valley Community College prior to the games.

Newman house won first prize in the car decorations contest. The American Chemical Society and Sigma Pi were second and third, respectively.

For the second year in a row, Alpha Phi Omega won first prize in the lawn decorations contest. Sigma Tau Gamma's "General Disaster" was second and the Newman House road-rash was third.

For the second year in a row, Alpha Phi Omega won first prize in the lawn displays, Sigma Tau Gamma's "General Disaster" was second and the Newman House railroad was third.

Ten non-paying high school students from low income families will be accompanied by an equal number of UMSL students, each paying $279 for room, board, and studies. A main objective of the program is to encourage these students to continue their studies.

The group will conduct an informal seminar to discuss philosophy, anthropology, and literature. Students will receive Spanish lessons and be free to do what they want. The berries of the court were Nancy Ross, Mary Barton, Evelyn Washington, and Tammi Cannon.

**Anthropology Trip**

Mickey Gibson, instructor in sociology and anthropology, is planning a one-month visit in August to Guadalajara, Mexico, for a group of 20 university and high school students.

Academic Elevation

On January 24, 1969, the Board of Chairs of the University of Missouri awarded contracts for the construction of a Social Sciences-Business-Edueation Complex at the University of Missouri-St. Louis. When it has taken its place alongside the other architectural curiosities, this complex will boast not only a four-story classroom structure, but also a 13-story office tower for faculty, students, and staff. When it is pace it begins construction, for it apparently will become a great symbol for UMSL, a veritable monument to academic elevation. First, the clean, trash-free, skyward of the tower will have an impact on the student population. Second, the tower will optimize the importance of an important core of learning. Third, the Great Tower of UMSL will become famous as the tallest building in all of Bel-Nor! Neo-Freudians and Melville's can't possibly work on new symbols.

But, as anyone academically acquainted with Dr. William Hamlin, knows, a symbol must function first on the level. There is a reason for this in order to be effective symbolically, the symbol must be believable; it must be an integral part of the situation involved. With this in mind, we may ask how our symbolic tower will function on the level below. The next we'll find himself first in the nebulous concept of the assistant professor, as the tallest building in all of Bel-Nor! Neo-Freudians and Melville's can't possibly work on new symbols.

What concerns us most, however, is the means of elevation available to the student, both symbolically and literally. Academic elevation, it seems, is enhanced by the maintenance of the symbols, both large and small, maintained by the faculty and teacher. Therefore, symbolic elevation will require literal elevation, namely to faculty offices in the Great Tower of UMSL. This will be an arduous journey for the neophyte scholar in quest of the fount of wisdom and the answer to the questions his own insignificance. It is only now that the symbol is available to anyone, even to students. But observation of the UMSL variety of architecture confirms the notion that there is a discrepancy between what is and what may not be. My guess, then, is that make a normative pile at this early preconstruction date for open elevators? It is the best interests of academic elevation.

Bulletin Board

Ever since Benton Hall was constructed and the University of Missouri-St. Louis began to grow, there has been a problem of communication on the campus. The administration had trouble finding out student opinions and the organizations had trouble announcing meetings and events. Every student government at the University has worked to solve the problem of communication on the campus, petitions.

One of the most controversial problems has always been a bulletin board placed at a strategic location on campus, and the most strategic location has always been the walk to Benton Hall. However, for some reason, which will remain only a mystery to those of us who have not been able to have a bulletin board constructed, there has never been one.

The Central Council and the Chancellor's Advisory Council should be commended for finally putting up the long needed bulletin board. We only wonder why the bulletin board was so long in coming? This has always been a problem on the campus, and we hope that in the future the bulletin board will be more responsive to your needs by having a bulletin board placed at a strategic location on campus.

Now that the bulletin board is a reality, we hope the students will take full advantage of it and that those of us that will not be able to take advantage of it will perhaps be forced to use the bulletin board to get all the information concerning events. The day, place, and time should all be noted and when possible, the sponsoring organization should also be noted.

Once again we commend the Central Council and hope that they will continually work to alleviate other problems which the students face.

UMSL Current is the official student publication of the University of Missouri-St. Louis. It is printed weekly and funded through the Student Activities Fund. The current issue is located in the University Administration Building, 2102 Natural Bridge Road. Advertising and subscription rates given on request.

Editorial Current Readers
As director of a research program funded by your activity fees and as the man most directly responsible for the inconvenient questionnaire that made your registration even more hectic than usual, I owe you an explanation that the Current did not choose to give you last week. Both you and my good-intentioned efforts have been cancelled out by the less informed, but equally well intentioned, efforts of some faculty and administrators. More specifically, on the complaint of several faculty members the administration has decided to cancel both the student census and the survey of faculty opinion and experience. (Pamphlet and organization listings will be made up for those who filled out the questionnaire before the program was cancelled.)

The goal of the student census was to help the University become more responsive to your needs by systematically learning just what students want. This failure is a failure of communication and of understanding. Each of us must share in the responsibility and, as a result, each of us will learn from it.

Sincerely,
Richey Gilman
Asst. Prof. of Sociology and Anthropology

Editorial

Dear Editor:

A student on campus, Mr. Elledge, has asked serious questions regarding the meaning and importance of language studies in an institution of higher learning. He deserves, in my opinion, every praise and commendation for having asked his questions. His questions had substance and the requirement of an answer in the form of a written response. His questions go deep down and explore those areas which are easy to ignore and are often never answered. He is generating progress of civilization and the meaning our lives ever have or should have for us.

Mario Pei in his excellent book, The Language of Story, is a chapter entitled “The Indispensability of Language”. He says: "...the story of language is the story of human civilization. Nowhere is civilization more perfectly mirrored as in speech. If your knowledge of speech, or the speech itself, is not yet perfected, neither is civilization."

Pragmatism is dead. Amen.

The modern means of transportation and the media of communication have made it almost impossible for the neighborhood, county, city, state, or nation. We are now in the entire world as the people of other tongues.

Many students are perhaps, unaware of how important an event it is to step into a different class, for example, for the first time. They have put themselves in a position to have meaning from or to two hundred and fifty million human beings on the face of the globe. The greater the proficiency the language the greater the possibility for greater meaning and from another.

It seems to me that one of the great goals of our society is to allow each person to quote from Friel’s book, “Once more where he was:” “...for the study of language is a social science to the highest degree. Language is the tool and the sum of all knowledge. Language is something more than the indispensable vehicle of all human knowledge. It is the basic foundation of all human cooperation without which civilization is impossible. I might add hastily that it would be an extremely naive pose if we were to require that our language alone be the one learned.

It took the genius of Michelangelo who, upon having put the finishing touches on his大理石マヒオール," struck the statue with his chisel and commanded it "Speak!" This supreme artist knew all too well that the gift of language was the Creator’s unique gift to man.

We believe that in the Scriptures that when we consider the work of the fingers of the Almighty--the man, the sun, and the stars which He has ordained we remain in wonder at the creation of man and the meaning of man. The sun has risen and the sun will set for millions of years. Its size is staggering. Yet each morning you and can contemplate it. It will never

LaRoyce Stevens
Miss UMSL Begins Duties

Miss LaRoyce Stevens, a sophomore, was elected 1967-69 Miss UMSL by the student body last November. Miss UMSL is the title given to the girl who represents the student body in public relations.

LaRoyce said the contest was a "first" in her experience. She said, "I've never been in a contest like this before and I had absolutely no idea at all that I had won." Asked about her family's reaction, LaRoyce replied, "They were thrilled, very, very happy.

Because of a ball in the visitors coming to UMSL LaRoyce has had few official duties since her Nov. 30 coronation. Her first official act was at half time, LaRoyce presented autographed team pictures to President John C. Weaver and Chancellor James L. Begg Jr.

Asked why she chose UMSL, LaRoyce answered, "I considered Columbia as my first choice, but I decided to come to UMSL because it is closer to home." LaRoyce is an active member of the Association of Black College Students in which she serves as the assistant secretary. She also expressed an interest in the Student National Education Association (SNEA).

LaRoyce is a business education major. She is currently taking health, economics, biology and computer. The results were tabulated at the University's computer center.

LaRoyce Stevens
Attended Beaumont High School and graduated in June, 1967. She is 19 and the oldest of two children. Her brother Vladimir is 10 and attends Trinity Lutheran high school.

Trip to Europe

This summer many students will be boarding planes to Europe, not for expensive tours, but for summer employment. The choice of countries is up to the individual, but it would be helpful to one if the student had at least a background in a foreign language.

Applicants must apply soon to obtain a position and must be willing to work at least two months.

Students should contact Dr. Robert L. Davenport, Assistant Dean of Student Affairs, in room 117, Administration Building, as soon as possible.

LaRoyce Stevens

LaRoyce attended Beaumont High School and graduated in June, 1967. She is 19 and the oldest of two children. Her brother Vladimir is 10 and attends Trinity Lutheran grade school.

Business School Survey Completed

Delta Sigma Pi, UMSL's business fraternity, completed a course evaluation program last semester in the School of Business. The fraternity originally planned to conduct the survey throughout the entire school, but as plans progressed, it was decided to limit the survey to the School of Business for practical reasons.

The survey was given to students in all classes and they were able to rate their instructors on lectures, assignments, textbooks, examinations and fairness of grading.

Dr. Emery C. Turner, Dean of the School of Business, gave permission for the survey and it was conducted with the help of Dr. Howard Baltes, associate professor of statistics and chairman of the department of statistics.

The project began with the efforts of Todd Davis and Robert Ehrig, members of Delta Sigma Pi and undergraduate students in the School of Business. Their primary purpose, said Ehrig, "was to aid in the evaluation of the faculty, the urgency for communication and feedback between faculty and students.

With faculty approval, Davis and Ehrig organized a committee to follow up the survey. The committee's goal is to assist the faculty in improving their teaching and providing the necessary feedback from the students through individual evaluation of the teachers.

Dr. Baltes, an alumnus of Delta Sigma Pi, provided the questionnaire which was previously programmed into an IBM 1130 computer. The results were tabulated at the University's computer center.

Davenport Calls Forum Successful

by Aubrey Herman

The four-month-old Noonday Forum, starting its second semester of activity, has been successful, Dr. Robert Davenport, Assistant Dean of Student Affairs, said in a current interview last week.

Dean Davenport termed the Forum "one of the most fabulous successes on this campus--a real coup in programming." The Forum included various programs: films, speeches, drama, music and reports from Dr. Harold Ehrig, Dean of Student Affairs.

Dean Davenport said the administration was not using a quota system to evaluate the success of programs, but rather attendance at different types of programs to attract as many students as possible.

During the first semester, 2,500 students participated in 35 programs. Statistically the breakdown was the following:

<table>
<thead>
<tr>
<th>Number of Type of Program</th>
<th>Program Avg.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Pep Rally</td>
<td>280</td>
</tr>
<tr>
<td>2 Films</td>
<td>120</td>
</tr>
<tr>
<td>4 Music</td>
<td>88</td>
</tr>
<tr>
<td>3 Drama</td>
<td>56</td>
</tr>
</tbody>
</table>

The average attendance for all programs was 71.

Other programs had proportionately lower averages. Dean Davenport said something must be done about information programs that ranked near the bottom of the list.

He said a major problem was communication. "Communication to the general student body is difficult, although a Communications Committee of the Student Council has been giving out flyers," he explained.

The Friday programs take place at 11:40 a.m. Monday through Friday in Room 180, Math-Language Building. Tickets are available in Room 117, Administration Building.

Letters

(Continued from Page 2)

be able to contemplate us. The stars cannot speak to another. Yet man is direct perception to his development in language can have meaning to another person. He can share with another the beauty of a stream, of a hill, of a smile, of a flower. He can communicate the joy of his response to sound or color. He can declare his love to someone.

Man cannot have dialogue with himself. He must reach out and "touch" other human beings. Like Quixote he must sally forth to force them to encounter others. Only in this way does he transcend himself and grow. He cannot linguistically or experientially stay home and "grow up." But not every one speaks the way he does. He, therefore, goes out to speak his language or learn about his culture. With his speech he creates his world. The contrary, the other fellow who has learned his language is the one who has gained, who has expanded himself as an individual and, therefore, has perfected himself.

The value of Modern Languages cannot be stressed enough. It is one of noblest of the liberal arts. The Liberal Arts man or woman is taught how to live, not how to make a living. Nothingless, Harry B. De Mairo in his article "For Value Received," published in Foudham (March, 1967) states that "Business, the way man conduct himself in it, its impact on society, historically, socially, normally properly subject matter for the student of liberal arts whose study is essentially man."

I respectfully submit the thoughts contained in this letter in dedication to the first man on Earth to ever utter a meaningful word.

Anthony W. Integlia
Instructor in Spanish
Department of Modern Languages

Counseling Service Assists Students

by Laura Lemcoe

"Call me what you like, but just give me some help," said Dr. Lewis Sherman, Director of UMSL's Counseling Service, emphatically said. The Counseling Service is not the administrative service concerned with planning next semester's schedule or dropping part of this semester's schedule. It is staffed by four counselors and clinical psychologists "available to assist students in obtaining greater satisfaction from their college experience," Dr. Sherman said.

The Counseling Service was started in September, 1966 by Dr. Carl Ober, who felt that it would add to the integration of the students and their education.

No Hesitation

Dr. Sherman, formerly chief psychologist at the Veterans Administration Hospital in Brockton, Massachusetts, stressed the fact that because of the normality of young people's interests, there should be no hesitation by students to seek the guidance of the Counseling Service, to get help with problems that are inevitable in the college environment.

An inmate idea that only weak people go to psychologists to escape from "hang-ups" needs to be eradicated, Dr. Sherman said. The cases of the counseling service are held in strictest confidence. Its staff act as professionals in helping people deal with their problems in dealing with their clients, not as professors grading for examples of lectures.

An increasing number of students using the counseling service is prompting the formation of a group counseling service, which emphasizes the similarity of students' problems by relating to others in the group, one-on-one correspondence between counselor and client, which has thus far been used, may still be chosen (the session lasting from 30 minutes to an hour.) The group sessions, each consisting of about 10-12 students would be once a week for an hour or longer.

Two primary types of groups will be inaugurated: specific problems and counseling service, many of these problems will bearable.

The Counseling Service is located in Room 424, Benton Hall. A student may "just walk in" the office Monday-Friday any time between 8:30 a.m. and 5:00 p.m. to speak to one of the staff.

A person's membership will be a minimum of three semesters. The first semester will be devoted to planning events, while the second and third will deal with policy decisions on scheduled programs.

The Tuesday night movie series will be inaugurated, Miss Allen said members of the committee at that time will resubmit their qualifications to Miss Kreis in room 117, Administration Building. Students, either part time or full time, must have at least a 2.0 grade point average and be at least a second semester freshman. The committee will be given to the Committee on Student Affairs which will screen the applicants and possibly interview them.

"We hope this selection procedure will be impartial and without favoritism," said Miss Allen. "If the person has the experience, we want and urge him to volunteer."
Cagers Beat Pershing, Southern; Now 14-4

February 17 Missouri Southern lost to Missouri Southern February 17.

Photo by M. J. Olds

Pershing

Faced by Jack Stenner’s 32 points and by the solid play of reserves Denny Caldwell and Chuck Henson, the Rivermen came up with a surprisingly easy 92-65 victory over Pershing for their third straight win.

The game was played before 1500 spirited fans at FVCC. Stenner scored 21 points in the second half including six in a row that put UMSL into a twelve point lead that was then their biggest lead of the game. They rolled on from there to open up a 28 point margin before a Pershing free throw accounted for the final 27 point spread.

The Generals from Beatrice, Nebraska, 20-4 on the season, never led in the game as Jack Stenner scored the first basket of the game. Scoring began slowly as both teams took time on offense waiting for a good shot. Things looked bad for the Rivermen when Greg Daust went to the bench with three fouls with 8:39 left in the first half and Pershing closed to within four points. Chuck Henson moved into the middle, and he, along with Stenner and Denny Caldwell, scored UMSL’s last 20 points of the half as UMSL held a 39-33 half-time lead. Stenner’s 11 points led Rivermen scorers while Caldwell and Henson came off the bench to hit for 8 and 6 points respectively.

UMSL led 49-43 with 16:05 left in the game when Stenner hit two baskets and two free throws in the space of 36 seconds to open up a 55-43 St. Louis lead. The Rivermen rolled on from there, hitting two sprees of ten straight points, as the Generals turned cold and scored only seven points in the last nine minutes of the game.

Stenner hit 14 of 23 field goals and 4 of 5 free throws for his game high 32 points. Greg Daust scored 15 points and contributed 12 rebounds to a 40-18 Rivermen rebounding edge. "Super Sub" Denny Caldwell hit seven of nine field goals for 14 points, and Chuck Henson scored 11 points while doing a good job filling in for Daust.

In the happy UMSL locker room after the game, Coach Chuck Smith praised his bench for "their wonderful job." He felt that the game’s turning point came when they (Pershing) got to missing with about eight minutes left and we got them into the ‘one and one’ foul situation.” Smith was pleased with the job the Rivermen did of "screwing the middle" and forcing Pershing to go outside for shots instead of lay-ups.

**Hendin's Headlines**

by Marty Hendin, Sports Editor

"I would love the opportunity to build a team here. We'd like to have St. Louis. The city is steeped in sports tradition and the Arena is a beautiful building. What more can we ask?" These were the words of American Basketball Association Commissioner George Mikan as he spoke with this reporter after the Miami Floridians had defeated the Minnesota Pipers before 3,157 fans at the Forum. As a result, the ABA has given the ABA a game ever played in St. Louis.

Mikan stated that the ABA is now averaging 3000 attendance in its first season. With 11,600 fans filling the arena, the ABA has had the lowest attendance of any league."I didn't expect," he said, "to break even in our first year." Mikan also added that the league has recognition now due to the presence of coaches such as Bill Sharman and Alex Hannum and players such as Connie Hawkins. All that is needed now is acceptance from college players, something that could come in this year's draft. Mikan was pleased that four or five teams are making money, a fact that "we didn't expect."

**Rematch With UWM Saturday**

The Panthers of the University of Wisconsin-Milwaukee will invade Florissant Valley Community College Saturday night at 8:00 to take on UMSL in a game in which the Rivermen have a few new players. The story of the game was early foul trouble to Mark Bernsen. Bernsen scored 34 of his 89 points with SIU guard Dave Belk to score 24 points. Early foul trouble also allowed the Norsemen to concentrate on the three-pointer. 795 percentage from the free throw line, Gary Skinner had a great game scoring 25 points, and looking as if he never had knee trouble. Jim Rohr, at center, scored 15 points and played the boards well. However, the Rivermen, down by a point with 26 seconds left in the game, missed the final shot. UMSL recovered the ball and proceeded to stall until fouled. SIU converted the 1 and 1 foul shots and won the game by three points.

**Florissant**

Florissant Valley, who previously beat the JV 95-67 on December 14, took advantage of the Rivermen's second condition. The February 11th game saw Flo. Valley take an early commanding lead. The Norsemen were consistently outrebounding the ball and proceeded to stall until fouled. SIU converted the 1 and 1 foul shots and won the game by three points.

**Baseball, Golf Schedule Meetings**

All men who want to try out for varsity baseball should attend a meeting to be held Tuesday February 25 in room 208 of the administration building. The meeting will begin at 3:45 p.m.

All men interested in playing varsity baseball this spring should contact Coach Arnold Copeland in the athletic department, room 17 of the blue metal office building. There will be a meeting for those interested on Monday, Feb. 24 in room 208 of the Administration Building. This will be the first year that UMSL will field a baseball team. Practice will begin approximately March 3 while the opening game of a twenty-game season will be played at St. Louis.
