Six-car pile-up on campus

A six-car pile-up on the lot near the blue metal office building was precipitated Friday when two cars collided, sending one careening out of control into the nearest car, which in turn crashed into the car parked beside it, and both were propelled into the cars opposite them before the momentum was dispersed. There was major damage to at least three of the vehicles, with minor damage to the rest. For the better part of the afternoon, campus security and County police sought to sort things out.

Chancellor out when CEW petition arrives

By RON THENHAUS
Current Staff Writer

Last week's protest by the Committee to End the War against on-campus recruitment by the Air Force and by McDonnell-Douglas Corporation was highlighted by an abortive attempt to present petitions on mass to Chancellor Glen R. Driscoll, last Thursday.

A crowd of about forty marched single-file, shouting anti-war slogans, to the Chancellor's office. However, he was not in for the afternoon, so they chanted their way back to the lobby of the Administration Building, where three Air Force recruiters had set up a table.

The recruiters showed little emotion as the protesters encircled their table, chanting, "U.S. out of Southeast Asia—Air Force out of UMSL."

After about five minutes, the demonstrators squared silently in a semi-circle around the front of the recruiter table.

The previous day, CEW had sponsored a 12:30 pm. rally in the University Center courtyard to build support for their petition. Marilyn Fried, the first speaker, described the purpose of the rally as "the beginning of political action movement at UMSL, which would hopefully spread to the community as a whole."

Vietnamese veteran Darrell Barnhard maintained that "as long as there are Viet Cong alive, the war is not over."

He cited the recent South Vietnamese presidential election and increased insubordination of soldiers to their commanders, adding, "We have to let the people know what is actually going on. It is obvious this damn war is finished."

Wolves invade campus

By ALLEN RODAKOWSKI and D. J. - Current Wolf Men

The big, bad wolf may not be so "bad," but "big" still holds true. Two of these big fellows were brought on campus Friday as part of a nation-wide tour by the North American Association for Protection of Predatory Animals.

The beasts were two males known as Clem and Jethro. Jethro is the older, being six years old. He comes from the Rocky Mountains and is of a light gray color. Clem is younger by three years and comes from Arizona. These two wolves, the more restless of the two, is a darker gray.

The wolves, held by huge chains by John Harris and Coyote, an Inuit hunter, held court on the grounds in front of the Life-Science building for about two hours. Jethro lay on the ground while Clem paced around. Students were somewhat surprised that they were able to pet the wolves like big dogs.

"They're not tame," explained Coyote, "they're just tolerant. They can't be raised as pets. They'd wreck a house in short order."

"That's what frustrates a lot of people when they try to make pets out of a wolf,"

onlookers were warned not to bring lunches or food. The wolves would dispose of these very quickly. The wolves also liked to grab books and papers in particular.

Younger Jethro is the dominant of the two wolves. Each morning he wrestles Clem to the ground and barks at the other to demonstrate his superiority. However, Clem's no fool. If he gets separated from his monkey business, he lets his feelings be known and Jethro will go away (age will be served, right, Clem?). Clem and Jethro are timber wolves of the class Canis Lupus, Dr. Bedford Vestell, a biology professor here explained. Dr. Vestell is interested in getting an organization called the Wild Canine Research Center developed at Washington University's Tyson Research Center. Dr. Vestell said "The purpose of this research center would be to preserve the diminishing stock of wolves, to study them, and to have a World Information Center for the purpose of answering any questions about wolves and other wild canines."

Activities planned for U.N. week

The University Program Board and the Council on International Relations and United Nations Affairs (CHINA/UNSM) have put together a wide range of activities to mark "Interdependence Week, 1973."

Programs will start Friday, October 22, with the presentation of a model general assembly by the St. Louis area Model United Nations Federation at the McDonnell-Douglas Corporation Headquarters (Building 33)

Movies concerning the "racial" regimes in the United States will be shown in 222 J. C. Penney building on Monday, October 25. There will also be a tribute that day to the Universal Soldier, to make Vietnam's Day.

Films will again be the medium Tuesday with the focus on the People's Republic of China, whose admission to the United Nations will be discussed for the first time with U.S. support.

October 27 marks the commencement of the "live" portion of the program. There will be a presentation on the situation of the Pakistani refugees in India, by Dr. Rao of India, who is executive secretary of the World University Service, and Mr. H. J. Ismail, of Bangladesh (East Pak-istan) who is a member of the U.N. correspondents' corps and whose brother just returned to this country after being wounded in the fighting in Bengal.

Also on Wednesday, both cafes will serve a "lunchfor hunger" which will consist of rice (cooked in lard), bread and powdered milk. All proceeds will go to the United Nations Emergency Relief Fund for Bengal Desh. The price will be $1.00.

Encroach (murder of the environment) will be the theme of the presentation on Thursday, with a discussion by Dr. Taghi Farzami of the Center for the Biology of Natural Systems at Washington University.

The discussion will focus on the effects of pesticides and herbicides on man and his environment.

The Silent Spring of Rachel Carson and Secret of Secrecy (concerning chemical and biological weapons) will be shown.

Dr. Zhignev Brezinszki, a renowned Avian expert, will discuss the Soviet Union and consequences of the Admission of the People's Republic of China in the U.N. in a lecture October 29.

Interdependence Week will end November 1, when Sharadad Khan will speak on the Liberation Movement in southern Africa and the legitimate struggles of the black majority for their rights.

Khan is the representative to the human rights commission of the Liberation movement in the Portuguese colony of Angola.

Headquarters for U.N. week will be 126 J. C. Penney building.

END
Better luck next time

You cannot help sympathizing with the efforts of the Committee to End the War. Last year they staged a massive protest against on-campus recruitment by representatives of McDonnell-Douglas Corporation, but the targets of their wrath decided to choose the better part of valor. Once again, last week, MAC recruiters declined to take up the gauntlet. Last year their "Sink the Navy" effort seemed to faze the Navy recruiters very little if at all; last week, Air Force recruiters seemed generally unimpressed with the chanting crowd marching in circles around their table.

To top it all off, they whipped themselves up to present a petition, assailing on-campus recruitment policies to Chancellor Glen R. Driscoll last Thursday, only to learn that he was out for the day.

You certainly cannot fault their dedication to putting an end to the war. However, you occasionally get the impression that perhaps their emphasis is misplaced. It seems that they could put their energies to more effective use by pushing the candidacy of those who share their convictions, rather than attempting to cow admitted unresponsive giants like MAC, the Air Force, or other government agencies.

Letters to the editor

Help light the darkness

Dear Editor,

I am sure that the reports in the metropolitan press about the savage blinding of a 17-year-old Wilma Chestnut, by a robed person who invaded the apartment where she was "babysitting," have struck deep into your heart and your conscience.

The horror of this act, which was accomplished so that Wilma could not identify her attacker, and which has left her permanently blind, leaves us all with a sense of soul sickness and frustration. As the community wonders what we can do to help, Wilma is recovering from the immediate wounds at Homer G. Phillips Hospital. She is experiencing her first day as a blind person.

All of her life, Wilma Chestnut has been an optimistic person. As a child she was able to lift the mood of her sisters by calling upon her fertile imagination. Her mother recalls that one of the children had a desire for a dress for which the family could not afford, Wilma was to the rescue and to the relief of her sisters' tears, with the very positive statement, "Sisters, don't cry, we are really rich folks. We just can't get in our money today. Some day soon we can have all that money and we will spend it then. Today, let's just be happy thinking about how we are going to spend it when it comes."

This imaginative attitude has stayed with Wilma and at age 17, doomed to a complete change in the direction of her life, and with the knowledge that from this day forth she must walk in darkness, Wilma has hope and determination. Her spirit is indomitable.

Although her future is dark and her path is uncharted, she has bravely begun to face her new life as a blind person.

Wilma needs great, her loss is irreparable. Won't you help Wilma find a spot of brightness along her way?

The WILMA CHESTNUT FUND has been established to help pay for her medical costs, and the long road toward her education and training to function in a sightless world. One St. Louis County woman has offered to give $1,000; if this would restore Wilma's sight medically, total eye transplants are not now possible. We hope that in the future this can happen, but for the present, your help can be in the form of financial aid and moral support.

I urge your interest and friends to contribute to the WILMA CHESTNUT FUND today. Checks may be addressed to:

St. Louis, Missouri 63121

Bad example?

Dear Editor,

I think the Current set a bad example in its recent clergy face-flahipping editorial (October 14, A Bad Example). The Current contends against Rev. Edward J. O'Donnell that the clergy exercised more than their ministerial responsibility in speaking against the proposed amendment to the Missouri constitution which would have allowed the legalization of parimutuel betting. The Current reads in part, "When a clergyman responds to a social issue he is particularly on issue with strong moral overtones... and especially when he speaks from the pulpit his opinion necessarily carries greater weight than those of a mere politician or editor."

This compliment to a pastor's motivational ability may not reflect the influence today's clergyman really has on his congregation. Do you really think people listen continued on next page

Special oppression

More than any other phase of struggle, the Women's liberation movement has been the most misunderstood and hence, the most commercialized. The true issues have often become hidden under nonsensical ideas about fashion trends and childish slogans like "man... the common enemy" which is such trash for this which threatens to reduce the women's movement to the level of a college fad, and has made it so far totally unacceptable to a great number of women. Black women are to a work force largely forced to relate to such a squalid interpretation of the women's role in society. The really sad thing is that, overshadowed by this so-called women's liberation (which is a pittance for some bored women who are just passing the time until they are ready to marry and settle down), the real movement--so badly needed--cannot get the hearing it deserves.

Understanding the true need for a women's liberation movement can be attained by considering some facts concerning women in the context of today's society. We must first understand that as society becomes more and more industrialized, greater numbers of women are joining the work force--often forced there by the need to help a husband eke out a subsistence. As a result they now constitute more than 37 percent of the entire workforce. In today's capitalist drive for greater profits, the working woman finds that she holds the bottom position on the list of the exploited.

When seeking employment, women are discriminated against twice as much as men, and on the job, they retire at the age of 65. Women are the cheapest workers--to be paid less and work longer hours for equally low pay. Among many companies, the better paying jobs are called for qualifications which purposely exclude women. With such barriers operating there is little chance for women to advance. To further complicate the working woman's life, most companies do not approve maternity leave--with or without pay. Many women who leave work to have a child must seek new employment afterwards.

I realize, of course, that the brief mention of these facts does not even scratch the surface of what the oppression of women is all about. It exists in every phase of life and is aggravated by the age-old failure of male supremacy which helps the system to continue this special oppression. The working man who insists on male supremacy and condones the discriminatory measures taken against women, must come to realize that he is assisting in the creation of a work force which cannot be used against him. It is a fact that in many instances, men workers on strike have been replaced by women who, naturally, work cheaper in the same position.

Women alone cannot win equal rights for women though only they can lead the struggle. Men must learn to accept their leadership and fight to end this special oppression whenever and wherever it occurs.
Letters continued

to sermons, let alone obey them? Many view the Bible, but they really do not affect the moral decision making of their parishioners. There are those who believe that Biblical principles, and even provide channels for action, but people need to figure out what they want, anyway. Current readers may want to consider whether they are really Christian to see if what they commit looks like.

But more important, the Current feels that the clergy were used to present only one side—those presented by the anti-betting forces. This does not speak as much against pastors (who are eager for all the money they can get) as it shows the cleverness of the anti-betting forces. I see no reason why the more progressive forces in the state can not make their case through the pulpits, too.

For example, an October 11 letter from the Citizen's Committee of the Families for Children: Recruitment Service was sent to St. Louis area churches asking their help in finding families to adopt hard-to-place children. The letter indicated that the churches "had been very helpful in the past." To reverse the Current's rhetorical question. How can Missourians hope to make progress when progressive readers are ever ready to venture into any fray without regaining their own concept of righteousness to their (less enlightened?) neighbors?"

The Current's conclusion that "clergy should restrict the use of the pulpit to its proper role, that of tending to the souls of their flock" is just the opposite of what to give. "Tending to the souls" is a hopelessly irrelevant occupation and would prevent the churches from becoming the agents of much needed change. Unless, of course, by 'tending to the souls' the Current means, "To bring the good news to the poor, to proclaim liberty to captives and to the blind new sight, to set the down trodden free, to proclaim the Lord's year of favor." Jesus claimed that 'job for himself (Luke 4:18-22) and his followers are at it still.

Inter-Varsity Christian Fellowship, UMSL.

Draft ceiling

Draft ceiling set at no. 125

The Selective Service System has announced that Random Sequence Number 125 would be the ceiling for induction into the military for young men born in 1951 or earlier, or those registrants born in 1971. Permission to use a draft of registrants born in 1971, the first priority selection group — that is, those registrants born in 1951 or earlier who received lottery numbers in 1971 or 1969 and are available for induction during 1971.

The Department of Defense announced a 10,000 draft call for the remainder of 1971. Draft director Dr. Curtis W. Tarr said that Selective Service boards would deliver 5,500 in the period November 9 - December 9.

Tarr said that the Selective Service System has directed local boards to give at least 30 days notice to all registrants facing the induction process in coming months.

Current draft regulations require 18 and 21.

Tarr said that the uniform national call provisions of the new law assures every young man in the 1951 group who is 1-A and qualified with a RSN of 125 and below that he will receive an induction notice in the near future.

Tarr pointed out that many of those men will join the Army in January, February or March of next year because of the extended liability provisions of the Selective Service regulations.

"Equity of treatment for all registrants requires that all men who have RSNs of 125 or lower face the induction process," Tarr said.

RSN 125 was the ceiling for inclusions through June 15.

Tarr also said that he has directed local and appeal boards to defer actions on classifications, personal appearance, and appeals until new regulations containing draft reform provisions are effective.

The 1971 amendments to the draft law which were recently passed by Congress and the Selective Service System to publish all regulations changes in the Federal Register at least 20 days before they become effective.

"Because of the many reform provisions in the new law and being instituted by the System, it would be unfair not to extend these forthcoming advantages to registrants now facing classification or appeal actions."

That's why the ruling class rules...

The struggle in this country has taken so many twists and bends that many people (people who should know better) have concluded that it's going around in circles. That's one reason why the ruling class still rules.

The lessons of the past have indicated that those in power and action must be coupled with a profound awareness and clear analysis of the real issues at hand. Rather than trying to piece together an accurate picture of the movement both nationally and internationally by reading the bourgeois press of why not try the Guardian, an independent radical weekly with an independent line. The Guardian's long-standing dedication to people's struggles and opposition to ruling class exploitation have made it the largest (some consider it the best) movement weekly in the country.

Stop reading between the lies.
Read the Guardian.

Long: human conditions 'box score' needed

Social scientists should develop a "box score on the human condition" of inner-city residents as a means of finding solutions to urban problems, Dr. Norton E. Long, director of the Center of Community and Metropolitan Studies, said Friday.

"Politics that are little better than patent medicines exist because we lack concrete yardsticks by which to measure success or failure," Long said. "Improvement, pure and simple, is only possible when we can measure and appraise the effectiveness of programs."

Addressing a conference of the Missouri Association of Junior Colleges at the Sheraton-Jefferson Hotel, Long said, "The condition of the city is the condition of its people. Too often this is forgotten."

He urged that this human element be associated with the term "the city" so the term will no longer be "an empty and blasted abstraction."

Long also recommended the city be regarded as a business, keeping economic books on its investments in housing, health, transportation, police and other services.

"The city," he said, "has only the brightest idea, if any at all, of what return it gets on its investments, or if indeed it should expect to get any return on those investments at all."

"If the city could be regarded as a business—the public's business—its leaders might ask how the business is doing and why it is not doing better than it is," Long said.

He said the "most critical dimension for the city and its inhabitants" is education, and called for "the best possible fit between the education (the city) provides and the jobs that industry and government need to have done."

"An education designed in most people's needs would make major contributions to the improvement of the public's health, its nutritional habits, its sanitation, and a host of things that can do more than doctors and hospital beds to improve the city's health performance," Long said.

"All the threads of the city's problems tie into the purposeful, intelligent development and use of its manpower," he pointed out, citing St. Louis' work-study program as one successful one of the city's manpower, but said it should be greatly expanded from the present nine companies and 50 students.

"Its expansion to a greatly needed—500 companies, 5,000 kids for starters—is needed to begin to turn the city around." He identified the two factors driving people away from the city as crime and the schools, and asserted that city life would hold and distinct advantages if these two problems were corrected.

"The city is the last reservoir of housing within the reach of many and increasingly important of single family housing for the middle class," Long said. "Not for a long time has the economics of new and used housing so favored the city over the suburb."

He urged that social science "seek to assist the city in developing a strategy to concentrate the investment of its scarce resources in those areas that are most promising for the improvement of significant dimensions in the lives of people."

"Above all," Long asserted "it will attempt to help people keep score on what is going on."

Referendum approved; 7 new reps elected

The proposition on the establishment of a "Commission on Student Governance", on the same ballot as candidates in the New Student Elections, was approved.

The vote was 415-to-88, against. Seven out of twenty candidates were elected to the Central Council.

Those elected were: Joe Farrell, 118 votes; Susan Flury, 112; Ed Ford, 99; Mike Dare, 87; Steve Walsh, 78; Garry Philipp, 71; Barb Schneider, 63;

Unsuccessful candidates, in descending order, were: Catherine Helbig, 61; Mike Stahl, 53; Dave Stein, 51.

Mimi Pash and Gary Wood, 16 each;
Steve Landrop, 43;
Mathes J. Phillips, 41;
Michelle Boss and Ron Derryberry, 29 each;
Tim Potts, 31;
Jannett Dorgan, 30;
Pauline Mollot, 29;
Paul Bedgguth, 26;
Results of the election were made public at noon, October 7.

Minister explains potent power of subconscious

By JUDY KLAMON
Current Staff Writer

"Be careful," warned the elderly looking Lutheran who sat across the desk in the small office sternly looking me in the face. "Your subconscious mind is an impersonal force ready to do your bidding.

"It is your puppet. If you can become the puppeteer your powers are unlimited. But if you are not in control of your puppet then other puppeteers are ready to manipulate your puppet.""

The speaker, Rev. Lester Bashara, minister/teacher at the Science of Mind Temple at 222 North Brentwood Boulevard, counsels individuals to become aware of themselves, and their own unique worth before they proceed to crusade through life, whether it be active or passive. He contended that young people in the break-away from the "establishment" do so because they feel enslaved. If there are no problems from one side, there are problems from the other. They commit themselves to causes which will supposedly benefit mankind, but they try to solve these outside problems with outside forces, according to Bashara. There must be a joint cooperation from within as well as from without.

Before accepting his position in St. Louis, he had served congregations in Denver, Sacramento and Pasadena.

Bashara, a graduate of the Institute of Religious Science, attended Iowa Public Schools, Morningside College and the Chicago Conservatory of Music. Though he believes in peace, Bashara maintained, "We can't scream and shout, people about peace and expect peace to come about. Each individual is the center of the universe—the better he becomes acquainted with himself and his relationship to other people and the universe, the more effective his life becomes."

The quest for peace in Religious Science is carried out through direct self-improvement rather than through prayer as it is commonly conceived.

Religious Scientists feel "it is done unto you as you believe," Bashara noted.

"So we don't just mouth prayers angescenting, begging, begging imploring—because, after all, who are we imploring?"

"We think that the intelligence that guides the universe—the in-telligence that we call God—is within, around and through every person. He accomplishes everything through us.

"God is love, man is loving; God is peace and harmony, but man must bring to the front those things in his own life.

"God is where I am, life is where I am. I'm the little ego and the universe is the God I love. There is no difference in us except degree. We are as much of the universe as God and its potential as we dare inwardly to accept.

"The attributes of love, peace, harmony, wisdom, and other attributes of good are exemplified by Jesus, Buddha, Mahatma Gandhi, and others who are remembered for how well they lived their lives.

"While Religious Scientists believe in the teachings of Christ, they don't believe in the trappings of "Christianity," which have become associated with those teachings, according to Bashara.

"Religious Science respects the philosophies and doctrines of all men," he said. "But we don't impose our doctrines on anyone.

"Our doctrines involve the concepts of Plato, Plotinus, Emerson, Kant, and the contemporary third force psychology of Maslow, Rogers and others."

In counseling sessions, "We don't research a person's past to help him with today's problems. We try to help him with today's problems and how they are going from here."

"We point out that the people are responsible for everything they do. Man is buffeted as long as he believes that he is controlled by outside circumstances.

"Bashara suggested that people ask themselves this question: How do you know you cannot do the impossible?"

"Have you ever tried to embody all the love there is in the ultimate of faith and courage? As long as you are the puppeteer who knows how far your puppet can go?"

Lloyd named programs director

The Extension Division has appointed Sam R. Lloyd director of Business, Industry and Labor Programs.

He will be responsible for planning and implementing courses, seminars and workshops in the business, industry and labor sector on topics of industrial interest and on general areas concerning general audiences to specific subjects designed for special interests.

Lloyd is an instructor of marketing in the School of Business Administration and is a doctoral candidate in marketing at Washington University.

He holds B.S. and M.B.A. degrees from Oklahoma State University and taught at Oklahoma State and St. Louis University before joining the UMSL faculty in 1970.

Accoring to some of the rumors floating around the campus, the observation deck on the 13th floor of the tower is going to be:
A. Control tower for the airport;
B. Chancellor's office;
C. Watch tower;
D. None of the above.

Would you believe part of a faculty lounge area?

The tower, which is part of the Business and Education Complex will house such departments as Economics and Sociology. Chancellor Glen R. Driscoll will remain in Bentley Hall.

The five story Arts and Sciences building will be the new home of such departments as Fine Arts, Philosophy, History, English, the Dean of Arts and Sciences, and the Dean of the Evening School.

John Perry, campus Business Officer, says that the Arts and Sciences building is very near completion and that classes are being scheduled there for next semester.

On the other hand, the tower, which is in varying stages of completion, doesn't look like it will be finished by the January first deadline. Delays in construction have left each floor at a different level of completion.

As part of the B.E. complex, the tower can be entered through second and third floor passageways, and through an underground tunnel besides the stairways and elevators on the ground floor.

Each floor will contain about 15 offices--cubicles about 8' by 8'--with some floors having large seminar and teaching assistant rooms.

The top two floors of the A and S building--maze-like catacombs--will house about 200 offices. The bottom three floors will have 23 classrooms and two auditoriums. The additional classroom spaces will facilitate the increase in the student body by approximately 3,000 students. It will also mean a freer reign in the scheduling and sizing of classes.

"The buildings we have now will have to last us until new construction of buildings is appropriated," said Perry. "So there won't be immediate full capacity occupation of either of the buildings. We've got enough room for growth to last us the next three years."

In order not to spoil the teaching assistants and instructors, and force them through the trauma of moving on later, they will still share offices even though there will be enough room for them to spread out at the present time.

"We have to maintain the 'pecking order,'" commented Perry. "An instructor or T.A. shouldn't be given all the privileges of a professor. If he has a private office one year, and the next year we need that space, it's awfully hard to get him to move into a double office."

Therefore, much of the tower and the fourth and fifth floors of the A and S building--which is all offices--will be vacated next year.

"Every year we ask for more buildings," said Perry. "We still need new music and art facilities and more science labs."

So it doesn't look like the building boom here is over yet—after January it will just rest for a while.
Elevator, elevator, we got the shaft!

The labyrinth lives again in the new Arts & Sciences building.
Brown building set as recreation center

The Brown building, recently secured by the Central Council for student use, is intended for use as a recreation-housing type area.

All the good tables, chairs and couches will be salvaged, and it is hoped that a television can be obtained.

A refreshment area with a full-time clerk is planned, with other recreation facilities to include four billiard tables and four ping-pong tables.

The treasurer's report at Sunday's council meeting listed the following.

Ecology course offered

The ecological effects of heating, cooling and lighting of the home will be studied in a short course offered by the Extension Division, October 27 through November 17.

Practical applications of energy conservation will be examined in order to reduce heating and cooling costs.

"Energy, Ecology and the Home" will also study the operations of household tools and appliances for the purpose of creating new usage patterns which are less detrimental to the environment.

Dr. Charles C. Foster, assistant professor of physics and Extension science specialist here, will conduct the course.

As a physicist, he will look at the household as a "household engineer" and will explain ways in which it can, on a day-to-day basis, improve the interaction of "plant" the home, with the environment.

"Energy, Ecology and the Home" will be presented 9:30 to 11:30 a.m. Wednesdays, at the J. C. Penney Continuing Education Building.

For more information, call J.C. McCurdy, Extension Division, at (314) 433-5961.

UMSL coed named queen

Miss Maureen Daly, a student on this campus, was selected 1971 Homecoming Queen at the University of Missouri—Rolla, Oct. 14.

Miss Daly, a senior, is majoring in English—education.

She is also a member and recording secretary of Beta Sigma Gamma sorority.

October 20-30

THE UNCOLA™ MUSIC MONEYOFFER

Get any of these top Record albums for only $3.80 and 7UP® proof of purchase (save up to $2.18). 8-Track and Cassette Tape albums, only $3.98 (save up to $4.00).

To indicate the category you want for each selection, circle the letters: B for Records, S for 8-Track Tapes, C for Cassette Tapes. Then enter the code numbers or portions of the code number you want and the prices in the appropriate columns. Please enclose full payment along with these 7UP bottle cap liners or other 7UP proof of purchase® for each selection. (NO POSTAL MONEY ORDERS.) Make checks or money order payable to: UNCOLA Music Offer.

MAIL ORDER FORM TO:
UNCOLA Music Offer, P.O. Box 7778, Indianapolis, Indiana 46206.

For important circle either "B," "S," or "C."
Brewer 68 paces Open field

"It was a great tournament," said UMSL Open tournament director Larry Berres of the record 45 entrants in the third annual event, held last Friday at the St. Charles Golf Club 18-hole course.

On a pleasant though cloudy afternoon Ron Brewer, competing in the Varsity division, led all players with a par 68, equaling the tournament record set last year by Gene Dodson.

Randy Gray was second for the varsity, checking in with a 73. Ralph Lageman carded a 71 for the low gross championship in the student division while Ron Arnud and Mike Long tied for low net scores of 71, earning handicaps of 8 and 14, respectively.

Gary Wahner was second with a gross card of 73 in the student category.

Miles Patterson and Fred Wilke tied for low gross in the faculty competition with 74 while K. W. Barrett took net faculty honors with 72. L. Barton was second with a net of 73.

Bob Carr hit the longest drive of the day, a 285 yard blast while the Current's own Bill Leslie hit the closest shot to the pin, with a seven iron which stopped 5'8" from the pin on the 16th hole.

"It's enough to drive you to drink!!!

**by DARRELL SHOULTS**

Someone remarked to me the other day how strange it is that Southern Illinois University Edwardsville should be so consistently good in sports. He said, "They're good in basketball. They're good in football. They're good in baseball. They're good in soccer." Who says the Rivermen are no good? They have yet to beat the Cougars in soccer.

Our Illinois Rivermen continued their four-year dominance of UMSL's kickers Saturday with a 6-0 victory over the Cougars. Last year they whipped the Rivermen by exactly the same margin, beating them 4-0. So now you wonder why? How come the Cougars always win their matches against the Rivermen? Two of the reasons lie in the persons of John and Chris Carema, whose brother Joe is a Rivermen kicker, and where a couple of b-a-d soccer players, (Joe in the newest sense of the word).

John Carema almost single-handedly took the Rivermen apart Saturday. Before the first period was over big John shot a pass over to outside-right John Diseinm (who already was single-handedly taking the Rivermen apart Saturday). He kicked the ball out of the Rivermen's territory and into the Rivermen's end zone. Joe Carema added one more point for the Cougars on the second attempt.

In the second period, Carema booted the integrated black and white ball past O'Toole after taking a cross from inside-left Tom How. Two for the Cougars and another point for Carema.

But then the second half began and the Cougars scored, the brothers Carema gathered four; John had two and Chris had one.

That puts the Rivermen in kind of a nasty spot. They were looking for an NCAA post-season playoff berth, and wanted to beat a No. 1 ranked NCAA team to impress the selection committee.

So, out of six points (three goals and three assists) the Cougars scored, the brothers Carema gathered four; John had two and Chris had one. That puts the Rivermen in kind of a nasty spot. They were looking for an NCAA post-season playoff berth, and wanted to beat a No. 1 ranked NCAA team to impress the selection committee.

- River Rats 1-1-2
- Sigma Tau Gammas 1-1-0
- Drangings 0-2-0
- Ramchargers 0-4-0

*Clinched League Title*

Head and shoulders above the rest, at least for a moment, SUU-Edwardsville's John Diseinm软件 a shot while UMSL's Frank Flesch rapidly changes direction. The Cougars continued their mastery of the Rivermen last Saturday, 6-0 in the game played last Saturday on campus. In the background is the Cougars' Chris Carema, who scored the last goal of the afternoon for the visitors.
