Barb DePalma

A model of the proposed $23 million UMSL science building was unveiled last Wednesday by the architectural firm of Sverdrup and Parcel and Associates. The new five-story building would connect Benton and Stabler halls and would contain classrooms, lecture halls, research labs, and offices. It would also contain an animal care facility, science library, and the University of Missouri-Rolla Graduate Engineering Center.

In the complex, the animal care facility would be expanded to better meet federal standards regarding animal care and would better serve the needs of the UMSL faculty and students. The new science library would house 30,000 science volumes which are currently stored in the Thomas Jefferson Library. This would also aid students and faculty through better staffing and availability of scientific materials.

By housing the UMR Graduate Engineering Center in the new complex, the center could offer additional graduate level engineering courses and labs which cannot presently be offered due to lack of space.

During the 1982 special session of the Missouri Legislature, UMSL received $320,000 in planning money for the science building. UMSL is currently waiting to receive the rest of the money needed for building costs from the 1983 legislative special session presently in progress.

In his opening remarks, Chancellor Arnold B. Grobman said he was concerned about the passage of the bond issue. If the bond does not pass, we are all wasting our time today," he said.

The building of a new science complex has been a top priority at UMSL since 1969. The final schematic design is scheduled to be presented to the UM Board of Curators for approval at the board's December meeting. Following approval, the construction is planned to begin in October 1986 and end in September 1988.

M. Thomas Jones, associate dean of arts and sciences, said there is a definite need for the new science complex based on "Seeing作球朋pr页2

House boosts allocation for science building

Erik Schaffer

The amount of money earmarked for the UMSL science building from the state capital improvement bond issue has been raised to $12.7 million.

Gov. Christopher S. Bond had originally recommended an allocation of $4.5 million for the building. The estimated total cost is $23 million.

The money is part of the capital improvement bond issue that is currently being considered on the floor of the Missouri House of Representatives. Originally, the bond issue had called for $205 million in bonds to be sold. The House Budget Committee voted on Nov. 9 to boost the amount to $230 million.

According to Rep. Everett W. Brown, R-Maryville, the increase was approved in order to further construction of projects that are in "Phase I" of the building process. The additional money would provide for the completion of some of these projects, Brown said.

A portion of the money allocated to the science building complex was received in August to aid in the construction of the rider Library Building on the campus of Northeast Missouri State University in Kirksville. For this reason, Brown said, he voted against the change.

Northeast Missouri State has no representative on the budget committee, Brown said. "I didn't think it fair to take money away from the Pickler Library Building when no one was there to speak on their behalf.

Rep. Wayne Goode, D-Norman, said the science building is beneficial not only for the UMSL campus but also for the St. Louis area in general. He said he urged the shift in money because the science building "is the only building in St. Louis likely to get any money out of the bond issue."

Goode said that after the matter is resolved on the House floor, it must go to the Senate committee, the Senate floor, and then a joint resolution needs to be established between the House and Senate. "It will be about another month before it's finalized," said Goode.

He also said that the science building project would make it possible to "at least build the shell of the building. Once we've spent money on the shell, there's no question it will be completed," he said.

M. Thomas Jones, assistant dean of Arts and Sciences and chairperson of the Science Building Committee, said, "We had reason to believe that something in the range of $120 to $135 million would be allocated by the legislature. He said the allocation is in line with the Regional Commerce and Growth Association's recommendation that the building be built in two phases. Phase 1 would be to lay the foundation and construct the shell of the building. Phase 2 would entail purchasing equipment, furnishing and finishing the building."

ASUM, escorts address Student Assembly meeting

Kevin A. Curtin

The UMSL Student Association held its regular monthly meeting Nov. 13 in Room 229 J.C. Penney Building.

There are two special reports to the assembly before the meeting was called to order. Jackie McIntyre and Curt Kopler, representatives of the Associated Students of the University of Missouri, spoke to the assembly about participating in a state-wide coalition of UM students. The other report was given by UMSL police chief William G. Karabas and Student Escort Bill Shultz on the conditions of the student escort program.

McIntyre and Kopler made their presentation to UMSL students to recruit their Associated Students of the University of Missouri (ASUM) as a lobbying group that hopes to be able to influence the Missouri legislature's appropriations for higher education. They are composed of students from UM-Columbia and UM-Rolla.

Their proposal includes raising approximately $15,300 using semesterly enrollment figures specifically by UMSL students. The remaining 40 percent would be turned over to the statewide board of directors of ASUM to finance their activities in Jefferson City.

There would be both an UMSL board of directors and the state board of directors. UMSL would elect its own agent, who would receive a stipend, to represent UMSL's interest to ASUM.

"We feel that a statewide coalition would give us tremendous clout," said Kopler. "It would show the legislature that UM students care about funding and are willing to work hard to improve the economic crisis that the university is presently enduring."

ASUM's proposal must be approved by the UMSL Student Association before any foundations are laid. ASUM was on the UMSL campus until 1981, when UMSL pulled out of the association due to differences with the students on the other campuses.

The other special report on the escort program updated the status of the program for the assembly, who has funded the program and issued strict guidelines for its operation this year.

William G. Karabas, UMSL police chief, reinforced that he believed the program provides a necessary service to the UMSL community. He added, however, that he has received "no favorable feedback this year."

"Personally don't believe that it's running right," Karabas said. "I'd like to see the escorts patrolling all over campus for high visibility instead of sitting in buildings waiting for calls. However, the students are funding this program, and I am happy to participate in the program using students' guidelines."

Bill Shultz, who is a member of the student escort program, spoke to the assembly. Shultz asked if the escorts could be allowed to start working earlier next year. See "Association," page 3

VOILA: The UMSL science building was unveiled Nov. 9 by the architectural firm of Sverdrup and Parcel and Associates.

House boosts allocation for science building

The problem of student retention on the UMSL campus is being tackled by faculty, administrators and students. According to Nancy Avakian, assistant director for academic affairs, there is a meeting scheduled for Tuesday in which faculty and administrators will discuss the problem.

"There was a workshop that was given on black student retention on November 3," said Avakian. "Actually, the planners of the conference realized that retention is something that should be addressed campus-wide, not just for black students."

Avakian said that this workshop was the first attempt in dealing with retention so it focused in on black students. She said approximately 35 faculty and administrators were present.

Recommendations that came out of the Nov. 3 workshop include the establishment of an ongoing orientation program, a call for better interpersonal relationships between faculty and students, more administrative involvement in college advising, and the formation of a campus task force to inform area high schools more accurately about the programs UMSL has to offer.

The Tuesday meeting will be to present the planners' recommendation to the point," said Avakian. "Everybody has made recommendations and that is why we are here."

"We're going to see the interaction between students and faculty relating to the retention."

"Hopefully, with this type of dialogue, it will make people more aware of the conditions of black students," he said.

Clark Davis, project manager for Sverdrup and Parcel, said he faces a foremost problem in building a new computer center: "The facility should be flexible in the way it is designed to accommodate anticipated and unanticipated changes.

"It should be flexible so that it can be in the black students," he said.

According to Davis, the new complex would have a "heat reclam" system. This system, he said, would act as a "heat exchanger" and recycle heat that otherwise would escape from the building.

"This is a very important and tangible commitment on the part of UMSL towards higher scientific technology for the industries in St. Louis," he said. "High technology can't work function unless it receives adequate support in terms of enforcement.

Michael Haggans, director of computer affairs, said that he would like to see more space per student than the average of the programs SABC needs.

"We're going to see the interaction between students and faculty relating to the retention," he added.

"We're going to see the interaction between students and faculty relating to the retention," he added.

Saint Louis University's Student Travel extends an open invitation to UMSL's students to spend COLLEGE DAYS in Steamboat. It would be our pleasure to have you join us for this fun filled event. Compare our package with those offered on your campus.

Sign-up deadline is November 30, 1983

FOR TWO WEEKS IN JANUARY STEAMBOAT FILLS UP WITH STUDENTS. IT'S A GREAT TIME YOU DON'T WANT TO MISS.

- Eight accommodations at luxurious condominiums located in Steamboat Village. Primary attractions will be at the Whistlers Village or Timber Run.
- A full-time Steamboat staff can assist you.
- A complete package of activities and adventures including hot springs, skiing, snowmobiling, snowboarding, mountain bike riding, golf, and river rafting.
- A fun-filled, friendly atmosphere.
- The best-known and most famous ski area.
- A complete package of activities and adventures including hot springs, skiing, snowmobiling, snowboarding, mountain bike riding, golf, and river rafting.
- A fun-filled, friendly atmosphere.

Students should sign petition

As reported in several issues of the Current, there is a petition against the proposed bylaws changes in the governance of the University Senate. The petition is sponsored by the UM Student Association, the student government on campus.

Members of the association have been working hard to raise 1,000 signatures to present to the University Senate before it adopts the changes. Their organization has been diligent in its methods, but it hasn't been paying off.

These concerned individuals have posted copies of the petition along with a fact sheet in all the buildings on campus. They have begun to circulate the petition in classrooms. They are stopping students in prime traffic areas asking only for signatures and student numbers necessary for verification. They have mounted a special campaign for only 1,000 out of over 11,000 potential signatures.

What are they fighting for is a just cause. If the proposed governance changes go through, the students of UM (not surprisingly) the majority of the UM campus population) will have little leverage in campus affairs significantly squelched. It is a note of thanks to the students for giving full-time students a break in the future to accommodate even more students.

We urge our readers to support the student petition against these changes. Even if you feel you need to streamline campus governance, we hope you would not desire such a drastic reduction of student representation. If you have no opinion or regard in the matter, sign the petition anyway. You may help a very concerned student in the future by doing so.

It only takes a few minutes to stop and sign the petition. Find a copy in your building, or look for a student wearing a special button. They can help you find the student's future at UMSL, and that is worthy cause indeed.

Dear Editor:

In approving such a plan, the university has been diligent in its efforts, but it hasn't been paying off. The lower the default rate, the more students can show a return of this trust, perhaps the university. The lower the default rate, the better are opportunities for the university's long-range planning, the better are opportunities for the university's long-range planning. If students can show a return of this trust, perhaps the bailout program might be expanded in the future to accommodate even part-time students.

Thank you, UM administrators, for giving full-time students a break in paying off their investments for the future.

We are ever so grateful that you have given us a break on our previous payments. We are ever so grateful that you have given us a break on our previous payments. We are ever so grateful that you have given us a break on our previous payments. We are ever so grateful that you have given us a break on our previous payments.

Thank you for your continued support. We appreciate your continued support. We appreciate your continued support. We appreciate your continued support.

Sincerely,

[Signature]

President prods populace to sign petition

In the last few years, students have made great strides in becoming more active and more involved in campus and in campus issues. We believe it is not too late to start. If you have been on campus long enough to appreciate some history. It is marked by the proposal of student members of the Fiscal Resources and Long-Range Planning Committee, which, in the end, found some additional money for the library and for the Computer Center.

Students have made contributions to the campus and to the Senate and its committees. For student seats to be taken from them, just as we are learning to be involved, is one less learning experience we students will have on this campus. Faculty have pointed out to me that students do not attend meetings. Faculty do not always attend either. This is not our job. It is extracurricular. We don't get points for service. Tenure for us does not rely on service for us.

If meeting times and dates are set for the convenience of the chairman and the faculty, then students cannot attend, as many leave campus to go to work. And we certainly will not be in attendance if our seats are taken from us now.

As president of the Student Association, I urge all students to show their concern for student involvement on our campus by signing one of the petitions. They are on bulletin boards, in the lobbies, and are being passed around.

Please be concerned — this is your campus, too!

Sincerely,

[Signature]

President, Student Association

The Current welcomes all letters to the editor. All letters must be signed and the writer's student number and phone number must be included. Non-students also must sign their letters, but only need to add their phone number.

Names for published letters will be withheld upon request, but letters with which the writer's name is published will receive first preference.

Responsibility for letters to the editor belongs to the individual writer. The Current is not responsible for controversial material in the letters, but maintains the right to refuse publication of letters judged by the editorial staff to be in poor taste.

Letters may be dropped off at the Current offices, 1 Blue Metal Office Building, or the University Center Information Desk. They may also be mailed to Letters to the Editor, Current, 1 Blue Metal Office Building, 8001 Natural Bridge Road, St. Louis, Mo. 63121.

Just a reminder!

The Current will print only two more issues this semester.

Our last issue will be Dec. 8, 1983.
Advocates nuking nukes with a letter

Margie Newman reporter

During the past 100 years, man has made great technological advancements. We now have the ability to communicate over airwaves, to fly in man-made planes. The time to travel to the moon and to send spacecraft around the solar system. We have also gained the technology to annihilate our own species—with nuclear weapons.

More than 13,000 megatons of nuclear yield exist on this planet, ready for deployment at the push of a button. This is enough firepower to obliterate every city on the earth hundreds of times over.

The long-awaited fitness trail was put into the parking lots, behind Lucas Hall, up to the Thomas Jefferson Office. The committee allocated $9,150, the parking lots, behind Lucas Hall, up to the Thomas Jefferson Office. The committee allocated $9,150, the parking lots, behind Lucas Hall, up to the Thomas Jefferson Office. The committee allocated $9,150, the parking lots, behind Lucas Hall, up to the Thomas Jefferson Office. The committee allocated $9,150, the parking lots, behind Lucas Hall, up to the Thomas Jefferson Office. The committee allocated $9,150, the parking lots, behind Lucas Hall, up to the Thomas Jefferson Office. The committee allocated $9,150, the parking lots, behind Lucas Hall, up to the Thomas Jefferson Office.

Starting from the Mark Twain Trail, the facility was made possible on one's ability to handle nuclear weapons: The world population must demand that all nations disarm themselves of this nuclear terror.

The fitness trail emphasizes coordination, strength, endurance, and flexibility, said Coffin. The President's Council on Physical Fitness and Sports recognizes that the fitness trail is an "ideal resource form for communities and agencies dedicated to improving health and fitness of Americans."

"The fitness trail, which is nothing more than wood beams, boards and a few metal bars, is a rigorous and challenging course because of the many hills on campus. I hope everyone will take advantage of the facility," Coffin said.

The facility was made possible by the efforts of Gail Greenland, physical education instructor, and Coffin. The movement to construct a fitness trail was put into full swing last spring by a concerted effort of several student organizations, which made recommendations to the Student Services Fee Committee. Once the committee allocated the $9,154, it was necessary to get approval for a suitable trail. It was not until two or three weeks ago, according to Coffin, that approval was given for the final trail.

After researching several companies, Coffin finally decided to go with the Fit-Trail package, from Southorb Corp. He felt it offered the best exercise course for the money.

The committee, according to Jones, will collect information regarding retention, and based on that, make recommendations. Jones said the committee will be made up of six faculty members and three student representatives. There will also be two ex-officio members. Presently, nominations to fill these positions are being received. Jones added that she has not studied why UMSS has a retention problem in particular. She had, however, studied other institutions similar to UMSS.

Because of the abbreviated week, the Current will not publish an issue next week.
The University Program Board Film Series presents the Academy Award-winning "Gandhi," starring Ben Kingsley in the role of Mohandas G. K. Gandhi. There will be no late show. Admission is $1 for students with an UMSL ID and $5.50 for the general public.

Today is the last day for students to drop a class or withdraw from school. Be sure to check the drop schedule posted in the Academic Office (Room 312, Main Hall).

Joseph Elder will present "Accounting and Computers" at a meeting of the Accounting Club, at 3:30 p.m. in Room 413 Clark Hall.

The UMSL Program Board continues "Gandhi" as part of its Film Series. See Friday for information.

Women's basketball vs. Culver-Stockton College at 7 p.m. in the Mark Twain Gymnasium. Admission is free to students with an UMSL ID, $1 for UMSL faculty and staff, senior citizens and children, and $2 for non-students.

The lab offers a place for students to get help at any stage of the writing process," Jackoway said. "If a student is having trouble getting a paper started, we can offer guidance. We'll also help with organization, or even with the final stages of papers."

What we don't do is write the paper for the student, she stresses. "We are a teaching service, and our ultimate goal is to make students independent of us. If we did it for them, they would never learn to write themselves."

The lab staff includes Debbie Larson and Fitzgerald, both UMSL English instructors, and two student tutors. Jackoway is on the job this semester, working on programs for new additions to the staff, two Apple IIe computers.

The computers will be used to aid students with several stages of the writing process, with program designs for specific problem areas. Because adequate computer writing programs on the college level are not available, Jackoway is designing programs to best suit students' writing needs.

The program will lead students in exercises on brain-storming, listing, outlining, revising, and choosing a topic for a sentence-combining. There will also be programs that students can use to take data from a class and form inferences, which is a good way to start a paper," Jackoway said. The lab will also be installing word processing facilities for tutors to use when teaching students. "Students can type several paragraphs into the terminal, and then a tutor will show them how to revise, organize and generally improve the paper," Jackoway said.

"The computers will be very much a part of the lab's operation," Jackoway said. "They offer a big advantage of the lab, which is that they allow both computers and students to revise right there in the lab, without having to cut anything or mark on a paper. Being able to watch the student write (on the terminal) will also allow the tutor to observe how a student composes, and how he is uncovering problem areas."

In addition to the Apple computers being acquired, the lab has slide/tape presentations that students can view on an individual basis, and a large collection of reference books. But according to Jackoway, the lab's most valuable asset is the one-to-one consultations it offers students.

"One big advantage of the lab is that it can tailor its services to students' needs," Jackoway said. An example of this flexibility is the lecture demonstrations that staff members give in classes. Teachers in non-writing classes often request lab staff demonstrations before essay exams or when a major paper is assigned. "Lecture demonstrations help students who are not in composition classes find out about the lab and the services it offers," Jackoway said.

For example, if a teacher is giving an essay exam, he or she can request that one of the lab's tutors come and talk before the class about good essay answers. Teachers also ask us to explain how to write research papers, lab reports, literature reviews and other writing formats," she said.

Last semester, 231 students visited the writing lab, with an average of three visits per student. In the future, Jackoway said, the lab will be even more in demand. "Now that English 101 (Advanced Expository Writing) is a requirement, more students will be looking to the Writing Lab for help," she said.

The lab is open from 8 a.m. to 3 p.m. Monday through Thursday, and from 9 a.m. to 3 p.m. on Friday. Evening hours are 8:15 to 9:45 p.m. Wednesday and 5 to 7 p.m. Thursday.
The Stray Cats album a rockabilly step back

Matt Bewig
music critic

The Stray Cats' "Rant 'n' Rave"

The Stray Cats have brought back today's pop music much of what was good about '50s rockabilly music.

That music had a driving beat, simple melodies and catchy lyrics. Above all, rockabilly was fun and danceable. The Stray Cats have preserved these qualities and re-injected them into the contemporary music scene to counter the pomposity and pretentiousness of much of '70s rock. "Rant 'n' Rave" has much that will delight the Stray Cats' fans, but the entire rockabilly revival has problems that strike straight to the heart of what rock 'n' roll is supposed to be.

First, it is simply not 1957 anymore. By ignoring over 20 years of rock-'n'-roll, the rockabilly revivalists pretend that nothing important happened in that time. The Stray Cats, after all, are doing nothing new. None of the songs on this LP display any creativity or originality. The themes of teenage love and fast cars are unchanged from the '50s. If you really want to hear this kind of music, and there's nothing wrong with that in my book, there is no reason to listen to the Stray Cats. Just dig out some old Elvis Presley, Carl Perkins, Buddy Holly or Jerry Lee Lewis records and you'll get the same essential sound, but with the original, raw content of rebelliousness.

And therein lies the more important problem. Since its birth, rock 'n' roll has stood for rebellion. Elvis Presley and Jerry Lee Lewis were seen by many as immoral rebels, because the enjoy-life-now, anti-authority sensibility of their music was rebellions. It was in the 1960s, however, that middle class kids used rock 'n' roll to express their social and political protests, as the rebellion of the '60s became the revolution of the '60s. The Stray Cats ignore all that, and the rockabilly music that once was rebellious now is innocuously frothy pop. The rebellious urge of rock 'n' roll simply can no longer be satisfied by songs about cutting class or driving recklessly.

"Rant 'n' Rave" is basically a boring album. The songs all sound the same. They have nothing to say and don't try to hide it. This is 25-year-old music released on this year's label. The trouble is rock music has come too far to go back to its infancy and not sound juvenile. It really is true. You can't go back.

John "Cougar" Mellencamp

"Uh-huh"

John Cougar Mellencamp's latest LP, "Uh-huh," may well be his best effort yet.

Although many dismiss Mellencamp as just another pop rock idol, I beg to differ. There is, on almost every cut on this LP, and underlying seriousness, an attempt to get at something deeper than teen-age romance and fast cars. There is rebelliousness throughout this album, but not just of the adolescent variety. In "Golden Gates," a powerful and sensitive song, Mellencamp gives voice to the frustrations of ordinary people.

"In these days of uncertain futures/Who knows what the masters do/they got their big deals guin' on, guin' on/Get nothing to do with me and you."

Throughout the album, Mellencamp tries to express the feelings of powerlessness and protest, and thus taps the vein of rock music that the Stray Cats miss — the rebellious tradition of Jerry Lee Lewis, the Rolling Stones and others.

Musically, Mellencamp is hardly innovative, yet he manages to avoid cliche. His music is hard, driving rock, but he understands something that heavy-metal morons like Def Leppard and Loverboy don't — that energy comes from musical passion and honest content — not just ear-splitting volume and laser shows.

John "Cougar" Mellencamp is no great poet-rocker ala Bob Dylan or John Lennon. The current trends and record company marketing strategies work against anyone making tough, honest rock 'n' roll today, and so Mellencamp has trouble trying to be one of the few, rather than one of the many. But he does try. For that effort alone, he ought to be taken seriously. He is trying to say something about life in America today, and that's a lot more than I can say for the Stray Cats or almost any other rock entity. Here's an A for effort, John.

Put Yourself In This Picture...

If you're interested in a rapidly growing and increasingly dynamic profession, dental hygiene may be the field for you. Service to mankind is the goal of health professions, and the dental hygienist with a bachelor of science degree may accomplish this goal through a variety of challenging professional opportunities. Dental hygienists are distinct members of the dental health team, working closely with dentists, the only ones licensed to provide direct patient services.

The University of Missouri-Kansas City provides an avenue for you to become a licensed dental hygienist. The program prepares you to perform professionally in private dental offices or to hold responsible positions in community health program planning, institutionalized patient care, or research.

The Department of Dental Hygiene is part of the UMKC School of Dentistry located on "Hospital Hill" adjacent to the UMKC Schools of Medicine and Nursing, Kansas City Veterans Administration Medical Center, Children's Mercy Hospital, and Western Missouri Mental Health. The integrated educational opportunities are challenging and the rewards for a dental hygienist with a baccalaureate degree are plentiful.

If you want more information on dental hygiene as a profession and the Bachelor of Science Degree Program in Dental Hygiene at UMKC, please complete the following and return to:

Office of Dental Hygiene, School of Dentistry University of Missouri-Kansas City 650 E. 25th St. Kansas City, MO 64108-2796 Telephone (816) 234-0474

Please send me additional information on dental hygiene at UMKC.

Hockey club seeks respect, partial financing

Jim Gouledn

The UMSL hockey team continues to struggle both on the ice and financially. The club, which has been without a full-time coach since last season, has struggled with finances and has had to rely on student-athletes for support. The team has had to pay for its own ice time and equipment, which has put a strain on the program.

Netsmen fall in tournament

Kurt Jacob

The UMSL volleyball team opened its season with a loss against the University of Southern Mississippi. The team was outplayed in all phases of the game, giving up a total of 86 points to the Golden Eagles. It was a disappointing start to the season for the Netsmen, who had high hopes for a strong performance.

Swimmers open with win

Barb DePalma

The UMSL swim team opened its season with a victory against Saint Louis University. The team scored a total of 152 points, compared to 147 for the Billikens. It was a strong start to the season for the Swimmers, who hope to continue their winning ways.
Inexperience plagues Larson, women cagers

Glenn Bourbon

"The attitude is better this year," assistant coach Sandy Moriarty said, after assessing the most recent edition of the Riverwomen basketball squad. And she is hoping this change in attitude, along with some hard work, will pay large dividends in the win column this year for the women cagers.

The UMSL women's basketball team opens its 1983-84 campaign Saturday against Culver-Stockton College, at home in a 7 p.m. contest. The game is billed as a tough opener for the Riverwomen after they squeaked by Culver-Stockton in last year's opener by only four points.

Add to that the fact that the women are returning just three lettermen from last year's team, and just one red-shirted freshman.

Coach Mike Larson, realizing the number of young players and their lack of experience, has been, "working on their fundamentals.

Two returning seniors, Deb Skerik and Kandy Cassady, are expected to provide what little experience the Riverwomen will have this season.

Last season, Skerik hit on 40 percent of her free goal attempts, 69 percent of her free throws and averaged 9.1 points per game. She also led the team in assists with 82 and contributed 40 steals.

Cassady, a 5-foot-11 forward and another of the tri-captains, has been an all-around player for the Riverwomen.

"She is very quick," Larson said. "She has the ability to play inside or outside and possesses a good corner shot.

Cassady hit 43 percent of the floor in 1982-83 and shot 43 percent from the line. She averaged 7.8 points per game.

Larson feels Skerik and Cassady will be the backbone of this year's team. And right now, Skerik and Cassady are the only two with secure starting positions.

To fill in the other three spots, Larson said, is a host of women.

"There are about eight women I'm working with and they will carry the bulk of the load this year."

Two of those mentioned by Larson were Skerik and Cassady. The other six are:

- Marni Schmidt, a 6-foot freshman who Larson has been very pleased with. She led her high school team, Hartley-Melvin, to a fourth-place finish in the Iowa State Tournament and averaged 27 points and 6.5 rebounds per game.

- Ellie Schmink, a 5-foot-7 senior guard, is the third tri-captain of this year's squad.

Schmink is a 70 percent free throw shooter and is eight in UMSL career scoring with 366 points.

- Judy Lisch, a 5-foot-8 forward who averaged 15.5 points per game in her senior year at Belleville West High School hitting 64.9 percent from the field, and she averaged 8.7 rebounds per game.

- Dawn Schuster, a 6-foot junior center, is a transfer from East Central Junior College where she was the starting center for the past two years.

- Tracy Thompson, a 5-foot-7 junior guard, is a transfer from St. Louis Community College at Forest Park where last year she averaged 15.3 points and 5 steals per game.

- Gina Gregory, a 5-foot-9 sophomore, was redshirted last season due to injury. In her senior year at Montgomery High School she averaged 20.8 points a game and 10.1 rebounds.

These eight women are expected to add the speed and hustle Larson is looking for this year.

Also joining this year's team are Janice Curtis, a 5-foot-7 freshman guard. Chris Mackey, a 5-foot-7 freshman guard, Paula Toczykowski, a 5-foot-10 freshman forward, Chris Bira, a 5-foot-10 freshman forward, and Maggie Komel, a 5-foot-7 junior guard.

"This year's team's goal is to finish fourth in the Missouri Intercollegiate Athletic Association, and to make the playoffs," Larson said. "Even third is reasonable."

With his outlook, Larson shuns the coach's preseason pick of UMSL finishing 10th.

Another note on this year is that the '83 edition of the Riverwomen is the shortest in the league, but the Riverwomen feel team speed will help overcome the handicap.

Larson is aided this season by three assistant coaches, Cathy Lewis, Sandy Moriarty and Lawrence Clossum.

It is Larson's hope they will help build the team, and that the students turn out to back the team this season.

Larson's pick's hits mark

Daniel A. Kimack

sports editor

Coach Mike Larson doesn't relish in predictions, but when he predicted a third- or fourth-place finish for his basketball Riverwomen, he wasn't speaking alone.

In early November, coaches from all seven teams in the Missouri Intercollegiate Athletic Association — Central Missouri State University, Northwest Missouri State University, Southeast Missouri State University, Northeast Missouri State University, the University of Missouri-St. Louis, Lincoln College, and the University of Missouri-Rolla — pooled their thoughts on the upcoming season to foresee the future of the 1983-84 season.

And what they came up with, not surprising to Larson, was a fifth-place finish. Not exactly third or fourth, but close enough.

Points were awarded on a 7-6-5-4-3-2-1 basis, from a first place pick to a last place pick.

Central Missouri won over all MIAA coaches and gained 49 points and is expected to finish first this season. Second with 37 points in Northwest, which received two second-place picks and five third-place picks.

Just behind is Southeast who gained 36 points. But don't put too much stock on this one. Southeast had five second-place votes, one third-place vote, and a last place pick by an MIAA head mentor who wished to remain anonymous.

Northeast (23 points), UMSL (22 points), and Lincoln (21 points) all bunched up together. UMSL was picked to finish fourth by two coaches, fifth by three others and sixth by the remaining coach.

Rolla fills the bottom rung, winning only eight points. And only one vote (for sixth place) kept it from finishing with one less point.

Rivermen finish fourth in coaches poll

Daniel A. Kimack

Appropriately, Coach Rich Meckfessel didn’t raise too many eyebrows in the Missouri Intercollegiate Athletic Association playoffs last season, knowing that this team needs to be more than just an improvement over his first season. Not only is the MIAA predicted strong this season (six of the seven teams return all or more starters), but the overall UMSL squad is stronger. The Rivermen will compete against four Division I teams — University of South Carolina, University of North Carolina-Charlotte, the University of Mississippi, and Saint Louis University.

"With the tougher schedule," Meckfessel said, "we need to be much better than last year. We’re hoping we can learn from the Division I schools."

Meckfessel will look to four returning starters from the ’82-’83 team to bolster the handful of other returners and transfers. Carlos Smith, a 5-foot-8 senior guard, will return as last season’s leading scorer (459 points), leading assist man (85) and leading ball handler (50). Smith is billed as a likely All-American candidate if he keeps improving, Meckfessel said.

"Smith can do it all," Meckfessel boasted. "He had a good year last season, but it wasn’t an All-America year. If he improves again this year, we’ll push him for the honors.

"If Smith has any weakness," Meckfessel added, "it’s his outside shooting. He can score, handle the ball and play good defense."

Unfortunately for the Rivermen, Smith will be unable to answer the bell when they kick off their season this Saturday night against the University of Missouri-Kansas City. Smith reinjured a hamstring pull last week and isn’t expected back until the Rivermen travel to South Carolina for a pair of games after Thanksgiving break.

Three other starters from last year will be in the starting line-up, though. Ron Porter, a 6-foot-4 sophomore, will start at one for­ward position, alongside of Kurt Jacob, a 6-foot-5 junior forward who was a key time returner in ‘82-’83. Last year’s other two starters, 6-foot-4 center Kurt Berg, and 6-foot-2 forward Vic Jordan are "unsung heroes who do the dirty work," Meckfessel said.

Jordan will team up with Bob McCormack, a 6-foot-7 guard, this season in the backcourt. McCormack will split time with 6-foot senior guard Frank Cusumano, depending on the defense, Meckfessel said.

The starting five for the River­men’s opener will be Porter, Jacob, Berg, Jordan and McCormack, but when Smith is healthy, he will take over for McCormack.

Porter and Berg are expected to control the boards for the Rivermen, but rebounding isn’t an UMSL strong point. Meckfessel said.

"We don’t have a really domi­nating rebounder," he said. "All five of our players will have to do the job. Rebounding is one of our two major weaknesses.

"Last year we were out-reboun­ded by two or three a game."

Meckfessel added. "And we lost three or four games by two points because of those two or so rebounds. It’s something we’ll have to live with.

Meckfessel said the other weak­ness glaring the Rivermen this year is the defense. He said the defense wasn’t too bad, but it’s not as strong as last year’s.

"Last year we had a better defense than offense," Meckfessel offered. "This season it’s the other way around.

Jacobs is expected to provide UMSL’s scoring punch in the ’83-’84 campaign, along with Smith and McCormack, both of whom have new coaches from the outside, Meckfessel said.

Cusumano will do what he can to work into the offensive plans of Meckfessel seeing time against man-to-man defenses, and Ted Meier, a 6­foot-7 junior forward who transferred from St. Louis Com­munity College at Florissant Valley is next in line.

"We have a good bench," Meckfessel said. "We can play eight to nine people and we might have 7-8-9 men’s opener will be Porter, Jacob, Berg, Jordan and McCormack, but when Smith is healthy, he will take over for McCormack.

Porter and Berg are expected to control the boards for the Rivermen, but rebounding isn’t an UMSL strong point. Meckfessel said.

"We don’t have a really domi­nating rebounder," he said. "All five of our players will have to do the job. Rebounding is one of our two major weaknesses.

"Last year we were out-reboun­ded by two or three a game."

Meckfessel added. "And we lost three or four games by two points because of those two or so rebounds. It’s something we’ll have to live with.

"We have a good bench," Meckfessel said. "We can play eight or nine people and we might have 7-8-9
Swimming

The fall squad consists of six new swimmers and five returners. Three of the returners are seniors — Mike Cole, Huter and Chilwood. Fowler said that because these three experienced winners will be graduating soon, the need is present for the team to build. However, Fowler is optimistic at this point that the team will have a good season.

In order to increase interest in swimming at UMSL, Fowler said more emphasis needs to be put on the program. "We have a wonderful facility — one of the best in the area," he said. "We also have a good location to draw from."

"It's nice to go out and win the first meet easily," Fowler added. "We just outclassed this team. With this meet we have half as many wins as we had last year."

The team takes its 1-0 record into this weekend. It will also face its other swimming rival, Saint Louis University, next Wednesday.

from page 9

because they have one of the best high school swim teams in the state.

Another area in which Fowler is looking for more help is in diving. He said this semester's team is weak in spring diving. "We gave up 10 points in diving in this meet," he said. "However, that didn't matter because we were so far above this team."

But the lack of diving skill will weigh heavily on the UMSL swimmers this weekend as they go to Iowa for a relay meet. Fowler said there are two diving events in the meet that UMSL will have to forfeit.

"Relay meets are tough," he said. "It is going to be hard to bring home a first or second place. It is going to be awfully hard without divers. Our diving coach, Ken Hudson, knows that he is doing. We just need someone for him to work with.

Hockey

Starr has done his homework. He has kept the receipts for all the bills he has paid to the board that this is a serious club and that it is willing to pay the bills and support whatever bill that help would be appreciated.

So the problems continue for the UMSL hockey team. The club's record now stands at 4-5, and it is still having problems getting a full team at its games.

"We can still win, we just have to get it going," Starr said. So, as the team takes off a few weeks until Nov. 30, it will try to reorganize and get back on the right track. Starr also hopes that they will receive some help from the university in defraying some of their mounting bills.

from page 9

Jeff Kuchno sports columnist

It seems like just yesterday that the UMSL women's hockey team was easy the most dominant team in the area. Now the team is the area's only one. The team will be one of the strongest in the area. As the team takes off a few weeks until Nov. 30, it will try to reorganize and get back on the right track. Starr also hopes that they will receive some help from the university in defraying some of their mounting bills.
