Jeff Kuchno

A shortfall in state revenue, due to a decrease in sales tax for the present fiscal year, could lead to substantial cuts in UMSL's present operating budget.

It has been estimated that general revenue receipts will be $10 million below the billion predicted earlier for the fiscal year. Since Gov. Christopher S. Bond is required to balance the budget, state spending must be reduced.

"The governor doesn't have to treat all state agencies the same," said UMSL Chancellor Arnold B. Grobman. "Hopefully, he won't cut us much, if any, out of education.

Bond withheld 10 percent of the University of Missouri system's $170 million state allocation for 1981-82 because of a similar shortfall in state revenue. The UM system was allocated $160 million for 1982-83 in the legislative bill signed by Bond.

Because Bond has not announced any withholding of the UM system's funds as of yet, and because of an increase in student fees, UMSL is operating with an increased budget this year. UMSL's budget for 1982-83 is $133.2 million, approximately $5 million more than it had in 1981-82.

Bond, however, is expected to announce his withholdings sometime next week. If he decides to cut his allotment for UMSL, the university may have to make significant reductions in its budget.

"We know there will be reductions, we just don't know how much," said UMSL Vice Chancellor of Administrative Services John P. Perry. "It all depends on how the cuts are handled.

The shortfall in projected state revenue, primarily sales and income taxes, has been blamed on the economy.

Missouri's total revenue in fiscal year 1981-82 was $5.4 billion. State officials expected an increase of 6.4 percent and actual general revenue receipts this year, but recent reports say that the increase was closer to five percent.

Perry said that if Bond decides to withhold 5 percent or more of UM funds, UMSL's budget could be cut by at least $1 million. "A 5 percent reduction is scary," Perry said. "We'll have to do some things we won't like or want to do.

The fact that cuts could come

Last phase begins for Optometry School

Sue Roll
assistant news editor

The School of Optometry now can begin its last phase of development with the help of a $1 million allocation of federal funds approved for the school Sept. 20 by the Missouri General Assembly.

The money is intended for the second, third and fourth floor renovations of the school, located on the Marillac campus, and for the conversion of an old chapel area into a library.

"We will be insured of operating a good quality program," said Jerry Christensen, dean of the optometry school.

Half of the second floor will be used as a specialty clinic for low vision problems. Optometry students spend 60 to 70 percent of their final two years working in clinics. The other half of the floor will be used for teaching labs and clinic administrative offices.

The third and fourth floors will be renovated for additional student teaching labs and faculty offices. In addition, research labs will be constructed along with a darkroom and animal holding areas. Central air conditioning also will be added to these floors.

On Sept. 20, the first-floor renovations were completed and a clinic was opened. Central air conditioning, carpeting and ceiling tiles were included in the renovations.

To convert the chapel area into a library will require lower ceilings with better lighting. Carpeting and ceiling tiles will be added to help cut down on the noise. The School of Optometry will share the new library with the School of Nursing and call it the Health Science library. Currently, the optometry school library is located in the Education Office Building in the Marillac Library.

"We sit in more space," said Christensen about the library. "It is cramped and we have outgrown it.

JRB Architects of Creve Coeur will draw up the plans for the renovation. They drew up the plans for the first-floor clinic and we are very pleased," said Christensen. The architects also were responsible for drawing up the preliminary plans for the second, third and fourth floors until funds ran out. Christensen also explained that the architects knew the idiosyncrasies of the building by heart.

Air Force honors Placement Office

Barb DePalma
news editor

Three sergeants from the U.S. Air Force presented an appreciation luncheon to the staff of the UMSL Career Planning and Placement Office Thursday.

"We wanted to say 'thank you' to the Placement Office," said Sgt. Dan George. "They have been very nice to the Air Force. They make our job much easier.

Sgt. George and Sgts. Chuck Querry and Mark Pobst provided the luncheon, which consisted of deli sandwiches, potato salad, cole slaw and a red, white and blue cake which read "Air High.

in the air and I was surprised," Burl said. "I couldn't figure out what was going on.

Burl came to UMSL in August 1970 and worked as a telephone operator in the Office of Admissions and Records. In May 1972, he became the recruiting secretary in the Career Planning and Placement Office. His main duty is in assisting students in setting up classes for employers to come to UMSL.

Burl is a graduate of the University of Missouri and the first floor also draws up the plans for the first-floor clinic and 70 percent of the funds ran out. Christensen also explained that the architects knew the idiosyncrasies of the building by heart.

Blood drive to be held at UMSL

The Beta Alpha Psi fraternity is asking all students that are physically able to assist them in reaching their goal of 500 pints of blood at this year's blood drive. The drive will be held Oct. 6 and 7 from 9 a.m. to 2 p.m. in the University Center Lounge.

This year's drive will feature individual and group prizes. The group prize will again by a half barrel of beer to the organization bringing in the most people. To register for the drive, each group must turn in a current membership roster before Oct. 1. Also at least half of the group's members must enter with a minimum of 25 people within and out of the group total.

Montaldo named manager

Jeanne Brossard Montaldo has been named manager of Constituent Relations at UMSL. Her primary responsibility will be developing community support for UMSL. She also will create and coordinate the university's 25th anniversary.

Montaldo has served as a volunteer to UMSL, and a number of other local groups, for about 10 years. She was a board member of the Junior Division of the Women's Association of the St. Louis Symphony Orchestra, is a past president of the St. Louis Herb Society, and a member of UMSL's botanical garden board. She also is a member of the Chancellor's Committee for National Heritage Rooms at UMSL.

UMR offers computer workshops

The University of Missouri-Rolla Graduate Engineering Center will offer three computer science workshops this fall. Topics include computer performance management (Oct. 4), programming Pascal (Nov. 12), and software development tools and techniques (Dec. 2). All workshops are scheduled from 8:30 a.m. to 4:30 p.m. in the J.C. Penney Building.

The computer performance management workshop is designed for management or technical personnel involved with computer systems, budgeting, forecasting and performance assurance. Quantitative techniques will be emphasized. Registration fees are $125.

Tom Reid, a scientific applications specialist for the McDonnell Douglas Corp., will teach the final two workshops. Fundamentals of the PASCAL computer language will be presented in the workshop Nov. 12. On Dec. 2, Reid will cover the major tools and techniques of software development, and also discuss the life cycle of modern software and specific tools used at each phase of the cycle.

For information, or to register, contact Joe Williams at Continuing Education-Extension, 553-3961.

Black history conference held

A one-day conference on the history of blacks in the St. Louis area will be held Saturday, Oct. 9, from 9 a.m. to 4:30 p.m. at the Central Baptist Education Building, 2423 Washington Avenue. Registration will take place from 8 to 9 a.m. The program is the culmination of a search for documents, photographs, oral histories and other sources of information collected during a three-year Black History Project of UMSL. There is no admission fee for the conference. Lunchroom reservations are available for $5 and must be made before Oct. 1 by calling Deborah Factory. UMSL Continuing Education-Extension, 553-5961.

The conference includes a series of workshops which focus on past and present issues in the black community. Some of the workshops planned include "Black Political Leaders from 1830 to 1920 in St. Louis," "Historic Black Neighborhoods in St. Louis City and County," "Black Political Leaders from 1920 to Present in St. Louis," and "Preserving Your Family Document and Photographs." In the afternoon workshop, participants will focus on "The Use of High School Newsletters in the Black Community," "Playwriting in the Public School System from 1844 to Present," "Music in the Black Community" and "The History of Black Newspapers in St. Louis."

A brochure describing the conference program may be obtained by calling Ina Neal Watson at 553-3273.

Roarty, Maritz featured at seminar

A communications institute featuring Michael J. Roarty, vice-president of marketing at Anheuser-Busch Inc., and William E. Maritz, president of Maritz Inc., will be held at UMSL Tuesday, Oct. 12, from 9 a.m. to 4:45 p.m. in the J.C. Penney Building. Registration is $55.

The institute will open with Roarty speaking on "Public Relations and Publicity as Effective Marketing Tools." At two-hour workshops, following will focus and cover applications for video, satellite and disk technologies. Maritz will be the featured speaker during the luncheon. The afternoon program includes five concurrent workshops on various aspects of marketing, followed by two workshops in internal communications. Spruk Small, staff manager of the Corporate News at Southwestern Bell Telephone, will discuss ways to relate employee communications to corporate goals, set objectives, and plan an effective employee communications program. Harriet Blickenstaff, manager of Employee Communications at Ralston Purina Co., will discuss organizing and award-winning writing.

Registration fee for the institute is $95, including materials, lunch and parking. Continuing Education Units will be awarded to program participants.

For information, or to register, contact Clark Hickman at UMSL Continuing Education-Extension, at 553-5961.

Matthew T. Hall correspondent

The universe could not have created itself because of a lack of natural processes, Danie Gish said last Wednesday in UMSL's J.C. Penney Auditorium.

Gish is a biochemist who quit his job with a pharmaceutical company to take the position of vice president of the Institute for Creation Research in El Cajon, Calif. He is a highly respected debater for Creationism. His lecture was sponsored by the Missouri Association for Creation.

"No scientific theory of origins, whether it be creation or evolution, exists," Gish said. He added that two models, creation and evolution, explain the complexity of the structured universe.

The creationist model says that life was created spontaneously because the laws of the universe could not permit spontaneous life. The evolutionary model contends that complexity arose from a process of self-creation. Evolutionists believe that the universe began in an explosion of hydrogen and that order was created from disorder.

Gish claimed that the evolutionary model contradicts the second law of thermodynamics. Life can only be explained as the work of a supernatural intelligence, he said.

"No one has noted the capability of matter to go from disorder to order, but we have shown matter to go from order to disorder," Gish said. "People, machines and galaxies are examples of complex structures that naturally break down to simple structures."

Gish noted that the probability of arranging amino acids in the precise order needed for life by random processes was zero. "The number of ways amino acids can be ordered to make up one single molecule of protein is more than the number of stars in the universe," he said.

Gish also attacked the fossil record. He said that no fossil evidence exists for ancestors of Cambrian creatures or fish, and no transition forms exist from fish to amphibians. Therefore these species did not evolve from lower orders but were creatures of a supernatural event that has not been and cannot be repeated.

"The evidence for gradual evolution is not there, and this leaves open the possibility of a creator. I believe there is a god and creator."

Following his talk, Gish took questions and accusations from the capacity crowd; he was accused of misrepresenting the facts and views of evolutionists.

Despite the furor from the audience, Gish remained calm. His response was "How could I leave a lucrative position in industry, to go out and honor God and lie about it?" He said that the comfort shown by his adversaries was a disgrace to the institution.

Gish defends Creationism before skeptical audience
Program RENEWs
Catholic faith

Barb DePalma
news editor

UMSL students will have an opportunity to gather together to share themselves and their faith when the RENEW program comes to campus Monday, Oct. 1.

RENEW is a three-year process of personal and parish renewal which searches for what it means to be truly Catholic. For six weeks in the fall and another six weeks in Lent, RENEW will center on basic themes from the life and teachings of Christ.

RENEW is the response of the Catholic Church in St. Louis and several archdioceses throughout the United States to the official order of Pope John Paul II to give witness to the Gospel through lives of holiness and efforts for justice and peace.

"During each of the RENEW seasons, parishes will include special Sunday masses and homilies, special weekday services and special events that highlight Christ's life and teachings."

The Newman House, UMSL's Catholic student center, is sponsoring the RENEW program on campus. It will hold small group meetings Monday through Friday in Room 266 of the University Center. The small groups will begin with a short prayer followed by a discussion of Scripture readings which will be assigned prior to each meeting. Participants then will be given an opportunity to share personal thoughts and ideas and ways the readings affected their lives.

Attendance is required at one meeting a week over six weeks.

The times for the small groups are Mondays, 1 to 2 p.m.; Tuesdays, 12:30 to 1:30 p.m.; Wednesdays, noon to 1 p.m.; Thursdays, 11 a.m. to noon; and Fridays, 10 to 11 a.m. Evening students will meet on Wednesdays or Thursday evenings from 7 to 8 p.m. at the Newman House, 8200 Natural Bridge Road.

"I see it (RENEW) as a chance to celebrate the Lord's presence in each other," said Father Bill Lyons, chaplain at the Newman House. "Together people can build an environment where they can be more visible. The program is open to everybody, not just Catholics."

The Newman House also is sponsoring a Day of Prayer at the Chishale Fathers' Retreat House in Godfrey, Ill., as part of RENEW. The group will leave the Newman House at 9:30 a.m. The day will include presentations and several hours of silent meditation. It is free and open to all UMSL students. A day of re-collection also will be held on Nov. 14.

A morning prayer session will be held Monday through Friday from 8:15 to 9 a.m. at the Newman House. This will be an opportunity for students to offer prayers for the success of RENEW.

The RENEW committee has designed flyers and a clown lawn display that will be put in front of the library. The Newman House is paying for the printing and the Office of Student Life will be posting the flyers around campus.

"A clown was chosen because it is a Christ symbol," said John O'Shaughnessy, student leader. "He was made fun of and made to look like a fool."

The committee consists of seven people who will be in charge of running small group discussions. They are Kate Lydon and John O'Shaughnessy, student leaders; Monica Lauer, publicity chairperson; Karen Jacoby and Rose Lane, co-chairs; Nick Wagner, associate minister at Newman House; and Father Bill Lyons.

For information on the RENEW program or to sign up for a small group, call the Newman House at 365-3455.

Optometry

from page 1

not enough freedom to be creative because of the way the building is constructed," says Christensen. "All they can do is knock out a few walls to make the facilities functional."

Christensen explained that construction is priced according to three types of categories: minimum, moderate and heavy. He said that the education building, once used as a dormitory for a convent, will need the large dormlike restrooms torn out so that the space can be utilized.

Christensen doesn't expect to receive the money till next March but said that it will take about three to five months to do the planning with the architects.

Many meetings will be required between Christensen, the architects and university officials. Christensen will be the mediator between the optometry school faculty and the architects to make sure that their needs are met.

The School of Optometry was officially begun in the fall semester of 1980.

The School of Optometry was officially begun in the fall semester of 1980.
Govenor Bond will announce next week cuts in state services, which could include reductions in education budget. The announcement will be at the University of Missouri-St. Louis. The reason was not given, but it is known that Governor Bond cut the state revenue. The decision to cut the state revenue will be disastrous. It is true that the four University of Missouri campuses would survive despite cuts in state funding, but the state would be neglecting one of its chief services. That is, Missouri would no longer be providing higher education at a high degree of quality or at a modest price. Cuts in state revenue will exceed the rate of inflation. For the year 1978-79, the percentical fee for full-time students was $39, and this was up to $960 in 1979-80. With the increased state revenue in 1981-82 and $510 in 1982-83. Next year, incidental fees are going up 15 percent to $602 per semester, which means we're getting close to the point where attending school out of town won't be much more expensive than staying in town. Incidental fees, by the way, have gone up seven consecutive years.

As a result, partly anyway, enrollment at UMSL has declined. Projected enrollment for this year was 12,259. Although final totals have not been announced, enrollment is around 11,000.

The reason for the drastic fee increase is obvious. The UM system is not being funded properly, and student fees must make up the difference. If the UM's amount in state funds is cut at all next week, it will mean that the university had more money in state funds two years ago than it will have this year. That, among other things, is unfair.

There also is some question about our so-called quality education. Because of financial burdens, UMSL and the other three UM campuses have lost outstanding teachers in the past few years. And without money, it has been difficult to add to the curricular. Academics have almost stagnated. We're waiting.

Where is our Sports Information Director?

What is an athletic department without a sports information director? It's like a poorly managed campaign without a campaign manager. Or a movie star without an agent. Any way you look at it, it hurts.

UMSL has been without a sports information director since Dan Wims left (that office in May) to take over as the director of information at Lewis and Clark Community College. Several members of the athletic staff and students who had worked in the sports information office previously offered to help with the duties since then, but a full-time SID still has not been hired.

Wims was resigned, there was talk about eliminating the position completely. It also was mentioned that the position would remain, but the salary would be decreased. In any event, UMSL has had about six months to fill the opening, and is still dragging its feet.

Despite the inattactive pay that goes with the job, there is no excuse for not getting someone who will be in the sports information office for more than a couple of hours each day. UMSL needs a sports information director, and in a hurry.

Those who don't realize how important a sports information director is should consider the following: It hurts the image of the university when no one is in the sports information office to field questions from members of the media, who give UMSL improved visibility through coverage of its athletic events; it hurts the attendance at the events because they are not promoted properly; individual coaches have to do their own publicity; and it also makes UMSL look silly when an opposing team comes to UMSL for a soccer game and doesn't realize that the starting lineups will be announced over the public address system. All these are duties of a sports information director.

UMSL is fortunate that John Kazanas, assistant baseball coach, has assumed the duties of information director. And soon...
New student elections held

New student elections were held Monday and Tuesday, Sept. 27 and 28.

Thirty-four votes were cast to fill six positions. Three students applied and were elected. They were John Wines, Lauri Hofher and Barb Foitek. Three write-in candidates also won seats. They were Tim Grobnan, two votes, and George Mirth, one vote; and George Pellicano, two votes.

The Student Association also held an election to fill the position of an Arts and Sciences representative. Myra Veatriz Martin defeated Cliff Reeves by 43 votes to 31 votes.

"I can't find any reason for people to complain about this election," said Roland Lettner, election commissioner. "I think maybe the apathy this campus feels comes in with the freshmen class. Or, perhaps, the general campus has a lack of knowledge about the Student Association and what we are here for."

UMSL projected an enrollment figure of 12,250 for this year, but exact figures will be closer to 11,900, according to Perry.

"With the drop in enrollment, we're low on income raised through student fees," Grobnan said. "Unfortunately, student fees are making up for what the state is not providing."

Grobnan added that the University Cabinet — consisting of U.M. President James C. Olson, chancellors from the four UM campuses and other university officials — will meet next Thursday, Oct. 7, at Columbia to discuss what cuts, if any, will need to be made in the university budget.

A FEW GOOD DANCERS

Auditions 3:30 - 5:30 Friday October 1st
105 Benton Hall for more information
call Jim Fay at 5485

Applications Are Now Being Accepted For:

- University Programming Board
- University Center Advisory Board
- Student Activities Budget Committee
- Student Court

Applications Are Available At:
Information Desk, 253A University Center, and Marillac, EOB.
Application Deadline October 11th 4 pm Woods Hall.

For additional Information Contact
Larry Wines or Earl Swift in 253A U. Center or call 553-5104

UNIVERSITY PLAYERS NEED GOOD DANCERS

Applications Are Now Being Accepted For:

- University Programming Board
- University Center Advisory Board
- Student Activities Budget Committee
- Student Court

Applications Are Available At:
Information Desk, 253A University Center, and Marillac, EOB.
Application Deadline October 11th 4 pm Woods Hall.

For additional Information Contact
Larry Wines or Earl Swift in 253A U. Center or call 553-5104
Thursday 30

- Cosaan African Dance Company will perform in the University Center Lounge from 11:30 a.m. to 12:15 p.m. Cosaan, which means African roots of culture, will present dances from Senegal, the company's homeland.

- Women's Soccer vs. Colorado College (here, 7:30 p.m.)

Sunday 3

- "Employment of the Handicapped" will be the topic for discussion on "Creative Aging" tonight. Deborah K. Phillips, commissioner of the Office on the Disabled for the City of St. Louis, will be the featured guest. Phillips graduated from UMSL in May 1976 with a bachelor of arts in French. She is handicapped and requires aides at all times. "Creative Aging" airs on KWMU (FM 91) from 7 to 8 p.m.

Monday 4

- Renew. The Newman House will sponsor a six-week series of small-group sharing focused on God's interaction with people's lives. The groups will meet for one-hour sessions in 266 University Center. For specific times, please call the Newman House at 385-3455.

- Body Building for Women. This introduction to the world of "pumping iron" will be taught by Jean Cavender. Time will be announced. Please call the Women's Center at 553-5380 for required preregistration.

Tuesday 5

- Fun Run. The intramural department will sponsor an intramural fun run from 12 to 2 p.m. at the Mark Twain Building. For more information call the intramural department at 553-5125.

- Women's Volleyball at Bradley University.

Wednesday 6

- The Kayak Club will sponsor a clinical 7:30 p.m. in the Mark Twain Building. For more information call the athletic department at 553-5125.

- Men's Soccer vs. Missouri Southern College (here, 7 p.m.)

- "Wednesday Noon Live" will feature "Street Corner Symphony" from 11 a.m. to 1 p.m. on the University Center Patio. In case of inclement weather, the concert will be moved to the J.C. Penney Auditorium.

- "I want your blood." The Red Cross will take blood donations today and tomorrow from 9 a.m. to 2 p.m. in the University Center Lounge. To make donations more convenient, the Office of Student Life is accepting appointments; please stop by the office at 262 University Center.

Thursday 7

- Elaine Viets, feature and humor columnist for the Post-Dispatch, will speak in Room 200 of Lucas Hall at 12:30 p.m. The program is part of the University Programming Board's "Fall '82 Speakers Circuit." See the features/arts section of this issue for related story.

- Journals for Women. It is not necessary to be a writer to keep a journal. Journals provide a way of understanding relationships, experiences and life work. Open yourself to new awareness. Stop by 425 SSB for more information on this seminar.

- Continuing Education will sponsor a symposium on Cancer among the Black. For more information call Continuing Education at 553-5961.

Friday 1

- Math Anxiety. Is the thought of having to take math frightening? Learn how to control your anxiety and solve your problems. This counseling service begins today and continues for four subsequent weeks. For more information contact the Counseling Service at 553-5711.

- Medieval Wargamers will meet at 1:30 p.m. in the lounge area of the University Center.

- Volleyball Invitational. The UMSL Tournament will be held today and tomorrow in the Mark Twain Building. Twelve teams will be participating in this invitational meet. For game schedule, see the sports section of this issue.

- "Time Bandits" will be the featured movie of the fall film series. The movie can be seen at 7:30 and 10 p.m. in 101 Stadler Hall. Admission is $1 for UMSL students with I.D. and $1.50 for the public.

Saturday 2

- Volleyball Invitational continues. See the sports section of this issue for times.

- Dance St. Louis will present the outstanding Houston Ballet in "Cinderella." Friday and Saturday at Kiel Opera House. Ben Stevenson choreographed this well-loved story to the melodious music of Prokofiev. Performance time is 8 p.m. For information on student prices, contact the Dance St. Louis Box Office at 968-3770.

Material for "around UMSL" should be submitted in writing no later than nine days before the Thursday date of publication to Shawn Foppe, around UMSL editor, Current, 1 Blue Metal Office Building, 8001 Natural Bridge Road, St. Louis, Mo. 63121. Phone items cannot be accepted. Material may be edited or excluded to satisfy space or content requirements.

place. In some cases, somebody has got to get involved. I know
something might have happened and
there are delays. But this is the
students' campus and somebody
needs to be willing to sacrifice for
it so crime won't get worse.

According to Chief of
Police William Karahara, there is
a problem with finding. "We are
working with the student govern-
ment. It is the hope that we will
gain additional funding so more stu-
dents will qualify for the Student
Police Program. In our jobs, we see,
the funding is only available to a
limited number of students."

Anytime students want us to
come talk to a group about any
problem, we'll be happy to help."

One program Dewing hopes
will help tremendously with crime pre-
vention. "We wanted to have five teams of two
students each patrol the cam-
pus and do a little eavesdrop and
carry walk-talkies. If they spotted a problem, they could call us
and we would then respond."

"The students would be paid. We 'd
try to make it interesting. I
really didn't want to handle serious subjects
for ."

"One main qualification was
that I wore clothes . I really didn't
want to talk about fashion writers
or how I got the thing ."

"That's changing. I
have some administrative-
judicial, I suppose ."

Everyone was impressed when he
said : "I started

Generally people really don't consider their health unless they are injured or sick, or are under stress. How many times have you heard someone say, "I have to slow down or I'll get sick," or "I really need to lose 10 pounds or I'm not going to be motivated." We usually do not consider improving or promoting our health or take the time to think about it only after we have had problems or worries.

There is a new mood in the health field. There is a positive attitude about health and the effect each of us can have on our own individual health. Each day the attitudes change and idea is called wellness.

Wellness is a concept whose time has come. Benjamin Franklin was one of the first to affirm the importance of believing in prevention. "An ounce of prevention is worth a pound of cure."

In the health field today it is realized that wellness concept. More and more, scientific research affirms what common sense has told us all along: How we live our lives, what we eat and drink, and how we take care of ourselves and others all affect our health. Wellness is a concept that stresses routine health actions encourages each person to take responsibility for his or her own health.

It is estimated that as many as seven or 10 causes of death in the United States could be reduced through a change in our lifestyles.

Wellness emphasizes activities that we do each day. Oriah, 28, improve our physical and mental health (e.g., exercise, diet, and fit to stay physically fit, you can take a brisk walk. You can have your sandwich on whole-wheat bread to improve your digestion. Taking 10 minutes out of a stressful day to do something enjoyable can also relax your neural system.

The economic benefits certainly are being explored and employed. Health care costs can be reduced due to wellness programs. Injury prevention costs are a significant factor in employee benefit packages.

So what can the University School of Nursing and the Office of Student Affairs have the importance of the wellness concept. They are co-sponsoring a Wellness Program to better promote healthy living for students, faculty and staff. The Wellness Program is not the only one at UMSL. Wellness Program and is developing and planning healthy activities for every student group. A survey of college students filled out a Health Style Survey at a wellness booth at this year's Expo '82. Many people took the time to evaluate their personal health habits and ask questions about what they might do to improve their health. The booth, run by Bob G. Welles, also sponsored the Wellness Program, was a real success. Interestingly, but not surprisingly, the most popular health worry was stress. UMSL already has many activities that help promote healthy living. The athletic and physical education departments offer exercise classes, tennis, racquetball, fitness classes and many other fitness programs. The Counseling Center has a variety of groups that help improve your personal wellness. Groups that reduce stress and help improve your health. The Counseling Center also has short-term group counseling skills in reducing stress. Movies sponsored by the University Program Board and other groups are available for viewing.

The Wellness Program will sponsor a campus-wide Health and Education Project, an assessment of wellness activities, and in November the American Diabetes Association will conduct a diabetic screening on campus. In the spring the Wellness Program will have a Wellness Week.

It takes an ounce of prevention, and a little bit of education, but wellness is worth probably much more than a pound of cure.
Viets

from page 7

"It's changed dramatically. There are a lot more women in the newsroom. There could be more."

Viets found it difficult to recount any favorite column.

"I have a problem, because once I write them I have a hard time remembering them. Sometimes people will approach me at a party and say, 'Hi. What have you written lately?' Usually, I just say, 'I'm drunk. I can't remember.'" I did some, I guess, maybe eight months ago, on Tom Swifties. I asked people to write in and I got 1,300 Tom Swifties. The columns where I asked readers to write in are always a lot of fun. I like to see what they have to say.

"I did one last summer, we were looking for the man who paved his lawn and painted it green. People wrote in; they had to give the address of where this person was and they would have the story behind it."

"We found eight people who had paved their lawn and painted it green. People wrote in; they had to give the address of where this person was and they would have the story behind it."

Cult dramatization is a success

"Ticket to Heaven" is a first-rate work: well written, well cast and well executed. Good drama based on factual occurrences is rare, and director Ralph Thomas has done a fine job creating a fascinating, compelling film about one man's descent into cult life.

Most movies dealing with the subject have tended to portray cults as the result of religious fanaticism and raping lunatics who only make themselves visible during daylight hours to sell flowers and harass travelers in airports. "Ticket to Heaven" transcends this sensationalistic, simplistic view of cultists, and successfully illuminates the reasons why cults flourish in our society.

The film is based on a story by Josh Freed's personal life, "Moonbeams: Journey into the Mind of a Cult." In his book, Freed describes his good friend's disappearance into, and subsequent rescue from, the "Monmies" of the Unification Church. Ralph Thomas and Anne Cameron collaborated to write a cohesive, convincing screenplay inspired by Freed's book.

Nick Manco is a solid, hard-hitting performance as the film's protagonist. David Kapell is a young Toronto school teacher who decides to take a holiday in San Francisco to forget personal problems. Upon arrival in California, David is greeted by a group of friends who drives him to a house full of young, fresh, attractive people claiming to belong to the "Young Pioneer Community Center," a group that supposedly takes on charitable, community-minded projects.

David is persuaded to join the group, for the weekend at a country retreat, where singing "happy" songs and sharing personal feelings around the campfire all seem innocent enough. But he doesn't realize it: David is being subjected to a complex, subtle brainwashing technique that shorty transforms him into a submissive zombie.

He gradually comes to believe that his parents and friends are under the influence of Satan, and that salvation is only attainable through a specifically regimented life style. Members of his cult are given only meager portions of low-protein food, they are allowed very little sleep, and they are required to spend 22 hours a day raising money for their Korean "goal"--a man intentionally similar to the Rev. Sun Myung Moon.

David's parents and friends become understandably worried and go to San Francisco to kidnap him, a gamble that is dangerous and illegal. The kidnapping is successfully executed and an experienced ex-cult member is summoned to begin the strenuous task of de-programming David's mind.

"Ticket to Heaven" does a superb job of giving insight into the psychological allure that cults utilize to attract people. We live in a large, impersonal world. Answers are few and insecurities are many. Perhaps at no time is loneliness more profoundly felt than by young, single men and women on their own. For these individuals, cults offer what a cold society will not: companionship, a sense of meaning and some general direction.

"Ticket to Heaven" will be shown at the Oriole Theatre Oct. 5-7 and here at UMSL, Nov. 12-13. It's a film worth seeing.

Women to host 12-team tourney

The UMSL volleyball Riverwomen will host a 12-team tournament beginning Friday at 5:30 p.m. Friday's matches will be played in the Mark Twain Building.

The 12 teams have been divided into three four-team groups for "pool play." In pool play, each team will play one game against each of the other teams in its group. The top two teams from each group will progress to a single elimination playoff Saturday.

The pool play schedule is as follows:

Friday, 5:30 p.m. - University of Evansville vs. Western Kentucky University.
Saturday, 10 a.m. - University of Evansville vs. University of Missouri-Columbia.
Saturday, 12:30 p.m. - University of Evansville vs. University of Southern Indiana.
Saturday, 2 p.m. - University of Evansville vs. University of Wisconsin-Oshkosh.
Saturday, 4 p.m. - University of Evansville vs. University of Evansville.
Saturday, 6 p.m. - University of Evansville vs. Central Missouri State University.
Saturday, 8 p.m. - University of Evansville vs. University of Arkansas-Pine Bluff.
Sunday, 11 a.m. - University of Evansville vs. University of Louisiana-Lafayette.
Sunday, 1:30 p.m. - University of Evansville vs. University of Arkansas-Pine Bluff.
Sunday, 3:30 p.m. - University of Evansville vs. University of Arkansas-Pine Bluff.
Sunday, 5:30 p.m. - University of Evansville vs. University of Arkansas-Pine Bluff.

Riverwomen down Central Florida for title

Dan Kimack

The soccer Riverwomen capped off a fantastic National Women's College Budweiser Soccer Tournament last weekend by defeating Central Florida College 2-1 in the championship game. The game was decided in a penalty kick shootout after the teams battled through two overtimes of 1-1 soccer.

The first half started slow. Central Florida tried to run the ball up the field against a tough defense — led by Theresa Klaus and Sue Richert — preventing it from scoring a goal until the 14th minute. UMSL used a passing attack to control the game and set up its first scoring opportunity. After unsuccessful attempts at centering the ball, an errant Riverwoman pass found its way back to the Florida defense. With the goalkeeper out of position, Debbie Lewis raced towards the ball, but Kris Caicedo recovered in time to clear the ball.

Joan Gettemeyer missed UMSL's second scoring opportunity. Gettemeyer found herself unmarked about 15 yards out and unloaded a drive over the outstretched hands of the Central Florida goalkeeper but instead of finding the net, the ball slammed off the crossbar.

Florida then countered by producing the game's first goal. After the ball was cleared into the UMSL end of the field, Michelle Sedina got behind the UMSL defense. Sue Richert tried to make a tackle in front of the goal, but instead was penalized for tripping and Sedita was awarded a penalty kick.

Kathryn Webb took the penalty kick for Central Florida. She drove the ball into the lower left corner of the net to put her team ahead 1-0 at 20 minutes 22 seconds.

UMSL knotted the score with less than four minutes left in the half. Jan Gettemeyer scored controlling a corner kick and then putting the ball into the net. The game remained tied through the second half and two five-minute overtime periods.

Central Florida kicked first in the shootout. Mary Varas beat UMSL goalkeeper Ruth Harkert on the first shot, but that would be the last time her team would ripple the orange mesh. On Central Florida's second shot, Harkert gracefully dove to her right to save Sue Mortberg. Next, Harker was unchallenged as Laura Dryden shot over the crossbar. On their fourth shot, Debbie Lewis raced towards the penalty area. The Riverwomen pass found its way in time to clear the ball.

Sue Richert, Debbie Lewis star in UMSL win

Jeff Kuchno

Since UMSL's triumph in this past weekend's tournament was the epitome of a team effort, it would be unfair to single out individual performances. But if it had to be done, most would agree that Sue Richert and Debbie Lewis were the primary standouts.

Richert's speed and Lewis' skill continued to move UMSL's attack. As the game came to a close, Richert said, "This game showed we learned a hard lesson last year at nationals. This year, it's going to be a different story.

Lews, a freshman who obviously was not on the team last year, added, "Debbie has been a big help to our offense. She is very quick and she makes things happen." Against Central Florida, Richert denied almost every attempt the Lady Knights made to move the ball into a position to score. Lewis, meanwhile, knocked home the decisive goal in the best-of-five penalty kick shootout to seal what perhaps was the biggest victory in the history of UMSL's women's soccer.

For Richert and most of her teammates, Sunday's victory avenged last year's 4-0 loss to Central Florida in the semifinals of the national tournament. She pointed out that UMSL had a lot to prove in Sunday's match.

"We really wanted it," Richert said. "[This game] shows we learned a hard lesson last year at nationals. This year, it's going to be a different story.

Lews, a freshman who obviously was not on the team last year, added, "Debbie has been a big help to our offense. She is very quick and she makes things happen."
Clinical sparks, getting two points on serve the Riverwomen saved a match point with dangerous spikes, but Principia suddenly caught fire. Before they Taylor and Judy Rosener both tough as they were tonight. and-forth when Principia describe how the match started. Displaying power and precision, women played host to Principia Cindy Rech had expected. game, 15 - 7. wracking .

“Principia’s inspired play of Darlene Bohnert and Debbie Shores seemed to be lacking that one key player. I told myself that I wasn’t going to be good, but we were really going to be good, but the Principia Tourney (a first-place finish for the Riverwomen) was unbelievable. I couldn’t believe we were doing some of the things we were doing.”

Rech said that one of the things that have helped the team is the overall ability of the players. “We’ve got five or six players who can really hit the ball hard,” she said. “Our two setters are outstanding.” Thought Janet Taylor was a fluke because normally a player can’t set and hit so well, but she can do it. We got a real prize when we picked up Darlene Bohnet (from Jefferson College). She’s really got one of the highest vertical jumps on the team.”

The Riverwomen can rest easy because we haven’t seen them in their tournament, but not as strong as they were tonight. (Principia) were tough in our stint for the best competition because we haven’t seen them play. (The tournament schedule can be found on page 10.)

**Intramural football crowds grow**

Ronn Tipton reporter

In this second week of the football season, some improvements have occurred at the bargaining table, but millions of Americans are still without pro football. As a result, UMSL’s Intramural football games in drastically up.

In last week’s action, the Jets (2-2) shut out the Wild Dogs (0-0-1). The Jets are the sole possession of first place in Division 1. RotoC (0-0-2) and the Tekes (1-1-1) played to a scoreless tie. Poker Twice (1-1-1) overcame the No Names (4-2-12) to take second place in Division 2.

NCFT (2-0) blanked CBC (9-0-2) 34-0. NCFT hasn’t allowed a point in either of their regular season games. The Grave Diggers (1-1) beat the Fighting Iris (1-1) by a score of 22-4 in a Division 3 game.

Thursday’s action included NCFT stopping the Grave Diggers 26-0. The Fighting Iris won 14-0 due to a CFC forfeit. Sig Tau defeated the Papal Bulls 14-0. Sig Tau (2-0) is now leading Division 2, being followed closely by the Pikes (1-0-2) and the Tekes (1-0-1).

The Tekes slipped by the No Names 2-0 on a No Names safety. The Pikes raised their unbeaten streak to 10 games by defeating Sig P. 8-2. Larry Alberici and Hans Shriner each had an interception for Sig P. in the losing effort. Joe Richmeyer and Mike Higginsboth combined for five pick offs. Lloyd Bollinger threw the games only touchdown pass to Richmeyer and the conversion to Tony O’Driscoll for two points.

A bad snap caused a safety which accounted for the Sig P’s points. For the Intramural Tennis Tournament that is going on now, in the intermediate division. Bob See “Intramural,” page 12

**Soccer**

from page 10 again on a similar shot midway through the second overtime period.

“I couldn’t buy a goal,” O’Mara said. “But I’m coming into each game with confidence. I feel confident every time I go out on the field.”

As a team, UMSL is building more confidence with every game. Dallas said it’s only a matter of time before the Riverwomen really start to gel as a team together.

“I expect us to start rolling pretty soon,” he said. “Things are starting to fall into place.”

“THE PROFESSIONAL BUSINESS FRATERNITY”

GET SET: Riverwoman Darlene Bohner sets for a kill in the Riverwomen’s victory over Principia College Monday night. Volleyball coach Cindy Rech said that Bohnet is our main setting setter and has been a strong addition to the team.
Mike Tippitt will play Frank Cusamano in the other semifinal match. Tippitt advanced to the semifinals by beating Topper Roth, 6-1 and 6-1; then by winning over Greg Malick, 6-2 and 7-6. Malick beat Rick Blanton, 6-4 and 6-4 to play Tippitt. Cusamano beat Larry Coffins 4-6, 6-2 and 6-4 to move up to play in the quarterfinals, and then defeated Lannie Lucas 6-3 and 6-2 to make it to the semifinals.

In the Advanced Division, Dan Dalick will play Jerry Cassidy for the championship Oct. 3. Cassidy defeated Matt Cazalas 6-3 and 6-2 in the semi and before that, he beat Bill Schneidee 6-9 and 6-2 in the quarterfinals. Cazalas overcame Steven Sigman 6-4 and 6-3 to play Cassidy. Dalick needed only to beat Andrew Hasek to advance to the finals, which he did easily, 6-0 and 6-2.

The Riverwomen scored on three of four penalty shots. Joan Jan Gettemeyer scored back-to-back goals and Debbie Lewis blasted home the winner into the top right corner. Lewis was named the tournament's Most Valuable Player.

The tournament began Friday when Central Florida defeated Southern Illinois University-Edwardsville 8-6. M. C. College defeated the University of Texas 9-0 and the University of Wisconsin-Madison shut out Quincy College 4-0 in other first-round games. The Riverwomen defeated Indiana University 2-1 in their first-round game. They jumped on top 1-0 by scoring with only 25 seconds gone and, according to Coach Ken Hudson, they thoroughly dominated play. UMSL scored again before Indiana could get one into the net with only three minutes left to play.

In the second round Central Florida again displayed its explosive offense by blasting MacMurray 18-9. UMSL reached the finals by downing Wisconsin-Madison 1-0 after a shootout. UMSL outshot Wisconsin-Madison 21-1 despite being shut out through regulation and two overtimes.

INS AND OUTS: Riverwomen midfielder Patty Kelley in action against Central Florida College and sitting out after her hand had been stepped on.

Intramural

from page 11

Cayson defeated the winner of the Mike Sloan Rich Saunders match, on which information is lacking to advance to the semifinals. He will play the winner of the Mike Larson Jay Suganava quarterfinal match. Larson beat Kyle Muldrow 6-0 and 6-2 to advance.

Star

from page 10

last year and didn't experience the rough times at nationals. ended Sunday's game with a blast into the upper left corner behind Central Florida goalkeepeer Amy Ford. "I could see that she was leaning to her left, which is the side I usually kick to," Lewis recalled. "My coaches have always told me never to switch sides, but I thought I could make it if I hit to her right." Lewis also scored the winning goal in Saturday night's shootout against the University of Wisconsin-Madison. UMSL won that game on penalty kicks, 1-0. Not surprisingly, Lewis and Richert were named the tournament's outstanding offensive and defensive players. Richert also was named to the All-Tournament team, along with teammates Patty Kelley and Joan Gettemeyer.

"I was psyched up for this tournament," Richert said. "We played well, but there was something we could have done better in each game. We can only get better."
