Drugs bring police chase to UMSL

CHASE ON CAMPUS: Narcotics agents and a search for a stolen car culminate in chase by six police departments of a suspect accused of questioning police on the campus. (Photo by Mike Weber)

Paul Fey

Students near the Multipurpose building entrance at 3:20 p.m. Monday, Oct. 27 found themselves suddenly in the center of a gunfire and the high speed chase of a suspect allegedly involved in a drug deal.

The object of the chase, described by police only as a white male, 22 years old with long brown hair, had swerved sharply into the north campus exit while being chased by police south on Florissant Road from Cool Valley. In close pursuit were squad cars from Cool Valley, Bel-Ridge and Norman- dcy, who reportedly fired four or five shots at the fleeing vehicle, which veered across the road, nearly striking the automobile of Student Willie Brogdon.

"I couldn't believe it," said Brogdon. "I heard shots and turned around, and then the guy came near run into my car."

From there, the subject raced his dark-brown Chevrolet Malibu across the campus, turning right at the metal office building, and racing down the parking lot between the rows of parked cars, with police still in pursuit. He was forced to make a screeching left turn upon reaching the end of the parking aisle, after which he bolted over the curb boundary and across a dirt ravine onto East Campus Drive.

At this point, the left rear tire of the fleeing auto blew out. The crippled auto was left perpendicul ar to the far curb, facing the woods between East Campus Drive and Normandy Junior High School, into which the driver fled, abandoning his still running car. The suspect scaled a barb-wired fence, losing both of his shoes in the process, and was followed on foot by several policemen.

Officers on the scene, which by this time included members of seven different forces, were unsure whether the flat tire had been caused by a bullet or through impact against the curbstones. As a few policemen continued the chase on foot, and a County Police helicopter hovered over the wooded area, officers directed campus traffic around the halted vehicle. They explained to Current, reporters that they had been under observation since early that morning and that the chase had begun shortly after he had been involved in a drug deal.

Police strengthened this evidence by opening the trunk of the car and producing a green duffel bag which police estimated as containing several pounds of marijuana. Later reports confirmed that the contents were 12 bricks of marijuana, the street value of which was estimated by Cool Valley Police at about $31,000.

Officers on the scene expressed confidence that the sus- spect would be apprehended. "He's baseless and unarmed," said one. "We'll find him."

Meanwhile, students present who had witnessed the incident expressed alarm at the fact that police had been driving so near to innocent bystanders. Ron Schroeder, who was present during the shooting commented, "That guy might have shot back and he someone, even if the police didn't. I don't even think they thought about it." As of Wednesday afternoon, Oct. 29, the suspect had not been yet captured.

Proposal reduces library cut

Windy Watkins

The proposed cut in the Thomas Jefferson Library budget may not be as extensive as originally expected. In an attempt to reduce the amount of Library monies to be cut, the Fiscal Resources and Long Range Planning Committee of the Senate voted last week to submit a proposal reducing Equipment and Expenses (E&E) budgets three per cent.

Under the original proposal the Library budget would be cut $175,000. Under the new proposal the Library budget cut would be reduced to $105,000, with the difference coming from the cut in E&E budgets.

Bernard Cohen and Bob Kil len of the committee initiated the new proposal at last week's committee meeting. Cohen said, "I would rather that the E&E budgets be cut than the Library. There may be a good deal of waste in these budgets to begin with."

The Expenses and Equipment budget handles monies used for various department costs such as, telephones, office machines, duplicating materials, paper, etc. Members of the committee felt that the proposed three per cent reduction would be an equitable means of making across the board cuts, rather than cutting from a specific area.

Students plan wheelchair day here

Susan Kundeich

The Disabled Students Union, a newly-formed organization of handicapped students on campus, will sponsor a "Wheelchair Day" Nov. 7 at UMSL.

In order to bring to the attention of the UMSL community the problems and dangers faced daily by students in wheelchairs, and those that are blind or orthopedically handicapped, the DSU has asked members of the faculty and administration, as well as fellow students to perform their normal activities on the campus that day confined to a wheelchair.

All participants will start in front of the Thomas Jefferson Library and will have to move to classrooms, offices and meetings under their own effort. Each person in a chair will be accompanied by a student volunteer, who will remain with them during the day. These volunteers will thus get a first-hand view of the difficulties the wheelchair-bound person encounters, and will also make sure the participants stay in the chair as much as possible.

According to Debra Phillips, president of the DSU, the most difficult problems for wheelchair day volunteers will be approaching and maneuvering in Clark Hall. "The Physical Plant built a ramp at the lower entrance of Clark Hall as a result of a meeting we had with John Perry, UMSL's business office manager," she said. The plant is not equipped to handle other type of problems, such as, for example, the need to open a door with a key or to move a desk.

Students pass council amendments

Mike Miles, chairperson of the Central Council Administrative Committee announced passage of all three amendments to the council constitution at its executive committee Monday evening.

According to the results released by Central Council, students supporting salary provisions passed with 55 per cent of the vote, the provision changing the recognition policy passed with 71 per cent of the vote, and methods to present referendum were changed with 63 per cent approval.

(continued on page 2)

Campus difficult and dangerous

(continued from page 1)

ier," she said. "But it doesn’t do any good, because there is no safe way to get to the ramp by wheelchair. Students confined to wheelchairs must now approach the building by means of a steep and rutted dirt path which has proven to be dangerous."

Though most of the elevator on campus no longer require keys, a small number of students in a wheelchair must go up and down steps before they can reach the campus.

They must also face the hazards of high curbs, steep hills, and parking lots pitted with chuckholes, said one student. "A chance meeting can seem like much when you’re walking, but you ought to try getting over it in a wheelchair — then it seems like a big rock."

All of these incidents usually be using the wheelchairs will encourage for the first time these frustrations which some students must face constantly. Although they will be instructed prior to Nov. 7 on the proper use of a wheelchair, this will not lessen many of the difficulties they will have to surmount. The DSU feels that they should be helped to bring through the effective means of bringing their grievances to light and gaining support for their cause.

"We would like the participants to respond verbally and by letter after their experience," Phillips said. "Once they recognize the need for some changes on this campus, they can personally bring these needs to the attention of the administration."

The DSU thus hopes to encourage the appropriation of funds to facilitatesome changes on campus. Then UMSL would be better equipped to handle a larger handicapped student population, and would "become more attractive to the prospective student suffering a disability."

Several members of the faculty and staff, and student groups have already agreed to take to a wheelchair. Among them are Kenneth Johnson of political science and Charles Granger of biology, Rolf Mueller

Reduction in library cut

(continued from page 1)

Charles Fazzaro another member of the committee, commented on the proposed E&K cut. "I know that some departments may not like to see their E&K budget reduced, but I’m sure that most will agree to a little belt tightening."

At one point in the meeting Fazzaro asked the chancellor to clarify the role of the Fiscal Resources and Long Range Planning Committee. He said, "I think it would help a great deal if we could come to some sort of understanding as to the exact role of this committee. What type of responsibility and relationship does it have to the chancellor?"

Awarded student grants available

Full checks have arrived for those students who have been awarded financial assistance under the Missouri Student Grant Program. They may be picked up in person at the Student Financial Aid Office, room 10, Administration Building, after presentation of a validated student ID.

ment, Rick Illiion, Director of Student Activities, Dennis Don-

ham, Assistant Dean of Students, John Schott, Coor-

dinator of Veterans Affairs, Father Bill Loomis of the Newman Cen-

ter, along with several students. The DSU is still in the process of re-

ceiving reports from other departments and groups on campus.

Because it is a relatively small group, the DSU has asked various representatives of the co-

operation in carrying out their plans for the weekend. Volunteers from fraternities, sororities, Central Council and the Newman Club, will accom-

pany the individuals in the wheelchairs, which have been rented or donated to the group.

The participants will remain in the chairs until 12:30 pm that day.

Student officers recommend curator

Marie Casey

Carrie Frank, Columbia’s student body president, was the initiate of a student meeting held on Thursday, Oct. 27, at which the student body pres-

idents and representatives from the University of Missouri’s four campuses met to find a replace-

ment for William Thompson, recently resigned from the Board of Curators.

The Board of Curators is a governing body composed of nine individuals who meet monthly to make major policy and financial decisions. Their powers lie below that of the Coordinating Board of Higher Education.

In persons they choose to interview, the students focused on a young female from the second or third congressional district in the latter being stipulated by law. They would also like to see someone

Council elected

Elected to serve the Even-

ing Council, the board of the coun-

cil’s first meeting last Thursday were, Paul Clel, Jr., president, Jamesanna Jones, vice-presi-

dent, Karen Placke, secretary, Mike Brandi, treasurer, Rex Peerce and Jamesanna Jones were selected as representatives to the evening college grievance committee, and Arita Patton is the alternate. Mike Brandi was appointed to the budget com-

mittee, and Paul Clel was ap-

pointed evening school voting representative to the Central Council.

Who’s Who

Thirty UMSL students have been selected for inclusion in the 1975-76 edition of the pub-

lication "Who’s Who Among Students in American Universities and Colleges." The students were chosen by a committee of UMSL faculty and staff on the basis of academic excellence, participation in extracurricular activities, service and citizenship at UMSL, and potential for future accomplishments. Those selected are:

Eric Banks, Mike Dace, Judy Galetka, Eileen Hohengarten, Tom Krachkoven, Brian Farrar and Michael Young.

Cathy Lienau, Mary Mack Michael Mayo, Steve Milko-

ses, Garrett Watts and Patrick Williams.

who is more accessible than present board members, par-

ticularly to the students. Questions asked were an at-

tempt to determine the interviewers’ philosophy of edu-

cation, students, and the uni-

versity. Hypothetical situations were posed to predict possible reactions.

Although Franki did not wish to speculate on who will be chosen by Governor Christopher Bond, the entire group seemed optimistic that all of the group’s recommendations will be con-

sidered more than those pre-

sented last year, Paul April, chairman of UMSL’s Central Council, commented that in the past, Bond has made a practice of talking to students about decisions after they have been made. Franki delivered the group’s recommendation to Bond’s staff.

Career day to aid black students

UMSL students are invited to attend the third annual St. Louis University Black Career Day, Wednesday, Nov. 17, 1975. The Career Day will be held in the Segomispinal Room of Beach Memorial Center, 20 North Grand Blvd., from 10 am to 4 pm.

The offerings are designed to assist minority students in making vocational and life career choices. Representatives from a variety of firms will discuss the personnel and academic qualifi-

cations sought by their com-

panies. A bus may be made available to travelers who cannot get to the event by 10 am in front of Barnhall Hall, to return to St. Louis University at 4 pm.

Interested students are ad-

vised to register in advance in the Office of the Assistant Dean of Student Affairs, Dennis Don-

ham, 201 Administration Bldg., as soon as possible. Bus registration deposit must be postmarked by August 1.

Dean Edwards to hold law seminar

Law Dean Jack Edwards of the University of Missouri- Columbia, will meet with pre-law students on Thursday, Nov. 13, in room 78 J.C. Penney Building, from 2:30-4:30 pm and again from 7:30-9 pm.

Though these sessions are intended to help senior pre-law students clarify the problems of securing admissions to Law Schools, including UMC, the sessions are open to all students interested in becoming lawyers. Dean Edwards has visited UMSL annually for several years, and students have discovered him to be an excellent source of pertinent information about law schools all over the country. As in the past, the Dean will spend much of the time replying to general and specific questions regarding law schools. Students should feel free to drop in for as long as they wish. Past meetings with Dean Edwards have demonstrated that students have a great deal to learn from questions asked by fellow students as well as their own.

KWMU presents child program

KWMU, 90.7 stereo FM, the public radio station located at UMSL is presenting "L" is for Listening," a twice weekly series of ten minute programs designed to help increase listening skills in children ages 3 thru 8.

Subjects covered in the stories include African folklore, "American Indian 'Why' Mythology," "Mexican and Hawaiian 'Why' Mythology," and the more general subjects of lifestyles, weather and poetry.

Executive producer of the series is Bob Eastman, KWMU's Assistant General Manager.

The uncompromising ones.
The calculations you face require no less.

The new compact HP-21 and HP-25 scientific calculators take it easy on your budget—and give you the same uncompromising design and quality that go into every Hewlett-Packard pocket calculator, regardless of price.

The HP-21 Scientific. $125.

32 built-in functions and operations.
Performs all log and trig functions, the latter in radians or degrees; rectangular/polar conversion; register arithmetic; common log evaluation.

Performs all basic data manipulations—and executes all functions in one second or less.

The HP-25 Scientific Programmable. $155.

72 built-in functions and operations.
All those found in the HP-21, plus 40 more.

Keystroke programmability.
The automatic answer to repetitive problems. Switch to PRGM and enter the same keystrokes you would use to solve the problem manually. Then switch to RUN and enter only the variables needed each time.

Full editing capability.
You can easily review and quickly add or change steps.

Branching and conditional test capability.
Eight built-in logic comparisons let you program conditional branches.

8 addressable memories.
And you can do full register arithmetic on all eight.

Both the HP-21 and the HP-25 feature:

RPN logic system.
Let's you evaluate any expression without copying parentheses, worrying about hierarchies or restructuring beforehand. You see all the intermediate data displayed; you rarely re-enter data; you can easily backtrack to find an error because all functions are performed individually.

Full decimal display control.
You can choose between fixed decimal and scientific notation and you can control the number of places displayed. The HP-25 also gives you engineering notation, which displays power of ten in multiples of -3 for ease in working with many units of measure—e.g., kilo (10^3), nano (10^-9), etc.

Come in and see these great new calculators today.

Reorganization plan a good one, but precautions may be needed

UMSL's chancellor, Arnold B. Grobman, in the last few weeks, has acted in ways that have raised the eyebrows of, and raised questions from, many of the members of this faculty and student body. The two most recent of Grobman's actions have caused grumbling: the proposed library budget cut and his reorganization plan, the more puzzling of the two. While the reorganization plan is a fine idea, there are many concerns and questions concerning the plan still unanswered.

Grobman's reorganization plan calls for a restructuring of the administration into three vice-chancellors: vice-chancellor at community affairs, Grobman nominating Everett Walters, now dean of faculties; vice-chancellor for administrative services, Grobman nominating presently UMSL's business director; and vice-chancellor for academic affairs, for which a search committee is being formed.

The reason for the reorganization, according to Grobman, and others is to bring more effective service to the chancellor's office. Presently several people are reporting to the chancellor, many of which are repeating information received through a previous source. To relieve redundancy and to save time, the vice-chancellors were proposed. The vice- chancellors will have some decision making powers, although not all. The chancellor, Grobman says, will be to meet with the people now reporting to the chancellor, to compile date and present a report to the chancellor. Efficacies will be the result of the vice-chancellors, but the cost and efficiency should be immeasurable. The reorganization plan might be compared to the dangerous isolation of Richard M. Nixon. The vice-chancellors potentially playing the roles of Haldeman and Ehrlichman. The chancellor will be less visible to the majority of the campus, sharing himself off through his reorganization plan. The vice-chancellors, if conscientious, will alleviate the congestion of the chancellor's office, and could also keep important information from the chancellor if it is something the chancellor might not want to hear. The chancellor, therefore, must not allow the vice- chancellors to alienate him from the campus community.

There seems to be a great deal of confusion over the positions of the different vice-chancellors, and many questions have been raised for which no answers seem to be coming. Grobman told the Senate that his reorganization plan is basic, a chair will go to the dean of facilities position, or the position of business officer? Why did Grobman appoint two nominees, and open a search committee for the third vice-chancellor position? If this is suggested by Frederick Pearson of political science, the reason is that Grobman looks at two of the positions as old jobs under different names, and the other as a new position, then the chancellor seems to be contradicting himself. In August, the Central Council passed a resolution calling for a search committee to be formed to advise the chancellor of nominations for the three vice-chancellor positions. Grobman wrote to the council saying he agreed with the thrust of the resolution, and yet chose two of the nominees without a search committee being formed. Again the chancellor seems to be contradicting himself. UMSL is an equal opportunity employer, with an Affirmative Action plan to ensure equality to minorities, but there seems to be some doubt among people on campus, especially Pearson and Stella Lang, the Affirmative Action officer, that Affirmative Action principles were utilized in the selection of the two vice-chancellor nominees.

The vice-chancellor issues, combined with the proposed library budget cut of originally $175,000, has tarnished Grobman's image in the eyes of many of the faculty and student body. One of the things that have alienated the chancellor is the charge of covert activities and secrecy. The problem results from the fact that Grobman is a politician who has the tendency to remain quiet. Grobman is being compared by many people at UMSL with Emery Turner, a very careful and obscure politician, but who often had setbacks in the political aspects of the University. Turner's career should be remembered, has brought UMSL one step closer to the purchase of Marillac when the Coordinating Board of Higher Education approved the acquisition.

The main concern of Grobman's reorganization plan remains the flow of information from the faculty, to the vice-chancellors, to the chancellor. When a message has to go through such bureaucratic channels, the message has a better chance of being misunderstood or misinterpreted. Vital information which could be essential in the making of decisions could be left out of vice-chancellor reports because they denote information as non-consequential. The tendency in all bureaucracies is to keep the bad news from the boss, according to sociologists. The chancellor must remain in contact with all areas of the campus, and have an overall view of the needs and atmosphere of the campus, which the reorganization plan for vice-chancellorships may prevent him from doing.

Ghosts: Just where do they hang out

Ghosts have been with us for a long time. And they have been with us in all kinds of places.
The Scottish scholar Eric Mapke (who doesn't even believe in them), went so far in his book as to say that “The best authenticated phenomenon of history is the house. The ghosts have been observed by countless generations of competent witnesses, and purely on statistical grounds it is reasonable that it has been securely estab-
lished.
Not only has the belief in ghosts been longstanding, it is a belief that is shared by ancient cultures—the ghosts of the ancient Japanese for instance, believed in. In fact, they are a belief that may have varied from culture to culture.
The Ancient Greek who believed in ghosts is known as Acheron. He was the god of the Underworld, where the souls of the deceased went after they died. He was also known as the god of the Dead, where he ruled over the souls of the deceased.

Muslim minister voices concern for blacks in drug culture

Drugs are being used to keep blacks quiet, according to Kareem Abdul Aziz, black Muslim minister of St. Louis Temple 28 of the Nation of Islam located on North Grand Boulevard.

Aziz spoke last week to a small group of black students congregated in the J.C. Penney auditorium. The event was the first of a series of guest appearances and lectures against drug use sponsored by UMSL’s Minority Student Service Coalition.

"Drugs," as stated by Aziz, "are the mechanism used today to still the voices of the black masses and to prevent peaceable or violent uprisings from blacks in the ghettos towards white America." Aziz stated that the use of drugs by blacks tended to usurp their stamina to fight for equality and justice on all planes. Aziz expressed his concern for blacks, "until we overcome various forms of sin we will continue to be dissipated."

Aziz felt strongly that white Americans had very uniformly undermined the Islamic theology by systematically associating it with evil simply because it’s teachings were contrary to those of Christianity. Aziz stated, "The Nation of Islam sought to give the black man pride, independence, a sense of well being as taught by the Messenger, Elijah Muhammad. All of these attributes were detracted from American blacks by whites. Christianity enabled them to emaculate the black people by forcing them to pray to white effigies of Christ and by remaining passive when one should fight for his rights."

Aziz went on to say that "black people instead of being contented with being black and achieving greatness sought to imitate their white counterparts through processing their hair, lightening the color of their skin through the use of various bleaching cremes and, worst of all, engaging in the same kinds of sin and temptations as their white counterparts such as fornication, adultery, alcoholism, and drugism."

Initially, Aziz thanked his audience for their attendance. He then proceeded to discuss

Pre-registration for students starts Nov. 7

Undergraduate students wishing to pre-register may pick up packets Nov. 7 in the Administration Building between 8:30 am and 4 pm. Packets should be returned Nov. 10 through Nov. 21. Evening students may pick up packets in the Administration Building Nov. 7 between 8:30 am and 8:30 pm and return packets Nov. 10 through Nov. 21.

Speakers directory available

The new UMSL Speakers Bureau directory, listing more than 100 speakers and over 400 subjects areas ranging from philosophical perspectives to literature, music and arts, is available for interested groups.

The bureau, composed of UMSL faculty and administrators, is designed to serve the area’s fraternal, professional, service, social, educational and religious organizations.

“How to succeed in Business by Trying Harder,” “Humanistic Education: Chance for the Inner City School,” “Japanese Flower Arranging,” and “Evaluating Your Local Government’s Performance” are among the topics listed in the 1975-76 directory.

There are topics for women, for the businessman, for students, parents and senior citizens. The directory also lists subjects of special interest to teachers, social workers and those in public service.

Organizations wishing to obtain a copy of the new directory should write Speakers Bureau, Office of Public Information, University of Missouri-St. Louis, 8001 Natural Bridge Road, St. Louis, Mo. 63121, or call (314) 453-5663.

Rat solution attempted

In the Sept. 25 issue of the Current, it was reported that a rat was sighted near the food service area. Since then measures have been taken to eliminate vermin and to prevent any other appearances.

Director of the University Center, Bill Edwards, said on the problem, “We referred the problem to physical plant whose responsibility is to control such matters.”

Paul Kuhlman of physical plant was not available for comment.

Night manager of food services, Larry Clark tells of two new jobs created to prevent vermin from moving into the area again. “Food services has hired two new people to work five hours a day to keep the loading dock area clean of refuse and to keep garbage from being left where it could become a food supply for pests.”

Clark also said, “Hoffmeier Bros., the firm that picks up our trash has been penalized for not deodorizing the cans and cleaning up spillage as our contract with them specifies.”

Bicycle tour planned

An “Historical Bicycle Tour” of Lafayette Square area will be held on Sunday, Nov. 2. Residents will be guided and lead interested cyclists through the entire historic district. Significant architectural features of the Victorian neighborhood will be pointed out.

The tour will start at noon from the corner of Mississippi and Lafayette and refreshments will be served there at the end of the tour. Participants are advised to dress warmly. The fee is $1.50 per cycle.

Live Jazz:

Con Alma
in concert
Friday, October 31, 1975
11:45am
JC Penney Auditorium

Free

presented by the University Program Board, financed with Student Activity funds.
Thursday

WORKSHOP: A Physics workshop in Pre-Engineering will be held in room 72 of the J.C. Penney Building at 10 pm.

"APPLE AWARENESS WEEK": An apple pie bake-off will take place in the snack bar from 11 to 1.

COLLOQUIUM: A mathematical sciences colloquium will be held at 4 pm in Clark Hall. Professor Willard Miller from the University of Minnesota will speak on "Symmetry and Separation of Variables for the Linear Partial Differential Equations of Physics." At 3:30, before the colloquium, a tea will be held in room 527 Clark Hall.

Saturday

WOMEN'S FIELD HOCKEY: MAIAW State tournament at Liberty.

THEATRE: The Royal Shakespeare Company will present "The Hollow Crown" at 8:30 pm in the J.C. PenneyAuditorium. Tickets are $2, $3 and $4.

SOC CER: UMSL vs. Rockhurst College at 2 pm at Rockhurst.

CROSS COUNTRY: UMSL in SLACAA meet at 11 am at Forest Park.

MEETING: The Minority Student Service Coalition will meet at 5 pm in the Black Culture Room.

For more information, contact Debbie Phillips at 831-8541.

MEETING: A meeting entitled "Defend Cabkin Teachers" will be held in room 272 University Center at 10:40 am.

CONCERT: A jazz concert featuring Con Alma will be held in the J.C. Penney Auditorium at 11:45.

FRANKLY SPEAKING - by Phil Frank

I CERTAINLY APPRECIATE THIS FINE TURNOUR FOR MY EMPLOYMENT INTERVIEW... I HAD HOPED TO MEET WITH YOU ON A MORE INDIVIDUAL LEVEL....

Wednesday

WORKSHOP: The Accounting Club will hold a meeting and workshop at 12:40 in room 229 J.C. Penney. Mr. John Haslans and Dr. Albert Amess will speak on "Managerial Accountants."

SEMINAR: A biology seminar will be held in room 316 Stadler Hall at 3 pm.

WORKSHOP: The feminist alliance group will hold a meeting and workshop in room 222 J.C. Penney at 11:30.

Friday

WOMEN'S FIELD HOCKEY: MAIAW state tournament at Liberty.

FILM: "Zardoz" will be shown in room 101 Stadler Hall at 8 pm. Admission is $0.75 with an UMSL ID.

"APPLE AWARENESS WEEK": An apple dunking contest will be held from 11 to 1 in the snack bar.

MEETING: The Disabled Students Union will hold an important meeting concerning Wheelchair Day at 12:30 in room 75 J.C. Penney. All interested students are urged to attend.

The exhibit is free and open to the public daily.

Monday

MEETING: The UMSL Pre-Law Club will hold their first organizational meeting from 11:30 to 1:30 pm in room 78 J.C. Penney. The purpose of the meeting will be to discuss the proposed club charter and bylaws and to deal with other administrative details. Anyone who is interested and cannot attend should leave their name and phone number in the Pre-Law mailbox or contact Lisa at 453-5591.

FILM: "Come With the Wind" will be shown at 8 pm in J.C. Penney Auditorium.

Tuesday

MEETING: The Marketing Club will have a meeting in room 311 Clark Hall at 1 pm. Morton Huff, chairman of the Board of Famous Barr will be the speaker.

KWMU to initiate new radio format

The student staff of KWMU will be changing its overall format on "Friday Magazine" from all music to special shows on Oct. 31. Some of the special shows are: "Comedy Corner," "A Woman's Point of View, with its host Mary Marsalla," "Album of the Week," "Fourth Tower of Inverness," "Feathered Artist", and interviews with personalities and special guests. News and music will also be heard throughout the evening and morning.

Thank you for a Magical ten years!! Gary
Selection limited for UMSL vegetarians

Thomas Teckelinger

Plato was one. So were Buddha, Voltaire, Shelley, Shaw and Hitler. The common factor among these divergent individuals was their aversion to eating meat. Vegetarianism is a philosophy which has probably been practiced as long as humans have been cognizant beings walking erect. The history of people not consuming beef, fish, or fowl, dairy products, and in some cases not wearing animal hides has many social, cultural, and economic origins. Yet because vegetarianism can be practiced in varying degrees, there is often some confusion about the reasons and ramifications of this blend of nutrition and morality. There are a few vegans at UMSL, perhaps less than one per cent of the student body, and several of them recently gave their views on the subject.

Vicki Forringer, a 21 year old part time student, is head cashier of the UMSL Food Service and has been a vegan since she was 13.

"I stopped eating meat," she says, "because I believe it is immoral, unnecessary, and economically inefficient. The amount of grain consumed and land used by cattle and other slaughtered animals results in less food produced than if the land had been used to grow vegetables or fruit." Vicki does not abstain 100 per cent from meat or meat products because "it is practically impossible in America today to be a pure vegan. Many vegetable soups and stews have a meat-based stock, and most processed foods have some animal based ingredient in them, such as gelatine pruduced from boiled cattle hooves. The best I can do is to avoid such foods as much as possible. But I do feel healthier and have lost weight since becoming a vegan."

A typical day's menu for Vicki might start with tea and oat or corn cereal for breakfast. For lunch she tries to eat at least two different kinds of cooked or uncooked vegetables, with perhaps a dairy product for protein. Dinner might consist of a salad, some bread, and rice or potatoes for starch. Like anyone, she tries to vary her diet as much as possible.

Dan Crane, Manager of the UMSL Food Service, is not a vegan but is aware there are some within the university community. "This cafeteria exists solely for the purpose of serving the needs of the faculty and students," he says. "Of course we wish to at least break even, but we are not a profit oriented operation.

I have been approached about this subject only three or four times. But we do have five vegetables daily, two of which also change daily, in addition to many other non-meat items. I believe we offer a larger variety of foods than similar cafeterias. Some vegans here have expressed displeasure at the fact that some of the vegetables are prepared with a meat base, such as green beans cooked with a piece of ham in the pot for flavor.

"That is a question," explains Dan, "if pleasing the minority or the majority. Removing the meat base would please the vegans, but the rest of the customers would notice the more bland flavor. But again I state we are only here to serve, and if any group — vegans, diabetics, or anemics — show me a sim- ple, disaffected minority we will accommodate their needs.

Dr. Rangachary Kannan, a 29 year old professor of mathematics, has a vegan lifestyle all his life. A native Indian, he says he was raised a vegan and has come to accept that as an adult.

"In India," he says, "vegetarianism is much more common than in the U.S. or the world. The population of India is quite large, there are less animals available for slaughter, and there is a dearth of cold storage facilities for meat. Consequently many Indians are vegans out of necessity as well as choice." Dr. Kannan does eat meat foods occasionally, but only when it is unavoidable. "I will not consciously eat meat, but it is harder to be a vegan in America than in India. I tolerate traces of meat in my food, but of course I don't consume it.

"I am satisfied with the non-meat selections offered in the cafeteria," he continued, "but I naturally preferred even more variety. I try to eat a mixture of vegetables, fruits and nuts and feel quite healthy."

Indeed one of the charges levied at vegans is that they cannot achieve a balanced, nutritious diet without meat. But Dr. P.J. Shanahan, UMSL physician, refutes that. "Vegans can eat a balanced diet if they try to. If they watch their caloric intake and the amount of protein, carbohydrates, and fat consumed, they can be as healthy as meat eaters. They may have some trouble obtaining enough protein, but that may be said of meat eaters as well. Dairy products are an excellent source of protein, and essential vitamins and minerals can be found in most fruits and vegetables."

"But frankly," he continued, "my limited medical experience with vegans has shown little difference in heath or longevity from others. Vegans might be a bit healthier than the norm, but that is probably because they are merely more conscious of what they eat than someone who grabs a frozen dinner and throws it in the oven."
Campaign methods influence election results

Gena Oraji
This year homecoming campaign methods overturned UMSL's usual pathetic voter turnout. The result was two historic marks for UMSL. UMSL elected its first black queen and king.

Rick Blanton, director of student activities and chair of the homecoming committee, was "very pleased with the campaign this year. We had a great turnout." The election was held for only two days this year: instead of three and with one less day we're going to bring in three to four hundred more votes. This is an attribute to the candidates.

To be a homecoming candidate one must be "sponsored by an organization or the individual themselves," according to Blanton. Each candidate ran for various reasons.

Marla Ferguson, newly elected queen for 1975-76, ran as a candidate representing the blacks on campus. Marla explained, "It was a group not just me, we thought it was time for some black representation on campus." Marla is the first black homecoming queen in the twelve year history of UMSL.

Nancy Balaskas, Cathy Leaunance, and Maria Royle were also nominated as homecoming candidates by their individual sororities. "Basically my sorority always puts someone up in homecoming. They nominated me," Nancy explained.

Mike Hendel and Ron Schroeder, both candidates for homecoming king, were nominated by their own fraternities. "I had thought about it personally and decided not to," Mike said, but he ended up running as a representative from his fraternity. Ron Schroeder ran because, "Our fraternity puts up a man each year, and they want someone who knows the most people. They asked me, so that's how I got into it.

Two other candidates ran representing a different group on campus. Both Carol Mikels and Steve Stockmann ran representing the Physical Education Majors. Steve explained, "Since I was president of the Physical Education Club I thought it was a good idea to get some kind of recognition.

John January, newly elected Homecoming king in 1975-76, ran as a write-in candidate supported by Tau Kappa Epsilon. John had a few problems with his campaign at first. He had originally planned to run as a regular candidate. Because of John's campaign methods, the homecoming committee decided to reconsider John as a candidate. His campaign was based on wearing a funny mustache, glasses and eyebrows.

Blanton stated that, "John was given a choice, he could remain on the ballot as John January or withdraw and run the campaign anyway he wanted to.

January explained, "I did it to make it more fun originally and to get more people to know that there was even a homecoming at UMSL." He continued, "The reason I chose to run as a write-in candidate is that I didn't do anything wrong. There were no rules at all set up saying that nothing like that could be done. We were accused of making a farce out of the election.

"That was John January's method of campaigning. He did a lot to stir up participation with his campaign. I have no malice to John. As a result of his campaign, more people heard about homecoming, or became involved in the process of electing a homecoming king and queen," Blanton commented. He also stated that, "Campaign methods were used in this year's homecoming. It was an idea that would have absolutely based her campaign on pink elephants that don't exist, reminding people to vote in the election.

The theme of my campaign was based on elephants because they never forget. Even though nobody really got it," Cathy explained. A few of the girls from Cathy's sorority, Delta Zeta, were helping Cathy with her campaign and decided to have a pink elephant on campus. "It was all a surprise to me. My sorority did it. It was a short that they dyed pink and were around campus. It said "Vote for Cathy." It didn't really look like an elephant though," Cathy said.

Ron Schroeder based his campaign on the spirit of the UMSLBasically, "My whole campaign centered around the spirit. It was an idea that would carry through," Ron added. Most of the other candidates could feel that they were doing something for the school by voting in the election, he commented. Ron and some of his fraternity members also passed out flyers that "gave information about how they could get involved in homecoming." He also used sheet signs setting the same theme.

One of the unique campaign methods used were three guys in spuds diving gear and funny noses, mustaches, glasses and eyebrows. They passed out flyers supporting John January for king. John's campaign also included 'about twenty five people wearing the nose, mustache, glasses and eyebrows', along with flyers and sandwich signs.

The methods of campaigning definitely seemed to have some effect on the outcome of the election. Mike Miller, Chairperson of the Central Council Administrative Committee, said, "John January ran away with votes for king. The method of campaigning was absolute in his case.

January launched a unique campaign and believes, "The reason I won was because the student body overcame the black votes of the usual sorority and fraternity winners."

In comparison Maria Ferguson believed that her campaign was, "Nothing really different. But something really different did happen. UMSL elected its first black queen and for the first time elected a write-in candidate for king.

For more information about Salesian Priests and Brothers, contact Father Joseph, S.D.B., Room 2-215

Salesians of St. John Bosco were founded in 1556 to serve youth. Unlike other orders whose apostolate has changed with the times, the Salesians always have been — and will be, youth oriented. Today we're helping to prepare youngsters for the world that awaits them tomorrow. Not an easy task but one which we welcome.

And how do we go about it? By following the precepts of our founder, Don Bosco. To crowd out evil with reason, religion and kindness with a method of play, learn and pray. We're trying to build better communities by helping to create better men.

As a Salesian, you are guaranteed the chance to help the young in a wide range of endeavor — as guidance counselor, technical and academic teachers, as chaplains, psychologists — in boys clubs, summer camps — as missionaries. And you are given the kind of training you need to achieve your aim.

The Salesian family is a large one (we are the third largest order) but a warm one. A community with an enthusiastic family feeling where not only your talents are shared but our shortcomings, too. If you think you'd like to work with youth as an important mission in your life, we welcome your interest.
**FIRE ARTS**

Students design kites

Brenda Shirley

"I sweat blood, felt pain and frustration," said Mike Nobs when describing the process of kite-making. Christi Cline "almost cut off a finger" as she saw away at the sticks she made for backing her kite.

Kites could be seen soaring behind Clark Hall. Madeleine Ryan was the most ambitious with her kite measuring 11 ft. by 6 ft.

Though MADELEINE RYAN's supporting sticks broke in five different places, it flew with feeding time record of 45 minutes. She added that, "it could have flown a lot longer, too!"

MADELEINE'S KITE caught the wind beautifully. The cupped shape created by the breaks was really amazing," commented CLINTON JONES, assistant, of the course, and newcomer to UMSS Fine Arts Department.

Clissye's explanation for assigning the tortuous project was that "earlier design projects in class had been limited to mostly rectangular formats, without little involvement in color and were not made to be functional. In designing kites, function becomes part of the aesthetics."

Instead of using conventional diamond-shaped kites, students created their own formats. They came up with a variety of shapes, such as, CHRIS BILLINGHAM's hexagonal kite made of crepe paper and dowel rods. Cheryl Pinkston designed a huge spiral kite, and Gloria Trichkin created a kite of two diamond shapes, one lying at an angle directly on top of the other. Cheryl and Gloria both made their designs with rice paper and balsa sticks.

Colors were selected to create sharp contrasts against the sky. Christi Cline painted the lower half of her kite in black tempera on rice paper, contrasted the black with a white stripe, and then painted stripes of warm greens, bright oranges, yellows and finally red in a progression from the middle of her kite to the bottom, all of which resisted blowing into the blue sky.

MADELEINE'S KITE of bright orange, yellow and deep green tissue paper seemed brilliantly colored stained glass when the sunlit flittered thorough the clouds.

For many students deciding upon a format, choosing the colors and making the kite proved to be easier to handle than the frustration that comes with trying to fly the kites.

Balanced created by careful placement of guiding strings, the shape and size of the kite, and weight of the materials, all play a crucial part in whether or not the kite will fly. With these balancing factors met, all that is needed is to experiment with different tails, unless, as with some students, their kites first crashing flight downward is its last.

A surprising feature of the design project was, as Terri MAIDEN FLIGHT: A student exhibits her creativity. [Photo by Mike Grosch]

Heitman pointed out, "the cooperation and help students gave to each other." Students rushed to help mend other's kites, supplied extra materials and tools and untangled each other from woven kite strings. For those kite-designers whose kites did soar, there was a feeling, as Madeleine said, "of satisfaction and accomplishment."

For those kite-designers whose kites did not soar, there was the satisfaction and accomplishment in trying.

"Hard times" seem dull times in the Depression Era

Terry Mahoney

The central character in "Hard Times" is a fellow named Charley Chaney. Charley is an itinerant pickler of plums who talks about the past, has no plans for the future, and is pretty sure his dreams will never be realized.

He has trouble getting more than two words out of a coherent string: "I don't look past the next bend in the road" might well be his philosophy for him in the entire script.

The part seems tailor-made for Charles Bronson. With a head that looks like a pair of bone necker gloopers and a body of tightly bound piano wire, Bronson looks like a Charley Chaney would have to. And while we've never especially cared for Bronson in the past, his limitations as a performer seem to fit in nicely with the low-key personality of Charley. Besides which, Charley thinks himself unharmonious, and the opinion he usually finds himself justified in having.

While the action hinges around Bronson's activities, "Hard Times" generally spends most of its time following James Corden around the master posters of Depression era New Orleans.

Washington University and the Saint Louis Symphony Orchestra present

A MUSICAL OFFERING

Monday Evening, November 3, at 8:00
Edison Theatre, Mallinckrodt Center

Featuring Hindemith's Sonatas for English Horn; Schumann's Carnival; and Beethoven's Trio in D major.

Tickets: $2.00, students; $4.50, general admission. On evening of concert, Edison Theatre box office will open at 7:00 p.m. for ticket sales.

"The Hollow Crown" will be presented

"...for God's sake, let an ear
upon the ground and tell sad
stories of the death of kings...
there an ant's site, scuffling his
state and grinning at his pomp..."
William Shakespeare
Richard II

Members of England's famed
Royal Shakespeare Company will
return to the UMSL campus on
Saturday, November 1st when the
company will present "The
Hollow Crown" at 8:30pm in the
J.C. Penney Auditorium. The
company made its first appear-
ance at UMSL a year ago in a
production called "Theatres and
Repertory," playing to a sold
out, standing room only crowd.
The Hollow Crown derives its
title and theme for a passage in
William Shakespeare's Richard II.
The production is an anthol-
ygy of letters, speeches, poems
and songs written by and about
English monarchs ranging from
William I to Queen Victoria.
Very far from a dusty account of
the past, the show is a lively
chronicle of the amusing, tragic,
vulnerable human beings who
have occupied the throne of
England. The selections include
sources as diverse as the Anglo-
Saxon Chronicles and the writ-
ings of Jane Austen and range
for Henry VIII's proposal to
Anna Boleyn to Horace Walpole's
hilarious account of the
burial of George II.

The cast includes Lynette
Davies, David Suchet, Clive
Swift and Hugh Sullivan, who
was with the company when
they appeared here last year.
Music is provided by Bill
Homewood who, in addition to
his work with the company,
teaches guitar at several London
colleges.

Formed around a core of
artists under long-term contract,
the Royal Shakespeare com-
pany is responsible for most of
the major Shakespeare produc-
tions in England. In addition to
Shakespeare, the company has
presented a wide variety of
modern plays and other classics.
Recent productions at the com-
pany's London theatre include
"The wearing," "Eldest and
"Sherlock Holmes.

The Hollow Crown is a
presentation of the University
Program Board and has been
subsidized with student activity
funds. Ticket prices are $2 for
UMSL students, $3 for UMSL
Faculty and Staff and Alumni
and $4 public admission.

"Blue Leaves"
opens Nov. 21

Lynne E. Fuller

Oscar Wilde wasn't even cold
in the hearts of the University
Players when his scenery was
torn down and the hammering
began on a new set. The Players
are on-off-and-running again.

"The House of Blue Leaves," by
John Guare, will play from
Friday, Nov. 1, through Sun-
day, Nov. 23, in room 105
Benton Hall. It will be directed
by Kathy Sala of the UMSL
Speech Department.

In the words of the play-
wright, "It's a story about
humanity and the times we
hurt others and they hurt us.
Yet such a sad, deep theme is
projected through a comic plot.
Artie Shaughnessy, a 45-year-
old zookeeper, is in reality a
frustrated songwriter waiting to
be discovered. He realizes his
time is running out, and he's
having trouble coping with it.
His 18-year-old son is trying to
assassinates the Pope. His wife,
Bananos, who really is bananas,
isn't about to be put away.
He meets his mistress, Bunny
Flingus, in a steam bath. There
are rows crawling in and out of
windows, and people being
blown up in elevators.
This show should be one
with a lot of entertainment.
Volleyball team aims at state title

Dave Bridwell

In the past the St. Louis area has not been known for housing strong women's volleyball teams. But now a beam of light is emerging from that field of darkness. The power that generates the light is the UMSL women's volleyball team under Coach Judy Whitney.

With a 16-1 record and a few games remaining in their schedule, the women appear in excellent shape as they ready themselves for the state tournament, Nov. 7 and 8 at UMSL.

In the tournament, three out of four districts have been decided. Teams which will be competing are UMSL, St. Louis U., UM-Columbia, Northeast Missouri and Southwest Missouri. Tickets are free for UMSL students with ID, $1 for adults and 85 cents for children. Team passes will be sold for $5 which includes admission to all the games.

On Oct. 21, UMSL clinched at least a first place tie in the GAlAW tournament. They did this by defeating St. Louis U. 6-15, 15-12, and 15-5. This was the first time UMSL lost the first game of a match. This made Whitney "a little scared". Linderwood also fell victim to the Rivermen by the scores of 15-3, 15-10. This past Tuesday the GAlAW tournament concluded with UMSL playing Fontbonne. The results of this match were unavailable for this issue.

UMSL picked up two more victories last Thursday against Principia and Meramec Community College. In the Principia match, Whitney made many substitutions which made for some close matches. The scores were 15-4, 7-15, and 15-13.

Against Meramec subs were also used. It took three games for UMSL to get two victories, which were won by scores of 13-11, 12-15, and 15-7.

The only injury that has cropped up is to senior Jane Schroeder who is out for a week due to a back injury. Junior Carmen Forest along with Schroeder are two of the team's stronger spikers and blockers.

Against Meramec subs were also used. It took three games for UMSL to get two victories, which were won by scores of 13-11, 12-15, and 15-7.

The only injury that has cropped up is to senior Jane Schroeder who is out for a week due to a back injury. Junior Carmen Forest along with Schroeder are two of the team's stronger spikers and blockers.

Against Meramec subs were also used. It took three games for UMSL to get two victories, which were won by scores of 13-11, 12-15, and 15-7.

The only injury that has cropped up is to senior Jane Schroeder who is out for a week due to a back injury. Junior Carmen Forest along with Schroeder are two of the team's stronger spikers and blockers.

Intramural football playoffs enter final stages

Paul Koenig

Intramural football playoffs got underway Tuesday, Oct. 31, as eight teams, each looking for the overall title gave it their best shot in a perfect, sun-drenched autumn day. The Fun Palace, last year's overall champs, rolled over the Pikers 24-0. A touchdown in the waning seconds of the opening half was the key play of the game. With but six seconds remaining before the halftime whistle sounded, the Fun Palace gained possession of the football deep in their territory and called time out. When play resumed play resumed the Fun Palace quarterback reverted to long distance aerial tactics, as he has done so many times, and unleashed a long bomb past the Piker defense into his receivers' hands. The Fun Palace added more fuel to the fire with a second half touchdown and went on to win 24-0. The No-Names and the Jets clashed in one of the two scheduled 4 pm games that day. Both teams entered the contest with identical 2-2 records. Each squad had nailed down the second spot in their respective leagues. The Jets proved their superiority, however, as they shut out the No-Names 14-0. First rivals Tau Kappa Epsilon and Sig Tau Gamma also met in a 4 pm contest. Neither team opened up a winning margin as indicated by a 6-6 half-time score and 12-12 score at the end of regulation play. Sudden death overtime was the order of business. The Sig Taus won the coin toss, elected to receive and promptly marched the ball the length of the field and defeated the TEKES 18-12.

The Sig Pi drew first blood with an early touchdown in their playoff game with the Pros, but lost their edge a few seconds later when the Pros came back on a long touchdown pass to over the score. The Pros took it from there and outscored the Sig Pi squad 24-12 to gain access to one of the two semi-final games. On Tuesday Oct. 28, the

Smith forms basketball booster club

Jim Shansahan

Chuck Smith, UMSL athletic director, announced the formation of a basketball booster club on campus which will be open to all students, faculty, staff, alumni and adults off campus who are interested in UMSL athletics. There is a $10 minimum contribution. "During the last three years a non-dues paying organization called the Rivermen Captains was formed to help promote attendance and create spirit on campus," stated Smith. "In 1975-76 we're moving in the direction of forming booster clubs with dues paying membership." A soccer booster club was formed earlier this year which drew ninety memberships. Booster members would receive preferred seating at games, all pre-game and post-game news releases, half-time and game statistics, and help with travel and ticket arrangements for away games. "The money will go into a basketball gifts fund," said Smith. "It will be used for social functions, publicity and other items with the excess being used in the basketball budget."

Smith expects primary support for the booster club to come from faculty and staff due to the $10 minimum contribution and the fact that students get into all home games free.

The Royal Shakespeare Company Production

The HOLLOW CROWN

An entertainment by & about the Kings & Queens of England

"The Hollow Crown" is a unique entertainment composed of letters, speeches, poems, songs and music by and about the Kings and Queens of England.

"Demonstrating the vulnerable humanity of those who have worn the crown, it sparkles with the wit of several centuries. Through a historical retrospective from William I to Queen Victoria, "The Hollow Crown" reveals not the majestic Kings and Queens of England as represented in the dusty annals of the past, but the histriornics of the living, breathing, men and women who have played out their lives on the stage of England's court."

"The evening races by, the vignettes are wholly engrossing. The language is superb, supreme."

"An English treasure." -- Jerry Tallmer, New York Post

"The Hollow Crown" is fun...most entertaining."

-- Elliott Norton, Boston Herald

Kickers win rough game

Tom Rodgers

Competing in its third double-overtime contest of the season the UMSL Rivermen soccer team defeated the Northern Illinois University Huskies by a score of 2-1 Saturday on the Rivermen Field, boosting the Rivermen season record to 7-2-2.

Playing to a Homecoming crowd, UMSL controlled the ball and provided sporadic excitement in the first half, but failed to score. UMSL head coach Don Dallas commented, "We moved the ball real well, but you have to put the ball in the net. That's the name of the game."

The second half opened with indications of a repeat of the first as UMSL maintained possession of the ball but not the scoreboard. Then with 63:57 passed in the game, Northern Illinois gained possession briefly and capitalized on a solo effort by Fred Tschachter to jump on top, 1-0. Tschachter's shot was a chip from the right side into the left corner.

With the Huskies on top, the game began to deteriorate into a physical battle. The pinnacle of the physical warfare came with 85:47 passed in the game as UMSL linkman Nick Traina was injured by Huskie Mike Strahler near the goal. "They just wiped him (Traina) out. It was a-refund play off the post and a very obvious penalty shot." This penalty shot was awarded to UMSL resulting in freshman Steve Moyer kicking in the tying goal and sending the game into overtime.

UMSL opened the first overtime period by pressuring the Huskie All-American goalie Pete Manzoni. With 2:32 gone in the period, the pressure paid off as Riverman Jack Donovan boosted in the go-ahead goal from five feet out on an assist by Steve Moyer. The UMSL defense then staved off the attack of the Huskies in the second overtime period to maintain the 2-1 lead.

In the preliminary game of Florissant Valley Community College, the number one ranked junior college team in the nation, against Forest Park Community College, Florissant Valley was victorious, 1-0, in a closely fought contest.

Bowling, volleyball continue play

Runners finish close third

The Rivermen cross country team came up short in the Westminster 10,000 meter road run, earning second place by one point. Westminster took first with 17 points followed by Washington University with 75 points in the race held Sat-urday, Oct. 29.

Westminster, led by Charlie Evans who took first in 32:45.5 placed six runners in the top ten finishers to easily outdistance the field. Running for the Riv-ermen were Neil Rehulp, 11 in 33:48, Bob Williams, 15 in 34:57, Frank Hake, 17 in 35:07, Jim Shanshan, 26 in 36:39 and Jerry Young, 27 in 36:55. The harriers will close out their season Nov. 8 in the SLACAA meet at SIU-Edwards-ville. They will be running against SUI, St. Louis Univer-sity, and Washington University.

IT TAKES TEAMWORK: Tod O'Neill [no. 18] and an unidentified Riverman both go for the ball as Pat Hogan stands by to control the rebound in UMSL's 2-1 overtime victory over Northern Illinois. [Photo by Betty Reitzler]

[continued from page 15]

semifinals were held as the Fun Palace was to have met the Jets, and the Pros and Sig Tuss were to have played. Because games could not be rescheduled in accordance with this reporter's deadline, semifinal scores will not be printed until next week's issue.

The Polish Nationals jumped from third to first place in bowling last week as they nabbed five out of a possible seven points from the TEKES. Two points are given for winning a game, one point is awarded for most total team pins. The Delta Zeta Turtles dropped a notch to second place as they lost five of seven points to the South Paws.

Third place was held down by the TEKES who took the shorter end of the scoring opportunities in their match with the Polish Nationals, winning two of seven. Four Hits and a Miss and the Double Gutters retained their respective positions, fourth and fifth, from the previous week.

Judy Oliver had a great day at the lanes as she shot a new women's high game of 201, beating Cheri Oliver's 187, and also upped her league leading average to 163.

Coed volleyball continues to be plagued with numerous forfeits the highlight coming this past Sunday when a double forfeit occurred — neither team showed!

On a positive note, Debbie Delight continued their winning ways as they stayed a game ahead of second place Soul Review in league play.

Coven and QFAPD currently reign supreme in League A as both own identical 2-0 records. The Homo Sapiens and the Dick Thurman team also share the same good luck as the two aforementioned teams. Their 2-0 records are good enough for first place in League B.

League D's current first place team is the Bookies followed by the Future Prospects and Clara Clark.
