Search Committee Announces Criteria

The search committee for a new chancellor to replace Dr. James Bugg Jr., has announced the establishment of criteria for the chancellorship.

The committee adopted the following statement:

"The chancellor must be cognizant of and in sympathy with the accelerating expectations now focused on universities. He must be able to translate these expectations, for the development of an emerging urban university distinguished in learning, research, and public service. The realization of the University's potential will require in the chancellor personal and intellectual characteristics of such quality as to generate excitement and a sense of involvement among students, faculty and others concerned with the campus.

"The chancellor must be able to delegate executive authority, holding those responsible to him to high standards of performance, and encourage an active and independent role for his responsibilities. He should be a leader with confidence in the value of open and critical discussion by everyone who has a stake in the University.

"The chancellor must be an advocate of support for the University of Missouri-St. Louis by all potential agencies, private and public, on the national, state and local level. He must have the ability to work effectively within the multi-campus framework of the University of Missouri.

"Of his previous function, the chancellor must be a generalist in spirit, with a commitment to..."

Central Council Forms Committee To Replace Student Union Board

by Matt Mattingly

A bitter, heated debate marked the birth of the Activities Planning Committee, intended to replace the Student Union Board which collapsed along with the student government last year.

The initial motion, which sparked the controversy, was proposed by Judy Allen, chairman of the committee which drew up the blueprint for the Activities Planning Committee. It stated: "I move that the Activities Planning Committee be established to contain nine students, two of whom will be representatives of the Central Council and the remaining seven from the student body at large, and two faculty members: and the director of Student Affairs. Its powers shall be under the Office of Student Affairs."

The motion encountered stiff resistance, but finally passed after a confusing passage through parliamentary procedure. Judy Allen, when asked to comment on the success of her motion, told a Current reporter: "I think that the fact that the motion was passed is a significant thing, because it completely breaks with tradition and hopefully will establish a new precedent."

In other business, the Executive Committee made public its list of standing committees. These are the Publications, Programming, Safety, Grievances, and Executive College Problems Committees.

Joe Bono raised the question of how the variance would effect student study efforts. The Council appointed Bono and one other Council member to protest to the librarian about the noise. The Council approved a motion (Continued on Page 3)

Students Asked to Answer Survey

by Carol Pratt

UMSL students are being asked to answer a university wide survey, sponsored by the Office of Student Affairs, during their spring semester registration. The "1969 Student Services Census" as it is called, is designed to enable students to report their opinions of the University, to give a brief outline of their background and personality, and to evaluate the use of specific student services.

No student is required to answer all or any of the questions, as indicated in the directions on the front page of the form. All that is required is that students write their student number on the same line. The survey is one of the student affairs preparations in order to "satisfactorily meet the standards of the institution and the University." Each student will receive a copy of the survey, which is due back in the ex-Counselor office, now used by the Office of Student Affairs as a storage room.

Need for Health Center Critical, Says Eickhoff

by Adrienne Beaudoin

Dr. Harold Eickhoff, Dean of Student Affairs, expressed deep concern over the need for a student health service in an interview with a Current reporter last week. "The matter has become so critical that a highly urgent request has been made in the budget for the funding of a student health service," Dean Eickhoff said.

Dean Eickhoff said he was "not sure the absence of a student health service deserves the attention it has been getting on the grounds of previously presented arguments. The administration has been criticized, and rightly so, for the lack of a nurse on campus. Criticism has been directed at the failure of qualified personnel to be available to come to the scene of an emergency."

He stressed that UMSL has emergency medical facilities as close to the campus as does the University in Columbus. In all emergencies requiring medical attention, the student is taken to Normandy Osteopathic Hospital unless otherwise specified. An ambulance service is also available. The University pays the bill for the ambulance expenses.

Duties of Nurse

The primary duties of the campus nurse, as outlined by Dean Eickhoff, would be the following:

1. Handling an emergency accident health service. This would include the revision and updating of student medical records and the systematic review of and publicity about the emergency procedure to be followed.

2. Using her practical and administrative experience to evaluate the existing emergency procedure.

3. Taking charge of a small infirmary. The infirmary would include a small bed for students too ill to leave the campus immediately. A small medicine cabinet, possibly containing nothing more than band-aids and aspirin, would also be available.

In the event of an emergency, the following procedure exists. When the emergency is noticed, the observer should:

1) Call Dean Eickhoff in the office of Student Affairs between 8:00 a.m. and 5:00 p.m. or the evening college after 5:00 p.m. Give the student's name and student number if known. Dean Eickhoff will call the ambulance if it is needed.

2) Send someone at the scene of the emergency to meet the ambulance and direct them to the student.

As soon as the call reaches the office of Student Affairs, the following action is taken:

(Continued on page 3)

Hearnes' Request Trims Budget For University

Governor Warren Hearnes requested $85 million in state funds for the University of Missouri system in his budget address to the Missouri Legislature Thursday, January 9.

This request represents a $12 million increase from the $97.1 million sought by the University. It also represents a $4.3 million dollar increase from the $82.8 million dollars recommended by State Comptroller and Budget Director John Vaughn.

Governor Hearnes' request also restored a little more than $1 million in capital improvements funds for the University, which had asked for $6 million. Vaughn's budget had denied the University and all other state agencies capital improvements money.

Although the Governor told legislators that he would favor a tax increase if he were a legislator, he made no direct plea for a boost in tuition or a fee increase. He merely stated the necessity to meet the rapidly rising cost of state service.

Speaking to the Governor's budget appeals hearing November 29, University of Missouri President John Gilman warned that enrollment would have to be curtailed or reduced and research cutbacks if the budget cuts were not restored.

President Weaver stated November 21 that a cut-back of $9 million would cripple the University in competition with other academic institutions.
Editorials
The Race for Space

The recent announcement by Chancellor Bugg that steps will be taken to open a new lounge for students in the Math-Language Building was quite refreshing.

It is not the secret that the problem of student study space has reached outrageous proportions at UMSL. Enrollment has increased faster than construction, causing a student vs. space dilemma.

The problem is especially evident during the winter months, with the use of outdoor study space hardly being feasible. Under these conditions there is overcrowding in the cafeteria, library, and the few lounges previously provided for that purpose.

Although many students felt that Benton lounge should be reopened for study space, few can argue with the Chancellor's contention that the lounge should continue to serve as the sole meeting place on campus for student organizations.

In addition to the initial step of providing a lounge in ML, the Chancellor also announced that there is a possibility that classrooms may be transformed into lounges (if the need persists).

It is thus apparent that Chancellor Bugg and his associates are not totally blind to student needs. In fact, these recent announcements show that new avenues at UMSL are being opened to student strife and flexibility in policy decisions. These are admirable assets for a growing university in an age of student-faculty unrest.

Library: The Impossible Year

Although the library is open, there is no reason to assume that it is complete and functioning at its best capacity. It is far from being able to rest on its laurels.

It is almost useless to mention that the tables and chairs seem to have come from an abandoned bingo game -- but the new tables and chairs will still be available by day. It has all the signs that the library has no place where a student can smoke.

We believe that such rooms are present in all of the other University libraries in the midst of learning. But the library is far too big to be of full service to the increasing number of students attending UMSL each semester.

The library should be taking better precautions to see that students do not come out without checking them out. It would seem that this would be of primary importance to the librarians.

Now that the construction of the library is completed, we cannot help but wonder as the library is on its way to the exit between the fourth and fifth floors. It is, however, a little late to do anything about that unless, perhaps, a hole could be cut in the ceiling of the fourth floor.

Finally, the intellectual atmosphere of the library is far from enhanced by the painters and carpenters milling through the library. We can hardly wait until they begin carving that Thomas Jefferson article into the wall of the main floor.

In our opinion, no university can be great unless it has a great library, a library that is a good place for study and research. The library staff has that great responsibility. We hope that they realize this and do their best to boost UMSL's library to the proper caliber.

Letter Policy

Because of the many letters that have recently been submitted to our editorial staff, the Current feels it necessary to establish a few definite guidelines relating to this area.

We receive a great many letters of 200 words or less which will receive greater priority towards publication than those of a greater length. (2) The name of the writer must accompany each letter (although this may be withheld by request). (3) The Current reserves the right to shorten letters solely for the sake of space. (4) The Current reserves the right to correct any errors which appear in spelling or grammar in the entire article.

The purpose of these guidelines is not to discourage the discussion of editorial topics by the faculty or students. It is, rather, necessary to establish such policy in order to allow for more views to be heard per letter. Ideally, it would be desirable to print all views, but there are limits.

To Lead Missouri

Those interested in the University of Missouri were not the only ones disappointed by Governor Warren Hearnes' budget address on Wednesday, January 9. The Governor described the shaky financial condition of the state of Missouri, but he did not call for action to ease this condition. Despite the knowledge that Missouri is floundering in the area of state services, Governor Hearnes seemed to ignore the subject, declaring that he would favor a tax increase if he were a legislator.

He is not, however, a legislator: he is the Governor of Missouri, the first to be elected to two consecutive terms. As Governor, it is his responsibility to provide the leadership for the state, not to transfer himself to the shoes of a legislator. If Missouri is to progress in the area of state services, then a tax increase is necessary; and if a tax increase is to be enacted, then the leadership of the Governor is required.

Correction

The Current wishes to correct a statement appearing in the article "Accounting Club Elects Officers" in the January 9 issue. The club has not yet elected its officers for the winter semester. It will hold elections for officers approximately the third or fourth week of the second semester. Anyone interested in joining the club may fill out data sheets, which can be obtained from Mr. Kargas in room 205 of the Administration Building.

Letters: Misrepresentation and the Library

Dear Sir:

In an attempt to correct misunderstandings created by an article in the Jan 9 issue of the Current we would like to make the following points:

1. Chancellor Bugg expressed his intentions of asking for a raise of $5.00 this year, by being used to complete the furnishing of the new Student Activity Center.

2. The Chancellor then asked the Council the following question: "Since I am going to suggest a raise of $5.00, should I at this time ask for an additional $2.50 for use in Student Activities?"

3. Only one of the two Evening School students present voted against the $2.50 increase. This was the only negative vote cast.

4. The Council approved the $2.50 increase, under the condition that we be consulted about the disbursement of the money into Student Activity fees. This will help to guarantee that the Students will get some direct benefits from the raising of the fees.

5. As a point of general information, $10 of the present $15 fee, and $12.50 of the proposed $25 fee, will be used in furnishing the Student Activity Center. These furnishings will include such things as the cafeteria, snack bar, desks, etc. The answer to the question, "Who is going to be listened to before the Student Fee?" lies here. Most of the fee goes into the furnishing of the Student Activity Center. Ground breaking for the center is scheduled for this year.

Thank you,

Central Council

Dear Sir:

At the meeting of the University Faculty Senate held January 9, the motion that the Library Committee undertake an immediate study of conditions in the library and make a full report to the Senate as soon as possible. This motion was passed unanimously by the Senate. I shall not bother to enumerate here my own reasons for calling for this motion.

During the vacation, nobody wanted to work on Saturday or Sunday so the library was closed for the week. Why didn't the library distribute the schedules to the students or publish them in the UMSL Current? Again it was only a slight inconvenience.

As of yet, the library has only one pencil sharpener located centrally on the third floor. It is not mounted. Yes, there are people who still use pencils. Again it's only a slight inconvenience.

The sad state of affairs did not affect just one student but most or all and you mention the slight inconvenience by three or four thousand, then you have a big inconvenience.

Larry Payette

Editor's note: The Current was furnished with a schedule of holiday library hours in time for the issue of December 12. Due to layout difficulties and a shortage of space, the Current did not print the schedule.

UMSL Current is the official student publication of the University of Missouri - St. Louis. It is printed weekly by the Student Activities Fee. The Current office is located in the University Administration Building, Room 210, 8001 Natural Bridge Road. Advertising and subscription rates given on request.

Spend Semester Break With...

Kiel Auditorium

DIANA ROSS and the SUPREMES

The Department of Chemistry has been awarded a grant, including two for undergraduate research. A fourth grant has received tentative approval.

Dr. William M. Larsen and Dr. Alan F. Berndt, associate professors, have received an $8,000 grant for research on "M.M. and X-ray Studies of Structure in Aqueous Electrolyte Systems" made by the Office of Water Resources Research, administered by the University of Missouri system.

Dr. Eric Block, assistant professor, has been awarded $12,000 by the Petroleum Research Fund of the American Chemical Society for "Studies in Carboxylic Synthesis." The two-year grant starting September 1, 1969, is a "Type B Award," designated for fundamental research in the petroleum field at the undergraduate level. Matching funds totaling $4000 will be supplied from UMSL's budget next year.

Health Council

(continued from page 1)

1) The student's health form, filled out as a requirement for admission to the University, is found in the library. This form was designed by Dr. Galooto, director of the student health service at the University. The form contains essential information about any physical abnormalities the student may have. The medical information contained on the form is given to the ambulance drivers to facilitate their correct handling of the patient.

2) The parents are called.

3) The doctor is called to meet the ambulance at the hospital. Dean Eckhoff said that every effort is made to talk to the doctor personally.

4) Dean Eckhoff goes to the scene of the emergency. Dean Eckhoff stated that "although the process seems complicated, once the call is received, you prove, it is considered in three to four minutes and has worked smoothly in most instances."

Procedure Used

The emergency procedure was used this semester in two cases of epileptic seizure, one in the library and the other in a classroom.

The emergency procedure was also used Friday, January 10, Miss Mary Colleen Grasse, sophomore, was watching an ice hockey game on the shore of Bug Lake. During the game, a participant lost the puck into the air, accidentally striking her in the forehead. After the Traffic and Security Office and Dean Eckhoff were notified, Miss Grasse was taken to Normandy Osteopathic Hospital by the campus police. The laceration required seven stitches.

Visa on Sunday

"Meet my 63¢ dinner date."

Mr. So what McDonald's is your kind of place?

"Yes sir, that's why McDonald's is a good kind of place."

"I know what McDonald's is your kind of place."

"You can't go wrong there."

"I know we can get a hamburger or a cheeseburger, a bag of fries, and a shake for about 60¢."

"We do that for all our friends."

"The cheeseburger, a bag of fries, and a shake for about 60¢."

"Yes sir, that's why McDonald's is a good kind of place."

McDonald's is your kind of place.
Shaw and Gorky
Two Modern Masterpieces
Of Drama at Loretto-Hilton
by Sam Hack, Features Editor

The Loretto-Hilton company is currently presenting in its repertoire two dramatic masterpieces of the first decade of this century — Shaw's "Major Barbara" and Gorky's "The Lower Depths." The two plays are on most grounds of comparison extremely different (most glaring is the stylistic difference between Shaw's social comedy and Gorky's drama of realistic naturalism), but there is the important similarity. Both playwrights concerned themselves with the importance of the individual man in relation to society. Not therefore were they aware of both the tragic and the comic nature of that relationship.

Major Barbara

In "Major Barbara" Shaw uses his sharp-pointed pen against society's hypocritical value system. He sets the altruistic Salvation Army, in the person of the title character, against the completely pragmatic Andrew Undershaft, a powerful multi-millionaire who is co-owner of a huge munitions business. Undershaft declares Undershaw the winner on all grounds of comparison. He sets the altruistic Salvation Army as a goal rather than seeing it (poverty) as, rather than material relief for the poor, hypocrisy is not its worst fault. Shaw's utopianism, a creation of heroes, is a goal rather than seeing it (poverty) as a goal rather than seeing it (poverty) as, rather than material relief for the poor, hypocrisy is not its worst fault. Shaw's utopianism, a creation of heroes, is a goal rather than seeing it (poverty) as, rather than material relief for the poor, hypocrisy is not its worst fault. Shaw's utopianism, a creation of heroes,

Russian Flop-house

The play is set in a Russian flop-house which is inhabited by an assortment of people who express varying degrees of misery, despair and boredom. An old pilgrim is among them and momentarily shows them happiness, kindness, and hope. His efforts to do good are almost complete failures, but the people he has touched cannot forget him. His faith is not born of innocent ignorance but exists in spite of all awareness and understanding of all that is wrong with life.

Rare Sensitivity

The Loretto-Hilton production of "The Lower Depths" is excellent. James Bernardi's direction displays a rare sensitivity for the meanings and intentions of the playwright. It is neither didactic nor depressing. It is a detailed realistic picture of Gorky's view of life. It is marked by its variety of characters and moods. It is, in essence, tragicomic. Bernardi weaves a collection of exceptional acting performances into a true ensemble.

Special Achievements

I feel compelled to give special mention to three other individuals who, as well as Bernardi, deserve special achievement. This production. Bernie Pesseltiner's performance as Loka, the kindly old pilgrim, is beautiful. It ranks among the best in this company's short history. John Wright's Sten's shabby set and Peter E. Sarven's evocative lighting combine to create a marvelously effective environment.

Shaw's "Major Barbara" is a fine play. Unfortunately it is not being given a particularly good production at Loretto-Hilton, Michael Flanagan's direction treats the tower at Shaw with too much reverence. The actors do little more than go through the motions, and they are not involved in the play how can they expect the audience to be. The most interesting performances (Donald Gantry, J. Robert Dietz, and James Scott) are interesting more for their technique than for their characterizations.

The Lower Depths is a simpler but more important play than "Major Barbara." It contains both an expression of naturalistic determinism and the faith in the dignity of man. Gorky seems to be saying that perhaps man cannot rise above the everyday utilitarian neediness and despair in life, but because man is all there is he must try; he must believe in himself.

Darst Attacks
Jury System

David Darst, proponent of civil disobedience, called for a more representative jury system in a Noon-Day Lecture Forum lecture Wednesday, January 8.

Darst who was convicted and later acquitted on a charge of burning federal draft files, said jurors should be judges of a person not only on whether or not a certain act occurred, but also on the validity of the law itself.

"When it comes to consider a case," he said, "a jury should take all possible factors into account. A man should be judged by a jury of government property, but the later acquitted on a charge of public property so that be made between personal and person not only on whether or not a certain act occurred, but also on the validity of the law itself.

"An outspokem critic of the Vietnam war, Darst said, is a response to the methods of civil disobedience when the ordinary means for dissent are closed. The demonstrator turns himself in for due process of law because he acts in the name of society."

"The purpose of civil disobedience is to make concrete that which is abstract. The burning of draft files was a symbol of protestation of moral indignation against the war for all to see," he said.

Gym, Scheduling Problems Plague Homecoming

Two problems remain in the plans for homecoming 1969. One is the plans for the basketball game. The other is the problem of scheduling homecoming events and the other from construction. Contraction of Normandy High School's new gym has been delayed. Two games scheduled there had to be transferred to Florissant Valley Community College. There is still some uncertainty about the game's completion in time for homecoming. However, the contractors have promised that the gym will be ready by February 7. They will know definitely by January 27 if it will be completed in time and will notify Coach Smith.

Louis IX Room

The other problem is the weekend on which the homecoming activities are scheduled. All the halls and hotel ballrooms were booked far in advance because it is Valentine's Day weekend. When Pi Kappa Alpha tried to rent a hall, there were none available. There was a cancellation, making the Louis IX Room in Union Station available. The dance was originally scheduled for Saturday, February 15 but the Louis IX room is available Friday, February 14 only. Parents, the dance begins about an hour after the end of the basketball game.

Attempts are being made to move the starting time of the game up half an hour (to 7:30 p.m.), because of the dance. Hopefully, the dance will begin at 10:00 p.m. and end at 1:00 a.m. Dress semi-formal and the cost is two dollars per couple, one dollar a person.

Parade to Game

The parade is being handled by Sigma Tau Gamma, Rules and entry blanks have been put in all organization mailboxes. There are three alternate routes for the parade, the primary one to be decided upon by Sigma Tau Gamma and the police chiefs of the involved municipalities. There will be trophies for the first, second, and third place winners in the car decorations.

Half-time entertainment, courtesy of Newman Club, will consist only of floats. The floats will triple for the car decorations and the lawn displays and the introduction of the five finalists in the homecoming queen contest.

Social Disorders Institute

The UMSL Extension Division is co-sponsoring an institute in Social Disorder from 6:00 a.m. to 5 p.m. Saturday, January 30, in Benton Hall. Cooperating with the Extension Division in the project is the St. Louis Federal Executive Board.

The Institute is designed to initiate meaningful discussion of the problems of social injustice and law violation, and to determine what steps can be taken to deal with prevention and control in Missouri and Illinois metropolitan areas.

Featured speakers include Miss Virginia Burns, an expert on juvenile delinquency with the U.S. Department of Health, Education, and Welfare; John C. Danforth, attorney general of Missouri; and Dr. Norman Johnson and Dr. Jerome Balschack, both of the UMSL Department of Sociology-Anthropology.

Topics to be discussed include the prevention of social disorder through metropolitan planning, the role of the law enforcement agency, and the individual's capacity to effect change within the community.

Participating in the conference will be a maximum of twelve resident students and six nonresident students including: William R. Dodds, executive director of the Urban League of St. Louis; James H. Roche Jr., chairman of the Mayor's Crime Reduction Task Force; Judge Theodore McMillan, St. Louis Juvenile Court; Judge Michael J. Carroll, St. Louis County Circuit Court; Lawrence Devis, Franklin County prosecuting attorney; William Dye, assistant to the director of the St. Clair County Illinois Crime Commission; Walter Bueser, sheriff of Jefferson County.

The five finalists will be selected Sunday, January 29. Posters announcing the five finalists will be put up on all bulletin boards by February 4. The campaign, conducted by the organization sponsoring the finalists, will run from February 4 through February 13. Voting will take place on Wednesday and Thursday February 12 and 13, in the administration building.

The American Chemical Society will have a voting table on the first floor of Benton Hall both days. Votes will be counted late the evening of February 13. The queen and her court will be announced approximately halfway through the homecoming dance.

Pop Rally

The Steamers Club has a pop rally Friday, February 14. It will be held on the same lines as the successful rally November 27. There will be a skit written by Mike Spector, some cheers led by the cheerleaders and a few words about the Rivermen by Coach Chuck Smith. The Steamer's Club is also sponsoring a contest among the fans to promote the song fight. There will be prizes awarded for the organization knowing the fight song best and their ability to get members together to sing it loudest. This contest will take place at the rally.

Funds Awarded

UMSL has received $34,000 from the U.S. Department of Justice under the Omnibus Crime Control and Safe Streets Act of 1968, to provide financial aid to students in the new Administration of Justice Program started last fall.

The program leads to a bachelor of science degree. A total of 35 students, 26 of whom are law enforcement personnel and persons promis ing to enter the law enforcement field. Loans up to $3,000 per academic year and grants up to $2,500 per semester may be made under the Act.

Student Nominees Attend Interviews

Eight UMSL students nominated this fall for Woodrow Wilson Fellowships have been invited to interview at the Woodrow Wilson regional committee in Kansas City, Missouri, January 9-11.

The nominees are James M. Baker, physics; Diana M. Brooks, chemistry; Carol L. Carpenter, biology; Diane C. Chenowith, Spanish; Linda M. McKinney, music; and William B. Thesing, English.

Rivermen End McKendree Streak With 93-88 Victory

by Marty Hendin, Sports Editor

Led by the second half rebounding and scoring of Greg Daust and "Doody" Roh, the Rivermen defeated the McKendree Bears 93-88 January 11, and ended McKendree's twelve-game winning streak. The game was played before a record breaking 2,000 crowd at the McKendree gymnasium in Lebanon, Illinois.

Daust and Rohn scored 27 points and grabbed more than twenty rebounds between them in the second half as UMSL made up for a 41-43 McKendree lead at halftime.

UMSL jumped off to an early lead in the game, but McKendree took over and opened up a seven point bulge midway through the first half. The Rivermen fought back and tied the score at 29 all with eight minutes to go. McKendree then jumped ahead again, but UMSL regaled to the lead 40-39 on two Verle Sutton free throws with 1:12 left in the half. McKendree's Terry Florek scored to cut the lead to 43-42, but Jack Stenner gave the UMSL lead with two free throws. With three seconds left in the half, McKendree's Paul Funkhouser scored to give the Bears a 45-42 half time lead. Greg Daust led St. Louis scorers with 15 points while Funkhouser had 14 for the Bears. McKendree continued their lead at the beginning of the second half until "Doody" Rohn popped in two baskets to tie the score at 48 all. The lead see-sawed back and forth until Rohn's basket put UMSL into a 61-60 lead with 13:25 left in the game. The Rivermen quickly jumped into a seven point lead but McKendree closed the gap to 87-80 with 53 seconds left. Greg Daust led all scorers with 36 points, "Doody" Rohn scored 18 points, Verle Sutton 15 and Jack Stenner 13 in his first starting effort after sitting out three games with a sprained ankle.

McKendree's Mike Finley and Terry Florek scored 29 points each to lead Bearcats scorers while Paul Funkhouser had 19 points and Dennis Korte 17. Daust grabbed 19 rebounds and Rohn collected 17.

The Rivermen now have a record of 8-3 with four wins in a row, including three on the road. For the season, the UMSLans are 5-0 at home and 3-3 on the road.

According to UMSL coach Chuck Smith, the Rivermen followed their game plan well. He felt that the turning point of the game occurred when the Rivermen started their fast break in the second half.
JV Wins in Overtime; Now 4-2
by Jerry Visky

The UMSL JV lost to Boys Club Thursday, January 9, by the score of 89-83. The loss was the second in a row and the second of the season. Two days later on January 11, the Rivermen played one of their finest games to beat McKendree College in overtime 82-74 and boost their record to 4-2.

The JV game against Boys Club was a painful sight to behold. Normally a high scoring team, the Rivermen hit only 17% of their shots from the floor in the first half. The poor start gave Boys Club a 42-20 lead at the half. The JV's outs cored Boys Club with 24 points. Mark Bernsen and Ben Phillips again led the Rivermen with 15 and 15 points respectively.

The game against McKendree College was second only to the game against Forest Park in importance, but possibly even more thrilling. UMSL led throughout the first half but the Bearcatts rallied to narrow the Rivermen's halftime margin to 55-52. The second half saw even scoring until McKendree tied the score at 57-57 with 6:30 left in the game. The Bearcatts took the lead at 1:00 and held it until the JV scored twice to lead 70-69 with 36 seconds left in the game. McKendree hit a long shot from Wayne Loehrking tied the game in the final seconds at 71-71.

A five minute overtime period saw UMSL outscore McKendree 11-3 with Mark Bernsen scoring 7 of the 11 points. Mark Bernsen hit the overall scoring with 20 points. Ben Phillips and Dave Krieger scored 20 and 15 points respectively.

The JV played Scott Air Base Tuesday January 14, but scores of the game were unavailable at the time of publication. Friday, January 21, will be the rematch of UMSL against Forest Park Jr. College.

As the Rivermen break for final exams with a 4-3 record, one cannot help thinking that they should be 11-0. The combination of referees’ bad calls, all-around bad play, and injuries hurt the Rivermen and cost them victories over Millikin, William Jewell and Sioux Falls respectively.

Two factors have contributed greatly to UMSL’s success so far this season. The first of these is the Rivermen’s depth which has allowed them to replace injured starters Denny Whelan, Jack Stener and Chuck Henson. After Whelan dislocated his knee against SEMO and was lost for the season, Joe Lauskemper stepped in and picked up the slack, scoring 28 points in UMSL’s romp over Kearney. After Jack Stener and Chuck Henson were hurt in the Kearney Tournament, Verle Sutton and Den­ny Caldwell took over and led the Rivermen to three straight wins. Sutton scored 93 points in four games, while Caldwell connected for 53 points in two games.

The other factor that has contributed to UMSL’s success is defense, which according to Coach Smith, has been the Riverman’s strong point. Junior college transfer, Chuck Henson, turned in one of the season’s finest defensive performances when he held Millikin star, Jesse Price, to 18 points, after Price had scored 39 points in the previous night. Another fine performance was turned in by Clarence Slaughter when he held UEC’s high scoring Rich Coys to only three points. Other defensive stars this season have been Verle Sutton and Greg Daust. Daust has teamed with Stagner to form a fine defensive and ball handling duo, while Dauust has set-up the Rivermen fast break with his 20 rebounds per game. The Rivermen will need their defense and defense starting February 6 when they will move into the toughest part of their season. UMSL’s last six games of the season include two games with strong Wisconsin-Milwaukee, plus a home-coming encounter with a tough team from Parchesberg College, and a trip to Memphis to face a Southwest team that won five of its first six games.

This year, however, the basketball team will gain a player after finals as 6-7 back-up center Bruce Ryan will become eligible, Ryan’s scoring ability and board strength will add a lot to the Rivermen, and his presence will allow Coach Smith to rest Greg Daust during the games.

"A computer has no mind of its own. Its 'brainpower' comes from the people who create the programs," says Rod Campany.

Rod earned a B.S. in Math in 1966. Today, he's an IBM Systems Programmer working on a portion of Operating System/360, a hierarchy of programs that allows a computer to schedule and control most of its own operations.

A mixture of science and art
"Programming" means writing the instructions that enable a computer to do its job. Says Rod, "It's a mixture of science and art. You're a scientist in the sense that you have to analyze problems in a completely logical way.

But you don't necessarily hunt for an ultimate right answer. There can be as many solutions to a programming problem as there are programmers. That's where the art comes in. Any given program may work, but how well it works depends entirely on the ingenuity of the programmer."

Programmers hold a key position in the country's fastest growing major industry—information processing. Business Week reports that the computer market is expanding about 20 percent a year.

You don't need a technical degree
If you can think logically and like to solve problems, you could become an IBM programmer no matter what your major. We'll start you off with up to twenty-six weeks of classroom and practical training.
