Science Building Proposal Near Final Word

FUTURESHOCK: The first illustration of the proposed science building at the University of Missouri campuses will be held on campus in a laboratory building.

Grobman says this idea is on the drawing board.

Grobman had earlier said that he had received $1.8 million in state bond money to begin planning and to hire outside architects.

The proposed science center will be fully funded by a competing bond issue.

The actual size and completion date of the center are dependent upon the outcome of the state bond proposal. The university has proposed raising an additional $4 million dollars through another bond issue.

If the state bond proposal is not successful, the university will have to seek other funding sources.

Survey Shows

Business Pros

Highest Paid

CPRI - If the latest survey figures are accurate, students now entering higher education teaching careers should become business management professors at schools that lagged considerably with faculty salaries.

The highest paid faculty professor earned excess $1,800 per year teaching visual and performing arts.

CUPA's annual study, which covers some 10,000 faculty members at over 700 publicly supported institutions, has reported that faculty salaries have increased at a slow rate.

CUPA's latest survey indicates that faculty salaries have increased at a slower rate.

The survey also found that doubling averages will generally make more than other public institutions.

Assistant professors earn significantly higher salaries than full professors.

The survey also found that doubling averages will generally make more than other public institutions.

Show Biz Not For Everyone Nina Blanchard

Loren Richard Klaph both voices.

If only I had 10 books 15 years of my career. I'm not sure, but the books I read are more valuable than the ones I do not.

One of my favorite questions was asked by UMSL student James Smith. James, who is from St. Louis, wanted to know about the different types of questions I received over the years. I'm not sure if he knew it, but I think he did.

Another of my favorite questions was asked by UMSL student Kim McGee. Kim, who is from St. Louis, wanted to know about the different types of questions I received over the years. I'm not sure if he knew it, but I think he did.

The Current will publish its third annual orientation issue on Mon, Aug. 13. This special issue will be one of the largest issues we have ever published. It will feature information about the campus and the surrounding area. It will also feature information about the admissions process and the financial aid options.
