Sharon Kubetzky editor

The stakes were high: the losers would buy drinks for the winners.

Not the winners of the election, mind you. There were several candi­dates waiting anxiously in the University Center Tuesday evening to hear the results of the student elections.

The goal was to maintain an envelope awaiting the final word.

Greg Barnes didn’t win this year’s poll, but he probably didn’t mind losing, the bigger prize: he was elected Student Association president for the year. Barbara Willis, this year’s pre­ident, was runner-up.

While acknowledging that the peace movement in the Midwest German bases.

More election results may be found on page 6.

Two referenda were on the ballot as well. The first, which asked for a 34 percent increase in student activities fees, was de­feated by a vote of 535 against, 136 for. The second referendum requested that the constitution of the University Program Board become an article in the Student Association’s constitution. This referenda passed, with 450 yes and 176 no votes.

In the race for assembly seats, many representatives were elected by write-in campaigns. In both the Arts and Sciences division, 17 candidates vied for seven spots. Elected in that division were: Berlyak (Students for Action), Donald Law­rence, Brenda Barron, Dwayne Ward, Steven Robinson, Cynthia Anderson and Tim Tolley.

In the Nursing division, Willa Holmes defeated Janice Langston by one vote, 6 to 5, for the one seat open.

Complete election results may be found at left and on page 6.

Says West German peace movement prospects

Heidi Berlyak reporter

The West German peace move­ment is alive and well and continues to grow. That is the message Dr. Josef Leinen, a spokesperson for the movement, who was delivered to UMSL students and faculty attendees to a series of lectures on campus this past week.

Leinen, a member of the German Social Democratic Par­ty (SDP), is presently serving on a six-person committee which coordinates demonstra­tions and other activities in a nationwide movement.

“This peace movement is not a fringe element but part of a funda­mental debate,” he said. The debate there, as in the U.S., is how to best meet national sec­urity needs, while dealing with the threat of a devastating nuclear war. But the German debate, he added, is much more intense than the one in the U.S.

Our young people have a much darker outlook than Amer­i­can youth. They have little hope for the future of their hard, thin, light­weight clothing. They are even more concerned about how uncomfortable we will be with this arm race going faster and faster. We are in the middle of . . . East-West tensions.”

Dr. Leinen is quick to point out that this fear and desire for a peaceful solution are not limited to young adults. “We are a broad­based coalition, which includes the Protestant church, women’s rights groups and the SDP among others.” He added that a large number of professors, lawyers, judges, clergymen, and even military officers support their efforts to stop deployment of more nuclear weapons to West German bases.

“More than 1. 5 million people attended demonstrations against the Pershing II and cruise mis­siles last October and Novem­ber,” he said.

While acknowledging that the protests failed to stop deploym­ent of the missiles, Dr. Leinen emphasized that preventing deployment is only a short­range goal.

Goals in the future years include a nuclear freeze and the creation of a make-free and tank­free zone along the East-West German border. The ultimate goal of the movement, he explained, is to establish a new Euro­pean Peace Order in which a collective security arrangement between the East and West blocs would bring cooperation instead of confrontation.

Dr. Leinen admits that goal is a long way off. Presently the move­ment is regrouping for its next objective, “a nuclear freeze.”

“We have to reflect on where we are now. The same level of interest is there as in November. Now we need to build new mo­mentum for the freeze idea.”

In addition to seeking support of the U.S. movement, the German peace organization is turning its efforts to the Euro­pean Parliament. They have planned a self-organized refer­endum for June 17 at which they hope to present the Parliament with petitions signed by millions of Germans for a nuclear freeze.”

“Our message is to freeze it. Stop it. To be able to blow the world up 14 times over is enough.”

Nance named special assistant

Everette Nance has been named special assis­tant to the chancellor for Uni­versity/School Relations at UMSL. He will retain his duties as director of the Midwest Com­munity Education Development Center and associate professor of education at UMSL. The appointment was announced re­cently by Chancellor Arnold B. Grobman.

“Dr. Nance will serve as a liaison between the university and public and private schools in the St. Louis community,” said Grobman. “We hope to establish better relationships between the university and the metropolitan community to improve the edu­cational climate for our young people.”

He added that plans are already in progress to participate in the improvement of in-service training for science and math teachers, and to help prepare teachers for high demand dis­ciplines. Part of Nance’s respon­sibilities will include cooper­ating with existing and developing groups such as the Teachers’ Center, the Technology Center, and the Educational Opportunity Centers.

“Through this appointment,” Grobman said, “I hope UMSL can be of maximum service to the area’s schools. Dr. Nance will be working not only with teachers and administrators of local schools but also with faculty members on other college and university campuses as well as with business and community leaders. I regard this as a cooper­ative effort to assist our schools, and I hope the university will serve as a catalyst under Dr. Nance’s leadership.”

Nance became the director of the University of Missouri’s Mid­west Center for Community Education Development in 1972. The center organizes and pro­motcs the community education concept in Missouri, in addition to training teachers and resi­dents to work in community school programs. From 1976 to 1977 Nance took a leave of absence to serve as director of the Citizen
COLUMBIA, S.C. (CPS) — In a settlement that could help slow down colleges' new practice of imposing mid-year tuition hikes and surcharges, the University of South Carolina has agreed to repay the extra tuition it charged 16 of its med students in 1981.

Each of the students will get back their $235 surcharges.

The students had claimed the surcharge had amounted to a retroactive tuition increase that breached their enrollment contracts.

A state court had agreed with the students last October, but South Carolina had appealed the decision.

In late March, lawyers for all parties agreed to drop the appeal. Under the settlement, South Carolina will repay the students and promised not to make any more retroactive increases, reported Paul Ward, the university's chief lawyer.

He recalled that the state legislature belatedly had limited the med school's 1981 budget after the catalog, which listed tuition for the term as $790, had been printed.

To get enough money to operate, the med school had to charge each student an extra $215.

"It was a very unusual set of circumstances," Ward said, "and I'm not sure they would occur in any other state."

Others disagree.

Colleges' legal right to impose mid-year hikes and surcharges "depends really on how the enrollment contract is worded," said Estelle Fishbein, lawyer at Johns Hopkins University and past president of the National Association of College and University Attorneys.

"I imagine that (settlement) will cause a few people to think" before raising tuition in mid-year, said Darel Semler of the National Organization of Legal Problems in Education (NOLPE) in Topexa, Kan.

"Students and institutions in a contractual relationship," added Don Gehring, a NOLPE officer who is also a professor of higher education at the University of Louisville.

"Terms are set up in the catalog. The courts say both sides have to play by the rules. Once (students) register and pay tuition," the college can't alter the contract.

Bob Ross, attorney for the University of Missouri system, said "most of the catalogs say tuition is 'subject to change' or something to that effect," and would that the schools impose surcharges.

Missouri, caught in a budget squeeze, recently imposed a tuition surcharge on its students, but then rescinded it after Gov. Kit Bond released additional funds for state colleges.

"I think you'd have to say more than that (tuition is 'subject to change')." Fishbein opined.

Bombarded by the lawyers contacted for this article were ready to say the South Carolina settlement will profoundly affect the abilities of campuses to impose unplanned tuition increases on their students.

"I just don't know of another institution (besides South Carolina) that's applied a surcharge," Gehring explained.

There have been many, although the pace has slowed this academic year.

Starting in 1981-82, colleges caught in budget crunches caused by the "tax revolts" of earlier years, federal funding cuts and the recession -- began imposing mid-year surcharges and hikes in increasing numbers.

Since then, Arizona, Alabama, the California State University system, Oregon State, Wisconsin, New Hampshire, Lowell, and Nankato State, among others, have forced their students to pay more than the amounts listed in their catalogs.

And Gannon College in Pennsylvania has just adopted a guaranteed tuition plan that promises freshmen their charges will stay the same for four years.

"But the court did not rule surcharges are illegal," South Carolina's Ward stressed. "It doesn't affect the ability of schools to alter tuition and fees. They just can't alter them retroactively."

Students wishing to purchase used textbooks, phone number and selling price for the book. When the book is purchased, Beta Alpha Psi will determine the purchase price and the rest of the money will be paid to the student.

Two UMSL students are winners of the annual Writing Award Competition. The awards are given for outstanding writing by an UMSL undergraduate on a subject concerning women.

Chase won for her paper "Little Women: A Utopia," in the category of non-fiction essay. She is a returning first-year student who has a specialty in English and philosophy. She is a candidate in the Women's Studies Certificate Program.

Young received the award for creative writing for her short story "Bumping into Margaret." She is a graduating senior majoring in English.

The women will be presented $50 each at a Women's Studies gathering on April 30.

UMSL among many schools returning fees, surcharges

UMSL among many schools returning fees, surcharges

SUSAN HALL BANNON, assistant professor of education, and Donald Dennis Lisenby, assistant professor of psychology, have been named this year's winners of the Amoco Outstanding Teaching awards. The two will be honored at a dinner in May.

Lisenby joined the psychology faculty at UMSL in 1965. He received his Ph.D. from Washington University and a bachelor's degree from the University of Illinois. In 1982, he was named associate chairperson of the psychology department and director of the Undergraduate program in psychology.

A committee of UMSL students and faculty selected the winners in a campuswide competition. The nominees were evaluated on the basis of classroom teaching, advising and assisting students outside the classroom, creative and innovative teaching methods, interest in the future education and careers of their students, and other personal and professional qualities.
A STUDY IN SPRING: UMSL sophomore Sheri Harmon takes a break outside the Thomas Jefferson Library on one of the first nice days in April.

Budget hearings scheduled

University of Missouri President James C. Olson and members of his staff will hold public hearings on the 1985-86 proposed budget requests for UMSL on Tuesday, May 1. The hearings are scheduled from 1 to 3 p.m. in Room 126 of the J.C. Penney Building.

The hearings are designed to give students, faculty, staff and the general public an opportunity to discuss the appropriations requests submitted by the UMSL campus. This will be one of four hearings scheduled on each of the University of Missouri campuses. Following the hearings, President Olson and his staff, in consultation with the campus chancellors, will prepare a total recommended request for consideration by the UM System Board of Curators later this summer. The total request, as approved by the curators, will then be sent to the state by October 1, in accordance with state law.

Sharon Kubatsky
editor
UMSL PAC wants you.

The recently-formed political action committee is seeking donations of time and money — but mostly time — from students. “A half hour or an hour a month can make a big difference,” said Linda Tate, area representative for the PAC. “We need students to research voting records, to address envelopes — there are all kinds of things people can do.”

The committee was formed in March with members of the faculty, staff and student UMSL populations participating. Tate has been spending much time of late canvassing student organizations to increase awareness of UMSL PAC and to encourage students to participate. In her presentation, she stressed the fact that UMSL PAC is not a lobbying organization. “We won’t go to Jefferson City to lobby for particular bills,” she explained. “We will donate money to the campaigns of candidates whom we feel will help support the university.”

Tate said she thinks the UMSL community can have a great impact on the Missouri legislators.

“I think it can make all the difference in the world,” she said. “One problem has been that we’ve never been organized — we’ve had to take whatever the state government dished out to us. I think once students show that they’re interested in the quality of the education, the legislators will respond.”

There are certain areas in which the PAC’s influence could directly benefit UMSL, according to Tate. She said that each year the university’s budget goes before the legislators. The state government approves bonds for the construction of buildings such as the proposed science building. And other issues, such as a student curator and tax reform bills, are also decided by the state legislators and could have a great impact on UMSL’s future.

Added Tate, “As a student and a teacher, I’ve heard a lot of people say a lot of negative things about UMSL. It really irritates me that they’re not doing anything to change it.”

Tate said the PAC will concentrate on soliciting donations of money from faculty, administrators and alumni of the university. So far, she said, the response has been excellent. “All across campus, people are really supporting it,” she said.

Tate said two events are currently planned to inform members of the UMSL community about the group’s possibilities. A rally is in the planning stages, tentatively set for early next fall.

Tate said members of the PAC hope to bring in two state legislators to speak with students at the Beachside Inn on May 17, and the Director of Concern held two years ago at UMSL. And an informational meeting will be held this Wednesday, May 5, 10 a.m. to noon in Room 266 University Center.

This meeting is in answer to questions from students and to encourage students to donate time to the PAC.

Tate encourages students to become involved in UMSL PAC. “UMSL is getting at the real root of the problem,” she said. “If we can get organized across the state and show them what business, PAC can make a difference.”

Business students honored recently

Outstanding UMSL business students were recognized at the Fourteenth Annual Honors Banquet held April 15 at the Brockenridge Conference Hotel. The banquet was sponsored by the School of Business Administration.

The Outstanding Student Citation-Delta Sigma Pi Scholarship Key was awarded to Carol J. McDowell. This award is presented to an outstanding business senior who has the highest academic record. Two UMSL business faculty members were inducted into the Beta Gamma Sigma fraternity, a national honorary society. The recipients were Albert P. Anness, professor of accounting, and Dik Twedd, professor of marketing. Two honorary members were also inducted into Beta Gamma Sigma. They were John R. Jordan from Price Waterhouse, and Mark V. Vertor of the St. Louis Business Journal. This is the first year the 153rd Charter of Beta Gamma Sigma has inducted faculty members.

In addition to these awards, honors were given to junior and senior business students in the areas of accounting, management, banking, marketing, management information systems, and finance. These students were recognized through the presentation of awards and scholarships.

Graduate women's studies specialization in the M.A. in philosophy

- Earn credentials in both philosophy and Women's Studies in a one-year program
- Assist in faculty to teach both subjects
- Engage in independent feminist research

Claims abortion is not a closed issue in America

Dear Editor:

Denise Robinson expressed her astonishment because she thought the abortion issue was a closed one. Well, there it is. It is not. This is a claim that between 5,000 to 10,000 women died each year from illegal abortions. That claim is not true. Dr. Norman Nathan, chairman of the National Abortion Rights Action League, he and other members of Planned Parenthood made up the article to convince the public about their beliefs. The truth is that the number of women who died from illegal abortions averaged about 46 a year. The number of women who have died from legal abortions, have averaged about 772 years. There are some other interesting figures. Of the women who have had legal abortions two to five percent have suffered from infection of cervix, is to one percent received perforation of the uterus. Of later complications of women having legal abortions is five percent to receive immediate sterilization, and five percent have tubal pregnancies.

About the abused and battered child, children have risen 90 percent since abortion was legalized. This figure was determined after taking into account "the new sensitivity and awareness of the public, to the problem of child abuse. Experts have found that 50 percent of all abused children are in homes that want the child. Experts have also said that before abortion was legalized, the overwhelming majority of unwanted babies were put up for adoption. The majority of these children does not suffer child abuse. As far as her individual case about the abused and battered girls, I have three questions for Denise Robinson. Number No. 1, she said that she has known the girl since her birth, but did Denise know the "mentally unstable mother" before the 17-year-old father got her pregnant? Number No. 2, did this unstable mother during her pregnancy, ever tell Denise if she could give birth under legal abortion? Number No. 3, can Robinson give the 100 percent guarantee that if the present day abortion laws had existed back then, that girl would not have been brought into the world. Denise, I would like to answer these questions. Denise Robinson will remember that when she writes her next letter.

Sincerely,

Martin Havey

Protests fee increase

Dear Editor:

I would like to register my protest against an increase in the student activity fees. As an evening college student with a full-time job, I am not able to attend events sponsored by student groups as most of them are held during the day. Most activities at night are also unavailable to me because they conflict with my class schedule.

I feel it is unfair to raise this fee for evening college students. As most of them do not derive any benefit from the expenses. I feel it would be more appropriate to raise the fees for day students only and not evening students. A reduced fee is all.

Diana Lynn Howarth Snider

Students should donate time to PAC

UMSL students are being asked for probably the one thing that is most precious to them now, time. The newly formed UMSL PAC, the political action committee organized by faculty, students and staff here, is asking students to donate a half hour each month to raise funds for UMSL PAC. UMSL PAC is not a lobbying organization but a group dedicated to supporting candidates who support UMSL's needs. On a recent trip to Jefferson City, UMSL students found legislators supportive of their interests. But the visit was just the beginning to listen to the students ideas. Not enough effort has been made to reach out to the legislators and inform them of our situation. And this is where UMSL PAC comes in.

By supporting only candidates with an enthusiastic interest in higher education, UMSL can show legislators we are serious in our request for a better education.

Not only do they have to provide UMSL's fiscal allotment, they vote on important issues like the state constitution and every abortion clinic has ever been a closed issue until the Human Right to Life movement. I have news for it. The Constitution and every abortion clinic has ever been a closed issue until the Human Right to Life movement.

If each UMSL student could devote just an hour each month to this worthy cause, the state legislature would be hit by such an avalanche of information and support increased in UMSL that the consequences could be phenomenal.

UMSL students would not only benefit through the improvements to the university, but personally as well. A student researching voting records will become a better informed about the state government and about UMSL. Valuable contacts and friendships could be made.

And students who could gain a sense of pride and responsibility toward UMSL. It is every student's responsibility to protect UMSL's future and thereby the future of every UMSL student.

Denise Robinson will remember that when she writes her next letter.

Sincerely,

Denise Robinson
Criticizes unfair trade practices in economy

Dear Editor:

Rand and Friedman do not have such an excuse. The nature of economies has changed drastically since then, with a major shift from land- and labor-intensive industries to predominantly capital-intensive ones. A new, cheap land, and which emphasizes manufacturing, not agriculture, the properties of capital are all important. It can be used efficiently to create wealth, but it can also be exploited ruthlessly and counter-productively.

A free-market/free-for-all, a heavily-capitalized business can kill smaller (but otherwise superior) competitors. By selling at a loss, temporarily overbuying to drive prices out of the market. That's something to worry about.

Similarly, large businesses can actively enter those markets and compound its vulnerability. Capitalized business can kill smaller (but otherwise superior) competitors. The alleged self-regulating nature of a market economy breaks down in other critical ways. It has historically been said that changes in automation have increased the work load. Historically, there is some truth to this, though some are displaced. In productivity have propelled the capital for new ventures which re-employ the workers, with a net increase in jobs. The result will in a growing number of permanent unemployed and unemployable people. A market economy makes no provision for labor. (Read: "Micromec­
tronics and Society.")

The result will be an unprecedented combination of "healthy" economic growth and high unemployment. Supply-side economics will cease to work. The activity generates capital gains which flow to the major purchaser taking its business elsewhere, where is enough to force a supplier not to sell to the opposition.

There are only a couple of the advantages of conditions. In small enterprises. Obviously, when the size of a business becomes significant in relation to the size of its market, it can manipulate those markets and compose its advertising. This causes qualitative changes in the laws of supply and demand, unforeseen by Adam Smith, and no valid economic theory can tolerate.

Rand and Friedman may tell you that the laws of supply and demand are the same, or nearly the same, for everyone, and not just the owner of a business. They are the same, but sometimes arbitrarily cheap. Without it, though, the price of a commodity is essential to the study of a certain work of art, and the collection was in need of a more organized labeling system. Her duties included copy photography, marking, mounting, cataloging and filing of slides, with the slide curator for the art department, which she received well and handled responsibly by Nancy Eckert. Her duties were checked to insure correct labeling and filing system. Her duties included copy photography, marking, mounting, cataloging and filing of slides, with the slide curator for the art department.

I am writing to you to pay homage to a member of the art department who is leaving us to accept a position at a different university. May all our UMSL students know Nancy Folksy--she's never taught huge lecture courses, but for a curator she can take on the workload of restoring the precie. May all our students know Nancy Folksy--she's never taught huge lecture courses, but for a curator she can take on the workload of restoring the precious art works, the art works of the art department.

In order for her to make satisfying prog­

ess, we need to continue our efforts.

Suggests support of beer

Dear Editor:

UML's "Comedy Improv" was the closest he has ever experienced to a real night club atmosphere at a college. If students like the idea of having a reasonable amount of alcohol, thereby visiting the university. They should be encouraged to visit the University of Student Affairs, 301 Woods Hall. With the success at the last "Comedy Improv," any number of students who attended the event that UMSL students would like some alcohol at some university activities. Ken Eckert University Program Board member

creed quality continued with improvements in equipment and the revamping of the filing system. Our collection now contains almost 75 thousand slides. Newer, high quality slides have replaced many damaged and faded ones. A large number of the slides students have seen in Introduction to Art (15), Art 235, Classical Art and Archaeology of Greece and Rome (215), Baroque Art (245), and Photography in Society (246) were slides that Nancy repaired, categorized more efficiently or brought into the collection by working with the faculty's needs. Her successor will find UMSL's slide library a well-organized resource with a broad scope of topics ranging from art techniques to ancient Japanese paintings.

I've worked as a student assistant in the art department for 21 years; most of that time was spent working closely with Nancy. I feel my time with her at UMSL has been some of the best I've spent here. She deserves a first class roasting (call Dean!) and many thanks for the improvements she's made in this valuable and often unrecognized visual resource. I'll always appreciate her sense of humor, her reliability, her penchant for organizing field trips, her approachability, her lively attitude, her active role in art appreciation, her tact in difficult situations, her way of feeling wonderful about growing older, her love of golf and week-end trips, her way of always looking for something new, her jokes... the list is endless.

Sincerely,

Rachel Park Applegate

Visual Symposium

The UMSL School of Optometry will sponsor a three-day symposium on "Human Visual Development and its Clinical Evaluation." May 16-18 in the J.C. Penney Building, 8001 National Bridge Road. Keynote addresses will be given on Thursday from 2 to 5 p.m. by top experts in the field: Richard Held from the Massachusetts Institute of Technology, Merton Flom from the University of Houston, and Colin Blakemore from Oxford University, (England).

Richard Held, professor of psychology at M.I.T., researches visual processes, focusing on the study of sensory-motor coordination. He holds a Ph.D. from Harvard University. Merton Flom, professor of optometry at the University of Houston, is an expert in physiological optics, binocular vision and space perception. He holds an O.D. and Ph.D. from the University of California, Berkeley. Colin Blake more's research considers the neurophysiology of visual development. He holds a Ph.D. from the University of California, Berkeley and is currently Way_ttl Professor of Physiology at Oxford University.

Registration for the symposium is $40 for standard registration and $35 for student registration. Participants may receive optometric continuing education certification for an additional fee of $50.

For more information, call UMSL Continuing Education-Extension, 555-5961.

around UMSL  april/may

**Friday, April 27**

- The UMSL Opera Workshop will present W.A. Mozart's "Don Giovanni" in English at 8 p.m. in the Benton Hall Theatre, Room 105. Tickets are $4 for general admission and $2 for students, seniors, and children. For more information, call 553-5980 or 553-5992.

- The University Program Film Series presents "The Big Chill," a story about college classmates reunited at the funeral of one of their friends. The screening will be at 7:30 and 10 p.m. in Room 101 Stadler Hall. The star-filled cast includes St. Louis's Kevin Kline, Glenn Close, Mary Kay Place and William Hurt. Admission is $1 for students and $1.50 for the general public.

**Saturday, April 28**

- As part of the Athletic/Physical Education Wellness Committee's free health talks, "Hearing Health Care" will be discussed by Scott Bashau, a hearing aid specialist, at 10 a.m. in Room 218 Mark Twain. Complimentary invitations for a hearing evaluation at Hearing Aid Associates, 307 Northwest Plaza, will be distributed at the lecture. For more information, call 553-9220.

- The University Program Board continues "The Big Chill" as part of its Film Series. See Friday for more information.

**Sunday, April 29**

- KWMU airs "Creative Aging" every Sunday from 7 to 8 p.m. and "Storytelling: One of the Oldest Means of Human Communication" will be the topic of a special call-in program with Dr. Ronald Turner, the associate dean of Arts and Science, Dr. Stuart Platner, an associate anthropology professor, and Dr. Lawrence Davis, an associate philosophy professor. The speakers, all from UMSL, will discuss the past, present and future of storytelling. Listeners may join in by calling 553-5968.

- The KWMU Student Staff presents "Sunday Magazine," a summary of the week's news events, from 10:30 to 11:30 a.m., and "Sports Spectrum," a review of the week in sports, from 11:30 p.m. to midnight.

**Monday, April 30**

- The UMSL Chapter of the Honor Society of Phi Kappa Phi will formally induct and honor faculty, staff and students at 3 p.m. in Room 101 Stadler Hall. Dr. Garry Hunt, director of the Center for Remote Sensing at Imperial College, London, England, will speak. The primary objective of Phi Kappa Phi is the recognition and encouragement of superior scholar-ship in all fields of study.

- UMSL's University Singers host a high school choral festival from 8 a.m. to 5 p.m. in the J.C. Penney Auditorium. The festival will feature choirs from several St. Louis area schools. For more information, call 553-5990.

**Tuesday, May 1**

- University of Missouri President James C. Olson and members of his staff will hold public hearings on the "1985-86 proposal budget requests" for UMSL from 1 to 3 p.m. in Room 126 J.C. Penney. The hearings are designed to give students, faculty, and the general public an opportunity to discuss the appropriate requests submitted by the UMSL campus.

- Under the direction of John Hilton, the University Chorus will perform "Brahms' German Requiem" with the Kirkwood Symphony Orchestra in a free concert at SL Louis Community College at Meramec at 8:15 p.m. For more information, call 553-5980.

**Wednesday, May 2**

- "Musical Passage," a film about Lazar Gosman and a small group of musicians who abandoned successful careers in the Soviet Union to pursue artistic freedom in the U.S., will make its St. Louis premiere at 8 p.m. at the Tivoli Theater, 6350 Delmar. A reception will be held at 6:45 p.m. Gosman is the musical director of the Kam­margid Chamber Orchestra, UMSL's orchestra-in-residence.

- "The fifth annual Storytelling Festival," sponsored by the UMSL Continental Education-Extension, UMSL's College of Arts and Sciences, the Missouri Committee for the Humanities and the Jefferson Expansion National Memorial will be held at the Gateway Arch through Sunday, May 6. "Stories of the River: The Water of Life" is the theme for the storytelling sessions scheduled from 10 a.m. to 2:45 p.m. each day and from 11 a.m. to 4:45 p.m. on Saturday and Sunday. Admission is free, but groups are required to make reservations by calling 425-6010.

**Thursday, May 3**

- The University Program's Board Comedy Improv at the Summit" will conclude for the semester with "St. Louis Comedy Showcase/UMSL's Top Comedians Final Competition" at 8 p.m. in the University Center Summit lounge. The evening's program will feature performances by the finest selection of St. Louis comedians and the "Improvs" audience will judge the "UMSL Top Comedian Contest." Admission is $1.50 for UMSL students, $3 for UMSL faculty and staff and $4 for the general public. Tickets may be purchased at the University Center Information Desk.

**Friday, May 4**

- The University Program's Board "Comedy Improv at the Summit" will conclude for the semester with "St. Louis Comedy Showcase/UMSL's Top Comedians Final Competition" at 8 p.m. in the University Center Summit lounge. The evening's program will feature performances by the finest selection of St. Louis comedians and the "Improvs" audience will judge the "UMSL Top Comedian Contest." Admission is $1.50 for UMSL students, $3 for UMSL faculty and staff and $4 for the general public. Tickets may be purchased at the University Center Information Desk.

St. Louis Mayor Vincent C. Schoemehl Jr. hopes to lead the city into a high-tech, world-class future.

As a 1971 UMSL graduate, he sees the university's role as crucial to the growth of the area. After all, his UMSL education, he said, has helped him get where he is now.

"I'm third oldest of 11 kids," the mayor said in an interview at his City Hall office downtown. "It took me seven years to graduate, so not only be out of academic lackadaisical attitude, but also because I had to work."

Schoemehl started at UMSL in the summer of 1964, when the campus was still an extension of the University of Missouri.

Schoemehl majored in European history and English literature. "If UMSL had not been there," he said, "I would not have graduated from college. It's that simple. I would not have been able to pursue the career that I have pursued and, frankly, I would not have done as well as I have done."

Schoemehl said that he had wanted to go to law school after graduating, but could not afford the programs at Washington University or Saint Louis University. He said he would like to see UMSL expand into professional fields like this.

"There is no night [law] school in this city, and that's an outrage for a city this size," he said. "There are no courses for graduate degrees in engineering. That's an outrage.

"These things are going to be very important to the city as it grows, if, in fact, we are going to grow in the types of service-related jobs that are important factors in the continued growth of our economy," he said.

Schoemehl said he believes that UMSL has to be able to provide that educational base because Washington University and Saint Louis University won't be able to.

"They have excellent programs in areas that are establishing themselves. But public universities are going to be the universities that provide that additional educational opportunity, that cost-effective for private institutions."

Schoemehl admitted that restrictions in state funding have slowed down the campus's growth.

"We are going to have to re-exam our funding priorities at the state level. I think it's criminally outrageous that the state is putting education in the rural campuses," he said.

"In the beginning, the educational dollars being spent are only 17 percent have any desire to go to graduate school. In short, they don't have the money (read that with a capital 'b') to do it fast."

It was no surprise, then, that the article also referred to a report by the American Council on Education and the University of California-Los Angeles that the nation's new conservative youth?...
Film

from page 9

set, two Neoclassics — at 1 a.m. "The Proud Rebel" (1958) and at 3 a.m. "Up the Down Staircase" (1969).

The diverse and talented Michael Curtiz directs "Up the Down Staircase" which stars Alan Ladd, and has an award-winning supporting cast, including Olivia de Havilland, Dean Jagger and Cecil Kellaway. Curtiz, who died in 1966, directed an enormous variety of films, but is best known for his action-adventures, with swashbuckling Errol Flynn and the 1942 Classic "Casablanca," for which he won an Academy Award.

Alan Ladd, who started in films in 1932, became a very popular everyman through the '40s and early '50s, his strongest roles being as the tough loner of western "Shane." He died in 1964 at age 50.

De Havilland's film career began in 1935 as a contract player for Warner Bros., and most of her early roles were of the pristine, amiable heroine. But in 1939 she was given a meaty role in "Gone With the Wind" and was nominated for an Oscar. More nominations followed in 1941 and 1948, and in 1944 she earned best actress Oscar for "To Each His Own" and for 1949 "For the Heiress." The New York Film Critics chose her as best actress in 1948 and 1949.

Jargow, who evolved into a worthy supporting and character actor, began his film career in 1939, winning an Academy Award as best supporting actor for the Near Classic 1950 war drama, "Twelve O'Clock High." South African born Kellaway, who died in 1973 at age 80, was typically typecast throughout most of his career as a wise and sympathetic soundproof.

A more personal and cinematic career in Australia, he began his Hollywood career in 1937 and was nominated for Academy Awards in 1944 and 1947.

Set in the post Civil War period, "The Proud Rebel" is a Confederate widow (Alan Ladd), who travels to the Midwest to find a doctor who can restore his son's (David Ladd, his real-life younger son) ability to speak, which had been impaired since he witnessed the ravaging of his mother and home during the war. Father and son are taken in by a warm-hearted farm woman (de Havilland) who slowly becomes devoted to the pair. For added drama, a wicked neighbor (Jargow) pulls out all the stops in an attempt to acquire the property of the virtuous Samartian.

Curtiz has managed excellent performances from all concerned and elevated a simple "soaper" into a moving study of growing love, deep emotions and entertaining conflict.

"Up the Down Staircase," written by Ted Mosel, was based on the best seller by Bel Kaufman and directed by Robert Mulligan. It stars Sandy Dennis, Eileen Heckert and Jean Stapleton.

Dennis, who began her film career in 1961, also starred on Broadway, winning two Tony awards in a row and subsequently earned an Oscar for best supporting actress in her second film, "Who's Afraid of Virginia Woolf?" (1966). Her starring role as a novice secondary school teacher in "Up the Down Staircase" is a high spot in her performing career.

Eileen Heckert, another award-winning Broadway actress, started in Hollywood in 1954, winning an Academy Award as best supporting actress in 1972 for "Butterflies Are Free." Better known for her role as Edith Bunker in TV's "All in the Family," Jean Stapleton didn't appear on Broadway until the mid-50s and her first movie was in 1958. Following her TV success, she showed a varied and talented facet for dramatic and light comedy roles.

"Up the Down Staircase" is the intense, personal story of a novie teacher (Dennis) and her students at the large New York City high school. She courageously battles bureaucratic disorder with few resources as well as faces warlike pupils. Dennis is superb, as she shows a rare love and understanding for her unruly charges, using a sense of humor, honest panic and a deep desire to help. Her supporting cast of teachers and pupils also give excellent performances.

Short subjects: Friday, the St. Louis County Library will present "Focus on the 50's," a one-hour color film showing the Korean War period, a divided Vietnam, the Suez crisis and the Hungarian uprising. Closer to home, it will feature the McCarthy era, growth of suburbia, the invention of transistors and color TV, and close the decade with the U.S. being challenged in space by the Soviet Union's Spintnik.

On May 11 it will show "Focus on 1960-1964, The Kennedy Years" and on May 11 — "Focus on 1945-59, The Angry Years." The films can be seen, without charge, at the Thornhill Branch, Fee Fee Road at 12603 Willoway. As this is the last edition of the Current for this semester, I want to wish the upcoming graduates all good fortune and happiness — the first isn't any good without the later. Everyone else, have a Class of the Century this year with the Down — we'll feature — well, safe anyway!

Kamermigel to end Bach season

The Kamermigel Chamber Orchestra will complete its 1983-84 season with an all-Bach program for the final time at 8 p.m. in the J.C. Penney Auditorium.

Reserved seating is $8; unreserved seating is $5. The Kamermigel is orchestra-in-residence at UMSL, and is under the direction of Lazar Gosman. For ticket information, call 535-5991.

The concert will begin with the Brandenburg Concerto No. 2 in F major BWV 1047. The soloists will be Craig Cohen, violin, Kathleen Mattis, viola, and associate viola oboe Barbara Herr; and Lazar Gosman, violin. The program will continue with the Brandenburg Concerto No. 6 in B-flat major, BWV 1051. The soloists Thomas Dunum, principal viola, and associate viola Kathleen Mattis. After intermission the orchestra will perform the Concerto No. 3 in D major for Violin, Strings and Continuo, BWV 1042. Soloist will be violinist Haruka Watanabe, Kamermigel concert manager and librarian. The program will conclude with the Orchestral Suite No. 3 in D major, BWV 1068.

The concert begins with the "Bach Suite" theme chosen for the orchestra this year, an anticipation of the 300th anniversary of the German composer's birth, in 1985. Lazar Gosman is featured in "Memorial Passage," a feature-length documentary film on the life and music of Johann Sebastian Bach, who has established a new artistic career in the United States which will premiere in St. Louis as a benefit for the Kamermigel Orchestra on Thursday, May 3 at the Trivoli Theatre, 6520 Delmar Boulevard. For more information on the film premiere, call 533-5991.

one in June and one in July.

We'll resume our weekly publications in the fall.
Applied psychologist wins award

Linda Belford

Human Factors, a branch of Applied Psychology, deals with the interaction between people and equipment. The increased use of high technology requires that people design such systems with consideration of human capabilities and limitations. For example, how do computer screens look to your eyes? How much information can be displayed without overwhelming your brain? "Many people don't realize there needs to be something that. The equipment can be used or not," said Leslie Whitaker, associate professor at USU's Department of Psychology. Engineers deal with keeping the equipment running, "I know how the operator views the machinery.

As a Human Factors psychologist, Whitaker is constantly coming across people who feel their work is not recognized as performing vital community service, "It is a very visible piece of our society," she said.

On the day she received her doctoral degree, Whitaker explained, "I would love to set up a situation where people make errors.

Since receiving her doctoral degree from Pennsylvania State University in 1975, Whitaker has done research in three areas: underground mines, transportation, and decision making.

She spent the last two summers in about fifteen mines looking at data collection and analysis of workers on trucks, combined with lots of noise and poor visibility make conditions ripe for accidents.

Whitaker has taken groups of graduate students to mines in Southern Illinois and Missouri, where they ride the equipment and speak to miners about work procedures. Her conclusions, based on interviews and analysis of accident reports, are then written into a Technical Report and sent for the mines to study. Unions, and the Bureau of Mines, which, in this case, provided the research funding.

Whitaker stressed the importance of involving graduate students in research. Her research assistant, Carol Shopfark, recently presented findings at the first Mid-Central Human Factors/ Ergonomics Conference in Cincinnati.

Whitaker's work with transportation safety involves making sure road signs are easy to read and in the right places. For example, when you want to go north on I70 coming from west, you have to go in the left lane to make this right turn. Unless you travel this road road before, you wouldn't know to go in the left and not the right lane, and the sign explaining this comes too late.

Whitaker said a student apologized for missing class one day saying she'd gotten smashed from trying to cross too many lanes to get in the left lane on this very highway.

This type of thing, she said, points out the necessity of her work.

Whitaker's most recent research has to do with brain lateralization. When doing brain surgery, it's important to know which hemisphere of the brain controls a person's speech so as not to disturb it. A right-handed person's speech is usually controlled by the left hemisphere, but with left-handed people, it could be either hemisphere. Her concern, then, is to find a non-invasive (non-intrusive) screening test to determine which hemisphere controls speech before doing surgery.

Whitaker said she went into academia instead of industry so she would be free to do whatever she wanted to research. Last year, as a visiting faculty member at the University of Queensland in Australia, she helped set up a Human Factors program in the psychology department.

"Most people," said Whitaker, "major in clinical or counseling psychology, but not me." "Human Factors," she said, "is an applied area of psychology, where people, especially graduate students, can show employers they have training in a specific area.

Whitaker teaches human factors, research methods, statistics, and environmental psychology, a new course added this fall. "I think dealing with how the environment affects people in nonnatural settings is fascinating.

"I'm looking forward to teaching this class," she said, "because I'll get to tell students about mountain climbers, and draw pictures of the equipment they use.

This semester, Whitaker received the Psychology Organization's Professor of the Year Award, given to a member of the psychology faculty in recognition of his or her personal interest and assistance to students. Past recipients Reginald Rohr, Robert Benefield, and John Boswell.

"I've been teaching Whitaker does to keep her profession going is serving on the editorial board of the Journal of Human Factors, in which she previews articles for publication. "I'd like to be exposed to the field, and it also improves my own writing," she said.

F.T.C. prizes. Be there, your friends will be.

AWARD-WINNER: Professor Leslie Whitaker, whose work is in the Human Factors area of Applied Psychology, recently received the Psychology Organization's Professor of the Year Award.

At the University of Queensland, Australia, she helped set up a Human Factors program in the psychology department.

LOOKING A LOT LIKE SPRING:

Although most of the month has been dreary and rainy, many UMSL students are looking forward to bright, sunny days, if the clothes they've been wearing are any indication.

Above: Sophomore business administration majors Dave Zak (left) and Mike Kinnison take a casual, somewhat preppy fashion approach.

Center: Junior education major Jeff Scott prefers the always-popular sporty look.

Right: Student Nicole Plourd wears a comfortable, oversized collarless shirt.

Below Left: Business administration majors Bernard Bector (left), a senior, and Geoff Rey, a sophomore, both choose a more dressy, but still comfortable approach.

Below Right: Music education major David Foote, a junior, chooses a stronger statement. Notice the single glove.
A CERTAIN FLAIR: Above Left: Senior Pat Blassie chooses a strong, casual attitude to head into spring.

Above Right: Sophomore computer science major, Angelia Goston, takes a more traditional spring approach, with a sweater perfect for breezy evenings.

Left: The "Flashdance" look will probably continue well into the summer, as sophomore business administration major Sandi Kieckers demonstrates.

Center: Jeans and a t-shirt, as worn by freshman business administration major Michah Ingram, are, of course, perfect for summer comfort.

Below Left: First-year optometry student Dave Seibel and junior foreign language major Mary Wetzel take a dressy attitude toward spring.

Below Right: First-year optometry student Ron Keeling, meanwhile, takes a more professional approach.

From page 9

In Missouri is that we are putting educated people into jobs where people are not going to stay. "I think we are SMART enough to graduate from the University of Missouri-Rolla; for your benefit. But we aren't SMART enough to stay there," he said.

"What we're doing is that we're bringing people into the state, we're educating them, and they don't stay here."

Schoemehl used the city of Boston as an example of his point. The transformation of Boston, he said, is "from a manufacturing-based economy into a high-tech, high-service, if you will, high-skill economic base. It is traced back very directly to the presence of 54 colleges and universities in the greater Boston area."

"What happens is that people from all over the country, very smart people, get a lot of college in Boston. They like Boston," Schoemehl said, "so they decide to stay there."

"You can't close Columbia," he said. "You can't close Rolla. Nobody will close a university or continue to invest or grow dollars for an area of that size."

One of Schoemehl's goals in his first term as mayor has been to establish and maintain a world-class city. "I think we're making some real strides in that area. The first thing we had to overcome was St. Louis's own lack of self-confidence. We were an awfully self-conscious community," he said.

"Saving the Blues, getting the Admiral back, keeping the Glob-Democrat — those are important things. Here we have a major sports franchise in this community," he said. "That was just going to walk away."

"I told people to be about it. Well, we did it and we were able to put together what it took to keep it there," he said.

"I think people are beginning to say, Wait a minute, we can accomplish things. The Globe was just like that. We did."

"We're in the process of bringing something here to the city that we can support."

Schoemehl was active in the city from the start of his first term as mayor. "I think my education has helped me in my job. I think there are some similarities between Vietnam and Central America, and I have very grave reservations about the war President (Ronald) Reagan has been waging in Central America. What I would suggest is that my perspectives on that foreign policy question have remained fairly consistent."

Schoemehl was elected mayor of St. Louis in 1981, perhaps buoyed by his support for Homer G. Phillips Hospital, which previous Mayor James Conway closed as a cost-saving measure. Schoemehl said he does not believe that the failure of a bond issue to renovate the northside hospital will affect his chances when he runs for re-election next year. Instead, he preferred to emphasize the continued development of the city.

"The physical development of St. Louis is taking form. What I'm going to spend my time doing in the second term, I think, is more infrastructure development." His goals include things like improving international air travel and revitalization of schools to UMSL and Southern Illinois University-Edwardsville, attracting a world-class music school, and maintaining an annual arts festival, he said.

"Schoemehl said during my campaign — I was asked about it several times — that I was a stu­ dent, and I had a foreign policy dispute with President (Richard) Nixon and Henry Kissinger," he said. "As it turns out, I think history was proven right. The point of view was probably a more appropriate one."

Schoemehl described himself as basically a moderate to liberal Democrat, now, as well. "What we were concerned about — while it took on different manifestations on different cam­ puses across the country — was essentially the foreign policy of the United States. We were very opposed to what was going on in South and Asia as many students..."
It wasn’t quite an average summer vacation

Sharon Tannenbaum  
reporter  

I drove in the dark. A smooth ride, no strain, no worries. We all did. They were all mistakes, we did them, that’s why we got the leather boots. We were cursed. I was drawn to theтемпературы  above the horizon, and the only way to fuse as possible. We slept like the dead. Meals were skipped. I was nauseous. Suddenly the green eyeshadow accentuated my eyes. I did what I was told. When someone’s talking to you, don’t stand there. It was clear that I had to be there one hour, two hours, three hours, four hours, five hours. I had to be there. I had to be there, or she was going to die. She died. She was a young sergeant. She was a husky sergeant waving an M-16 over his head. You take care of it, and it’ll take care of you!

“This baby’s your best friend!” said a husky sergeant waving an M-16 over his head. “You take care of it, and it’ll take care of you!”

“When we add up all the points, you three privates come up on top. That means we gotta call you honor graduates and promote you. But in my book, you’re still lazy slimes!”

The lyrics, “I wanna go to Iran. I wanna kill an Iranian!” weren’t the best songs I knew, but the tunes were catchy.

During a command inspection, the major who inspected me took notice of my superlative performance. Instead, she ordered me to hold my hands in front of my head. Delicately, she ran her fingers through my hair.

“Nail polish?” she said. “Disgusting.”

We had classes in modern “sanction” tactics. “Now’vea see this, private! It’s a 10-inch blade you attack the end of your finger with. A bayonet. Only the toughest Marines use them. You won’t even touch one. But I’ll tell you a little about em anyways.”

“You’re to kill. And the only way you can kill with this mother is when you’re a foot away. But you’re shooting, when you can hide your aim in the bushes. You gotta work fast. Go for his vitals: his throat, his belly, or his legs. You gotta get those cultured, start staking him at his face. Once that Gook tastes his blood, he’s done. Smash him with the rifle butt. Slash his arms off, cut his legs with a can opener, drive that blade home! Deep, privates, deep into his belly!”

Our Marine bootcamp, was not a training base; it was a training base. Rich, green vegetation covered the earth. Orange and lavender clouds painted the morning sky. As sweat formed on my body, the cold breeze from the sea soothed my skin. At that moment, I ran through the wall of barbed wire, ran through the ranks of drill instructors, only miles of sandy road with nothing but the Boot Camp.
Counseling offers computerized guidance

Lynee Lacosteol

UMSL is one of the few four-year universities around to offer computerized help for each individual student's career search. Purchased by the Counseling Service in 1983, the System of Interactive Guidance and Information is housed in Room 427 SSB in the area jointly occupied by the Counseling Service and Peer Counseling offices.

With SIG!, students can explore occupational fields. Based upon a value hierarchy set up by the student, SIG! will print out a list of occupations most likely to be satisfactory. Detailed information about preparation for specific careers, rewards and risks, national outlook and answers to other questions frequently asked during a career search can also be obtained on the printout, which is provided for the student to keep.

SIG! is useful in making decisions about a career, SIG! is able to identify compatible occupational fields, while teaching a systematic and logical career planning method.

Operating SIG! is fun, easy and interesting. By responding to the displayed screen, students are guided through stages of planning, depending upon their individual answers to multiple-choice questions. There is plenty of time to reflect carefully before each response, and students are encouraged to calmly move through the program at their own pace.

Based on a value hierarchy set up by the student, SIG! will print out a list of occupations most likely to be satisfactory. Detailed information about preparation for specific careers, rewards and risks, national outlook and answers to other questions frequently asked during a career search can also be obtained on the printout, which is provided for the student to keep.

SIG! is very helpful to students trying to decide on a major, since it can clarify their field of interest. SIG! is designed to explore general career options and will not give one magic answer, but rather a summary of possibilities and options on which the student can follow up. By facilitating each student in locating a promising direction, SIG! is a valuable tool. However, the ultimate choice is left to the responsibility and freedom of the student.

After completing SIG! programs, counselors are available for follow-up interviews. Most students will have gained an enormous amount of information about themselves and about career options and will want to talk with someone knowledgeable. SIG! is also used in conjunction with other career planning tools, such as the Strong-Campbell Interest Inventory, which is also available through a counselor in either the Counseling Service or Peer Counseling. The Career Library is another resource open for further research on specific careers.

SIG! is free to all enrolled UMSL students and is usually available right away. To obtain appointments, call 553-5711 or visit the Counseling and Peer Counseling in Room 427 SSB between 8 a.m. and 5 p.m., Monday through Friday. Usually it takes about four hours to complete the entire SIG! program, so appointments are given out in two-hour blocks. SIG! will confidentially store all information between sessions.

SIG! provides a challenge to think honestly about personal attitudes and values. It is a terrific tool for organizing and sorting through career information. The Counseling Service and Peer Counseling invite all interested students to make use of SIG!.

STARTS FRIDAY April 27th at a theatre near you

An adult nightmare.

From the author of CARRIE, THE SHINING, THE DEAD ZONE, and CHRISTINE...
of women. I found one of the
privates particularly amazing.
Unlike the rest of us, she had
refused to get her hair cut. Every
morning she wasted five valu­
able minutes wrapping it into a
tight bun. During our one-minute
every evening showers, she managed to
wash, rinse, and comb her foot­
long hair. It wasn’t until the
seventh week of training I dis­
covered she also wore contact
lenses.

“They’re no problem at all. I
just sneak into the bathroom a
few minutes before wake-up, and
slip them in. It’s only kinda bad
if sand gets under
them in my
feet,” my bunkie said.

Not all the privates were as
casual as my
bunkie; our drill instructors took no
mercy on the

When that target
hitting the damn
tree! On this first one, I
go for the
head.”

A rusted silhouette popped up
some 200 yards away. I lined up
my sights, held my breath, and
pulled the metal trigger.

A sharp pain bit his head. He
reached up and felt only torn
flesh where his ear once
was.

"You just knocked it, private!
Start thinking! You wanna KILL
that sucker! Now take this next
one in the stomach.”

The second bullet exploded
within his bowels. Jagged metal
severed his intestines as he was
thrown against a tree.

"That’s better, recruit. OK, on
this last one, blast his heart out!”
Before he could seek shelter,
the final bullet slammed into his
chest, ripping a hole through his
lungs. His crumpled body fell to
the ground, painting the earth red.

“Excellent shot, private! We’ll
make a Marine out of you yet!”

I was in the ironing room, press­
ing my uniform for the next day.
I left to refill my iron with water,
and returned to find two privates
standing over my clothes. As I
approached them, they
smiled coldly at me and said,
“Try eating your own food next
time.”

‘Excellent shot,
private! We’ll
make a Marine
out of you yet!’

I looked down at my uniform.
Bleach had been dumped on the
jacket. Already, white streaks
covered the sleeves. There was
no point in reporting the inci­
dent; our drill instructors took no
action. So I paid $45 for another
jacket and learned to keep my
hands to myself.

One evening during the last
month of training, the duty drill
instructor stuck her head out of
the office.

Figerova, Upchurch, Tanners­
baum! Up in the CI hut! A-S-A-
p!

“Damn, what’d I do now?” I
thought as I pulled on my pants
and began lacing my boots. It was
almost “lights out.” Small groups of
girls sat in their pajamas shin­
ing brass, polishing boots, writ­
ing letters home.

“Private Tannenbaum report­
ing as ordered, ma’am.”

“Get in here, Tannenbaum.”
Figerova and Upchurch were
already on line.

“OK, let’s get this over with.
Now all these weeks we been
grading you privates. Every
hourly inspection, every PT test,
every time you all been opening
your traps, we been writing it
down. And when we add up all the
points, you three privates come
up top. That means we gotta
call you honor graduates and pro­
 mote you. But in my book, you’re
still lazy slimes! And you, Tannen­
bau, it says here you ain’t even
registered for A damn reservist?
What the hell you gonna do with
your life!”

“Go to college, ma’am.”

“College? So you think you’re
pretty smart, huh? Well, I don’t
give a damn about your brains.
Let’s just see how good you are on
that rifle range tomorrow. That’s
the real test, ya know. Any fool
can shine boots, but how many of
you got the guts to kill!”

I laid sprawled in my foxhole.
A metal helmet weighed down
my head as I locked my M-16 in
my

It was
my site, and one second to shoot.
And don’t be breathing when ya
fire or you’ll be hitting the damn
tree! On this first one, go for the
head.”

A rusted silhouette popped up
some 200 yards away. I lined up
my sights, held my breath, and
pulled the metal trigger.

A sharp pain bit his head. He
reached up and felt only torn
flesh where his ear had once
been.

"Ya just knocked it, private!
Start thinking! You wanna KILL
that sucker! Now take this next
one in the stomach.”

The second bullet exploded
within his bowels. Jagged metal
severed his intestines as he was
thrown against a tree.

"That’s better, recruit. OK, on
this last one, blast his heart out!”
Before he could seek shelter,
the final bullet slammed into his
chest, ripping a hole through his
lungs. His crumpled body fell to
the ground, painting the earth red.

“Excellent shot, private! We’ll
make a Marine out of you yet!”

I graduated from Marine boot­
camp on August 11, 1981.
On December 19, 1982, I was
eligible for transfer to the Inac­
tive Reserves. Happily, I exer­
cised my option.

Chancellor Arnold B. Grobman led UMSL through its twentieth anniversary year, preparing and planning for the university to grow and prosper in the coming decades.

Economics professor Elizabeth Clayton returned from a semester in the Soviet Union, lecturing on her experiences as a visiting professor at Moscow State University.

Professor Suzanna Rose coordinated the women's studies program at UMSL this year and was profiled in the Current features/arts section.

ACADEMICS: Plans for the proposed UMSL Science Complex were approved by the Board of Curators; the university awaits the necessary appropriations from the state legislature before construction can begin.

STUDENTS: Twice a year, the University Bookstore is crowded by UMSL students making their beginning of the semester purchases.

The new Coordinator of Student Activities, Donna Kitchen, succeeded in filling the shoes of Curt Watts, who left last summer.

The new Coordinator of Student Activities, Donna Kitchen, succeeded in filling the shoes of Curt Watts, who left last summer.

ACTIVITIES: UMSL chess players formed the Chess Club this year, sponsoring a number of both members-only and area tournaments. The group plans even more for next year.

Student Association president Barb Willis was credited with creating unity in student government, among other things, during her term. Willis was the only candidate for vice-president in the election this week.

Political science professor Lance LeLoup was instrumental in the founding of UMSLPAC, a new political action committee formed by UMSL faculty, staff and students.
OPPORTUNITIES: American Cablevision opened a new public access studio here. Television Production Club member Mark Evans demonstrates the new control board.

CELEBRITIES: Members of Pi Kappa Alpha pose with actor Vincent Price, who gave a dramatic lecture here.

CLEANING UP: Members of the Biology Club clean up Bugg Lake, which was covered by a layer of algae, earlier this year.

James Neal Primm, chairman of the history department, was profiled in the features/arts section last fall as part of a feature on UMSL faculty and their writing.

John P. Perry, Vice Chancellor for Administrative Services, celebrated 35 years of service to the University of Missouri this year.

POLITICS: Democratic presidential candidate Rev. Jesse Jackson hugs Associated Black Collegians president Priscilla Dowden at a rally the group sponsored.

A GIFT: The Alumni Association presented UMSL with a new Alumni Center that was the site of numerous events and receptions.

ARTS: Room 101 Lucas Hall was the unusual site for a concert by the new music group, the Violent Femmes. Whether a lecture hall can be transformed into a jumping night club or if this was just Femmes 101 is still unanswered.
The Current is now accepting applications for the 1984-85 school year. The following positions will be available to any student taking one or more classes at UMSL. Some positions are paid; in those cases that is noted by the job description.

The Current is a great way to meet fellow students, get to know the campus and the administrators, and learn the hows and whys of publishing a college newspaper. Next year's staff will participate in training sessions, lectures by area newspaper professionals and more. In addition, the Current offers social events for its members.

Get involved in the award winning newspaper at UMSL. Get caught up in the Current! We are seeking students to fill the following positions:

**News Editor**
This salaried position requires a student with good writing skills, a general knowledge of the campus and its functions, and a "nose for news." The news editor will help to recruit a staff of writers and production persons to assist in the development of the news section. This student will work primarily on Monday, Tuesday and Wednesday. The news editor needs good leadership and organizational skills.

**Features Arts Editor**
This student will be responsible for developing and carrying through on story ideas. A group of writers and production assistants will help develop the features section under the guidance of the features editor. This student will need to work primarily on Friday, Monday and Tuesday. A good grasp of the campus events and good writing skills are necessary. This is a salaried position.

**Sports Editor**
The sports editor will also work with a team of writers and production assistants to produce a full sports section each week. Good writing skills, ability to work on a deadline, and organizational skills are very important. A basic knowledge of UMSL athletics is necessary. This student will work primarily on Monday, Tuesday and Wednesday. This is a salaried position.

**Copy Editor**
This student should possess an excellent knowledge of the English language as applied in journalistic writing. The ability to spot errors and an eye for detail will be important. This is a salaried position, and the copy editor will be in charge of the flow of copy and production, so the student should be organized. The copy editor will work primarily on Friday, Sunday, Monday, Tuesday and Wednesday.

**Photography Director**
The photo director will coordinate a staff of photographers in regards to shooting schedules and darkroom work. This student must possess an excellent knowledge of basic black and white photography and darkroom work and a creative eye. The photo director works primarily on Friday, Monday and Tuesday. This is a salaried position.

**Assistant News, Features, and Sports Editors**
These salaried positions offer less work hours but the same advantages: technical training and experience. The assistants will write and/or work on layout. At least two assistants will be selected in each area. The assistants generally work the same days as do the editors.

**Assistant Copy Editor and Photo Director**
Also salaried positions, these assistants will help in organization of the departments and will do some of the groundwork associated with each. They should each possess the same skills as their respective managers.

**Business Manager**
This salaried position carries the responsibility for coordinating the business activities of the Current. This student should have a working knowledge of business functions. The business manager's hours fluctuate according to the organization of the department.

**Advertising Director**
This person coordinates the activities of the ad salespersons. An effective sales director will possess good communication skills and a knowledge of UMSL and the area surrounding it. The advertising director may set his or her own hours.

**Typesetter**
A good typist can be trained to work with the computer typesetting system at the Current. Typing skills of 55 words per minute are necessary. Typists work some or all of the following days: Friday, Sunday, Monday, Tuesday, Thursday and Wednesday. Typists are salaried positions. At least 4 will be hired.

**Office Manager**
This salaried position requires the responsibility for circulating the paper on Thursday mornings (approximately 9 a.m.) and for doing a number of duties in and around the offices on Thursday and/or Friday. This is an excellent position for someone wanting to learn about the basics of newspaper production and possibly move into a different area later on.

**Around UMSL Editor**
This salaried position has the responsibility for compilation and layout of the weekly calendar section in the Current. Good basic writing skills are necessary, as well as an eye for design. This student works primarily on Friday and Monday.

In addition to the above mentioned positions, reporters, photographers, production assistants are all being recruited at this time.

Applications are available at the University Center Information Desk, or at the Current, #1 Blue Metal Building. For more information about working for the Current, call Sharon Kubatzky, editor, or Jeff Lamb, managing editor, at 553-5174.

---

Get caught up in the Current! We're now accepting applications for next year's staff!

Rauch wants consolation bracket in tourney

Daniel A. Kimack
Sports Editor

The tennis Rivermen, 1-13 overall, certainly have had their share of adversity during the 1984 campaign. From inclement weather throughout the season to Nos. 1 and 2 singles players missing important matches because of schoolwork, Coach Rich Rauch has spent a lot of time pondering what might have been.

He will find out, however, what will happen to the Rivermen when UM-SL travels to Warrensburg, Mo., for the Missouri Intercollegiate Athletic Association conference tournament. Weather permitting, the Rivermen will leave the university campus the week indicated a chance of rain Friday and Saturday.

"We've had more rain than Noah did when he put his animals on the ark," Rauch lamented. "If Noah was a tennis coach, he couldn't be more frustrated than I am."

Riverwomen from page 21

Two hits, including a double by junior Jean Albers, were scored in the second inning.

Rauch's performance can be deceiving, however. UMSL has beaten some tough opponents such as Saint Louis University and Indiana State University-Evansville.

And one of the team's top sluggers, junior Maggie Komel, should be back in action for the MIAA tourney. Komel was the team's second top hitter at .321 and had 16 RBIs before a knee injury put her out of commission three weeks ago.

The squad has also benefited from the addition of outfielder Theresa Klaus. Klaus was one of the team's top offensive and defensive players last year. She joined the team a few weeks ago when injuries and academic problems narrowed the roster to a bare-bones unit.

The Riverwomen have shown what they're capable of, pulling out an eight-game winning streak out of a 10-player hat.

Coach Larson believes that they can pull out yet more wins out of the tournament hat this weekend. The University of Missouri-Rolla is slated to be UMSL's first opponent. Larson knows they can beat Rolla, pointing to his team's 3-0 season lead in the season series.

The remaining highlights will be Southeast Missouri State University and Northwest Missouri State University, ranked first and second respectively in the league. According to Larson, "both are going to have to go to be good defensive games. We'll have to be able to score at least two runs in each. As long as we play mistake-free ball, we'll be all right."

If the past is any indication, UMSL may well be capable of reaching the summit and enjoying the view in the rarified air of a championship spot.

Riverwomen note UMSL split a pair of games Tuesday afternoon against Indiana State-Evansville in the first game, 4-0 before losing the nightcap, 1-0.

In the opener, Gassei pitched a solid game allowing just four hits in recording the shutout. Offensively, Theresa Klaus and Kathy Boxschott provided the big hits. Klaus drove in three runs in the second inning, and Boxschott slugged a home run for UMSL's final run.

The split brought UMSL's record to 19-16.
Riverwomen lose to SLU

Daniel A. Kimack
Sports Editor

When the tennis Riverwomen dropped their record to 1-10 Tuesday with a 6-3 loss to Division I school Saint Louis University, all three match wins came by default. Not very impressive or competitive, you ask?

Well, Carmen Nanawa, UMSL's assistant coach, begs to differ. No matter that the Riverwomen are 0-5 in the Missouri Intercollegiate Athletic Association and have won just one match as a team, she said.

"The whole match was very close," she pleaded. "We liked what we saw."

Nanawa said she and Coach Pam Steinmetz were pleased with the play of No. 1 singles player Laura Dyer, who lost to Susan Lawler, 7-6, 6-3. She also credited Julie Crespi with a fine match after she fell to Patti McDermott in a split set, 6-4, 5-7, 6-4, at No. 4 singles.

"Dyer played the best she has all season," Nanawa explained. "She came very close to winning. Julie played a very competitive match against McDermott, too."

Playing at No. 2 singles, Kathy Owens lost to Beth Knight handily, 6-1, 6-1, at No. 5. Shera McMahon lost to Mary Clayton, 6-3, 6-2. Both Dede Martin and Deb Skerik, Nos. 5 and 6, respectively, won their matches by default, as did the No. 3 doubles team of McMahon and Skerik. Dyer and Owens lost at No. 1 doubles, 6-3, 6-1, and Martin and Crespi fell 6-3, 6-1 playing No. 2 doubles.

Nanawa said all the women showed a much sought-after improvement during the match. "We've been hoping to improve," she said. "And the way we have been playing lately, I think we are reaching our potential."

Nanawa credited the warm weather and practice sessions for upwinding the Riverwomen's pendulum. Before, she said, the players just went into the match unable to receive coaching, except during the split sets, when communication with the coach is allowed. But because of the recent practices, "the girls are taking all that knowledge and putting it to use."

Steinmetz spoke to her players Tuesday and said the day's results were very encouraging for the final weeks of the season. Steinmetz added that she hopes the improved play will continue this weekend through the conference tournament.

"We're looking forward to the tournament."

Riverwomen travel to Warrensburg, Mo., this weekend to compete in the MIAA conference tournament Friday and Saturday. Included in the six-team tourney are Northeast Missouri State University, Northwest Missouri State University, Southeast Missouri State University, the University of Missouri-Rolla, Lincoln University and UMSL.

The Riverwomen finished dead last, last season in the tournament, but are looking to improvement as the way out of the cellar. Seeds and rankings will be determined today during a meeting between the MIAA coaches.

"We would like to have a positive attitude going into this tournament, but Lincoln will definitely be the favorite," UMSL will rely on the strength of the team's bottom half in the tournament. Not to slight the singles, Nanawa said, but the doubles teams have been exceptional as of late.

Also, McMahon and Crespi have been moved up to Nos. 3 and 4, one notch higher than during the season. Both Steinmetz and Nanawa are happy with their play in the new seeds.

"We're looking forward to the tournament."

TWANG: Women's tennis player Deb Skerik returns a volley during a recent Riverwomen match.
from page 21

- Best Game: UMSL 42, Saint Louis University 65. The basket-
ball Rivermen gave SLU coach Rich Grawer a leather sandwich.
He was head coach at Muscatine (Iowa) that year.
- Best Acquisition: Frank Viverito, manager of sports pro-
motion and sports information at Missouri State University.
- Best Practice: The basketball Rivermen. After he
- Worst Individual Season: Rich Rauch. Not necessarily his
fault or the fault of his players, but the successful high school
coach and teaching pro at James-
- Best Team Season: Missouri State University, in their
first year of college coaching.
- Worst Individual Season, honorable mention: Ken Hud-
son. He’s in the same boat.

from page 21

- Second Worst Quote: Al Mares, UMSL shortstop and 1981-82
UMSL Rookie of the Year. "Hey, Dan, Whitey (Herzog) called me
the other day. He wants me to
take over for Ozzie (Smith)."
- Worst Acquisition: Right now, the somewhat-constructed
soccer stadium because it wasn’t
finished for the 1983 soccer
season. Who knows, it might be
next year’s best acquisition. But
scratching it from this year’s list—
too much hoopla about outside
restrooms and a press box that
didn’t open.
- Worst Success Story: Frank Viverito. The UMSL sports pro-
gram will certainly miss his
ideas and hard work.
- Worst Practice: The soccer Rivermen. They practiced on the
artificial turf at Lindenwood

Athletes

- Second Worst Quote: Al Mares. "Hey Dan, Tommy
(Lasorda) called me."
