Bee invasion swarms campus

by Frank Watson

Question: What is the latest problem bugging UMSL students? Answer: Bees. The problem is most obvious in the University Center where the garbage cans by the University Center and Library where the garbage cans are apparently going after coke and other sugar based wastes, but it exists campus wide.

Susan McNary, R.N., Head Nurse of the Student Health Center said that there had been about 15 or 20 people reporting to the Center for treatment for bee stings in the last month and a half from homes or offices, but that there was no way to guess the actual number that have been stung.

"There are a lot of people who get stung and don't come over and report it," she said. To help alleviate the problem the University has asked for a bid on a trash compactor. "We are aware of the problem, we have ordered the compactor, and we feel this will solve the problem," Chris Graham, Personal Assistant in Training and Safety, said.

Additional action is being taken in not moving the trash containers farther away from the loading dock, she said. These are the large, gray containers that must be emptied with special machines.

The trash compactor has been ordered, but it is not sure when it will arrive and be put in use. "We're hoping for cold weather," Graham said.

Apparently cold weather is the only sure way to be rid of the bees, McNary explained. "You can't control bees. To find every hive and to spray every gutter would be an impossible task." A hive in a tree by the University Center, she said, has been removed.

The poison which would be used to get the bees would be chlorodane, and "chlorodane is pretty bad stuff," according to Paul Kohlbrenner, Assistant Superintendent of the Physical Plant.

"We use chlorodane and it gets in the air and is carried by the wind, and all of a sudden we have a lot of sick students," he said. It is also dangerous in that it loses its potency slowly. "It gets in the ground, and the worms eat it, then the birds eat the worms, and everything gets poisoned.

"You don't just go throwing that stuff around. He also questioned the usefulness of spraying, saying that no matter how many you may kill by spraying today, tomorrow the ones that got away return with a bunch of others, and then you have to start all over again.

"We'll just keep our fingers crossed that it'll frost soon and they'll go away and be forgotten about," he said.

A bee sting can, in very rare cases, be dangerous, but according to McNary "most people who are allergic to bee stings know it and take the proper precautions." And if an emergency situation is in progress, this can be taken care of, since there is a hospital just across the street.

She feels that there is not that much of a hazard in bee stings, "People get stung at home," she says, "and they don't seek aid. It just so happens that we're here to serve the students, so they come in for treatment when they're stung here and there wouldn't be a problem.

What should a person do if he or she is stung by a bee? The best thing, McNary said, is to remove the stinger and apply ice to the sting. "An allergic reaction begins to set in then further aid should be sought. Some people may apply a paste of baking soda and water, she said.

"Can a person take precautions against being stung?" "It's best to avoid the bees," it was generally agreed, but it was admitted that the bees are so widespread sometimes this just isn't possible.

Advance registration to begin in two weeks

Pre-registration for currently enrolled undergraduate day students will be held from Wednesday, Nov. 7 through Wednesday, Nov. 21. Students may obtain registration packets in the Administration Building beginning Tuesday, Nov. 6 from 8:30 am through 4:00 pm.

Advance registration for currently enrolled Evening College students will be held Mon., Nov. 6 through Wednesday, Nov. 21. Registration packets may be obtained in the Administration Building beginning Mon., Nov. 5 from 8:30 through 9 pm, with the exception of Friday evenings, when the Admissions office closes at 5 pm.

Pre-registration for currently enrolled graduate students will be held Mon. and Tue., Nov. 19 and 20. Registration packets may be picked up in the Administration Building beginning Tuesday, Nov. 6 from 8:30 through 9 pm with the exception of Friday evenings.

The bulletin put out by the Office of Admissions and Records erroneously stated that graduate school pre-registration would be held Oct. 19 and 20 rather than Nov. 19 and 20.

Special m.i degree graduate students are not eligible for participation in advance registration procedures.

Registration packets will be prepared automatically for all students who plan to re-enroll in the divisions in which they are currently enrolled. Those undergraduates who plan to enroll in divisions other than those in which they are currently enrolled must submit requests for a permit to re-enroll prior to Oct. 25. These slips are available at the Admissions office.

Students planning to apply for admission to the School of Education or the School of Business must submit requests before Oct. 25. Only those students with a 2.00 grade point average or better, and who have completed 60 or more credit hours will be considered eligible for admission to either of these two schools.

Students currently enrolled in the Evening College, who wish to transfer to the day division, must submit requests at the Admissions office prior to Oct. 25.

Detailed instructions will be distributed to students with the registration packets.

Regular registration procedures for Evening College students will take place on Mon. and Tue., Jan. 14 and 15, 1974.

Baha'í relates to today

by Junice Talamanes

Dr. E. Amanat, head of the Children's Psychiatric Division at St. Louis State Hospital and Mr. Al Dichter, a psychologist, will speak to UMSL students at a meeting sponsored by the Baha'i Club on Tues., Nov. 13. The discussion will explore the question of how Baha'i relates to contemporary man's social, psychological and spiritual well-being. Both men serve on Baha'i administrative bodies in the St. Louis area.

Shoghi Effendi, head of the Baha'i community throughout the world from 1921 to 1957, has written the following in a book, "The Promised Day is Come":

"The fundamental principle enunciated by Baha'u'llah is that religious truth is not absolute but relative, that Divine Revelation is a continuous and progressive process, that all the great religions of the world are divine in origin, that their basic principles are in complete harmony, that their aims and purposes are one and the same, that their teachings are but facets of one truth, that their functions are complementary, that they differ only in the nonessential aspects of their doctrines, and that their missions represent successive stages in the spiritual evolution of human society.

Dr. Amanat and Mr. Dichter will address themselves to this subject at their scheduled meeting Tues., Nov. 13 at 12:30, Rm. 222, J.C. Penney Building.
Sex to be offered at UMSL

by Yvonne Rehg

Could a black person know what it is like to be white? Could a white person know what it is like to be black? Could a woman know what it is like to be a man? Could a man know what it is like to be a woman? The answers to these questions are debatable. The answer to the latter question, is presently being debated by several persons who are questioning a course called Sex. This may be proposed to the curriculum committee for approval sometime this year.

Although it may be opposed by a few, the subject matter of the course, Sex, has been received positively by many faculty members and students. The course, as it is presently being discussed, will cover several areas of study including sex in literature, anthropology, biology, and psychology. Some of the topics being considered are the attitudes toward sex as expressed in Western literature of different ages, the origin of sex as expressed in modern and Darwinian theories of evolution, biological sexual functions, the roles of men and women in society, and the psychological theories concerning sex, including the consequences of Freudian thought on personality development in modern women.

The reservations concerning the course are based primarily around the teaching staff. The four teachers who drew up the course and presently plan to teach it are Gene Burns, associate professor of history; John Boswell, associate professor of Psychology; William Hamly, professor of English; and Frank Moyer, professor of Biology. Although to some, the sex of these instructors does not matter, several faculty members and students have expressed concern about the all male teaching staff. The concern was expressed by John Owsoka, associate professor of English. "In most courses, the teaching staff, whether it be male or female, should not matter, but in a course as sensitive as this, I think it should. I have no gripe against any individual involved in the course... but I don't think ample discussion has been given to the inclusion of a woman." Another faculty member expressed concern that women students may have reservations about taking a course on sex when only taught by one sex.

According to one of the men involved in the course, several women have been asked to participate in the course. But he said that many of the women faculty have not yet received tenure, and interdisciplinary courses taught on an overload basis such as this one, is not considered toward the attainment of tenure.

However, personal research has revealed that at least nine women faculty members at UMSL who have already obtained tenure, teach in departments associated with the subject matters to be taught in Sex. Female guest speakers are also being considered for the course, but a female instructor, but several female faculty members have expressed opposition to being treated as tokenism. According to one female faculty member, several women have been asked to take positions in front of a class if they consider themselves mere tokens. When students were asked by how they felt about a course on sex being taught by an all male staff, the opinions varied, but the majority of the students favored at least one full time female instructor.

According to Rick Guerther, a senior in Arts and Science, "I think there should be a woman on the teaching staff. It would be like a nun trying to teach about sex. Men can read all they want about it, but I think first hand knowledge drawn from personal experience would be beneficial."" Brady Barr III, a freshman in Arts and Science agreed. "May be a woman would better relate to roles of women", he said. "Just like in a course about race, a black could tell you more about being black than a white, so a woman could present a woman's viewpoint."

Linda Wiercz, a junior in Arts and Science did not entirely agree. "Personally I don't think it would really be necessary. I do hope they have women speakers, but it's not really necessary. It would definitely be helpful and possibly make the course more interesting."

Diane Wozniak, a senior in Arts and Science said, "I think the course would be rather biased if you don't put a woman in there. No matter how well educated the men may be, I think they would be likely to overlook element that a woman would be more sensitive to. The men may overlook subjects that they feel don't need to be explained when a woman may feel it necessary to discuss them openly."

FEATURES

Solution for bees...

by Howard Friedman

We feel it is our civic duty to point out that there is a certain group on this campus that has not been contributing anything constructive to the UMSL community. This alleged group of insoconstructivity has been getting into people's hair, keeping others from going into certain rooms, showing up in classes without paying tuition, and not voting in new student elections.

Well, if it takes a stinging expose to bring this to your attention then we shall deliver it. It is those tiny creatures from buzzdom - the bee -- of which we speak!

So what? You say! Everybody is complaining you say! We want solutions you say!

Well we say we have one. But who cares what we say? None-the-less in the "Under This" the Central Council suggested: a) they have no solutions and b) don't drink sodas (because it attracts the things). Well we suggest that a +b=solution.

First we must point out that you can only have solutions to complaints. Complaints go in the bitchbox. But, instead of putting complaints in said box put 18 cents worth of Dr. Pepper in it. Leave it open, have the chancellors stand near by in a beekpeeping suit, and when the bees buzz in he can slap it shut.

This is, of course, not the only thing that can be done with the bees. We could put them into use at soccer games to spur our team on. We can instill that winning hustle by looming sting in bees on slacking players. A quick nip in the derriere should use at soccer games to spur our team on. We can instill that winning hustle by looming sting bees on slacking players. A quick nip in the derriere should

Bud Drinkers, can you figure this out?

Ralph bought a 6-pak of Budweiser, and invited four friends over to share it. Since he bought, he expected to have two cans to himself, but unfortunately when he returned to the refrigerator for his second, he found it missing. So he asked who took it. Al said, "Joe drank it." Joe said, "Dan drank it." Dan said, "Joe, that's a lie!" And Bill said, "I didn't drink it." If only one of these statements is true, who really drank it?

Still closed minds about ‘open’ meetings

By Judy Kliamov

One might ask exactly what is open. It would seem that some of the most important matters affecting the general public are eliminated from open meetings. The reason for this is expressed by most administrators and editorial writers is ludicrous when one considers that it has taken nearly 130 years for the corporate meetings of the Curators to be open to the news media and 134 years for the executive committee meeting of the Curators to be open.

It went into effect Oct. 1, 1973. Contrary to the “spirit” of the law, the Curators were not immediately obligating. On Oct. 9, the Board of Governors appointed a Board committee, headed by President of Communications Jack Hamilton, that because of the opposition to open committee meetings from some of the Board members, only the executive committee meeting of Oct. 11 would be open along with the corporate meeting of the general board of Oct. 12. This was agreed upon the corporate board would vote on a policy toward “all” curator’s meetings. Because the “Sunshine Bill” did not specify broadly for governmental bodies to adjust, this was clearly against the law.

On Oct. 10, the Columbia Tribune announced that the following Curator: Emerson Committee, the Finance Committee, and the physical Facilities Committee were to be open to the general public; they obviously were not.

Irvis Fanez, Curator President, apologized for the misunderstanding, that he had interpreted the decision that was made Oct. 9 to mean that the curmudgeon meetings of Oct. 11 would be open upon the discretion of the committee chairman, for at least this month.

Has Nixon shot his last Waterloo?

By Tom Pagano

I wrote today concerning the “narrowness of thought” exhibited by Mr. Tom Pagano, on page 8 of the October 18 issue of the Current, Mr. Pagano, in attempting his viewpoint of the “U.S. Role in Israel,” stated his belief that the main concern of the current Mid-East conflict is not primarily related to the super-powers (Russia/U.S.) desirer for mid-East oil, but rather “is based solely on the survival and continuation of .... Israel.”

I maintain that with a reasonable degree of cognition, it becomes readily apparent the “nuclear” of this crisis is indeed related to the need for mid-East oil. Also, it seems that the “vainest straw” of the democracy-loving Israelis” is unfortunately, secondary to this, dominant theme. Fact: The U.S. and Russia could both benefit greatly by procuring the oil available in the Mid-east. Fact: The Arab contingency, particularly Saudi Arabia, has refused the U.S. any oil. An Israeli victory could make these “forbidden fruits” potentially available again. Fact: It is no

Israel.”

I maintain that with a reasonable degree of cognition, it becomes readily apparent the “nuclear” of this crisis is indeed related to the need for mid-East oil. Also, it seems that the “vainest straw” of the democracy-loving Israelis” is unfortunately, secondary to this, dominant theme. Fact: The U.S. and Russia could both benefit greatly by procuring the oil available in the Mid-east. Fact: The Arab contingency, particularly Saudi Arabia, has refused the U.S. any oil. An Israeli victory could make these “forbidden fruits” potentially available again. Fact: It is no
"I'll make you lose your shoes."

Given the appropriate setting for up tempo blues, Sam Chapman of the Memphis Blues Caravan might have done just that to his Friday night audience in the Multi-Purpose Building. To the orthonologist it's the ivory-billed Woodpecker. To the numismatist it's the one cent 1955 double strike. To the blues devotee, it's the Memphis Blues Caravan's rare assemblage of bluesman's Adams and Eves that never were able to go "Hollywood" like B.B. and Albert King.

Although a repetitious and extremely personal genre of music, the idyllic audience was quite satisfied when they left campus in the morning's wee hours.

Sam Chapman, in the third slot, was the crowd pleaser. I've heard the old adage, "Just because there's snow on the roof doesn't mean there's no heat inside," but Chapman is a 74 year old birdie.

There, on the stage was this anemic looking, bearded septuagenarian in a janitor's uniform singing lyrics so unusually suggestive as to make the Hot Nuts seem like Up With People in comparison. While everyone seemed to be keeping their shoes on, Chapman was inventing things up immensely with his sophisticated guitar playing and informal singing on such highlights as "Screwworm Blues," "I Need Good Meat," "Crosscut Saw" and "I'll Get Drunk Again.

Despite repeated attempts by the M.C. to gracefully nudge Chapman's performance, he remained onstage for 21 songs.

The play was his least popular for a time, but has recently been appearing in the Broadway and touring companies of Shakespeare and rock music fans, and even those of you who are not, should make a point to go see the rock musical, "Two Gentlemen of Verona". Sunday, Oct. 28, at 8:30 p.m. in the Multi-Purpose Building.

Admission costs are $2 for UMSL students, $3 for faculty and staff, and $5 for the general public. Tickets have been on sale since Oct. 8 at the University Center Information Desk.

Two Gentlemen is a play adapted by John Guare and Mel Shapiro, music and lyrics by Galt MacDermot and Guare of "Hair". This musical has long been drawing capacity Broadway audiences. A touring company has now been formed to give those of us at UMSL and in St. Louis a chance to see it in the fun. Says Clay Barnes of The New York Times: it is "a jeu d'esprit, a bardic spree, a midsummer night's jest, a merriment of lovers..." The musical also has a strangely New York feel to it--in the music, in the spare and sometimes even abrasive lyrics, in the story itself of small town kids and big town love...

The story is about two friends who fall in love with two different women. The romantic Proteus (Carlos Cestero) becomes a cheater and thief when he later seduces his friend's girl Sylvia (Rosaa Wortham). The other lover Valentine (Howard Porter) proves true.

The musical is "Two Gentlemen of Verona," which has an at-first forbidding sound to it, for isn't that a title of one of Shakespeare's plays? But those who remember the bounding entertainment derived from Will Shakespeare's treasure-house in such musical hits as "Kiss Me. Kate," "Your Own Thing" and "The Boys From Syracuse," will not be deterred by the fact that "Two Gentlemen of Verona" is indeed Shakespeare's comedy, fitted out with Galt MacDermot tunes, and some jubilant dancing and a broad comedy adaptation by John Guare, author of the Drama Critics Award in 1971 for his work on "Two Gentlemen of Verona," and MacDermot also won the Drama Critics Award in 1971 for his music in "Two Gentlemen." This was more honor than he had received for such memorable songs of his in "Hair" as "This Is the Age Of Aquarius," "What A Piece Of Work Is Man," "Good Morning Starshine" and "Ain't Got No." When "Hair" began, its notable four year run of 1,742 performances, it was not immediately recognized for the landmark musical it was, and neither MacDermot nor his fellow-creators received any laurels that spring of its opening, in 1968.

Will Shakespeare was a young man when he wrote "Two Gentlemen of Verona," which may explain why it's one of his lesser works. In 33 songs he presents Chaucerian beat, ranging from rock to calypso to ricky tick, the musical version of the Bard's Play celebrates love in all its variations: Love requited, love unrequited, love driven away, love found,love of country, love of money, love of war, love of friends and strangers.

The play was his least popular for 380 years -- until 1973 when it became one of the biggest hits among his masterpieces. What brought it a delayed success was its having been made into a rollicking musical version that was produced on Broadway by the New York Shakespeare Festival, Joseph Papp, producer -- a version that won a thundering acclaim on its opening night, a run of eighteen months and both of the year's top prizes, the Tony Award and the New Critics Circle Award as "Best Musical" of the season.

The Cast
Shakespeare's hardly honorable "gentleman" (the friends who daily betray each other often enough) from small-town Verona to big-city Milan) are to be played in the company coming here by Howard Porter as Valentine and Carlos Cestero as Proteus. Porter has recently been appearing in the Broadway and touring companies of "Parfie," and he was Ambrose, the sailor in the food market in New York City, in the applauded production of "Hello, Dolly!" that starred Pearl Bailey. Cestero acted in the Broadway production of "Verona" as well as in its outdoor version this summer.

The highly sobbing girls they get involved with will be played by Rosaa Wortham and Silvia, daughter of the Duke of Milan, who sets the friends into rivalry, and Louise Shaffer as the Julia, the sweetheart whom Proteus leaves behind in Verona, but who refuses to stay there.

Ms. Wortham has sung in night-clubs in numerous countries of Europe and North Africa, and sung and played in several French films. She is a member of the Broadway last season in the multi-starred revival of "The Women." The company began their 100-city tour at Princeton University on Sept. 20.
Harriers regroup for end of season

by Jim Shanahan

The UMSL Cross-Country team raised its season record to 4-4 with a stellar performance in the annual carte du froid meet at Ft. LeMou. The Harriers defeated Lincoln U., 18-31, in their last league contest before heading to the Missouri Valley Conference. The team worked out through meets, sometimes disguised, sometimes disguised, and most times beaten. But on Oct. 18th the team sat back and looked at their performance against Milken and Illinois Wesleyan as the test of their new system. The Harriers ran by both schools completely dominating the meet. Their hard work has paid off and they have both schools completely.

Coach Wall, in his two practices, said, "They are the type of competitive race a coach likes to see. They battled the UMR runners even after the 2 mile mark." Freshmen Jim Shanahan, Paul Wood, Jack Edwards, John Fitzpatrick and Fran Hake have really improved in the last few weeks.

Coach Neal is especially pleased with the way his freshmen have performed. "Our freshmen are becoming faster and faster at these longer races and they are responding well to the workouts that we give them. Their performance shows when they are responding well to the first half. The first scoring touchdown pass to Bob Hayes and lost a closely fought duel to U.M.R. In the second half, Sigma Tau's explosive offense came back to life. Passing to each side of the field, moving his team despite at times bad field position. Beach's generalship put Sigma Tau back into the game. A strike from Beach to John Hitzkowitz gave Sigma Tau its first points followed by another touchdown pass to Bob Hayes to tighten up the contest. The Sigma Tau defense rose to the occasion taking the pass away from the Sigma Pi offense and harassing Long enough to contain his dangerous outside running.

With time running short, Sigma Tau took the ball following a punt and marched the length of the field for the final touchdown, capped by a thrilling 46 yard quarterback option play from Beach to Mike Smith. "They (Sigma Pi) played excellent defense in the first half," Bill Beach said after the game. "We got a couple of breaks in the second half and we were able to score enough to win."
SIU-E leaves UMSL in disgust, as Mike Caraffa saves 0-0 tie

by Tom Wolf

In a game that was high-lighted by its physical play, the UMSL Rivermen held their own in a 0-0 contest against SIU-Edwardsville last Tuesday. Rating the match as one of the most important of his six-year career, UMSL coach Don Dallas must have felt that he had played this game before. His Rivermen had salvaged a 3-3 tie in a bruising match earlier this year against an intimidating St. Louis University team. But as the long October shadows crept across the UMSL field it became evident that the wily Rivermen weren’t giving an inch to the top-ranked Cougars.

Although giving away some height to the big Cougar’s backs, the UMSL strikers persevered on numerous occasions. Left-winger Pat Reagan fed Tim Smith early in the first half of the match, but Smith had trouble settling the ball. As a result his shot sailed harmlessly over the goal post. The Rivermen experienced problems getting set for the good shots all day and when they did, Cougar goalie Chuck Kowaleski had all the answers. Kowaleski’s counterpart in goal for UMSL played no less spectacularly. Goalie Tusinski frustrated SIU forward John Stremeta, and a host of other SIU players enroute to his fifth shutout out of the season. Tusinski had help thought in the form of fullback, Mike Caraffa, who turned in the play of the game. With Tusinski out of position; Caraffa kicked out a shot that was labeled for right corner of the net. Caraffa continued to make his presence felt throughout the game as UMSL upped its season mark to 4-0-2.

On Saturday, Tim Kersching led the UMSL attack with three goals as the Rivermen sought to better their No. 7 national ranking. Tim Smith provided the other score as the Rivermen whipped Chicago Circle, 4-0. UMSL will try to run its unbeaten string to eight against Quincy on Saturday. The match at Quincy will start at 8 pm. The Rivermen will visit Kansas City Rockhurst on Nov. 3 before ending their schedule at home, in a 1-30 match against Washington University on the 10th.

UMSL begins upward climb

Polling all but one first place vote, the 7-0-0 SIU-E team maintained its number one spot in the latest rankings issued by the coaches committee of the Intercollegiate Soccer Football Association of America. Still in second place is St. Louis University, who trailed the Cougar kickers in total votes, 389-431. Coming up strong was the University of Missouri, St. Louis Rivermen, who vaulted from ninth-place last week to seventh.

Due to the Rivermen’s tie number one ranked SIU-E the next release should see UMSL jump up a few notches in the ratings.

The University of San Francisco-Dons (5-6-1) took over third place in the rankings to replace the University of Pennsylvania, which dropped to eighth. Quincy College, which had been out of the rankings the past two weeks, was picked in the 11th spot after trouncing the University of Wisconsin, 3-0, and holding SIU-E to a 2-0 score last week.

The Cupboard has Undone Itself... Stop by and Undo Yourself.

The Cupboard thinks that people need a casual place to have good food anytime of the day. So we've spunked the place up with a collection of unusual relics and added an entirely new all-day menu. It's available from 11 a.m. to 12 p.m., Mon.-Thurs, and till 1 a.m. Friday & Saturday, and there's something on it for everyone's taste including a variety of Eggs, Crepes, Fondues, Burgers, Sandwiches, Mexican and Italian Goodies and Steaks. The Sunday Brunch will be served from 10 a.m. to 1:30 p.m. where a most satisfying array of pastries and entrees are featured.

We also serve a really great Sunday Buffet - 4 to 8.

The Cupboard's Bar will continue its swinging Cocktail Hour and nightly entertainment. The great drinks and hors d'oeuvres have not been new now, but some new concoctions have been added.

Our new policy is to serve both unusual and common foods inexpensively without formality. So drop the tie, stop in anytime unannounced and stay as long as you like.
