Sam Bommarito supports salary for chairman.

In a recent Current interview, Central Council chairman Sam Bommarito said he supported the move to pay the student-body president because such a salary would provide the equivalent of the income from a part-time job. 

According to Bommarito, without a "supplemental income," the student-body president would in effect be "penalized" for his services to the school.

"If you look at the past four or five student governments, it's evident that their performance in the second semester was inferior to that performed in the first," Bommarito said. "A supplemental income would ease the strain and prevent our second-year student-semester slump from taking place.

A Current reporter asked Bommarito if his grade point could show this press account was a government leader. "Sacrifices must always be made as the price for being involved in school activities."

He also stated that the salary would enable the student government to attract "the best possible quality of leadership." Bommarito said that plans for an improvement process are being worked out, to provide relief from malfeasance in office.

Asked if he intended to be a candidate for student-body president, Bommarito said that he wouldn't make that decision for another month. "I chose not to run, that would pave the way for a perhaps more qualified student leader to come to the fore."

On the other hand, I have contacts with which a newcomer wouldn't have.

Insecticides Used on Trees, Shrubs Cause Major Pollution in Bugg Lake

by David Crain

Workers are shoring up the banks of Bugg Lake with railroad ties in an effort to stop erosion.

Dr. Frank H. Moyer, chairman of the biology department, stated, "This is a matter of great concern to the department, because the pond represents a major resource in teaching and research, and we are determined to solve the problem."

The department will confer with the physical plant to learn which pesticides have been used, and when, Dr. Moyer said. This knowledge, in conjunction with the report of the Missouri Department of Conservation, should lead to identification of the toxic substances.

The problem first became apparent in mid-February, when dead fish began to appear along the shore of the pond. The biology department requested the aid of the Missouri Department of Conservation and immediately began tests on the water and some of the striped fish.

The problem could trace the physical plant to learn which pesticides have been used, and when, Dr. Moyer said. This knowledge, in conjunction with the report of the Missouri Department of Conservation, should lead to identification of the toxic substances.

The problem first became apparent in mid-February, when dead fish began to appear along the shore of the pond. The biology department requested the aid of the Missouri Department of Conservation and immediately began tests on the water and some of the striped fish.
Suppression of Expression

On March 19, four students of the University of Missouri-Columbia were scheduled to appear in Magistrate Court on the charge of selling "obscene" literature.

The charge stemmed from the distribution by the students of an underground newspaper, The Columbia Free Press. The paper circulated on campus, which university officials deem objectionable.

What makes this athletics progress even more gratifying, however, is its accomplishment by equally rapid progress in the all-important area of academics. This year four UMSL seniors earned designation as Woodrow Wilson Fellows; and while intra-system competition is officially frowned upon, the contributions are reciprocal. In any event they wish to be withheld.

Dean of the library the Lewis Library, after his equally famous partner.

Dear Editor,

I am writing in regard to the letter of March 13, which was written by the Association of Black Collegians.

Pursued a person that I am, I predict that this letter, written by them, will bring about a storm of protest that the content of the ABC letter, though scientifically true, is stupid, unjustified, and many other goodlies.

Therefore, may I suggest a compromise name of another great American, someone who might be mutually acceptable to both black and white students. Since the former MLA Building is now Clark Hall, and assuming that this is the same Clark who explored the western United States, how about naming the library the Lewis Library, after his equally famous partner.

Sincerely,
Victor A. Brown

Dear Editor:  

When I read the letter from the ABC's about the naming of our library, my first reaction was probably like that of a great many other people. I thought it was making a fuss over a trifling matter. Yet when I re-read it a couple of times I realized that these students' interest wasn't a trivial one. What more they let their point of view be known for any of us white people to care to know. I think our big problem of lack of communication between races is well illustrated by this letter and my first reaction to it. If we continue to discount such messages simply because we think their source is "bad," "stupid," "crazy," or "sick" we are already cut off any chance of communication. "Oh, that's not important," we say. But we must realize that even though we may not consider it important, they do. If we are truly to achieve greater understanding of the black people of this nation and the reasons for our racial troubles, we must listen to them and at least understand their point of view as well as our own, though we may not agree with theirs.

The manner in which this letter was worded indicated to me that the ABC was not trying to be belligerent. They simply made known their feelings on this matter. Had they not spoken, few of us would ever have realized that something was bothering them at all.

I do think it is worth pointing out to the ABC, however, that the library was probably named for Thomas Jefferson because of the quotation of his that will be carved into the marble wall. It reads "This Institution will be based on the unlimited freedom of the human mind. For we are here to forget truth when it may lead, nor to tolerate any error so long as reason is left free to combat it." Certainly there is nothing offending about this quote, is there?

Theresa Luth

Dear Editor:

Your comments about the UMSL Raceway are interesting, particularly your rection of the line that our security men should setup radar on the road in order to trap violators. Our security men aren't as much interested in "trapping students" as they are to provide a community service and helping students. At least you might consult Chief Nelson about this. Citi grams constantly criticizes our law enforcement and regulation agencies as being passive, whereas actually we are trying to teach them to be service oriented. The public seems to be confused as to whether they want to be trapped or assisted. Prevention seems to be a much better approach in traffic and student safety than apprehension through trapping. As it is, when law enforcement officers apprehend law violators they have a tough time. Let the public make up its own mind as to whether it wants a "trapping force" or a "service force." The professional law enforcement officers would rather do service.

Sincerely,
Eugene P. Schwartz  
Administration of Justice

Dear Editor:

We have again been told by Professor Onuska that yes, the Student Affairs Committee did want the student survey, and no, it did not want to use the funds. In any event, the survey was to be financed from that mysterious black bag known as the normal budgetary funds. Since both Professor Onuska's salary and mine are paid from normal budgetary funds, it is not clear whether he was volunteering a portion of his salary or merely offering mine.

He then goes on to demand a campus ticket agency, presumably financed from the same black bag.

In Economics 51 we teach that there is no such thing as a free lunch. Perhaps, just for the sake of this simple truth, the course is so important that it should be required of all faculty.

Sincerely,
Joseph F. McKenna  
Professor of Economics

Editor's note: The Current at this time is printed weekly and funded through the Student Activities Fee. The Current office is located in the University Administration Building, Room 210, 8001 Natural Bridge Road. Advertising and subscription rates given on request.
Students Apply For Committees

In response to the Central Council’s call for students to serve on student-faculty committees, an estimated 30 to 40 applications have been submitted. This response was about as expected according to Sam Bommarito, Central Council Chairman.

The Committee on Student Affairs and Curriculum and Instruction drew the greatest number of applications. Eight students applied for the five-member student court. After the application deadline, there were still vacancies for the Committees on the University Library and Urban Affairs, which will be filled as second-choice positions of applicants.

C.I.C. Seeks Volunteers For Community Projects

by Sue Dorsey

The one-semester-old Community Involvement Committee is seeking student volunteers to place in welfare and community projects. C.I.C. was organized by Jane Burnhardt and Jane Alexander under the advisement of Dr. John Boswell, assistant professor of psychology. It acts primarily as a recruiting station for the Volunteer Improvement Program and the Citizens Volunteer Corps.

Garbell spoke at the Noonday Forum last month after the showing of the movie “Tell It Like It Is” which explained the V.I.P. and C.V.C. programs. Miss Burnhardt said that after the showing, about 15 students requested more information and have become potential volunteers.

Locked Car Stolen From Parking Lot

A green 1965 Triumph Spitfire was stolen from the parking lot V near the first curve at the top of the hill Thursday afternoon, March 6. Current photographer Bill Leslie, a freshman, had parked and locked his car at 1 p.m. When he returned after a chemistry laboratory class, four hours later, the car was gone.

Leslie reported the theft to campus police who “thought I might have only misplaced it.” After a 10-minute search, campus police filed a missing car report with the St. Louis County Police.

“The county police were supposed to send out a telegram to St. Louis City police that same day,” Leslie said. “When I called city police Friday, they had not yet received the telegram. They received it Monday.”

Library Closed

The library will close at 5:00 p.m. Friday, March 28, and will be closed for the weekend. Beginning Monday, March 31 through Friday, April 4, the library will be open from 8:00 a.m. to 5:00 p.m. and will be closed April 5 and 6. The library’s hours on Monday, April 7 will be 7:30 p.m. to midnight.

Two Separate, Diverging Communities -- One Black, One White

by Ron Brown, News Editor

UMSL has two separate communities—one black, one white. Drawn apart by the same determination, the paths of each segment are quietly diverging. The minority black community is developing apart from the mainstream of academic life and social activities.

The number of black students is undetermined. The Admissions Office as a result of the Brown vs. Board of Education decision does not classify students on the basis of color.

Among a faculty of 250 are some full-time black members: Dr. Marcus Allen, associate professor of French; Mary Burger, insectologist; and Dr. Doris F. Mosby, assistant professor of psychology. Two part-time faculty members are Richard Massey, a Economics major; and Arthur Littleton, assistant professor of business administration.

The UMSL black student is a first generation college student who lives two lives; one as a commuter who spends 15 hours in the city and the other as an inner-city resident among the urban problems discussed abstractly in his courses—subsidized housing, high unemployment rate and rising incidence of crimes.

"No One Knows"

"Black students feel that no one knows anything about their problems except themselves," said Dr. Mosby, who is a member of the Counseling Service. "They have to think about the possibility of next year's fees and often this means working full time as well as being a full-time student."

"Another problem is where to study. The conditions at home are too crowded and at school are too limited," she said.

The Association of Black Collegians plays an active role in the black community. The distance between its members is deeper than the social-orientated organizations. It neither has, nor needs a single leader.

"A strong people do not need any one particular leader," said Michael Jones, ABC representative to the Central Council. "Anyone can do or fill any of the others. We are bound together by a black man's respect."

In a University manual on student organizations, the ABC is listed as having somewhat limited membership, however, ABC president Leo Trice said "all enrolled black students" are considered to be members of the organization. By comparison, no black students are members of the six fraternities and two sororities, Sigma Tau presided the University Manual on student organizations.

The pay isn't particularly great...$1.55. But it's handy to campus. The hours fit your schedule and you have a chance to win a $10 scholarship each semester. (P.S. You probably can steal some food, too.) Leave your name, address, phone number, grade point and previous work experience at the Current office.

Two Separate, Diverging Communities

(continued from page 4)

the black and white communities may be misleading. In a speech in December, Charles Koen, Midwest Director of the Students' Non-Violent Coordinating Committee, warned that racial trouble at UMSL would arise "maybe not in the next few months, but it will come."

Black students view campus life as an extension of the world outside UMSL's boundaries.

"Our problem is not as, basically white Americans," Jones said. "It's revolutionary change is needed to let the black American live, then it will be a revolt against the white system that has suppressed him."

"Black students can join any campus organization as long as there aren't too many; however, the result too often is tokenism."

"A company will hire black people now because it wants to showcase a black. It's easy to point to him and say that 'this man went through the system,'" he said.

"Whites have taken the superior position because they run the power structure," said Ralph Davis, who spent one year at Tuskegee Institute in Alabama. "In the civil

right marches I participated in, white people told us how to solve our problem."

"Professional basketball died in St. Louis because our brothers were taking over the sport. Now the fans cheer wildly about a white, white hockey team. Yet the fellow who goes see them play will say he doesn't practice racism, but he does--internally," he said.

Trice, who moved from north St. Louis to University City, said when he arrived in his new neighborhood, "white people asked my parents if they were professional people. It seems a black has to be a professional to live with who have a grade school education and work in a factory."

Trice said whites will not solve its racial problems until "something happens so bad that their interests are affected."

"He said UMSL and the rest of the world will have such a 'catastrophic event.'"

"I am skeptical of viewing UMSL as two worlds because I do not think there is a consciousness of blacks or whites to be separatists," he said.

Dr. Allen, who studied at the University of Pittsburgh, said fraternity pledges were separated along racial lines, but the dormitories where he lived were integrated. While a graduate student, he was the only black student in his area working towards a doctorate.

Dean Eckboff said that the UMSL black student, unlike his professors before him, is not a member of a separate community. "I am skeptical of viewing UMSL as two worlds because I do not think there is a consciousness of blacks or whites to be separatists," he said.

Angel Flight Revises Pledging

Angel Flight is considering a proposal to revise its pledge program. Instead of rushing in the fall, it will rush at the beginning of the second semester. The Flight hopes this program will offset the low membership each year.

The Flight will inaugurate a pledge pledge equal to the number of active lost. In this way it will be able to start each year with a full membership. A rush program will begin in April.

In other activities the Flight will celebrate its anniversary dinner March 21 at Lombard's and will join the Air Force and Army ROTC cadets March 28 for their Military Ball.

Michael Jones (Timmy Cleary), Sam Hack (John Cleary) and Mary Lacey (Nettie Cleary) rehearse a scene from the UP production, The Subject Was Roses. photo by Ken Ealy

Prize-Winning "Subject Was Roses" Scheduled by University Players

In his rave review of Frank D. Gilroy's The Subject Was Roses, Walter Kerr lamented, "too bad the prize-giving season is over." Mr. Kerr need not worry, Gilroy's play was not forgotten when awards were passed out a year later. In fact The Subject Was Roses became only the fourth play in American theatrical history to win all three possible "best play of the year" awards; the New York Drama Critics Circle Award, the Antoinette Perry ("Tony") Award and a Pulitzer Prize.

The Subject Was Roses will be presented by UMSL's University Players Friday, Saturday and Sunday, April 1, 2 and 3 at 8:00 p.m. in room 105 Benton Hall. The three character family drama, will be performed by Sam Hack, Mary Lacey and Michael Jones all of whom were involved in UP's successful production of Albee's The American Dream earlier this semester.

The play is now in rehearsal under the direction of James Paul. Mr. Paul is a well-known professional actor and director with extensive experience. In St. Louis, he has directed many productions for the Webster Groves Theatre Guild and the first St. Louis professional productions of Albee's The Zoo Story and Baker's The Caretaker at the Crystal Palace.

As an actor, he was with the Gateway Theatre company where he had the leading male roles in Doll's House and Life With Father. He has had many important roles as the Municipal Opera.

He has also been very active outside of St. Louis. He directed four productions for Harvard's Hasty Pudding Club and spent ten seasons as director of stock companies. He acted Off-Broadway with the Shakespearewrights in Macbeth and King Lear and in Chicago with Joel Rithbone in The Window Boy and with Geraldine Page and Tom Bosley in Papa Is All.

Sam Hack will play John Cleary. At UMSL, he has acted in The Imaginary Invalid, Don Juan in Hell, and Carousel and directed The American Dream. He acted Off-Broadway with the Shakespearewrights in Macbeth and King Lear and in Chicago with Joel Rithbone in The Window Boy and with Geraldine Page and Tom Bosley in Papa Is All.

Mr. Baker in Come Blow Your Horn and as Elwood P. Dowd in Harvey.

Nettie Cleary will be played by Mary Lacey. She has impressed UMSL audiences as Allison Porter in Look Back in Anger and as Mrs. Barker in The American Dream. She will be directed in The Go-Between at the Theater-Go-Round at St. Louis University where she acted in Jones' The Bald Soprano.

Michael Jones, who will play Timmy Cleary, developed his fascination for the footlights as set designer and lighting designer for the productions of A Absence of a Ceilo and Look Back in Anger. He has acted at UMSL this year as the telephone repairman in Barefoot in the Park and as Daddy in The American Dream. He was also in the Carsonville Players production of Harvey.

Bean Raffle

Alpha Xi Delta will sponsor a bean raffle from Monday, March 24 through Friday, March 28. The jar of beans will be displayed in the cafeteria and in the first floor of Benton Hall. The cost will be 10 cents per guess or a quarter for three guesses. Three names will be drawn with the one closest to the actual number winning the $20 first prize. Second and third prizes also will be offered.

Edwardsville, Illinois
University Establishes Three Programs on International Relations

by Adrienne Beaudoin

International relations and affairs have been given a place in the University system with the establishment of three programs. The Office of International Studies is the center for International Studies (with a branch on each campus) and the Office of International Relations and United Nations Affairs (CIRUNA), whose president is Miss Cynthia Smyrniotis.

Dr. Erwin H. Fedler, associate professor of political science and the director of the UMEL Center for International Studies, said that the Center is primarily engaged in getting off the ground and planning for the future. The bulk of the Center's activities will begin next year.

Several projects have been established as tentative goals for the future. The bulk of the projects will be geared to the interests generated among the people it reaches. The success of the Office of International Studies and its future programs is entirely a question of interest.

The Office of International Studies is a clearing house for all activities and projects functioning within the University structure on an international plane. Schrart said, "There is a need for the University to establish a repeatable international relation involving several levels: the undergraduate student, the graduate student, the faculty, and the public. The charter for the Office of International Studies is as broad as possible so as to eventually include programs for area high schools, junior colleges, and other state-supported institutions."

The program particular to the UMSL campus only is the Council on International Relations and United Nations Affairs (CIRUNA), whose president is Miss Cynthia Smyrniotis.

Dr. Roy E. Hintz, an instructor in political science and CIRUNA's faculty advisor, said that "CIRUNA is an academic extension. It should be department wide at a minimum and should have a core membership. The program should not be limited to the political science field but should be extended to the audience at large. The tendency in the past has been to consider organizations like CIRUNA as special interest groups. This should be gotten away from.

Two Categories

"CIRUNA's activities have two categories," said Mr. Hintz. "The first is for departmental and University consumption in the form of speaking engagements and special projects. The second category is of a more specialized nature including the International Model United Nations and the Washington University seminar program."

Mr. Hintz was particularly concerned with the representation in the MMUN and the academic advantages of such a program. "The University should be represented in the MMUN. This should be on as broad a basis as possible. The delegation should not be a closed group, but preferably chosen by some sort of open process. This is as good a learning experience as any in-class academic program, and it should be included in the University's scope."

Your Psychology professor lives with his mother?

Think it over, over coffee...
The Think Drink.

Paul R. Schrart

War College in Newport, Rhode Island. From there he went to the Joint Chiefs of Staff Office in Washington, D.C. In 1963, Schrart was a member of the United States delegation to the Eighteen Nation Disarmament Conference in Geneva, Switzerland.

The Office of International Studies (OIS) is another University program involving the four campuses. While Schrart is actually connected to the Columbia campus, OIS is the headquarters for this program. The Board of Curators chose St. Louis for the University headquarters because of St. Louis' involvement in international affairs and commerce. The executive board of the OIS is composed of faculty delegates from each campus, the director of the Office of International Studies, and a representative of the University vice-president's office.

The OIS provides an opportunity for those interested in international affairs to do a great deal which one is unable to do elsewhere. The program has an emphasis on scholarly writing. The OIS is encouraging students and faculty doing research and writing papers on international subjects to have their work published by the University press. Things like this would be difficult for, say, a student to do on his own. The function of the Office of International Studies will be geared to the interests generated among the people it reaches. The success of the Office of International Studies and its future programs is entirely a question of interest.

The Office of International Studies is a clearing house for all activities and projects functioning within the University structure on an international plane. Schrart said, "There is a need for the University to establish a repeatable international relation involving several levels: the undergraduate student, the graduate student, the faculty, and the public. The charter for the Office of International Studies is as broad as possible so as to eventually include programs for area high schools, junior colleges, and other state-supported institutions."

The program particular to the UMSL campus only is the Council on International Relations and United Nations Affairs (CIRUNA), whose president is Miss Cynthia Smyrniotis.

CIRUNA outlined its plans for the fall semester in an interview with the Current. This includes a United Nations Day Tribute, a prominent international figure being sought for a lecture on that day. Miss Smyrniotis said, "This is one of CIRUNA-UMSL's most important dates as it is also founder's day on campus." Once established as a representative country to the Midwest Model United Nations, CIRUNA will host several activities in connection with the country.

A panel discussion concentrating on the economic, political and historic aspects, an open forum on the country's 'hottest issues' with a guest speaker and a mock strategy of the country in a crisis will be presented. These programs will be preliminary to the University’s representation of the country at the MMUN. A mock Viet Nam peace talk or a mock Middle East crisis is also being planned.

A national project will be the Harvard Invitational China Conference. Speakers at this event will include Senator Edward Kennedy, Jacob Javits, Arthur Goldberg, and Edwin O. Reischauer. Comparing CIRUNA to the Center for International Studies, Miss Smyrniotis said, "The Center for International Studies is the out-of-classroom academic part of international relations; CIRUNA is the out-of-classroom aspect of it. CIRUNA is the means of reaching the students."

Mr. Stephen E.C. Hintz, an instructor in political science and CIRUNA's faculty advisor, said that "CIRUNA is an academic extension. It should be department wide at a minimum and should have a core membership. The program should not be limited to the political science field but should be extended to the audience at large. The tendency in the past has been to consider organizations like CIRUNA as special interest groups. This should be gotten away from.

Two Categories

"CIRUNA's activities have two categories," said Mr. Hintz. "The first is for departmental and University consumption in the form of speaking engagements and special projects. The second category is of a more specialized nature including the Midwest Model United Nations and the Washington University seminar program."

Mr. Hintz was particularly concerned with the representation in the MMUN and the academic advantages of such a program. "The University should be represented in the MMUN. This should be on as broad a basis as possible. The delegation should not be a closed group, but preferably chosen by some sort of open process. This is as good a learning experience as any in-class academic program, and it should be included in the University's scope."

Cynthia Smyrniotis
High Point Ends UMSL Dream

High Point College used their three guard offense against the Rivermen, and it paid off in a 102-90 victory for the North Carolina school in the first round of the NAIA national tournament March 11 in Kansas City.

Playing with 6-0 All-American Eugene Littles and 5-9 Jim Colbert at guards at 6-6 Danny Witt playing at forward but shooting from outside like a guard, the Purple Panthers ran over the Rivermen with a finely executed fast break.

The Rivermen took a quick 10-4 lead as they hit their first five shots of the game. High Point took over to lead 20-19 with 13:30 left in the first half. The lead then saw-sawed back and forth with High Point holding a 53-49 advantage at halftime. Witt and Littles led first half scorers with 18 and 16 points respectively with Greg Daust scoring 13, Jack Stenner 12 and Denny Caldwell 10 for the Rivermen.

Benson's basket at the start of the second half narrowed the lead to 55-51. That was as close as UMSL could come as the Rivermen turned cold and High Point jumped out to a 63-53 lead with 17:26 left in the game. The Panthers took the biggest lead of the night at 84-65 before UMSL came back to trail 95-85 with 2:25 remaining in the game. They couldn't get any closer however and wound up on the short end of the 102-90 final.

Littles was the game's high scorer with 31 points, Witt had 28 and Colbert 22 as three guards scored 72 points. Forward Steve Tatgenhorst scored 16 points and 6-10 Greg Daust scored 13, Jack Stenner 12 and Denny Caldwell 10 for the Rivermen.

Spring Sports To Begin Soon

Beginning in April spring sports will take over the UMSL activities calendar.

UMSL's first baseball team, coached by Arnold Copeland, will play its first game Saturday, April 5, against SIU-Edwardsville. The game will be at 1:00 at Forestwood Park, the site of all home games. Forestwood is located at 825 Ferguson Avenue, west of Florissant behind Universal Match Company.

Forty-five people are trying out for the baseball team and half of them want to pitch. The baseball team's pitching staff is being guided by Ron Kinney who is using the St. Louis Cardinal method.

There are two top prospects for starting pitchers, Tim Krull and Bill Coats. The season will consist of 21 games, 10 of which will be home games. According to Coach Arnold Copeland, St. Louis University will be the toughest opponent of the season. The teams will meet once at St. Louis' field and once here at home.

Coach Larry Berres' golfers will inaugurate their second season when they take part in the Gulf American Classic April 2-5 at Naples, Florida. Home matches will be played at Creve Coeur Golf Club.

The opening of golf will mark the return of five UMSL lettermen. They are Tom Craddick, Kent Auferheide, Steve Loughner, Den- ny Chester and Steve Chamberlin. The golf schedule is stronger due to the addition of such teams as Culver-Stockton and Illinois College.

The tennis team, coached by Dr. Carl Lerner, will begin their season April 2 at Washington University. The teams will be playing to rebound from a 2-7 season last year.

Lettermen Stuart Lerner Don Breitley, Mike Lerner and Kevin Dougherty will return to the UMSL tennis team this season. The tennis schedule includes many familiar names, such as Washington University, St. Louis University, Millikin University, Southwest Missouri State, and Drury College.

Intramural News

Girls interested in playing girls' basketball should submit rosters of not more than eight girls to the athletic office, room 17 of the blue metal office building, by Monday March 24. The season will start March 27.

Rivermen Review
UMLS's Most Valuable Player
by Jack Connors

Up at 6:30, at work from 7:00
4 to 9:00, basketball practice from
4:30 to 5:30, classes from 6:45
home at 5:45, and finally bed. A rough
schedule? Undoubtedly; but 6'6" senior guard Jack Stenner followed it,
and led his team to a 15-7
and a berth in the NAIA
Tourname
Sent.

But Stenner's accomplishments
don't end there. He spearheaded
a fast break which enabled the
Rivermen to score over 90 points
seventeen times; he scored 40
points in a single game, breaking
the school record he had set the
year before; he scored over 1,250
points in his three-year career;
he averaged over 22 points per
game in both his junior and senior
years; this year he scored 558
points, and averaged over 24 per
game (at one time he was averag-
ning over 30); he led the Rivermen
in scoring in sixteen of the twenty-
two games he played, including
seven of the last ten, and four of
the five games in the NAIA; and he
was the team leader in assists.
Top on all this Jack managed to be
ded to the District Sixteen All-
Star team two years in a row
AND get a 3.5 grade point last
semester, giving him three semi-
esters in a row on the Dean's List.

Lobors Under Handicaps

Stenner's accomplishments are
very even more fantastic when you ex-
amine the handicaps he has had to
live under. When Jack and Sandy,
his beautiful wife, arrived here in
the fall of 1966, UMSL was just
beginning its first season of com-
petition against four-year col-
leges. The Rivermen had a new
teaching, and so facilities. Before
the season even started they lost start-
ing center Dave Wilson to a knee
injury. Starting guard Sylvester
Phillips was lashed by academic
difficulties at the semester, Jack,
the high-school all-district center at
Bel-Nor, was asked to play guard.
He did so in excellent fash-
and the Rivermen finished with
a remarkable 12-7 record.

The next year the Rivermen
were rolling along with a 12-5
record until grades dawed five of
the first seven players, leaving-
only Stenner and center Terry Reiter.
Jack led a patchwork lineup to an
upset victory over Southwestern
of Memphis and then into a NAIA
playoff with Rockhurst.

This year's team started off
with just four Jefferson. Two min-
utes after the season opened one of
those was knocked out for

plays at Springfield

Jack says his next ambition is
to play pro basketball. All of us
who have had the privilege of
seeing him play this year realize
that he's leaving some mighty big
shoes to fill; and while there are
a lot of talented basketball players
around, there are few with the
dedication of Mr. Jack Stenner.
Stenner recently added another
honor to his accomplishments as
he was named by his teammates
as their most valuable player for
the second straight year.

Jack has not finished his career
as a basketball star for
UMLS. He will be among twenty Mis-
souri college basketball all-stars
chosen by former MU-Columbia
coach Bob Vanatta to play in a heart
fund benefit game Saturday March
29 in Springfield, a city that thought
it saw the last of Stenner two weeks
ago.

### Headlines

**Congratulations to the coaching staff and basketball team on a really great job this year. The guys rallied back from a lot of hardships this season including completely rotten treatment from the NAIA and District Sixteen.**

In spite of these obstacles, the Rivermen compiled a record of 19-7, the best mark in UMSL's history. The record included 10-1 in St. Louis and an amazing 5-6 on the road by a team that had won only 2 of 13 road games the previous two years.

**Smith's Views of Season**

In a recent current interview, Head Basketball Coach Chuck Smith named his team's two victories over Southeastern-Memphis and the national tournament as the high spots of the season. He was also pleased with the victory over Eastern Illinois at Charleston and the win over UWM after losing at Milwaukee. Low spots of the season included the loss at William Jewell and the poor second half against Southeastern of Memphis.

**More About the Fans**

Following the game at Kansas City last week, the players again committed to me about the tremendous spirit of their fans. Although stunk almost at the top of the Municipal Auditorium, the UMSL followers made themselves heard by the players and everyone in the building.

**Stenner vs. Fredricks**

For the benefit of the NAIA and District Sixteen, I would like to point out that Jack Stenner outscored and outplayed both Gall and Virgil Fredrick in their three game span. Stenner scored 175 points in the three games while Gall scored 77 and All-American and district MVP Virgil scored 32.

Although Drury outscored UMSL in the three games 207-194, UMSL's three top scorers, Stenner, Daust and Caldwell scored 158 points as opposed to Drury's top three, Virgil, Gall and Roland Smith, who scored 112.

**Who Starts Next Year?**

There should be some great fights for starting jobs on next year's team. Danny Caldwell, Joe Laukemper, Chuck Henson and Denny Rohn will all be back at forward along with Jim Rohr up from the JV and Denny Whelan who will be trying a comeback after his elbow injury. Greg Daust and Bruce Ryan should be back at center. Jack Stenner will have graduated. Verle Rohn and Rick Utage will be back at guard and Mark Bernstein will be up from the JV. Clarence Slaughter, who found himself in the building.

"A computer has no mind of its own. Its 'brainpower' comes from the people who create the programs," says Rod Campany.

Rod earned a B.S. in Math in 1966. Today, he's an IBM Systems Programmer working on a portion of Operating System/360, a hierarchy of programs that allows a computer to schedule and control most of its own operations.

A mixture of science and art

"Programming" means writing the instructions that enable a computer to do its job. Says Rod, "It's a mixture of science and art.

You're a scientist in the sense that you have to analyze problems in a completely logical way.

"But you don't necessarily hunt for an ultimate right answer. There can be as many solutions to a programming problem as there are programmers. That's where the art comes in. Any given program may work, but how well it works depends entirely on the ingenuity of the programmer."

Programmers hold a key position in the country's fastest growing major industry—information processing. Business Week reports that the computer market is expanding about 20 percent a year.

Programming at IBM

"It's a chance to use everything you've got."

You don't need a technical degree

If you can think logically and like to solve problems, you could become an IBM programmer no matter what your major. We'll start you off with up to twenty-six weeks of classroom and practical training.

Check with your placement office

If you're interested in programming at IBM, ask your placement office for more information.
