Students discuss election discrepancies

Mike Blomdi

Irregularities in the outcome of UMSL's 1975 homecoming queen election have been discovered, the Current learned last Thursday. More votes were reported cast for queen than were reported ballots tallied.

In addition, an official recount of the vote last Friday found Cathy Lieurance, second runner-up in the queen contest, receiving the largest number of votes for queen. Malia Ferguson was runner-up in the count Friday, Maria Royal was third. The meeting ended with Ferguson retaining the crown.

"I don't think there may be a discrepancy in the counting of the votes," stated Randy Klock, student body president. "We at Central Council decided to recount the votes."

Curt Watts, student body vice president, discovered the discrepancy in vote totals on Monday, Oct. 27. At that time, he was told that Ferguson received 396 votes, Royall, 343, and Lieurance 262. A total of 1,297 votes for queen were reported cast.

"On the Friday before homecoming," stated Watts in an interview last Friday, "I counted the ballots out of personal curiosity, I wanted to see how many people had voted in the election."

"It wasn't until Monday after homecoming that Mike Miller gave me the total votes," Watts continued. Miller is chairperson of the Administrative Committee of Central Council and headed the vote-counting of the homecoming election. Miller, four other students and two administrators counted the votes the Thursday before homecoming. It was this total that was announced at Saturday's king and queen crowning.

"I told Jan Scott (secretary to the assistant dean of student affairs) that I had found the total vote for queen to be more than the total ballots we had counted. I asked to recount the ballots only," stated Watts.

Watts, Scott and Jeannette Davis, a student assistant to the dean of student affairs, made the first ballot count on Friday. "Jeannette and I gave the figures of Monday's ballot count to Jan. This time we had 1,116 ballots," Watts stated.

Watts then told Klock, Dennis Donham, assistant dean of student affairs, and Rick Blanton, director of student activities, about the discrepancy. Blanton had been one of the original vote counters Thursday. "We tried to inform Mike Miller," Watts continued, "but he had already left campus."

Lynn O'Shaughnessy, editor of the Central Council News, Donham, Blanton, Klock and Watts then made another count of the vote that Monday afternoon.

"This time we came up with different figures," Watts said. The count was unofficial, Klock later stated.

Monday's count gave 261 votes to Lieurance, 257 to Ferguson and 239 to Royall. "We felt there might have been ballots missing," said Watts.

In a meeting last Thursday, Klock, Watts, Donham, Miller and Blanton decided to have an official recount of the votes the next day. "We decided to invite the candidates most likely affected," Watts stated.

At the vote count Friday, Lieurance received 261 votes, Ferguson 257 and Royall 239. The total ballots counted was 1,116. This total included 78 ballots not marked for queen. Tally sheets used to mark votes at Thursday's counting were totaled at the Friday meeting. According to those sheets, Ferguson received 263 votes, Lieurance 250 and Royall 230. The total votes for queen were 1,000. This figure excludes ballots without a vote for queen.

The figure of 1,297 total votes for queen excluded ballots without a vote for queen. Miller gave this figure to Watts on Monday.

"I make no accusation," Watts stated. "It could have been the calculator, it could have been people transposing the votes from the tally sheets to the actual total sheet, people calling off the wrong names, or the people who tallied marking down the wrong names. In the past there have been measures taken to prevent this. The whole thing has been poorly handled."

Heated debate characterized the discussion Friday, which was open to interested groups and continued on page 2

Computerized system causes delays

Stanley Ketterer

Those students who were disappointed by the delivery of mid-term deficiency notices may be elated to discover that they will not be forthcoming.

Glen Allen, associate registrar for UMSL, traced the source of the problem to implementation difficulties with the new Student Information System.

"With the new system, everything that we do is in a new environment, and everyone knows that we have problems," says Allen. "The system has been delivered and implemented with a modural approach, but the module pertaining to the registration office as well as final grades has not yet been delivered, much less tested. We have utterly no control over problems that we've experienced with the system so far."

The faculty was notified a week prior to the mid-term that we would be unable to process the notices," Allen says. The Student Information System is a completely computer- ized system that records a student's academic history from the time he enters the university until he departs. The system consists of 16 computer modules. Only 12 have been delivered to the registrar's office. The corporation is contracted to provide the modules, but delivery has not been in accordance with projected schedules.

All four University of Missouri campuses are operating under the Student Information System. Implementation problems under the new system are not confined to the UMSL campus.

"All four Missouri universities have experienced enormous almost-impossible delivery difficulties, with the system," Allen says. "It just takes time to work out the bugs inherent in any new system."

Of the four campuses, only UMSL issues deficiency notices, and they are not compulsory.

"Many classes don't use them, only a small per cent actually do," Allen says. "Only 13 per cent of all students receive deficiencies, and many of those students are being notified of a D."

A very important purpose that mid-term deficiencies serve is to correct registration problems. Allen says that many students receive them because they enter incorrect course references numbers on petition, drop and add cards.

"If a semester students put down the wrong course numbers and end up in a class that they don't realize they were enrolling in," says Allen. "The deficiency notices help clear up registration problems in the classes."

Allen does not feel the small requirements are unreasonable, considering the expenditure of time and money required to process the notices.

"It is just costly in machine time to process mid-term deficiencies as final grades," Allen says. "The only difference between the two is postage. If they (deficiency notices) were not delivered it would save over $1500, plus paper costs."

Traffic light at entrance to be installed soon

A traffic light at the north entrance to UMSL near the Multi-Purpose Building will be in operation within the next 120 days. Governor Christopher Bond says.

In a letter to student body president Randy Klock, Bond says, "The project to install a new traffic light at the North Florissant entrance to UMSL is underway. Apparently the project was awarded to Kenny-Wagner Construction Company in September. Students and campus officials have wanted the light for many years since the location has been accident-prone. Between January 1 and November 1973 eight reported accidents occurred at the entrance."

One student was severely injured in November 1973 when she was attempting to make a left turn from West Drive onto South Florissant Road. A southbound tractor-trailer struck her.

Bond says, "According to the contract, completion of the work should take no longer than 120 days."

SHOULD I GO? The driver of this car reluctantly pulls out on South Florissant Road near the Multi-Purpose Building which is the scene of the hazardous intersection where a proposed traffic light is to be installed within 120 days. [Photo by Jeanne Vogel]

A special organization for the parents of UMSL students will hold its first meeting this month. About UMSL Parent's Association is for parents who would like to become more involved with the university and university-related subjects. The objective of the group is to be helpful to the students, parents and university.

Blair Farrell, development consultant, said, "This is not a formal fund raising group. The organization will be in total control of the parents. This is a way the parents can help UMSL." Another way the Parent's Association can be of help to the university is to give the university the potential for recognition.

"The community as a whole has been exposed to what is being done here," Farrell said. "We assume there should be a higher degree of interest and a way to communicate with the parents and the university."

Students report discrepancy

(continued from page 1)

Individuals, "We do not want to take any accusers actions," stated Blanton. "We do not want to take any accusers actions." Proceedings centered around the question of whether Ferguson and Lieruse were questioned as to what alternative they prefer to the courses offered.

Arnold Air Society sponsors joint sorority

There is a new sorority starting on campus known as Angel Flight. This sorority will be joint with Gamma Sigma Upsilon from University and Park Aeronautical College. Angel Flight is sponsored by the Arnold Air Society at Park College, which is a selective group of ROTC organization. One difference of Angel Flight is, there does not have to be a desire to go into the Air Force, which means there is no military obligation. Angel Flight consists of girls who are interested in aiding in the advancement of the Arnold Air Society, helping in the community and working with the university.

Some of the activities that are being planned for this year are a Military Ball, a convention in Evansville, a convention in Philadelphia, parties and some school and community activities.

Anyone interested in joining should be a higher degree of interest in parents because this is a commuter school. It would be fruitful if we could communicate more with the parents and the community to let them know what is going on." The staff members involved with the organization are Chancellor Grobman, Farrell, Lois Schuermich, Alumni Director, Dennis Dohm, assistant dean of students, and Rick Blanton, director or student activities. "We are here to be of service to the parents and we will help them in any way we can," said Blanton.

The parents and staff members seem to think the program has a future at UMSL. "Everyone involved wants to see this program succeed, but these things cannot be done overnight. It is something that has to grow," said Blanton.

There has been no expectation of a negative reaction from students. Farrell said, "There could be mixed reactions. There are many students who understand this as a position, many of their parents and the university. If this organization gives financial aid to students, they should have a positive attitude." It was suggested that there either be no queen or two queens, or that Lieruse, alone be crowned. In addition, it was proposed that Ferguson remain queen.

At the meeting Friday, Miller explained there was general informality in the vote counting. The tally was not made before homecoming began. "We would call off each roll in a way that the roll to people that tallied only that item," he said. Ballots were taken from each of the four bullet boxes. After the ballots were counted and the votes from each box were tabulated, the ballots were returned to the boxes. Each box was then locked again.

Tally sheets for each ballot were divided into four sets of one for each box. The total for each box was figured and posted on the sheet. It was these totals that Miller added to arrive at the results of the election.

"At the time I added the total on each sheet, it was close," Miller stated. "We did not add to see the total vote cast." Ballots were counted on Saturday.

One student and two administrators counted the votes Friday, John Sehriot, coordinator of the voting and elections office, represented Donahue, who was out of town. Blanton checked the totals, and Steve Greenfield depend on behalf of Marla Ferrell.

Angel Flight should contact Kathy Giddens at 427-4348 after 2 p.m. or call Captian Walker at 430-1665, extension 58 or 59 before 5 p.m.

The idea of forming a parents organization was suggested by Chancellor Grobman at an informal meeting he hosted for the parents of new students after orientation. At this meeting there was an attendance of approximately 400 parents. Farrell said all parents seemed "interested and enthusiastic." There was a survey taken at the meeting for parents who were interested in a formal organization. Out of 400 parents, 109 surveys were returned. One hundred-two people said they were interested, of which 50 were willing to help organize the program.

Recently an informal meeting was held to get the program started. At this meeting a steering committee was formed and Joseph Nickrent was elected chairman. The committee discussed the group and its programs and ways they could be helpful to students, parents and UMSL. These programs will be decided as the group gets organized. The association's first major event will be Thursday, Nov. 30. The parents will meet in the great room at UMSL for dinner, a business meeting and a theater performance by students.
Coro foundation announces recruitment efforts

The fourth annual St. Louis recruitment effort in the competition for public service fellowships has been announced by the Coro Foundation Midwestern Center. Coro representative will be on campus in the lounge area of the student union Monday, Nov. 10 from 9:30 to 3.

Young men and women interested, or presently involved, in public affairs careers are invited to contact Coro to learn about the Fellows program. Candidates being sought now, if selected for the program, would begin their training next September.

The Coro Fellows Program is a nine-month, full-time training opportunity that offers potential public leaders an exploration of the people, organizations and resources affecting community life in St. Louis area. The format of the program consists of internships in the areas of government, business, politics, labor and community service, combined with group seminars, retreats and public service projects.

Tuition for the Coro Fellows Program is $2500. Tuition scholarships, as well as living expenses, are awarded based on individual financial need.

Applications to the St. Louis Coro program are now being accepted, and interested persons should contact: Mary A. Bremner, Recruitment Coordinator, Coro Foundation, 4378 Lindell Boulevard, St. Louis, Missouri 63108. Phone: 314-533-3806.

Council meets

With the passing of the three amendments behind them, Central Council's new business, at a meeting Sunday Nov. 3, included several questions concerning salaries.

One of the amendments just passed reads that the Central Council issue salaries to those positions it deems necessary.

Two motions raising money to persons working with council were brought up and passed by the council. However, the motions did sit up a few disagreements.

Those who saw the need for more money to be allocated toward salaries believed that those persons receiving the salaries were worthy of a small payment. The two jobs referred to were a course evaluation director and typist of the Central Council News. They reasoned that the small amount of money to be allocated was less than the value of the services rendered.

Those who were against an increase in the number of salaries paid, believed that an alternative solution to lightening the work load of the director of chairperson lies in the fact that there should be more people involved in the various committees, as well as Central Council as a whole.

J.D. * GET READY... R.R.

We asked the same question when we first found ourselves in a position to make the world a more livable place.

At Kodak, we started close to home: In Rochester, New York. We cut river pollution with one of the most efficient industrial waste water treatment plants in the country. We cut air pollution with scrubbers, adsorbers and electrostatic precipitators. We helped set up a black enterprise program in downtown Rochester.

Why? Helping to combat water pollution not only benefits society but us as well as we need clean water to make film. Our combustible waste disposal facility not only reduces air pollution but also helps pay for itself in heat and steam production and silver recovery. The black enterprise program not only helps people who aren't well off but also helps stabilize communities in which Kodak can work and grow.

In short, it's simply good business. And we're in business to make a profit. But in furthering our business interests, we also further society's interests.

After all, our business depends on society. So we care what happens to it.

Kodak
More than a business.
Questions sociology program

Dear Editor:

I would like to bring to the attention of the UMSS community certain incidents which happened to me in the sociology department on the campus of United States. The sociology department at UMSS conducts research on women. However, this professor is not for the benefit of women or by women. It is, instead, carried out by a certain professor of sociology. To one gay woman, myself, as a student, it was a kick.

In April of this year I was kicked out of the course that I am carrying sociology training program for gay activities. This followed my application for the V.F. for Lesbian League. At that time, I was also housing by a graduate student, a "close friend" of the above professor. They enjoyed the after-hours time at the house. (There are several other things that I know of.)

From my own experience, if you are a gay and activist, you threaten the whole arrangement. And no matter how hard you work as a student, you will not succeed as well as others who work as student.

Due to being kicked out of this program, I no longer have the living and will not be able to finish my graduate school as I usually would have, had this one professor not decided that my "activity" threatened the training program's relationship with community. Also, I was forced to move from my place of residence during exams because of this notice.

The only indication I received of the reasons for my termination was a brief letter stating that presence at the training center does not conform to the college's policy.

Just what are these purposes? Sociology is generally thought of as an liberal and enlightened. It isn't on this campus in regard to gay activism and a continued exploitation of women students is occurring in the graduate school.

Billie Remberger

LETTERS

Suggests quicker solution

Dear Editor:

This letter is basically addressed to students who want to add only two or three years at UMSS to the time already spent as an addition to the student union. Any UMSS student with a sense of purpose is pressing need for additional space. The student union can be financed by student activity funds, which everyone must pay once a year. If the addition would take several years to complete, then that long period is not a problem. I doubt very few of the present proposal is that a recommendation for change. This would be much more visually stimulating than anything packing space in the student union campus. Why then the move to the building from the University?

I would like to hear from UMSS students, faculty and from the Administration, their opinions on the idea, using the Current as the forum for discussion.

Bob Steinman

Answers Duncan's accusation

Dear Editor:

I hereby clear up a few issues presented in the article "This is an article in order to give my right" given to Larry Duncan (Oct. 9, 1975) and to show my writing letter (Oct. 16, 1975). Mr. Duncan implied that I could not identify myself in the Oct. 9 article as I made accusations which were unjustified for such actions were of professional nature, not personal ones. As philosopher and professor of the Current, as also a satisfied employee, this conclusion is not at liberty to feature myself in an article. Therefore, I remain unbiased, and even over, I was not concerned with repercussions to be suffered if

Suggests alternative for strike

Dear Editor:

While discussing the Women's Strike Day we came up with following consequences and suggestions:

It is not practical for women to take a day off work. Women have responsibilities and feel and obligation to fulfill them. Therefore we don't think it's feasible for us to neglect our duties for the sake of doing anything. What we would recommend, however, is that we certain date all women, instead of striking should wear a symbol of protest, a flower on arm, and a colored arm band in an effort to remind the world in general of the women perform. In this way we would not only use a day meaningfully, but also, would have a greater participation and neglecting our obligations to our significant others and to ourselves.

Austrian Fullbright Scholar attends UMSL

Thomas Tuchlinger

Ingomar Robier, a 22-year-old Austrian, is attending UMSL on a Fulbright scholarship. A graduate student in English literature, he has been in the U.S. two and a half months and already notices a different atmosphere from Europe.

"People here are much more informal and relaxed," he says. "English does not have the

formal form of address common to most European languages, and first names are used between acquaintances as well as friends." While taking two classes here in British fiction, he is teaching an introductory German course as partial compensation to the university.

Born in Klagenfurt, Carinthia, he attended the University of Graz to become eligible for the prestigious scholarship. "I had originally planned to come to America in the 75-77 school year," he says, "but the opportunity to teach here unexpectedly came up and I grabbed it." Ingomar speaks with an accent, although he has an excellent command of the English language.

"I wanted to come to the U.S. since I was 17, when I applied to the U.S. Foreign Service in Austria. But they weren't interested in teenagers," he grinned.

Ingomar was unfortunate enough to arrive in St. Louis during the height of the August heat. "I had never experienced such heat and humidity, not even in Morocco. But we had a beautiful Indian summer which made more up for it." He has traveled extensively, for much of Europe and England, to the Iberian peninsula and North Africa. There is quite a bit of difference between American and European educational systems.

"In Austria," Ingomar explained, "the equivalent to an American high school is the gymnasion, attended by children age 10 to 18. Here, a student's general education - history, mathematics, languages, science - is fulfilled.

"Once a person enters a university, he studies almost exclusively in his major. And the area covered by courses in seminars is less broad than here, but studied more thoroughly.

"In Graz and many other universities," he continued, "there is no central campus, but rather the buildings are scattered throughout the city. The Philosophy Department might be two kilometers from the History Department. Classes are often scheduled hours apart in the morning and afternoon. These factors make it very difficult for a student to work somewhere in addition to his studies. Hence, unlike America, the working student is a rarity.

"Paradoxically, in spite of the casual atmosphere in America, he feels students work harder at their studies than in Austria. I went through the dormitories one Sunday night at Washington University, and everyone was studying furiously. In Austria the typical student attitude is, 'Why hurry, I have my whole life to graduate.'"

"But I am different from the typical Austrian student," Ingomar continues, "because I am anxious to finish my schooling and start making money for all my years of effort. My goal is to become a university professor.

"Ingomar has not yet decided whether he will settle in Europe or America. "I am young and do not know what the future will take," he says. "But I do hope I can get a position teaching in a university rather than a high school or a gymnasium. I don't think I would be satisfied teaching basic English or German grammar after my years of schooling."

Ingomar was also rather pleasantly surprised at the accessibility of American professors. "In Graz, the professor might have only one office hour per week. During that time as many as a dozen students might be lined up outside his office, and occasionally he might not show up at all!" Ingomar is currently writing his 50-page master's thesis, which is more of the novel and the narrative situation in the modern trivial novel.

Ingomar's father is a State employed construction engineer and a dozen students might be lined up outside his office, and occasionally he might not show up at all! Ingomar is currently writing his 50-page master's thesis, which is more of the novel and the narrative situation in the modern trivial novel.

Apple Awareness Week is "apple"tizing

Kathy O'Brien

A rather heavy set, cheerful-looking student wearing glasses stood behind a table full of apple desserts, canned apples and a mound of just plain apples, chowing down on a crisp apple while saying to people passing by, "These apple pies are delicious!"

It was Thursday of Apple Awareness Week and once again Mike Dace, a graduate student and academic advisor, was spending his lunch hour selling apples. Mike had been active in organizing Apple Awareness Week and he was very enthusiastic about it. On Thursday his enthusiasm was still coming strong.

It all began when the University of Illinois had a surplus of apples and donated 8000 to UMSL. At this time Bill Edwards, a student in the University Center approached several organizations and individuals asking for ways to get rid of the apples. Their best response was the five days of apple craziness entitled 'Apple Awareness Week', sponsored by Mike Dace.

Throughout the week of October 27 anyone who was up in the Snack-a-teria could not have missed seeing the Appleland display, where a different event took place every day.

The week-long shenanigans began on Monday with the Apple Peeling Competition. Anyone buying an apple for ten cents was given a chance to peel their apple. Those keeping the skin in one continuous ring were awarded cookies.

Tuesday was Apple For Teacher Day but teachers didn't get the apples. Anyone buying and apple could vote for a teacher. The teacher with the most votes won the Apple Dumpling Award. Dr. Larry Lee from the Department of Biological Sciences won this award, said "I didn't even know anything about it. I didn't make anybody vote — I didn't even pay them like I usually do for something like this."

On Wednesday, Apple Trivia Day, apple eaters, upon purchasing an apple asked trivia questions. Contestants with correct answers won cookies.

Thursday was the Apple Bake-Off. Throughout the week any one wishing to participate simply had to go to the Appleland display and tell them how many apples were needed for their recipe. There were two categories: Apple Pie and Apple anything, which Mike described as any kind of dessert containing the apples. The entries were judged at 12:30 Thursday by members of the Food Service Staff. The winners received paper back editions of the Joy of Cooking Cook Book, donated by the book store.

Pat Quinn, from Psychology, won the Apple Pie Competition. Charlotte McCluer and Sue Fisher, from the University Center staff, won the apple anything competition for their sour cream apple squares.

To wind up Apple Awareness Week on Friday there were two events. First of all, there was apple dunking. According to Mike it was handled in this way: "Someone might say 'I'll pledge 10 cents if you dunk.' Then we had six people dunking for five apples, whoever didn't get one out — kind of like musical chairs. The student who won got a bottle of apple wine. And whichever group had the most people dunking won the Dunkiest Organization Award."

Gary Vien from Pike County Alpha won the bottle of wine, while the Pike fraternity won the Dunkiest Organization Award.

The other event was the William Tell Dart Throw. Participants paid 5.25 to throw three darts at apples on manikin heads. Those who hit the apple with one dart won an apple, while two or more hits won various prizes from the book store. Mike said that the prizes were wrapped so the winners didn't know what they were getting, but they ranged from plants and plaques to underwear and binoculars. The book store contributed over 900 in prizes.

During the week students could come in and get bags of apples to sell in their classes. At the end of the week who ever sold the most won the Apple Annie and Andy Award. This honor went to the Peer Counselors.

Apple Awareness Week was a cooperative effort of the University Center, Food Service, Bookstore, Central Council, Peer Counseling and Student Activities as well as several interested individuals. Mike Dace said, "It shows great cooperation between organizations and individuals, it was a community king of things consisting of faculty, students and staff."

All proceeds went to the American Cancer Society. Mike said, "It touches on a lot of people's lives because almost everybody has a relative or knows someone who has had cancer.'" The total amount earned came to approximately $4000.

In all, Apple Awareness Week was a success in spite of the short amount of time to prepare. Mike said that they had just found out about the apples the Wednesday before (Oct. 22).

Charlotte McCluer, said, "I think it was a good way to get rid of the apples. Considering the fact that it was put together last week its gone fairly well.

Bernice Apple, a cafeteria worker who was quite active in the affair all week, said, 'It's tremendous when a school gets interested in something like this. I've tried to get everyone interested to donate. If there had been more time for advertising in the beginning we would have done better.'

Some people were active participants in events all week. Lynn O'Shaugnessy not only baked an apple pie for the Bake-Off and pealed apples, but she also bought a lot to eat. She said, 'I'm sick of apples. All I want for lunch right now is the last four days is apples. I guess it's better than eating junk, though.'

One of the high points of the selling was on Wednesday when someone bought 3000 lbs. of apples (apples by the hundreds). As a result, on Wednesday alone 3200 apples were sold.

Although a lot of people helped, Mike with his enthusiasm, outgoing personality and overwhelming contribution of hard work, was a definite asset that really helped pull the whole thing off. He said, "We got rid of all the apples, in fact people wanted more than we had."

So, everyone who took part and contributed — time, money or whatever — was sure to have a good feeling in the heart and apple in the stomach.

**Friday**

**ADVANCE REGISTRATION:** Packets may be picked up for advance registration for Day Division, Evening College, and Graduate School students from 8:30 until 4 pm in the Administration Building Lobby.

**WHEELCHAIR DAY:** From 8:30 am to 3 pm the Disabled Students Union will attempt to publicize the problems of disabled students on campus by sponsoring a Wheelchair Day on campus.

**WOMEN'S VOLLEYBALL:** The 1975 Women's Missouri State Volleyball Tournament will be held at UMSL, beginning at 5 pm in the Multi-Purpose Building. UMSL vs. Western Illinois University at Western Illinois at 11 am.

**Saturday**

**SOCCER:** UMSL vs. Western Illinois University at Western Illinois at 11 am.

**WORKSHOP:** "World Religion for the Classroom" a workshop sponsored by the Extension Division will be held from 9 am to 4 pm in the J.C. Penney Building.

**Monday**

**ADVANCE REGISTRATION:** From 8:30 am until 4 pm advance registration will be held in the lobby of the Administration Building for the Day Division, Evening College, and Graduate School students.

**WOMEN'S VOLLEYBALL:** The 1975 Women's Missouri State Volleyball Tournament will continue at 12:30 in UMSL's Multi-Purpose Building.

**FILM:** A United Farmworkers film "Fighting for Our Lives!" will be shown at 7:30 pm in the Newman Center. Admission is $1.50 and all money raised goes to California for the Workers' Strike Fund.

**FILM:** "The Parallax View" will be shown at 8 pm in room 101, Stadler Hall. Admission is $1.75 with an UMSL ID. Advance tickets for the weekend may be purchased at the University Center Information Desk.

**WORKSHOP:** "World Religion for the Classroom A workshop sponsored by the Extension Division will be held from 9 am to 4 pm in the J.C. Penney Building.

**Tuesday**

**ADVANCE REGISTRATION:** From 8:30 am until 4 pm advance registration will be held for Day Division, Evening College, and Graduate School students in the lobby of the Administration Building.

**WORKSHOP:** The Feminist Alliance Group will hold a meeting and workshop on "Women's Studies" in room 121, J.C. Penney Building at 11:30 am.

**FILM:** The English Cinema Lab will show "Point of Order" in room 200, Lucas Hall, at 8:30 am, 1:40 pm, and 7:30 pm.

**FILM:** "The Maltese Falcon" will be shown at 8 pm in the J.C. Penney auditorium. No admission charge.
"The Hollow Crown" a high level success

Mark Henderson

They were mad, sane, patient, intolerant, benevolent and bloody; their lives were both painfully honest and funny and painfully sad and tragic but most of all the monarchs of England were people to pity.

This is the overall impression left by the Royal Shakespeare Company's production of "The Hollow Crown."

"The Hollow Crown" is an anthology of the history of the kings and queens of England. The theatre piece consists of writings and songs by or about the monarchs from William the Conqueror to Queen Victoria, and is devised and directed by John Barton, an associate director of the Royal Shakespeare Company.

As a theatre piece, "The Hollow Crown" runs the gamut of emotions; from uproarious laughter in response to a reply to a secret memorandum of Henry VII concerning a proposed marriage, "Article, to take notice of her breasts and paps, whether they be large or small," to high drama when Charles I is tried for high treason.

The transitions are weak, not as well woven as the transitions in last year's production of "Pleasure and Repentance," and often the viewer has the feeling of adjusting to the different parts. The second half of the program is much stronger than the first half.

Another problem in viewing "The Hollow Crown" is the necessity of knowing English history very well to be able to understand the show's subtle humor. The show is much more suitable to an English audience, while "Pleasure and Repentance," a light-hearted look at love, is a universally understood theatre piece.

The Royal Shakespeare Company's travelling company this year consists of David Suchet, Hugh Sillivan, Lynette Davies, Clive Swift, and Bill Homewood providing the music, and the reportory gave the filled J.C. Penney auditorium two hours of high level entertainment and brilliant acting.

David Suchet, together with Hugh Sillivan, was one of the main actors. Suchet, a man with sharp, handsome facial features, black hair, and classic voice, played most of the highly emotive parts in the theatre piece, including Richard II surrendering to Henry IV. Suchet's masterpiece was Charles I, a monarch who believed in the divine right of kings in a time when Parliament was becoming the ruling body of England. Suchet's Charles is a man confused by Parliament's trying a king without precedent, obstinate and small-minded.

Hugh Sillivan, the other major role in the cast, is the only returning member of the Royal Shakespeare Company from last year's touring company. Sillivan is a master with light material with his easy, confident delivery, and does most of the cast's humorous material. Sillivan brought down the house at the beginning of the second half of the program when he delivered a speech as James I concerning the evils of tobacco. At this time Sullivan humorously chastised some members of the audience late in returning from intermission.

In the character of James, Sullivan watched one couple come down the aisle to their seats and said, "Hurry up, hurry up." Later, another group came down the aisle and Sullivan said "Hurry up and sit down, sit down... those of you in good health have no problems at all, except lateness; I ought to send a messenger to the Tower."

Bill Homewood broke up the speeches and provided variety to the performance with his expert guitar playing and singing. Homewood sang a variety of airs and ballads from different periods concerning the monarchs. Clive Swift and Lynette Davies supplied the music of their five talents to fill out the theatre piece, backing up Suchet and Sullivan.

As an epilogue, the company presented a reading from Sir Thomas Malory's "Morte D'Arthur," proving the most famous monarch in English history is still the legendary "once and future king," whose return to the stage is still waiting for the Royal Shakespeare Company left UMSL, with everyone waiting for its return to this campus.

'Hearts': western humor

Terry Mahoney

Lewis Tater is a man of ambition. The youngest son of an Iowa farmer, Lewis wants to be a writer of Zane Grey-type novels — or anything that adds to his weighty contribution to world literature. Of course, he in reality means: it really matters very little.

Tater (Jeff Bridges) has already met his first novel — and the weighty contribution to world literature it's two and a half pounds, he weighed himself. It's entitled "Hearts of the West." So in his movie, given a small role in the film a pulp magazine publisher tells Tater that his novel is "an amusing work, rough in spots, but overall having a certain childlike simplicity." So does the film.

And so, for that matter, has Tater. The year is 1930 (we know that because there's a billboard that says "Garbo Speaks") and Tater's a paying Lewis Tater is a man of Titan/Correspondence Division. Intent on following the registrar's advice — namely, "to saddle up and join the distinguished alumni of our school, many of them make up the $200 dollars a year." Tater heads for Titan, Nevada, figuring that if the flowers are "the best, they're just good enough to be good through the mail, they ought to be plain terrific right there on the beautiful campus not surprising that he decides to run westward.

It is from the west that Tater encounters the sort of people he's always wanted to meet: cowboys. Only these cowboys are the movie kind.

They are the regular players in the "B" movies produced by Tumbleweed Productions. Their director is a man named Kressler (Alan Arkin). Kressler tries to strange extras. He also talks funny: "serious, but the guys, I was really punk out there today.

I mean really stink...

While Tater figures that "The west is full of characters," it's easy to make "em up," he is nonetheless open to the possibility of a career in the movies.

There are several reasons for this.Tater has trouble with his stunts men (Andy Griffith among them); there are certain things they simply won't do at extra charge. Tater on the other hand is just stupid enough to be willing to do anything and at no extra charge. But mostly there's Kressler's script girl, played by Bylthe Danner. Danner is terrific. She also acts well.

It's a pity Tater cannot even eventually cast as a lead, he's a killer smile in a village idiot's gang.

He has little time to get better. While the operators of the University of Titan may know nothing about writing good literature, they do know a little about acting a man down in Hollywood. And there rests most of the plot.

In the mean time there is another con run on Tater. There is the old con of his own, a 1930's musical is so bad it's been described as "That's Entertainment!" a rather bizarre bunch held for pulp writers, some slapstick and a love story, it's good.

"Just trying to stay afloat"
Lovers lost in ‘Midsummer’

Mike Drain

The best description of the Loretto-Hilton’s first production of the season, “A Midsummer Night’s Dream” by William Shakespeare, is found in Peter Quince’s memorable introduction to his play: “a most merry tragedy.”

The director, David Frank, certainly worked hard to give the play a pace and a sense of timing that was seldom interrupted by a rough transition or awkward blocking. The series ranked, semi-circular platforms, backed by half of a translucent gooseneck dome, all designed by John Kavelin, did a remarkable job of creating the setting and the mood of the play. While the set gave the visual mood, the sound designed by Bob Chamberlin, and the lighting designed by Peter Sargent, gave the impression of the eeriness of dreams and the cuterness of reality. The most distracting of the physical aspects of the play was the costuming; it was innovative, but inappropriately bizarre, especially in the costumes of Puck, and all of the Fairies.

The play, the frantic story of four young lovers confused and misled by the Fairies of an enchanted forest, is centered around a wedding feast for the Duke of Athens.

While the young lovers are busy running around in circles, the fairies are messing up the hopeless love tangle even more. Finally, the problems are resolved by the use of a mysterious flower and the high magic of the king of the forest, Oberon, played by Arthur Rosenberg. Meanwhile, Will Love plays the role of the weaver, who tries to act in the play for the Duke, but runs amuck. His cohorts in comedy Francis Flute, played by Richard Krueger, and Peter Quince, played by Robert Darnell, serve to make the hopeless play a delightful disaster in the tragedy of “Pyramus and Thisbe.”

Other than a slightly traceable accent that marked John Peak hard to understand at times in the role of Theseus, the Duke, and a few hurried lines here and there, excellent portrayals of the characters in the play show a real sensitivity to the creative genius of Shakespeare. Especially fine performances were given by Robert Spencer as Puck, and Margaret Winn as Helena, one of the lovers.

Talented Fun Palace rolls over Sig Taus

Paul Koeing

The Fun Palace, a team laden with talent, took the intramural overall football title last Thursday as they swept by the Sig Taus, 18-6. As a prelude to the final showdown, both teams played on October 28 in semi-final games.

The Sig Taus met the underdog, named Pross and scored a 12-0 upset victory. The first half was dominated by excellent defensive play. The Pross got an early drive going but their efforts were nullified by a first interception. The Taus, as well as having a fine secondary, displayed an excellent offensive front line as they provided their signal-caller with ample time in the pocket to find an open receiver. Short passes were the order of business as both squads put the clamps on all long receivers.

In the second half, the Sig Taus defense set up the game’s first score with an interception. The Taus promptly took the ball downhill for the score. Minutes later, after regaining possession, the Greeks upped the margin. A fine run by the quarterback found a receiver untouched in the end zone. The Pross couldn’t cross the goal line for the first time all season and came out on the tail end of a 12-0 score.

Also hurting for a final playoff spot that day were the Jests and the Fun Palace. The Fun Palace rallied first and would have run the halftime score up to 12-0 but had a perfect touchdown strike called back because of an illegal motion penalty. Wasting no time the Fun Palace quarterback let go a bomb that was hauled in right on the zone corner marked at a 12-point lead.

The Fun Palace seemed to have the game well in hand as they showed how they breached through the second half to add six more to their lead. However, a Jester defender intercepted a short sideline pass and dashed the length of the field untouched with Palace linemen in hot pursuit.

The Jests had a golden opportunity to tip the score minutes later when they were on the ball first and goal to go on the one-half yard line. However, they choked on four attempts from that distance, the Palace defense blanketed the Jet receivers and batted away all passes, the touchdown passes. The momentum then swung back to the Fun Palace.

From that point the two squads exchanged touchdowns running the score to 18-12. Ultimately it was the fine Fun Palace execution that won for them. A final touchdown with two seconds remaining shut down all Jet chances for a comeback. The stage was set for a battle with the fests.

Two days later the semifinal winners met in the Super Bowl for final intramurals. Team members arrived early to loosen up and prepare to themselves mentally. The weather conditions were ideal, sunny skies with crisp temperatures. Prior to the opening kickoff, both teams huddled for last minute instructions. The Fun Palace gathered quietly and the Taus clapped a steady staccato beat in their huddle.

The Fun Palace took control of the opening kickoff. Quarterback, Joe Porter skillfully led his team to the end zone in four quick plays, the touchdown pass. The over-the-shoulder catch by the Fun Palace.

Sig Taus quarterback Mike Hurz had trouble the entire game connecting with his receiver, John Dudauck. Fun Palace defenders Rich Frede and Bob Dowell kept fratt passing gains to a minimum as they blanketed the speedy Dudauck.

The final play of the first half, Porter again connected for six points, this time to Joe McDonald. Big Maurice McDevitt was widely responsible for Porters’ passing success as he kept defensive linemen at bay, giving Porter precious time and momentum in the pocket to locate his targets.

When asked about the origin of the Fun Palace squad, Porter commented, “We’re all really close friends. We’ve been together a long time, some of us back to high school. When we came here we started hanging out in the Fun Palace. We also played cards together and a few of the group played on the same rugby team.

A few of the second half was nearly a carbon copy of the first with the Fun Palace dominating the well into the Fun Palace zone. The long drive was capped by Hurz to Steve Cottin touchdown.

Down 18-6, the Taus again had an opportunity to score but Joe McDonald intercepted a Mike Hurz pass with nine seconds remaining, keeping the Fun Palace’s string of fourteen consecutive victories and two overall titles unblemished. The Taus were forced to play catchup ball from the opening kickoff and were never able to establish the winning style that brought them to the “UMSL Bowl”.

Sig Taus’ two intramural football champs were on hand for the game and challenged the UMSL representatives to a game which has been scheduled for Nov 9.

Jim Veltin, the director of intramurals, commented, “I was very pleased with the set-up (the regular season and playoff scheduling). It served its purpose. I think we’re going to keep excitement high until the last game. I expect to keep the same format for next year. And I think my referees did a great job.”

Women stumble on road to state

Dave Bedwell

This week was rather disastrous for the UMSt Women’s volleyball team. They were defeated two out of three games this weekend, losing to St. Louis U. and Eastern Illinois.

The team had already defeated two out of three games this weekend, losing to St. Louis U. and Eastern Illinois.

The Scow and Huskylawn Volleyball Tournament begins this weekend here at UMSL. The tourney will be played on Friday from 5 to 10 pm and Saturday from 12-5 to 5:30. The nine teams that will participate are: Southwest Missouri State University-Columbia, Northeast Missouri State University, University of Missouri-St. Louis, St. Louis University, University of Missouri-Kansas City and Northwest Missouri State University.

Admission for UMSL students is free, adults $1.00 and children $5.00.

Women close tennis season

Jim Shanahan

The women’s tennis team closed out their fall season with a 5-2 victory over St. Louis University last Monday at Dwight Davis Tennis Center in Forest Park. The win raised their record to 5-2 for the year. Their only losses came at the hands of Washington University.

The matches were played with an eight game pro set format in which the first player to win eight games, leading by at least two games, wins the match. Normally the players must win six games in a row by taking two out of three games each match.

“We used this format because we knew we didn’t want to get too long and get stopped by darkness,” says coach Judy Whitney.

The uncompromising ones. The calculations you face require no less.

The new compact HP-21 and HP-25 scientific calculators take it easy on your budget—and give you the same uncompromising design and quality that go into every Hewlett-Packard pocket calculator, regardless of price.

**The HP-21 Scientific.** $125.
32 built-in functions and operations.
Performs all log and trig functions, the latter in radians or degrees; rectangular/polar conversion; register arithmetic; common log evaluation.
Performs all basic data manipulations—and executes all functions in one second or less.

The HP-25 Scientific Programmable. $195.
72 built-in functions and operations.
All those found in the HP-21, plus 40 more.
Keystroke programmability.
The automatic answer to repetitive problems. Switch to PRGM and enter the same keystrokes you would use to solve the problem manually. Then switch to RUN and enter only the variables needed each time.
Full editing capability.
You can easily review and quickly add or change steps.
Branching and conditional test capability.
Eight built-in logic comparisons let you program conditional branches.
8 addressable memories.
And you can do full register arithmetic on all eight.

Both the HP-21 and the HP-25 feature:
RPN logic system.
Let's you evaluate any expression without copying parentheses, worrying about hierarchies or restructuring beforehand. You see all the intermediate data displayed; you rarely re-enter data; you can easily backtrack to find an error because all functions are performed individually.
Full decimal display control.
You can choose between fixed decimal and scientific notation and you can control the number of places displayed. The HP-25 also gives you engineering notation, which displays power of ten in multiples of −3 for ease in working with many units of measure—e.g., kio (10^3), nano (10^-9), etc.
Come in and see these great new calculators today.
