About has announced the recipients of Student Life Award. Marsha Gifford, kins, Terry Inman, Michael T. UMSL Christine report, Award winners announced and commerce score for and 18.5. natural science scores were 21.6, were 18.5, 17.8, and 17.7. The corresponding scores were 17.4, and 16.9. In social studies mean, 18.1. In mathematics, the man outscored the averages in score 18.7, while 'the national American College Testing Freshmen _ plan. Gregory' Barnes, Jeannette AprUS, UMSL students,.. show more interest in becoming elementary school teachers (three percent compared with two percent) and writers or journalists (4 percent compared with 1.9 percent). UMSL freshmen also show a higher-than-average interest in engineering science, chemistry, physics and computer science.

The proposed new building would be situated north of Benton and St. Louis. An atrium would connect the new building with Benton Hall. Plans call for the new building to contain a science library, classrooms, laboratories, offices and various support facilities. Olson also announced that he had selected a faculty member from each campus as recipient of the Thomas Jefferson awards, given annually to the faculty members who "best exemplify the principles and ideals of

A recent report by the American Council on Education and the University of California in Los Angeles shows that about 43 percent of 1983 UMSL first-time, full-time freshman plan careers as accountants, computer professionals or business executives, compared with 23 percent nationally. Another three percent think that some day they would open their own business, a full percentage point above the national figure.

UMSL freshmen also show a higher-than-average interest in becoming elementary school teachers (three percent compared with two percent) and writers or journalists (4 percent compared with 1.9 percent). UMSL freshmen also show a higher-than-average interest in engineering science, chemistry, physics and computer science.

In addition, the Student Life Award is presented to a faculty member, administrator or support person who has served "with dedication through personal contributions that have enhanced the quality of student life at UMSL," according to Assistant Dean of Student Affairs Dan L. Wallace.

Nominations for the Student Life Award are Margaret Cohen, assistant professor, Behavioral Sciences; Harry Gaffney, assistant dean, Evening College; E. Terrence Jones, dean, College of Arts and Sciences; and Mary Bank secretary, Music.

An award ceremony and reception will be held Thursday, April 26, 3 p.m. in Room 124, J. C. Penney Building. The UMSL community is invited.

Inside

The Peer Counseling Center at UMSL can help students with overcoming their fears and pressures of college life on the UMSL campus. that feature, plus reviews of movies, a play, and the Vincent Price lecture. Fans of science fiction will find all this week's features/arts section.

The UMSL Rivermen are "out of the chute" early, after suffering through bad weather and a Texas trip. Plus the softball Riverwomen and tennis teams are going for improvement as spring finally comes to the UMSL campus.
April brings instructional courses to UMSL

A variety of instructional seminars and courses have been scheduled for April at the UMSL campus.

Students interested in broadcast careers may attend several seminars sponsored by the Television Production Club. The seminars will be held in the new UMSL Public Communication Studio in Lucas Hall, and will be videotaped.

Students may also choose to attend instruction in a special program or a special course on photographing nature, or they may participate in a new certificate program titled "The Sales Institute." All the workshops will be held on the UMSL campus.

Broadcast Careers. These seminars will be held on Monday in April from 1 to 3 p.m. in the access studio, 115 Lucas Hall. All sessions are free, and will be videotaped by members of the TV Production Club. Audience participation will be encouraged. Topics to discuss include: News Broadcasting and Community Affairs on April 9; Broadcast Management on April 16; Industrial and Independent Production on April 23; and Advertising and Public Relations on April 30.

These seminars are free. For more information, call Wendy Hearst at 553-5485.

Sales Institute. This new certificate program will provide sales professionals with the opportunity to learn and earn a wide range of new skills to increase productivity.

The program will include three workshops: Basic Sales begins April 16 for four consecutive Mondays, 6:30 to 9:30 p.m. The Advanced Sales Workshop will be held May 10 and 17 from 9 a.m. to 5 p.m.; and a Sales Management Workshop will be held May 17 and 18 from 9 a.m. to 5 p.m.

Instructors for the program will be Michael Baber, a nationally known sales trainer and marketing consultant, and Alan J. Danforth, Market Consultants.

Fee for the entire program is $475; however, one or any combination of workshops may be taken. For a brochure with complete fee information, call Joe Williams at 553-5961.

Instructional Management and the Writing Process. This workshop is offered as part of the Gateway Writing Project on Saturday, April 14, from 8 a.m. to 4 p.m.

Participants will explore ways to increase effectiveness in teaching writing. Using the most recent research, this course will help planning and managing writing instruction in any content area. The program is designed primarily for experienced elementary and middle school teachers. Topics will include the writing crisis and the task of teaching writing, left and right hemisphere; how to write good assignments; lesson design in writing; and more.

Instructor will be Jane Zeni Filian, lecturer in the English and education departments. Fee for the course is $38, which includes kost, refreshments, course materials and parking. For information call Joe Williams at 553-5961.

---

Optometry offers minority workshop

Minority students from colleges that offer pre-optometry and other as well as high school juniors and seniors who have shown an interest in pursuing a health career will participate in the UMSL School of Optometry Career Opportunities Workshop to be held this Saturday from 9 a.m. to 6 p.m.

The workshop will be held in the School of Optometry facilities on the UMSL campus and will focus on encouraging minority students to consider optometry as a career.

---

Two faculty members chosen ACE Fellows

Two UMSL faculty members, Gary Burger and Howard Benedict, have been selected as Fellows by the American Council on Education for the 1984-85 ACE Fellows Program. The announcement was made by TOP CONTI, president of the council.

Established in 1968, the program gives the opportunity to faculty members to experience leadership in American higher education by identifying and preparing faculty and staff for college and university administration. Approximately 26 Fellows, nominated by the presidents or chancellors of their institutions, are selected each year in a national competition.

Gary Burger, professor of psychology, has been a member of the UMSL faculty since 1972. He taught at Saint Louis University from 1966 to 1972, and earlier held several research posts with the Loyola University Psychology Laboratory and psychology department in Chicago. He earned his bachelor's, master's, and doctoral degrees in psychology from Loyola, completing his Ph.D. in 1966.

Howard Benedict, director of the Center for Academic Development and Lecturer in the Engineering department since 1966, joined UMSL from Our Lady of the Lake University in San Antonio, Texas, where he had been director of the Academic Development Program and the Academic Support Program. He received his Ph.D. in 18th century British literature in 1965 from the University of Pennsylvania, and an M.A. in English literature from Temple University in 1963. Additionally, he received an M.A. in higher education from the University of Texas in 1979.

Lois Vander Waerdt, affirmative action officer at UMSL, is serving as a 1983-84 ACE Fellow, spending much of her time at Southern Illinois University-Edwardsville. Previous UMSL ACE Fellows include E. Terrence Jones, Conney Kimbro and Edith Young.

Optometry offers minority workshop

Minority students from colleges that offer pre-optometry as well as high school juniors and seniors who have shown an interest in pursuing a health career will participate in the UMSL School of Optometry Career Opportunities Workshop to be held this Saturday from 9 a.m. to 6 p.m.

During the morning sessions, participants will hear presenters as by prominent black optometrists and from around the United States who will discuss each topic as optometry as a primary health care profession; special areas of optometry such as pediatrics, vision training and low vision rehabilitation; future direction of optometry; women in optometry; career opportunities in private, military and industrial practice; minority health care needs; and planning a good undergraduate program for acceptance into the optometry school.

The afternoon will consist of numerous workshops of about one-half hour each. Small groups of students will visit six to eight stations where a presentation will be made that deals with various aspects of an optometrist's curriculum. The workshop is sponsored in part by a grant from the Health, Education and Welfare Division of Health Manpower, U.S. Department of Health and Human Services.
Imagine the career you want.
In the country you love.

Then do more than imagine. Experience it. With Motorola's Semiconductor Products Sector—the international leader in the research, development and manufacture of microelectronic components and systems. Our technology has earned us a reputation of uncompromising quality. In the United States. And around the world. If you would like to have a solid career waiting for you at home, consider Motorola. We are seeking individuals who are citizens of and who want to work in:
- Tokyo, Japan
- Geneva, Switzerland
- Hong Kong
- Malaysia
- Guadalajara, Mexico
- Munich, W. Germany.
The following full-time positions exist in these disciplines for graduates with the required degree:

- Design Engineer • Assembly, Manufacturing • Final Test Engineers
  - Requires BS Electrical Engineering
- Quality Control Engineers • Plastic Engineers • Production Supervisor
  - Requires BS Electro-Mechanical Engineering
- MIS Programmer/Analyst Position requires BS Computer Science, Math or Business
- Safety Engineer • Process Engineer Positions require BS Chemical Engineering
- Materials, Traffic Position requires BS Materials Management
- Financial Analyst Position requires MBA Finance/Accounting
- Shipping/Receiving Administration Position requires BOHA

We also have several summer internship positions available in Malaysia. This program is for BSMS Electrical Engineering students who are, at least, in their sophomore year and who want to work in Malaysia the last two summers prior to graduation.

What could be...is.

**Business ethics symposium offered**

The Missouri Committee for the Humanities Inc., the state-based arm of the National Endowment for the Humanities, has joined the College of Arts and Sciences and Continuing Education-Extension in sponsoring the free Business Ethics Symposium set for tomorrow at the Marillac Auditorium from 9:30 a.m. to 4 p.m.

Topics for the conference will center on environmental pollution and the environment of the workplace.

Representative Robert Peigenbaum, Missouri state legislator from the 17th district, will be among the guest presenters for the conference. Peigenbaum has sponsored legislation on workers' "right-to-know" laws and is currently sponsoring a "superfund" bill to help pay for environmental cleanup.

Other speakers will include James O. Wilson, director of planning and information, Environmental Policy Staff, Monsanto Co.; Lynn Barth, coordinator for Monsanto's Volunteer Clearinghouse; and Richard Friedmann, attorney with Mann, Poper and Whitten.

The format of the program will allow for questions and comments by the audience about corporate responsibility.

More information is available by calling Dave Klosterman, Continuing Education-Extension, at 533-5961.

**Observatory has star view**

The first-quarter moon, Orion Nebula and planet Saturn will be favorably located for observation when the UMSL Observatory opens for public viewing this Sunday.

The public will be invited to view the stars through UMSL's 14-inch Celestron 14 telescope beginning at 7 p.m., weather permitting.

The observatory is located adjacent to the student parking lot on the South campus, 7804 Natural Bridge Road. Admission is free.

The telescope allows observation of stars, planets and galaxies up to 1,869 times greater than the human eye can see.

The observatory is used primarily as an instructional tool for astronomy courses, as well as providing an aid for research students in the astrophysics program. The public is invited to attend the planned monthly viewing sessions.

Future dates for public viewing are May 6, June 8, July 6, August 2, Sept. 2 and 30, and Nov. 2.

**Freshmen**

from page 1 compared with 3 percent).

Other survey findings include:
- Approximately 65 percent of UMSL freshmen travel between 11 and 50 miles a day to attend classes. Nationally, only 23 percent travel that far.
- About 54 percent of the students anticipate that they will get a job to pay for college expenses. Nationally, 40 percent expect to work to help defray costs. Seventy percent expressed concern about financing college. Nationwide, the figure was 67 percent.
- Asked about their college selection, 68 percent of the freshmen indicated that UMSL was their first choice, while 25 percent indicated that UMSL was their second choice.
- UMSL freshmen are more conservative than the national averages. Sixty percent of the UMSL students said they were in the middle of the road, 15 percent classified themselves as conservative, and three percent as far right. Nationally, students indicated preferences of 57, 19 and 1 percent respectively.
- UMSL freshmen are less likely to approve of abortion. While a national approval rate of 60 percent exists, only 60 percent of the UMSL students approved.

Student curator support needed

Last Wednesday, March 28, the Missouri State House of Representatives passed a bill that would install a student as a member of the University of Missouri's Board Of Curators. The bill was passed on the consent calendar, in a large group of other bills, and given over to the state Senate for its approval.

Getting that bill pushed through the Senate is going to be a very big legislative battle. Already there are some rumblings out of Jefferson City that claim that students just aren't interested enough to help it.

This is exactly like the dog that chased its tail -- it keeps going around and around, making itself dizzy. It keeps going around and around, but it never gets anywhere.

To imply that students aren't capable of participating in the decision-making process that governs the entire UM system is to imply that the students in Missouri higher education just aren't very bright at all. Others are concerned that students really aren't capable of drawing the whole UM picture together very clearly, so that they would probably hinder the Board, not help it.

By having a student on the Board of Curators, campus governance would be enhanced, and also the very same educational system that our legislators have so longingly awaited for so long would be recognized and its impact on student life would be taken. Although the state Senate will not move on this proposal for some time, we students should take no chances and begin lobbying on our own behalf immediately.

Dear Editor:

Since Eric Harris likes to give recommendations on reading material, perhaps he won't mind hearing a recommendation of my own. I think he should have read the letter that Terry Imman wrote (March 1), the letter to which I referred on March 15, before he attacked mine. Harris writes, "those who would criticize a system should first understand it." If he is consistent (and I have every reason to believe he is), then I can substitute the word "letter" for "system." Fair enough? Mr. Harris obviously doesn't understand the motivation behind the writing of my letter. I was not offering a critique of the history of government intervention (which is what Harris does... and with a bibliogaphy, too!), rather, a rejection of the elimination of government intervention as put forth by the letter he did not read.

Sure, there are plenty of problems with the bureaucratic agencies that have been established by the U.S. government. Harris raises some very interesting points: ones that I didn't deal with in my letter. But, as Harris says himself, "we haven't the space and I haven't the time." I was merely suggesting that government regulations, no matter how badly they may need amending, are better than no intervention at all.

My example of the 12 hour work day for a 12 year old child served only to point out that a regulation was needed to end that kind of exploitation. Mr. Harris argues that "capitalism killed the 12 hour workday by making labor more productive." Absolutely correct. (Congratulations, that reading must've given you the insight to come to that conclusion.) But, capitalism did not prevent that 12 year old from working, a regulation did. Capitalism did not provide better and safer working conditions: a regulation did. Capitalism did not provide transfer payments to the poor and homeless starving people of this "land of plenty": you guessed it, a regulation did. Again, I do not believe these regulations are perfect. However, they're better than nothing. (And Terry Imman will debate this to the grave!)

Mr. Harris should take the advice of the headline that adorned his letter to the editor, "Read... before writing." It seems Harris does quite a bit of reading, so why can't he take the time to read the letter to which he is responding prior to the day he wrote his? It seems he didn't read the letter to which he is responding. He did not prevent that 12 year old from working. Shortly after he attacked mine, Harris writes, "those who would criticize a system should first understand it." If he is consistent (and I have every reason to believe he is), then I can substitute the word "letter" for "system." Fair enough? Mr. Harris obviously doesn't understand the motivation behind the writing of my letter. I was not offering a critique of the history of government intervention (which is what Harris does... and with a bibliogaphy, too!), rather, a rejection of the elimination of government intervention as put forth by the letter he did not read.

'Natural property rights' simply don't exist

Dear Editor:

Terry Inman (Libertarian) should pause to read and think before he rants and raves. His response to my previous letter consistently misrepresents my position. Yes, Terry, I have been stolen, sort of. If you accept the principle of absolute property rights.

As was clear from my letter, I do not accept that principle. Indeed, that was my whole point.

Life is in many ways like poker, a game of skill and chance. Some people are dealt bad cards, and lose through no fault of their own. Others may inherit badly played hands, and come into the game without enough chips to ante up, much less win anything. But it's the only game in town.

The Libertarians defend these harsh realities as, by definition, moral. The winners have no obligations to the losers, even if the difference is partly or wholly a matter of luck.

Poor blacks may have twice the mortality rate of middle-class whites, but the Libertarians would have us end Federal and infractions programs on t-ion of life, when there is a direct con- trary to property over others' right to

In general, the rich can live off the goose that lays the golden eggs to good use. In a world of limited raw materials and unequal economic opportunity, a Libertarian system would be disastrously unfair.

"First-come, first-served" and "what is, is right" can only be acceptable to morals to those who are either quite sure of their luck, or extremely stupid. As I've said before, capitalism may be justifiable as a means to an end, but not as an end in itself, a moral imperative. If so, Mr. Inman responds to this by citing its potential for feeding people, again confusing its ends and its means. I do not doubt capitalism's products and I do not suggest that we scrap it. I merely defend the practice of modifying and regulating it, when we do, so that it will better suit our purposes. I'm not such a fool that I would kill the goose that lays golden eggs - I just want to put those eggs to good use.

Capitalism is not an all-or-nothing proposition, any more than the right to property is, once it loses its moral justification. I reject Ayn Rand's rejection of society that perfectly pure capitalism would work perfectly. This is a very naive and disastrous concept. Besides the inherent injustice, it leaves the poor and the disadvantaged, a Libertarian government would use force to defend people's lives, wages, and "right" to compound their advantages. In general, the rich can live off interest on the go ose that lays golden eggs to good use. In a world of limited raw materials and unequal economic opportunity, a Libertarian system would be disastrously unfair.

Sincerely,
Paul R. Wilson

8

- Men’s Tennis vs. Southeast Missouri State University at 9 a.m. on the Mark Twain courts. Admission is free.

- UMSL Baseball vs. University of Missouri-Rolla in a doubleheader beginning at 1 p.m. on the Mark Twain field. Admission is free.

- The University Program Board continues “All The Right Moves” as part of its Film Series. See Friday for more information.

- The UMSL Health Fair will be held at the Mark Twain gymnasium from 9 a.m. to 4 p.m. This is a 2-hour event. Admission is free. Free screenings for height and weight, vision acuity, cardiovascular health, blood pressure and percentage body fat will be offered. These services are available to concerts of one year and older. Pre-registration is required. For more information, call 553-5761.

- A general meeting of the College Republicans will be held at 1 p.m. in Room 212 Clark Hall. Anyone interested in campaigning for candidates should attend.

- The Peer Counselors offer “Putting Yourself on Paper: Resume Writing,” a workshop covering the basics of a successful resume, from 2 to 3 p.m. in Room 427 SSB. For more information or to preregister, call 553-5711 or stop by Room 427 SSB.

9

- Sunday Extension offers “Archeology Without Digging: Surveying Techniques” on Saturdays through May from 9 a.m. to 4 p.m. This activity will be conducted at a field site to give participants the experience in surface survey. For further information, call 553-5961.

- KWMU airs “Creative Aging” every Sunday from 7 to 8 p.m. This series includes "Planning Retirement Time" with Frances Bartsch and "A Hobby That Preserves Retirement Time" with Mr. and Mrs. Robert Lauck, the makers of homemade jams, jellies and relishes.

- The KWNU Student Staff presents “Sunday Magazine,” a summary of the week’s news events, from 10:30 to 11:30 p.m. and “Sports Spectrum,” a review of the week in sports, from 11:30 p.m. to midnight.

- The Counseling Service offers “Sex — A Workshop in Plain Brown Wrapper” from 3 to 5 p.m. in Room 337 SSB. Call 553-5380 for more information.

- As part of UMSL’s annual Conference on Women’s Issues, Judy Gor­ man-Jacobs will perform a blues folk concert with traditional and contemporary music at 8 p.m. in the J.C. Penney Auditorium. Admission is free. For more information, call 553-5380.

- The UMSL faculty women’s book sale continues from 8 a.m. to 8 p.m. in the Blue Metal Office Building. See Tuesday for more information.

10

Tuesday

- Reaching the students of metro St. Louis. Largest metropolitan market in Missouri. 
  - Over 110,000 students
  - Over 80% students employed full or part-time

- The Chicago Chamber Brass will play an Easter concert including a solo performance of Handel’s “Messiah” at 8:15 p.m. in the J.C. Penney Auditorium. General admission is $6. For more information, call 553-5148.

- "Wednesday Noon Live" will be held from 11:30 a.m. to 1:30 p.m. in the University Center lounge or on the patio.

- The Libertarian Student sponsors a lecture on how to legally avoid paying income tax by legal expert Amos Bruce at 1 p.m. in Room 427 SSB. Call 553-5711 or stop by Room 427 SSB for more information.

- The UMSL faculty women’s book sale concludes at 8 p.m. See Tuesday for more information.
Peer Counseling offers help

Mike Luczak assistant features/arts editor

Some students find their grades are suffering because they can't find time to study. Some are depressed because the future that seemed so bright may now be dimmer. Others are lonely and, even though they need someone to talk to.

For UMSL students faced with these or other, everyday-life dilemmas, the Peer Counseling Center located in Room 427 SSB can and will help.

"We're basically a staff of untrained people who help to other students," said Maureen Corbett, head of public relations and peer counselor in the Center.

"We're here for students on a walk-in basis between the hours of 8 to 5 every weekday to talk to other students about anything they might be concerned about, whether it be academic, personal or personal concerns.

"We're unique in that we offer free counseling," said Michele Aguayo, director of the Center, "since other universities often charge for similar services. We're actually an adjunct to the Counseling Service, which we're carefully supervised by trained professional psychologists.

"Besides offering counseling we offer free counseling stations, or "centers," if you will, for students to come and go through. We also have a walk-in basis where students can come and go through any time of the day and have discussions with a counselor and even make appointments with a counselor."

"Since we're para-professionals, though, we're limited to one half-hour counseling sessions we can have," Corbett said. Peer counselors are not trained enough to make a diagnosis of the issues. Students have to make appointments with a counselor and, even though discussions are kept strictly confidential.

For students faced with problems like time management or procrastination, the Center also contains a series of five free workshops throughout the year on these and other topics.

"It's all very informal," Corbett said, describing the workshops. "It's not a normal class-type atmosphere. We try to give information as well as have students discuss the topics.

"If a student wants to come to one of our workshops, but can't make it because of time conflicts or any other reason," Corbett said, "then we encourage them to come to the Center and schedule a time when they can meet with one of our counselors. This way they can receive all the information given in the workshop, and have someone to answer any questions a student might have."

Besides counseling and special workshops, the Center also has a career library. "These students can find books and important information on any career fields they might be interested in.

For students who can't decide what career they might want to pursue, even arrange an appointment with the Center to use the computer program called Interactive System of Interactive Guidance Information. SIGI helps students with a systematic strategy for making possible career decisions. It also gives students accurate up-to-date nation-wide information about occupational fields, and matches students with valid career choices. It is free to use.

"One of the misconceptions students frequently have about SIGI is that they think it will tell them what career they should go into," Aguayo said. "It doesn't do that at all. It only offers suggestions to them. The students are the ones making the decision, not the computer."

"It takes about four sessions for students to complete the SIGI program," Corbett said, "so we divide it up into two two-hour sessions.

After students complete the SIGI program they meet with one of the counselors on the staff to discuss the information they have received from SIGI and talk about what career choices might be best for them.

What if students were interested in becoming peer counselors? According to Aguayo, they'd first have to take Psychology 61, which is a two credit course dealing with "Helping Relationships.

If they were still interested in becoming a peer counselor they'd be interviewed by the Counseling Service. If accepted, they'd take Psychology 61 while working as a peer counselor for the Center. Psychology 60 and 61 are open to all students, even if they don't want to become peer counselors, and are informal in their formats.

In describing the courses Corbet said, "Students learn the

Others disbelieve his dream

Mike Luczak assistant features/arts editor

If we looked back at my future yesterday, and I'm scared. Here I am in college, and I have no idea what I'd like to be. I want to be a writer. I want more than anything else in the world to have a novel, with each being best sellers, but in reality I realize that it may never happen.

Where should we draw the line when it comes to dreaming? Isn't it too much to dream of success? Does everyone have? Is it wrong for us to believe in something that in reality might never come to be? I wonder.

"I want to be a writer," my mom's friend said to me with a disbelieving smile the other day when I'd like to write."

"I don't know what to write about, and maybe do some teenage romance novels if I can," I said in response.

"Honestly, do you really think you'll ever be able to sell anything you write?" she questioned.

"Sure, I wouldn't say if I didn't think I could," I said.

"But out of all the professions, why do you want to be a writer? It's a chance in a million, isn't it?"

I thought about it a while. Why is it that I want to be a writer, and why is that every­

"I think the reason I want to be a writer is because I believe in something." I said with a rather unconvincing smile. "It's because I like writing, and I want to try and find a job they like to do,

Final phase of fitness trail is in the works

Stuart Serran reporter

Putting up through muddy hillsides around campus are an odd assortment of blocks, bars and blue signposts.

Passersby may wonder what some strange sculptor is designing. Those familiar with the UMSL Fit Trail recognize the concrete exercise stations, but they still may wonder about the Fit Trail's purpose and final destination.

At this point, the exercise stations are just random, mostly off the beaten path. But if you look closely, you might just see the last bit of a puzzle to find the linking Fit Trail stations.

Gary Greenwald, coordinator of the Fit Trail project, assures students that the trail will be a useful and sensible addition to the campus—when it is completed. The battering of occasional rain and snowstorms has delayed completion of the exercise posts until the ground dries in spring or summer.

"We've been placed with the project thus far," Greenwald, lecturer in the physical education department and director of a number of community physical education programs, said. "It's an excellent way for people to get in good shape to get in great shape, and for those in fair health to become more healthy. The hilly campus of UMSL will be good for everyone. People can jog, run or walk the trail.

Workshops are held in the Center and usually take about an hour for each session, with some workshops lasting more than one session.

"It's all very informal," Corbett said, describing the workshops. "It's not a normal class-type atmosphere. We try to give information as well as have students discuss the topics.

"If a student wants to come to one of our workshops, but can't make it because of time conflicts or any other reason," Corbett said, "then we encourage them to come to the Center and schedule a time when they can meet with one of our counselors. This way they can receive all the information given in the workshop, and have someone to answer any questions a student might have."

Besides counseling and special workshops, the Center also has a career library. "These students can find books and important information on any career fields they might be interested in.

See "Peers," page 9

Greenwald said that only a few difficulties were encountered in the planning of the Fit Trail. The Committee considered several paths for the Trail before settling on the final course, which circles the interior of the campus. One of the early plans had a path running alongside the outer edge of the campus and winding around Bug Lake. Another had students crossing the street two times. The Long Range Planning Committee for the Fit Trail objected to any course that might jeopardize safety.

One of the committee's main priorities was to make the trail aesthetically appealing. Many of the ideas were purposely set in the more remote places on campus—near trees and parking lots. Greenwald added that such placement is ideal for inhibited exercisers.

Greenwald found it strange that the final plan had to be further examined at the Columbia University for another "overly steep inclines or dangerous gullies." It seemed that there was a lot of run-around," Greenwald said. "But it's around."
There are many reasons that people give for going to the theater. Some go to see and be seen. Others go for art's sake. Some, like me, go to be entertained.

At least I usually go with the idea that I want to be entertained. If I receive anything else from the production, then that's just an extra. After seeing the Theatre Project Company's production of Laslo Wilson's "Angels Fall," I left the New City School feeling that I had received much more than a few hours of entertainment.

Last week's Current described the play as "Laslo Wilson's look at six people waiting for the highway to be cleared after a nuclear accident."—big deal, I thought. And even though I'm no fan of nuclear power, I still didn't want to sit in a theater for three hours and watch characters parade onstage up to a soapbox, and then listen to them spout popularities at nuclear power. That's not my idea of entertainment, no matter what the cause. So I was more than a little pleasantly surprised when I saw for myself the extra that I got from the nuclear accident.

The play takes place in a small Catholic mission in northwestern New Mexico, just a few miles from a nuclear power station with his unofficial Indian euphemism "Project." This nuclear accident, blocked due to an accident at the Catholic mission in northwest New Mexico, just a few miles south, is a concern with his outside/Indian desert, explains Father Doherdy. The accident is what brings these people together, but what holds them together is a concern for another one that is not always easily seen. It is a concern for the problems that they each have and must learn to deal with some time during the play. Father Doherdy explained it well: "The only good thing that can come from these silly emergencies, these rehearsals for the end of the world, is that it makes us get our act together." The audience watches, one by one, as each character gets his or her act together.

The extra that I got from the play was that I learned a lot. I learned a lot about what it means to be called, to be called to another. It is that I lost my way. The message comes from the most unlikely of characters, the seemingly mindless Zappy Zapala, portrayed brilliantly by Jim Kilian. I also learned a lot from Niles Harris. I learned the frustration of what it must be like to be very strict in the past. Most of Price's lecture, though, pertained to certain unusual happenings and experiences of his acting career in villainy, which were less than eventful. At one point, Price mentioned that possibly his best talent was his ability to diversify upon subjects, and he was right. He spent entirely too much time telling pointless stories which seemed to go on forever. Maybe it wouldn't have been so bad if Price could have talked about more relevant experiences of his brilliant career, but he didn't, and this is probably the greatest disappointment of his brilliant career, but he didn't, and this is probably the worst truth about the entire night. Surely his lecture could have been more interesting than it was. Although he did discuss villainy at some length and had some very observant points, there seemed to be something missing.

The high point of the whole night was when Price took time at the end of his lecture to answer questions from the crowd. In distinct moments, one could actually see the "real" Vincent Price, and not the "actor" Vincent Price as he had been throughout most of the lecture. Perhaps if Price had dealt more seriously and not acted his way through the lecture, his points might have seemed more valid.

It seemed as if Price himself couldn't make up his mind about whether he wanted to be the "real" or the "actor" Vincent Price. Had he decided either way, the lecture might have had potential. Price received a standing ovation from the sell-out crowd, but the question is, whether it was for his past accomplishments in film, or for his extremely disappointing lecture. In my opinion, it was for his past accomplishments. In truth, the lecture was just not so entertaining to deserve a standing ovation.

devoted your life to something, only to wake up one day to discover that you may have been living a lie.
Niles’s “nervous breakdown” can also be understood as the author banker and the director realizing that he doesn’t believe a word that he ever said. The portrayal of Niles is the strongest character in the production, as the audience seems him go back and forth between wellness and sickness. I don’t believe that he could have helped but love: he was so warm and so very human.
The program is works by Ludwig Van Beethoven, including excerpts from Opus 83 (1808) and Opus 79 (1809) and others. He will be accompanied by pianist Deborah Nottingham of Cincinnati.

Baritone to perform
Baritone Carl Gerbrandt will perform a program of vocal works by Beethoven and others on Saturday, April 9, at 3 p.m. in the Education Auditorium on the South campus. Admission is free.

we have in our everyday lives is the result of someone’s dream.
Why shouldn’t my dream be any different from either Einstein or Bell’s dream? It doesn’t take a special man to dream. It only takes determination and confidence in oneself for a dream to come true.
I hate when people try to crush my dreams. Maybe I do expect too much, then, because I don’t know what a dream is and what it’s really like? Is there any gauge on reality? To some people, the answer is yes, but to me, I know of no such gauge and even if I did, I wouldn’t accept it, the capabilities of man, I believe in my own comprehension.
I’ll never become a writer. Maybe I’ll only be able to look back and say that yes, indeed, it was a dream that never came to be. I know it works, only to swallow, but like everything, dreams die. If this dream have to a liter died, then another dream will eventually take its place.

It may be true that they can take the life out of a dream, but how can anyone take the dream out of life? When I think about my life on board, our lives are based on dreams, and whether we like it or not, there will always be dreams in both our hearts and our minds.

To the other third of the “I don’ts.”

Love, Ourt M.

Wanted: Creative, energetic individual to work consistently 2-4 hours per week, placing and filling posters on campus. Earn $500 or more each school year. 1-800-342-5879
Volunteers needed! Volunteer for the Great Chicago Youth Stars at UMSL’s first Special Events Festival. Experience not needed. Just groups or individuals interested in volunteering, UMSL’s VISA a success. Call Sheila Bell 553-5790.

Do you dance? Sing? Are you a clown? Use your talent to help make UMSL’s Spring Concert a success. Write to: Campus Box 11387, St. Louis, Mo., 63110.

We have the lowest fares to every airport in the country. Ask your travel agent.

Dix's thoroughbreds race, gain their share of roses

Daniel A. Kimack

The baseball Rivermen, soon to be joined by their baseballed throbbing heart, broke out of the chunky ground yesterday afternoon and are sporting the laurels of a 9-4 record. The packseeders, 4-0 in victory, are No. 1 in the American Baseball Athletic Association, off and running — literally.

UMSL, which has stolen 58 bases in just 13 games, won just two of its last five games. The BeeWoods Tournament in Nacodoches, Texas. But doubleheader sweeps of Southeast Missouri State University and UMSL are sporting the laurels of a 9-4 record. The packseeders, 4-0 in victory, are No. 1 in the American Baseball Athletic Association, off and running — literally.

UMSL, which has stolen 58 bases in just 13 games, won just two of its last five games. The BeeWoods Tournament in Nacodoches, Texas. But doubleheader sweeps of Southeast Missouri State University and UMSL are sporting the laurels of a 9-4 record. The packseeders, 4-0 in victory, are No. 1 in the American Baseball Athletic Association, off and running — literally.

The baseball Rivermen, coming off two quick wins in the first game's 8-5 triumph. Freshman Tommy Ganozzi, one of the team's two pitchers with a 1.61 earned run average, took credit for the shutout.
National powers, weather string out men's tennis

Jim Goulden

The weather as well as strong competition teamed up to dampen the men's tennis team last week. With only three days of outdoor practice behind them, the netters took a rough schedule of opponents.

UMSL was shutout by national powers Northeast Missouri State University and University of Tennessee-Martin, 9-0 and 6-0 respectively. Their losses were quickly followed by defeats to Westminster College, Baker University, and Northwest Missouri State University, before UMSL finally shut down Central Missouri State University 9-0.

The team's record stands at 1-6 now and Coach Rich Rauch said, "When you get off to this kind of start, there's only one way to go." UMSL's dismal record can partly be attributed to extremely poor weather. "We have had only three days of outdoor practice, and the rest have had to be held at an indoor facility," Rauch stated, "and there is no comparison to playing indoor and outdoor."

One bright spot that the team has to look forward to is a host of home matches, weather permitting, against such teams as Southeast Missouri State University, Washburn University, Eastern Illinois University, Westminster, and Principia College. Rauch sees the matches against EIU, Westminster, and Wash U. as important matches. "I'm really looking forward to playing those teams for the second time this year, so that I can see how far we've come," Rauch said.

"We've also had some injuries to do with better players," Rauch stated. That meant that the team had to undergo some changes in their seeding, and when that takes place the weaker players have to take on tougher opponents. With injuries to Bill Valentine, Tom Bruns and Bill Schneider the team has had to go with several different lineups.

Jim Dixon has also been absent for a few weeks. The injuries coupled with the inclement weather have wreaked havoc on the team since practice began in early February. "The conditions are ideal on the indoor courts, whereas in the outdoor you have to battle the elements, so there is a big difference," Rauch said. The team has been practicing at the Jamestown Racquet Club, but their upcoming matches will have to be held at UMSL. This means that the team is in desperate need of some nice weather for both its practices and matches.

The netters hope to notch some victories in the next few weeks and hopefully pull out of their tailspin before it becomes too late to salvage a respectable season. So, as everyone waits for spring to arrive, the men's tennis team hopes some sun shines on their, thus far, gloomy season.

Lack of scholarship dollars, tough competition hamper tennis women

Daniel A. Kimack

sports editor

The Riverwomen's tennis record now stands at 1-6, is deceiving in the worst way. First, both wins were default victories. Second, and more importantly, the three defeats were basings, brushings and beatings.

Weeks from last weekend are a case in point: Friday, UMSL, lost a dual to Evangel College, 8-1, Saturday, the lumps were bigger as Northeast Missouri State University blanked the Riverwomen 9-0.

Monday, though, UMSL won a partial-default match with Saint Louis University.

Certainly, the early season decisions might lead to a quick eight-count for Coach Pam Steinmetz and her players. But assistant Coach Carmen Nawaza isn't quite ready to throw in the towel. "A lot of matches have been closer than the scores indicate," she said. "We get ahead quite a bit, but we just can't get that last point to win.

"What we need is that experience and competitive edge that our own players have," she continued. "The lack of scholarship dollars, however, seems to be the real reason UMSL is having trouble competing with other schools. A lack of scholarship dollars, of course, means none -- you know, slices. And, skepticism it, the lack of scholarship dollars necessitates a lack of players, if not a diminishing number of quality players.

"We're not on the same par as many other teams," Nawaza said. "We only have six players -- all our players are walk-ons. But you have to work with what you have, we have some good kids and we're seeing a lot of improvement.

"We expect to see a lot more improvement and, by the time the season's over, we might surprise some teams. Everyone is real gung-ho."

Even team manager Faith Boone is revved up. Ineligible to compete interscholastically, Boone filled in last week for No. 6 singles player Deb Skerik who was out of town. Unfortunately for the Riverwomen, she couldn't win either. The only victory for the women over the weekend was No. 5 singles player Julie Crespi's 6-4, 6-3 win against Evangel. Sheza McMahon No. 4 singles, lost in a split set to NEMO, 6-2, 4-6.

"Except for those two matches, UMSL fell in straight sets throughout both meets.

During UMSL's partial-default win on Friday, No. 1 singles players Laura Dyer fell 6-2, 6-1, No. 2 singles Kathy Owen lost 6-3, 6-1, and No. 3 singles Dede Martin was rained out after three sets. But the team hopes to have three girls for the meet, giving UMSL its second win, 5-2.

"We're still optimistic," Nawaza said. "We can do nothing but improve, we could become stronger and be very tough." The Riverwomen invite Principia College in today and travel to Southeast Missouri State University Saturday afternoon.
