

driving isn't the only way —

Vicki Schultz

If paying high prices for gas every week, battling for a parking space every day, and facing traffic twice a day doesn't sound like a lot of fun, UMSL students can take part in car pools, van pools, or ride a shuttle provided by the university.

Students who are interested in sharing a ride in a car pool can obtain a computer match with other students by contacting Student Affairs. The members of a carpool purchase one parking sticker at a cost of $24. Carpools of three or more members will have reserved parking spaces in Garage Two.

New library carpeting: walking on $30,000

Mark A. Harder

Although Library Director Ronald Krah is having a lot of financial problems, at least he has a new carpet on which to pace while trying to think of solutions. The total cost of the carpet and installation was $30,000.

The full renovation consisted of the taking up of the old carpeting, which was put down about 10 years ago, and the laying of the new carpeting on a new substrate. The old carpeting is being shredded and will be used for the soundproofing of the new carpeting.

Dr. William McClellan, head of the library, said that any replacement for the old carpeting would have to be neutral in color to blend with the other carpeting in the library, just as a neutral rug on the floor of the library would blend with the carpeting.

The new carpet was purchased from a local carpet dealer and was laid last Friday. It is expected to last about five years.

UMSL lights up

The UMSL soccer squad played its first ever home game under the light last Friday night and the Rivermen fans were happy to see their team win home

Happy Anniversary!

Gallery 210, an art exhibition room located in Lucas Hall, is celebrating its tenth anniversary at UMSL. ...

The opening kickoff

Touch football kicks off the intramural season at UMSL this fall. The games will be played on theintramural field. The competition will always be fierce and this year promises to be no exception.
Senate to hold first meeting

The UMSL Senate will hold its first meeting of the school year next Tuesday at 3:15 pm in 78 J.C. Penney. The main item on the agenda is a report from Chancellor Arnold B. Gobman that is expected to summarize the Board of Curators meeting this Friday in Columbia. The Board of Curators are expected to take action on a 1982-83 budget proposal. The Senate will also hear some committee reports.

Video workshop offered

A video production workshop will be held at the UMSL Missouri Center, from 6:00-9:00 pm, September 21 through November 23. The program is designed for beginners who wish to develop video production awareness and skills, as well as for professionals who wish to improve present skills.

The "hands-on" workshop will cover all aspects of video production, part of each class devoted to actual use of television production equipment in the studio. Audio, script writing, lighting, graphics, video tape recording and editing techniques are among the topics to be covered.

Donald R. Greer, director of the Instructional Technology Center and associate professor of Education at UMSL, will direct the workshop. He has taught television production courses at UMSL for ten years and specializes in the use of television for educational and training purposes.

Registration for the workshop is $150. Additional information about the workshop can be obtained by calling Continuing Education at 553-5960.

Discussions to be held on making decisions

Father Quentin Hackeneweir, assistant general of the Brothers of Mary and author of several books including Girls of Wheat, will lead weekend discussions that will be devoted to helping college-age people learn how to make decisions this Saturday and Sunday at Newman House. He will be assisted by Brother Paul Galensweir.

"This will be a weekend of trying to teach a way of discerning, a way of coming to decisions," said Father Bill Lyons of the Newman House.

Teachings will be held Saturday from 7:30-10:30 pm, and Sunday from 10 am-9:30 pm. Mass will be included in the program. While participants are requested to bring a lunch, Sunday dinner will be eaten at Bonanza.

Newman House (Catholic Student Center) is located at 8200 Natural Bridge Road. There is no cost for the teachings. Additional information can be obtained by calling Father Lyons at 385-3455.

Physical activity programs offered for older adults

Physical activity programs for older adults will be offered this semester by UMSL. Classes will meet on Tuesdays, Thursdays and Saturdays, Sept. 22-Dec. 8 in the Mark Twain Building.

Tuesdays and Thursday classes include square dancing, tap dancing, walking and jogging exercises, aquatics, and social dancing. On Saturdays, lifetime sports activities will be held. Swim passes are also available to all UMSL Active Adults for use in the Mark Twain Building pool during regularly scheduled hours.

Registration fee is $10 per class or $25 for three or more classes. Additional information about the programs can be obtained by calling the physical education department at 553-5229.

Music degree developed

A new four-year program leading to the Bachelor of Music in Management degree has been developed by the UMSL Department of Music in cooperation with the School of Business Administration and has enrolled its first class of ten students this fall.

Coordinated and developed by Arnold Perris, associate professor of music, the program consists of a core curriculum in music that includes applied study and 18 hours credit in busmess courses. In addition, students will be encouraged to enroll in a variety of elective courses and will have the opportunity to serve a one-semester internship in a commercial firm or art agency.

Perris, who worked for Sammy-Birchard Co. of Chicago, a music publishing company, for several years before entering teaching, said that the Bachelor of Music in Management degree can lead to such careers as concert management, music publishing, instrument manufacturing, advertising and promotion of music and musicians, management of music libraries, and some careers in television and radio.

Additional information on the program can be obtained by calling the music department at 553-5980.

Phone service

A new cost that may occur in the speech department this year is a charge for some services offered by the instructional technology center. Donald R. Greer, director of the center, has told Fay that he cannot afford to offer free services on the more expensive equipment and that he will have to add a surcharge on support services. "They're feeling cuts too," Fay said.

Fay said that budget reductions have hurt in recruiting new faculty members. "While we are still somewhat competitive in some areas we do not have the facilities here to attract people in the professional areas," Fay said.

"When you don't have the facilities you have to offer more money, and we're not doing that," Fay said. "We have no facilities whatsoever." The speech department has no official tie to the campus radio station KWMU.

"The demand for mass communications classes on this campus is very high," Fay said. "We should be expanding services not reducing them."
Penney walkway to be built

Barb DePalma

A concrete walkway is scheduled to be built from the top deck of parking garage #2 to the area between the J.C. Penney Building and the University Center. The purpose of the walkway is to create an easier method of directing students and visitors to the J.C. Penney Building.

"Parking garage #2 is the first structure used when people come onto campus," said John Perry, Vice Chancellor of Administrative Services. "Right now people have to go all the way down and across to get to the J.C. Penney Building. The walkway would make it easier for people to go straight from the third deck to campus."

The total cost of the walkway is approximately $200,000, and will be partially paid for from parking improvement funds. These funds are a percentage of the parking fees paid by students, the construction will be done by Wachter Construction Company.

The second part of the construction bid submitted by Wachter includes the covering of stairwells in the northern section of parking garage #2 and the resurfacing of ramps.

We'll show you how...free.

Would you like to:
- Raise your grade average without losing sleep over tests.
- End all right cramming sessions.
- Remove all stress from studying in as little as 1½ hours a day.
- Have even the life to enjoy yourself.
- Read 3 to 5 times faster, with better concentration, understanding, and recall.

Evelyn Wood works — over 1 million people, including students, recreation centers, and even presidents — have proved it. A 1½ hour demonstration will show you how to save hundreds of hours of study time this year as well as how to increase your speed immediately with some simple new reading techniques. It only takes an hour, and it's free. Don't miss it.

Students receive financial aid

During the 1981-82 school year, nearly $1 million will be spent on financial aid given to UMSL students. This includes scholarships, loans, and grants, according to Icel McCullough, of the Financial Aid Office.

Almost 3,000 students applied for aid this year out of an approximate enrollment of 11,500. Four thousand students will probably receive aid.

Financial aid has not increased with inflation or with the raising of university fees. Due to budget cuts made by President Ronald Reagan earlier this year, UMSL lost some loan money, but grant funds have remained basically the same.

"Some students may receive less this year than they're used to," said McCullough, "but the office has tried to supply them with enough money for fees and books, according to their needs."
Athletes losers in homecoming preparation plans

In three weeks, homecoming will arrive. A game will be played and the dance will be held. But which one will students attend?

The problem instead of the players merely competing against the opposing team, they will be competing with the weekly activities. Apparently a new tradition is being started at UMSL by centering the weekend around a sport, but not the team.

Students will have two choices: 1. attend the game and cheer on the team as possible, or attend the dance later. At all, or 2. attend the dance and get the results of the game later.

"The major problem seems to have developed from a lack of communication."

The men's soccer team will either be in the midst of playing a consolation game at the start of the dance at 6:30pm. or else preparing for play at 7:30pm. It is possible that they will be able to participate in the evening's activities by making a late appearance.

The women's soccer team, however, will have a choice. They will be on their road travelling to Ohio for their first-ever interstate road trip.

Somewhere along the line something went wrong. The major problem seems to have developed from a lack of communication between the Homecoming Committee and the Athletic Department.

Persons directly involved in the scheduling of UMSt games were never consulted. This was the first mistake. If the game propositions were not contacted, the contact could have been avoided. The possibilities of night games, versus a game to UMSL, this year due to the recent installation of lights on the soccer field, should have been anticipated.

True, the committee did consult a game schedule, but unfortunately it was for the wrong sport and the wrong dates. Now they consulted Mizzou's football schedule. Although their reason for doing so is certainly valid (UMSL students do travel to Columbia to attend the Missouri football games), it should not have been a deciding factor. It just so happens that Oct. 3 is the only Saturday in October the Tigers do not play at home in Columbia.

It appears as if our team lost. Our own team's schedule should have held a much higher priority. Again, more effort should have been placed on working out a convenient date for everyone concerned.

It is unfortunate that this conflict has flawed this year's homecoming weekend. Except for this lack in communication, other activities centering around the weekend have been well planned and persons have spent a lot of time in the preparation.

Homecoming activities will include the game and voting for queen and king candidates and will feature lawn decorations depicting the "Old South," the theme of homecoming. Then comes the highlight of the weekend, the Planta­tion Dinner Theatre has been booked for the evening.

The weekend should be enjoyable (wherever one may be) but next year we will be all the more wiser.

Dear Editor:

The present library schedule must be expanded to or beyond last year's schedule. However, "they" say that the funds for such an expansion are not available. I contend that the real problem is within our priorities.

The library is the heart of the university. The fact that there are several eating places, a Fun Palace (i.e. time waster), and nonessential student-funded organizations shows that the priorities are out of order. If areas of expenditure, such as those above, exist in the midst of library funding cutbacks, then something very threatening is occurring within our school system.

Compare the university to a human being. Consider a situation in which a surgeon must decide to amputate an arm in order to prevent heart failure. The amputation must be done because the surgeon knows that, while life without an arm can exist, there is no problem is certainly valid (UMSL students do travel to Columbia to attend the Missouri football games), it should not have been a deciding factor. BUSCH. The official beer of The Charlie Daniels Band.
September
Friday 11

- Fusion 91 will highlight Carlos Santana from 11pm-7am. Fusion 91 is a KWMU student staff production on 91 FM.

- "Elephant Man" will begin UMSL's Friday and Saturday Night at the movies with two shows at 7:30 and 10pm in 101 Stadler. Admission is $1 for students with UMSL I.D. or $1.50 for general admission. Advance tickets are on sale at the University Center Information Desk. Students with an UMSL I.D. may bring one guest at the reduced rate.

Sunday 13

- "Sunday Magazine", a KWMU Student Staff public affairs show, will explore "Living History Circa 1863" at 11pm. The hour show can be heard on FM 91.

- Gallery 210 holds an opening reception from 3-5pm in 210 Lucas for its new exhibit "A Decade of Collecting: Master Photographs from St. Louis Private Collections", which opened Sept. 8. The exhibit will run until Oct. 2 from 9am-5pm Monday through Thursday and 9am-6pm on Fridays.

Monday 14

- The Video Series features "Second City T.V." and "The New Sensuality" from 10am-noon everyday this week except Wednesday in the University Center Student Lounge. Shows will be screened at different intervals throughout the week so that students can catch both shows. For dates and times call 553-5146.

- The soccer Rivermen will host Southeast Missouri State at 2pm here. There is no admission charge for UMSL students.

Tuesday 15

- An UMSL Senate Meeting will be held at 3:15pm in 76 J.C. Penney.

- The Evening College Council features free coffee and cookies at its "Koffee Klatch" from 5:30-6:30pm in the third floor lobby of Lucas Hall.

Wednesday 16

- Wednesday Live Series presents "Carnival" with a concert from 11am-1pm on the University Center Patio. In case of rain, the concert will be held in the student lounge.

Thursday 17

- Applications for a photography contest, sponsored by the Art Showcase, which displays the talents of students, are available at the University Center Information Desk. Deadline for entries is Oct. 15. The Art Showcase will be held from Oct. 22-30.

- Maritime Art Exhibit and Sale, sponsored by the University Programming Board, will be held in the University Center Lobby from 10am-7pm until Wednesday. The Exhibit will feature original oil paintings from actual animated films by such producers as Disney and Warner Bros. This original art from cartoons can be purchased at the exhibit.

Saturday 12

- Gateway Jazz, a KWMU Student Staff show, features Bobby Shaw, a St. Louis jazz artist, from 11pm-midnight. Joe Sample will follow on KWMU's "Miles Beyond" from midnight to 8am. KWMU is at 91 on the FM dial.

Gallery 210: Ten years of exhibits

Sharon Kuboush

In September of 1972 Gallery 210 first opened its doors to the public with an exhibit entitled, "A Faculty Loan Show from UMSL Art Gallery: Permanent Collections," which included art objects and drawings from the permanent collections of the UMSL faculty members. That was ten years and sixty exhibits ago, but Gallery 210 is still a well needed and bright focal point of the university.

Jean Tucker, who was one of the gallery's originators, was then acting as the coordinator of Art, a division of the Department of Fine Arts located at Benton Hall. A folding screen located in the hall was used as the only visual art exhibit area on campus. During the planning of Lucas Hall, it was asked what was needed on campus. Tucker quickly drew up a request for a visual art exhibition area and was granted an 18'x30' classroom and a small budget which was to be used in converting the room into a Gallery. After adding grid lighting, some carpeting, and wall coverings that would be suitable to hang art work on, Gallery 210 became a reality.

The name Gallery 210 was given because of the location, room 210 Lucas, one of the most famous galleries in New York, Galleries 212 and 210 of the St. Louis Art St., also features numbers in its name. It is owned by Alfred Stieglitz, one of America's pioneers in photography. Stieglitz had many photographs exhibited in Gallery 210.

During the past 10 years, the gallery has exhibited the works of such artist as Roy Lichtenstein, Robert Motherwell, David Hockney, Philip Pearlstein, Carlyn Brady, and many others. Works by several photographers have been seen in the gallery. One-person shows by Ansel Adams and Imogen Cunningham from St. Louis Collections were organized here in 1976. The Adams exhibit has brought the largest crowd so far, over 1000, to the university's campus. It was Adams' first exhibition in St. Louis. His major exhibition at the St. Louis Art Museum didn't take place until July, 1980.

Three exhibitions originated in Gallery 210 and subsequently were moved to the St. Louis Museum of Fine Arts as permanent collections. The first featured works of American Photography whose artistry and innovations in creating photographs have been broadly recognized as having contributed to the rich development of the medium. Tucker served as the curator for this exhibit although she is no longer the gallery's coordinator. She is presently at the Center for Metropolitan Studies.

Both Walters and Tucker feel the need for larger appropriations in order to continue the standard of exhibits that has been presented in the past. Tucker said, "It is difficult to produce a show on the present budget." The number of shows per year has decreased from six to five and includes an annual student show. "One thing we try to do," Walters explained, "is use the resources of the community. The public has been very helpful in filling the gallery and helping out with loans and grants." Walters also expressed her gratitude for the support of the Missouri Arts Council and the National Endowment for the Arts.

Tucker feels that the gallery not only provides important art works for the campus community, but it also works as a kind of a reservoir for the students and public from the university. For each exhibition 2500 public relations notices are sent to an off-campus mailing list.

LOOKING AT THE SIGHTS: Gallery 210's first exhibit this semester, "A Decade of Collecting: Master Photography from St. Louis Private Collections," is now on display for viewing. [photo by Witley Price].

The present exhibition, "A Decade of Collecting: Master Photographs from St. Louis Private Collections," will be running until Oct. 2. It is a collection of photographs that were loaned to Gallery 210 through the generosity of 50 private collectors in the St. Louis area. The focus is in masters of twentieth century photography whose artistry and innovations in creating photographs have been broadly recognized as having contributed to the rich development of the medium.

Ex-mayor Conway lectures on "The City"

Bob Goff

Students enrolled in The City, Interdisciplinary 94, are gaining a unique perspective on urban issues from the lectures of James Conway, former mayor of St. Louis. Conway became a member of UMSL's political science faculty after being defeated last April in his bid for re-election.

The course, The City, is taught by three people: Assistant Professor of Sociology, Daniel Monti; Assistant Professor of Political Science, Andrew Glassberg; and Conway. In speaking about Conway's contribution to the class, Glassberg said, "I think he'll bring an exciting dimension to the class because of his practical knowledge." Monti agreed, "I think it's great. Conway does very well as a lecturer. He does more than just tell stories, he provides analysis." Monti has taught the course for the last six years. He explained part of the teaching. "I try to give the students some urban history and explain how changes in population, the nature of that population, and other factors affect the organization of a city," he said. Glassberg, a specialist in sociology, also commented, "This will be my first time teaching this course, I'm really looking forward to it."

The interdisciplinary nature of the course allows students to compare the viewpoints on an issue from different schools of thought. Conway explained, "The theoretical standpoints are given by Glassberg and Monti and I come up with the practical aspects." These practical knowledge began with four terms as a state representative and one-and-a-half years as a state senator. In 1977 he was elected mayor of St. Louis. Before all this, however, Conway earned a degree in political science and a MBA, both from St. Louis University.

These practical aspects include some of the achievements of Conway's term as mayor, such as the renaming of the Convention Center, the initiation of the $413 million dollar international airport, and the construction of new housing throughout the city.

Glassberg and Conway meet regularly to discuss the matters at hand and come up with new ideas for the class in order to prevent gaps or overlapping. "We're concerned with trying to avoid problems with the material covered in the lectures," said Conway. "I meet with one or both of the professors before class to make sure my remarks are consistent and fit-in with the over-all scheme."

The class meets three times during the week. Conway generally handles one of the sessions. "I think we compliment each other," Conway commented, "All our styles and backgrounds have significant differences. I think the students get an opportunity to experience different perspectives from different areas of education. I feel very good about it." Students appear to enjoy the course. One student said he liked Conway's style of lecturing. Another student said she wished there were more time for questions. Conway said, "The student seems to be interested in what the class has to offer. My only disappointment is that the classes aren't longer."

[See "Conway," page 8]
Management and leadership. They take Military Science courses during their junior and senior year, and students take Military Science courses during their senior year. After that, they can receive a commission in the military. Major Christiansen sees communication and leadership skills as important. He believes that developing one's communication and leadership skills is what people like about ROTC.

Major H. Robert Christiansen is the director of ROTC at the University of Missouri-St. Louis (UMSL). Both programs are open to men and women and are broken down by major. ROTC at UMSL offers extra-curricular activities, such as mountaineering, rappelling, orienteering, and canoe trips. Both programs provide a needed opportunity for students to prepare for careers in the military and opens another alternative door in their college career.

Conway

As for his future with UMSL and Conway said he might enjoy teaching in another capacity after his tenure at UMSL. As for his future politically, Conway said, “What’s run for public office, I never planned on making a career of it. Politics is like straw and sand, the first big wave always fail, I don’t know what the future holds for me. It’s possible something might occur, but I have no specific plans.”

If you're taking rough courses, you need all the help you can get.

If you've really done it to yourself this term, you need an advanced calculator you can count on through thick and thicker.

You need the most advanced functions and programming features. You need lots of pre-written programs to save you time. You need Continuous Memory and the utmost in dependable ability. You need an HP calculator.

The HP-34C. All the help you can get.

HP offers you eight different calculators priced from $55 to provide professional solutions in science, engineering and business. Visit your nearest HP dealer for a hands-on demonstration. Then buy an HP calculator. It may be the last easy thing you do for a long time.

For details and the address of the dealer in your area, call toll free: (800) 543-3400, Dept. 658N, except Hawaii and Alaska. In Oregon, call 758-1010. Or write Hewlett-Packard, Corvallis, OR 97330, Dept. 658N.

If you're taking rough courses, you need all the help you can get.
Rivermen capture opener as Weis equals record

Dan Noes

Behind the shutout goalkeeping of Ed Weis, the PRIME TIME Rivermen captured the opener on Saturday night with a 1-0 win.

Weis, who earned the NCAA record last season, made his season debut and continued his streak with 10 shutouts.

Weis, who has been the focus of the team's defense, made numerous saves to keep the Ravens off the scoreboard.

The Rivermen were able to capitalize on their opportunities, scoring the only goal of the game.

Weis's performance was a testament to his skill and dedication to the sport.

SEMO to visit UMSL

The UMSL Rivermen begin their quest for the first Missouri Intercollegiate Athletic Association (MIAA) soccer title this Saturday afternoon when they host the Southeast Missouri (SEMO) Indians. A game between the Riverwomen soccer squad will follow.

The UMSL-SEMO contests will mark the beginning of soccer as an official sport in the MIAA conference. The University of Missouri-Rolla and Northeast Missouri State are the other competitors battling for the first MIAA soccer crown.

This is the first year that Southeast Missouri State has had an intercollegiate soccer program. Also, not one of the players on the SEMO roster has played soccer before.

[See "SEMO", page 12]
Muesenfechter

from page 10

ranks, "I had a pretty good idea I would be drafted," he said.

After a few non-committal inquiries by some of the outdoor teams, Muesenfechter was drafted by the MSFL Champion New York Arrows in last year's amateur draft and was promptly traded to the short-talent Denver team. He scored two goals in limited action in the final six games of the 1981-82 regular season.

Of course the transition from college soccer to the pro level was made more difficult by the fact that the Steamer's second and third round draft choices in the 1981 draft were less than an undisclosed amount of cash.

As far as Muesenfechter's experience with the Avalanche team, he expressed a little regret over leaving the Denver franchise.

"I knew it was not going to be a great squad."

Muesenfechter, informed just last week that he was now a member of the Steamer, admitted that he doesn't own a great deal about the St. Louis franchise. He has met Steamer's head coach Al Trost and has attended an informal practice session held last week by Trost.

Muesenfechter stressed the "just positive things" exuding from the Steamer's club, a runner-up to the champion New York team in last year's MSFL playoffs, but refused to put too much emphasis on his professional soccer career.

"If it doesn't work out, no big deal."

"But, I'd like to try it with the Denver team."

The Steamer's being the top-flight seven would do just that—right here in River City.

1981-82 forecast: Partly cloudy season.

At one time or another, most columnists feel the urge to look into the future. In my case, I've been forecasting the success and failure of UMSL sports for two years and I see no reason to stop now.

Of course, I haven't always been correct, but then who has? With the fall season just getting underway, though, there seems to be an atmosphere of optimism surrounding the entire athletic program as many of the UMSL coaches look ahead with great anticipation. And, as always, the same question is being put:

"What can we expect from UMSL sports this year?"

In order to answer that question, I'll have to look into my crystal ball (don't believe that)

"MUESFENTER"—I said last year that UMSL Rivermen basketball squad was certain to be in store for a banner year in 1981-82, and I still feel the same way. The Rivermen, who finished third in the Missouri Intercollegiate Athletic Association last year, should return more players than any other school in the conference, including, 1,000-point scorer William Harris. Coach Don Mattox also had an outstanding recruiting year, which could make the Rivermen the class of the MIAA this winter.

Another team that cannot be considered anything short of "outstanding" is the women's soccer squad. Unproven, but talented, the women kickers boast many of the top players in the St. Louis area. And St. Louis is known as the hotbed of soccer for men, it is even more true for women. Coach Ken Hudson expects to see his team finish in the top four in the nation. Barbing injuries and an complacent attitude, a national championship is within the realm of possibility. This is definitely a team to get excited about.

THE "HAVE HAYES"—This is the area most of UMSL's teams fall into. Starting with the fall, men's soccer has never had a losing season and UMSL has advanced to post-season play nine consecutive years. This year, the Brownies return only three starters and face another strong schedule. My guess, though, is that the kickers will garner another winning season.

The volleyball squad struggled last year as the women averaged around the .500 mark. Many of the key players from a year ago have returned with a heavy influx of newcomers, which should translate into a winning season.

Once winter rolls around, we can expect to see the women cagers shooting for another 10 win season. With some key changes in personnel, 20 wins could be tough. But don't sell the women short.

The football team is a sport that has improved steadily in the past few years and I might have listed both the men's and women's squads among the "have nots" if it wasn't for the coaching situation. Jim Wheeler, last year's coach, will not be back and UMSL is presently searching for its fifth swimming coach in five years. How's that for continuity?

The star sport of the spring season last year was softball. The women won a school-record 33 games, but they are losing several key performers from last year's squad. Baseball, on the other hand, suffered through its worst season ever last spring. With an emphasis on youth, though, things should get better this year.

THE "HAVE NOTS"—Actually, there is only one team at UMSL that I have little reason to be optimistic about and that is Cross Country. The Harriers have always been under-funded and coach Frank Neal has his hands full just trying to get enough people to run. It's a sad situation.

As far as the tennis and golf teams are concerned, the crystal ball revealed no answers. In fact, it was so cloudy I couldn't see a thing. Therefore, I'll reserve judgment until things clear up.

And so, those are my predictions for the 1981-82 season at UMSL. Granted, maybe I didn't make the boldest of forecasts, but there isn't much fun in being burned.
Football to kickoff UMSL Intramural season

Frank Cusumano

September always seem to be consistent. Reggie Jackson gets hot, Mohammad Ali says he's coming back, Earl Campbell gets his 150 yards, the football Car

dinal management starts think

of everyone for their upcom

ing poor record, and the UMSL Intramural program begins. Mary Chappell, who is coming off a great year as Acting Intramural Director, and Larry Coffin, who is presently in charge, will run the show this season. Mary is quite optimistic about the year. "I am looking forward to a stupendous year."

Tankers to meet

The swimming team will hold an organizational meeting next Monday at 3pm on the swimming pool balcony in the Mark Twain Building. The team needs men and women swimmers. Additional information about the team can be obtained by calling 553-5641.
