Senate to vote on bankruptcy plan

A proposal that would allow students to declare "academic bankruptcy" will be considered by the University Senate Tuesday.

The Senate's Curriculum and Instruction Committee will make the recommendation at the Senate's monthly meeting. The proposal would be effective beginning with the fall 1985 semester.

The proposal would work this way:

On any one occasion during his or her academic career, a student could declare academic bankruptcy. To be eligible, the student would have to have taken at least 45 graded hours and would complete at least 30 hours after bankruptcy. One or more consecutive semesters, up to all undergraduate work prior to the request, could be declared under the bankruptcy.

Grades of A, B, and C would be treated as "credit only" towards graduation. Grades of D or F would not be accepted for credit. Under the plan, students could declare "academic bankruptcy" for one or more consecutive semesters.

grades received would still be recorded on the transcript but those classes taken before the declaration of bankruptcy would not be included in the student's cumulative GPA.

"Student Academic Bankruptcy" would be noted on the transcript. So in effect, students could "start over" with a new GPA, while still keeping the credits gained from past coursework.

Linda Tate, a member of the C and I committee, said that the committee had been working on the guidelines for about two months, with input from all the curriculum committees from various departments and from faculty members.

I would think it would pass," she said, "because all the departments have agreed to this revision."

Good sex!

Dr. Ruth dispels myths, encourages literacy

Johnn Tucci reporter

Dr. Ruth Westheimer, famed psycho-sexual therapist, presented a lecture on Monday, April 8 at UMSL's J.C. Penney Auditorium.

Westheimer is noted as a pioneer in the field of media psychology. She is currently the hostess of "Good Sex! With Dr. Westheimer," a television show on the Lifetime cable television network. Dr. Ruth is also a frequent guest on the "Tonight Show" and "Late Night with David Letterman."

Dr. Ruth was delayed because her flight from New York, where she appeared on "Good Morning America," that morning, was late. Though she arrived about 30 minutes late, she was cheerful. She said she was in a good mood because she recently appeared on the cover of People magazine. She noted that she was the oldest woman to appear on their cover.

Dr. Ruth also mentioned that for one week in June she will be on "Good Morning America" as a part of a series the show was planning. She will soon be a guest on the "Tonight Show," hosted by Joan Rivers. Westheimer also has relatives in St. Louis who came to see the lecture and visit her.

After explaining why she was in such a good mood, Dr. Ruth expounded some of her philosophy. She stated, "Sex is not everything in a relationship! There are other components, like caring, responsibility, intellectual and emotional stimulation and devotion."

Dr. Ruth stated that she wanted to make everyone "sexually literate. The more we educate, the less we will need sexual stimulation and devotion."

She continued by saying that she was not "for going into a kindergarten and saying 'today is the first day of spring, now pull down your pants, we are going to learn how to masturbate.'"

She claims that the vast majority of unwanted pregnancies are due to sexual ignorance. Dr. Ruth said that she had heard many stories about people who had unwanted pregnancies and couldn't understand why. One couple couldn't understand it because it was "their first time."

Another was confused because they did it standing up. Yet another woman was perplexed at her pregnancy because she claimed to have taken a Coca-Cola douche right afterwards.

And still another couple was confused because they said that they felt no orgasm. Dr. Ruth said that "if these people would have been sexually literate then they probably wouldn't have found themselves in the situations they were in now."

"You can send a man to the moon, have the best technology around, but we have not yet created the perfect contraceptive," Dr. Ruth declared. However, there are two contraceptives that she would recommend: the condom and the diaphragm. "True that they are not 100 percent effective, but they will be the ones that I will talk about until we find something better," stated Dr. Ruth.

Westheimer came out particularly strong against the contraceptive sponge. She also contended that she worked with a doctor at Cornell University who said not to use the sponge because there is a danger of toxic shock syndrome. She also contended that "it's too expensive for young people, hence, they will use it more than once, to save money, and that will lead to infection."

On the abortion matter, Dr. Ruth declared that "abortion must remain legal in the event of

Student honored for heroism in fire

Al Hauswirth, an UMSL student, received a proclamation from the Missouri House of Representatives for his part in helping a six-year-old when her home caught on fire.

Hauswirth rescued six-year-old Latonya Chomn from her burning home shortly after midnight on Jan. 8, 1985. He entered the burning building at 2:09 a.m. and rescued her.

In the proclamation, the Missouri House of Representatives paid tribute to Hauswirth "whose recent heroic efforts have earned him the respect and esteem of the entire comm-

GET DOWN!: UMSL students enjoying the music of the band Vision last week at "Wednesday Noon Live." The students said they learned the dance while in Florida during spring break.
Henschke returns from Brazil

Mention Brazil to John Henschke and his first reaction will be a smile. Behind the smile, he'll probably be thinking about his next trip to Brazil. Henschke, associate professor of foreign languages at UMSL and Missouri Cooperative Extension Service continuing education specialist, spent three weeks in Para, Brazil, returning to St. Louis on March 16. While in Para, Brazil, he was recognized for his efforts to serve the community education conference. The Federal University in Belem, Para's capital city, is planning to expand that program to meet the needs of its adult population, and that, he said, "was the impetus behind the trip, and the reason Partners paid my way down there and back."

Missouri, U.S.A/Para, Brazil "Partners" is a non-profit organization, one of four state-wide partnerships with a national headquarters in Washington, D.C. Missouri/Para Partners' goal is to foster social, educational, economic, and cultural development between the Midwest region and its South American sister-state. Henschke furthered the educational part of that goal by attending the community education conference.

"I spoke on the topic of community education," he said. "I presented the notion of how we see adults as being different kinds of learners than children. The implications of that, and how they get their education, vary with the sides in their community education system." When he wasn't presenting his ideas on adult education, Henschke had a chance to interact with his South American counterparts. The dedication Brazil has for teaching is evident under adverse conditions globally impressed Henschke. "The teaching materials are very limited at the community education centers," he said. More often than not, Henschke said, a textbook and a blackboard is all the materials available to a Brazilian teacher.

"The teachers in the community education schools got the American equivalent of a $10 a month. And most of those teachers, as well as those at the Federal University, are working two, three and sometimes four jobs just to make ends meet. They have to have a tremendous amount of dedication to do that. I admire them for their tenacity," he added.

In addition to attending the community education conference, Henschke, with the help of an interpreter, taught a course on methodology for educating adults. But before Henschke could start teaching, he first had to bridge a gap, the gap that exists between different cultural and language backgrounds, but also because of attitude.

"They look at our country as being 'the big wolf in the forest.' Their dollar rises and falls according to what the American dollar does," he said. "They perceive that American dollar as the almighty 'wolf in the forest' and they don't want to be gobbled up by that wolf. So they said, 'One of the first questions they (the students) asked me was, 'Are you for another dose of puerilism that we've experienced in the past?'" Henschke said. "I basically told them I wasn't there to be 'in your face' or on them. I was there, depending on them to learn as much from them as they did from me, if not more." Once he established a give-and-take atmosphere, Henschke said, the course took off. "They opened the door of their hearts, and let me come in and participate and learn with them," Henschke said.

The course on methodology for educating adults was so successful in fact, that the Federal University is making plans to install the course into its permanent curriculum. But, that wasn't the only outcome of Henschke's trip south. "We in Extension and here on the campus want to do what we can to lower the (student) drop-out rate. They [in Brazil] are concerned about their drop-out rate. So we are going to do cooperative research on that," Henschke said.

Plans for cooperative research were not the only thing Henschke returned home with. When his plane landed at Lambert Field, Henschke was loaded down with tropical fruit, Brazilian nuts, gifts, clothes, and the memories of friends and countless moments.

It was a tremendous growth experience," he said. "You know your practice as an extension educator as well as professor of adult education, will be forever changed. You learn so much. It's an experience you wouldn't trade your life for."
Research leaves granted

Chuck Wiethep

Ten faculty members have been granted research and development leaves to be taken during the 1985-86 academic year. During the leaves, the faculty members will not be required to teach, so that they can devote their time to major research projects and specific research.

James Chicks, assistant professor of social criticism, will be doing research with a kineticist. The work will involve the measuring of the mechanics of thermal rearrangements of hydrocarbons.

Richard Cook, associate professor of English, will write a book about American literary criticism. Besides Kazin, the book will feature the works of Edmund Wilson, Lionel Trilling, Irving Howe, Van Wyck Brooks, and F.O. Mathiessen. All are critics who wrote in the period spanning 1920-1970 in a style which complemented then-popular formalist criticism. Cook, who is one of his colleagues at the research in the New York Public Library where all of Kazin's personal and professional papers are housed.

Michele Hoyman, assistant professor of political science, will write a book about the period in which she received her Ph.D. She is currently working on a book about the surface of metals with gates.

Richard Schwartz, professor of astronomy, will attend a space workshop at the Santa Barbara Institute of Theoretical Physics, which is located in the University of California at Santa Barbara. The seminar, which will be held in the spring, will be on the theory of star formation.

Sharon Levis, associate professor of economics, will write a grant and writing book on the social and economic determinants of scientific productivity.

Eugene Meehan, professor of political science, will be working on a new book and finishing an empirical study on non-verbal behavior and communication. He will also prepare a grant application.

Lyman Sargent, professor of political science, will work on the understanding of the ambivalence in American foreign policy toward the Middle East. He has done previous work studying this subject.

John Schrievels, assistant professor of chemistry, will work on an apparatus he has been preparing for the past 1 1/2 years. From this he will begin research studying the surface of metals with gates.

Award recipients selected

Thirty-two students have been selected recipients of this year's Student Affairs Awards, and fourteen more have been chosen finalists for the Student Life Award.

The students were selected from among 150 nominees according to Dan L. Wallace, assistant dean of student affairs. Students chose the basis of their participation in school activities.

The Student Life Award Honor- in-excellence in teaching and over all contribution to the university.

The selected students will be honored at a reception on April 25, 3 p.m. in the J.C. Penney Room, St. Louis. The additional students accepted to the Who's Who in College and University Faculty are being recognized, and the Student Life Award winner will be announced.

Finalists for the Student Life Award are Dr. Ruth Jenkins, nursing; Dr. John Bowler, psychology; Dr. Harry Gaffney, evening college; and Dr. James Mathis, business administration.

Students selected for the Student Affairs Award are:

Ken Andreschein, Rod Ahld, Susan Adrian, Tighe Anderson.
Barron, Ben Barry, Carll Brown, Cherry Cannaday, Susan Cooke, Brenda Barron, Ben Barry, Susan Cooke, Brenda Barron.

Maxine Stokes

Maxine Stokes

She holds a bachelor's degree from the University of Missouri-Columbia and a master's in counseling from UMSL. She joined the UMSL counseling center in 1974 and has served as counselor at UMSL since 1977.

Stokes has been director of academic advising and assistant dean of students since her undergraduate studies in 1977.

Stokes said that in addition to her current duties, she will be involved with alumni relations, making a major campus contribution to the University of Business Administration.

Stokes added that she would also be establishing communications with the alumni to find out what positions they are holding and whether they are doing in the community.

Stokes said she would also be expanding her work in the area of undergraduate advising.

"I hope to strengthen contacts with students who are going to the St. Louis area, especially the community colleges since many of our students come from there," Stokes said.

Stokes is a member of the UMSL Business School Alumni Association board of directors and has served as a member of the overall UMSL Alumni Association board for eight years.

"They cited the fact that their actions were "nothing more which prevented a terrible tragedy."

They went on to say, "House-"n herths has served as a source of inspiration for countless others, whom he has touched by carrying the highest qualities of bravery and self-sacrifice."

"The resolution was submitted to the Missouri House of Representa- tives Rep. Russell Hauswirth was also honored at Russell Elementary School.

Interested in joining the Current staff next year? If so, drop by the Uni- versity Center Information Desk or our offices at the Missouri Metal Office Building (that building on the north end of campus). It is a maintenance shed sit- ting next to large piles of wood. Pick up a copy of our application. Fill it out. Mail it back or drop it in. We'll call you.
MoPIRG: Fee method is wrong

Recently students here have been besieged with requests from sign petition and candidates for MoPIRG, a public interest research group that wants to establish a chapter at UMSL. The group is trying to get the issue placed on the Student Assembly elections. They say they’ve gotten about 1500 signatures so far.

MoPIRG is a lobbying group that would work for issues such as more state aid for higher education, better financial aid, and other gains for students. This proposal is annoying for one very good reason. As suggested, MoPIRG’s services would cost each student an additional $3 when paying fees. Then MoPIRG’s officials say, a student was not satisfied with the group’s work, the $3 would be refunded.

But MoPIRG’s fee service for this type of thing is nothing new — and we don’t disapprove of that fact that these organizations need funds to accomplish anything.

But MoPIRG’s method of pay, refund later is a rather sneaky way of getting students to pay the fee. MoPIRG needs to honestly count on the assumption that many students won’t go to the trouble of collecting the fee if they aren’t satisfied. Think about it — if you had to try to raise all the way over to the cashier’s office, or send MoPIRG a letter, or take some other action to get that $3 back, would you try the time? Probably not, and that’s what will make MoPIRG prosper.

We’re not arguing that MoPIRG might help students, and the university as a whole. We’re sure their motives are good, but we just don’t agree with their method of collecting fees.

What needs to happen? When the Student Assembly meets this week, they can look at the proposal before voting on it. If they were to change the proposal from a refundable fee to a set fee of $3, students would be voting on a fair proposal.

If each student paid the $3 fee, with no chance of a refund, at least MoPIRG would have to offer satisfaction. They would be bound to more closely watch the wishes of the students they were representing. At least students could decide, during the election, if they felt MoPIRG’s services would provide worth an extra $3.

If this change is not made, then we would have to urge students to vote No on the proposal. It is not fair to impose fees without protest. And, then we would support the idea of putting the proposal on the ballot for students to decide.

Barnes recalls accomplishments for re-election

Dear Editor:

This is to announce that I will be a candidate for re-election to the presidency of the Student Assembly for the month of April. I am also proud to announce that Hillary Clinton, one of the student leaders in the country, has agreed to be my running mate on the UMSL Students ticket.

I said when I was first elected last year that my dream was to see a new era of student activism, less radical and obnoxious than the 1980s, but with the same spirit and commitment to a better campus and a better world. Many, including myself, thought that a quixotic pipe dream, but it was a hope I shared in Missouri, Shelby and I asked the Student Assembly to commit to a major campaign for nonviolent, noncooperation with that system. In one of the proudest days of my administration, the Assembly (after heated debate) put aside ideological differences and joined in a unanimous endorsement of our divestment proposal. Similar scenes were repeated when governing bodies of Student Associations in Columbia and Rolla joined the campaign with near-unanimous votes.

None of this would have happened had Bishop Desmond Tutu won the Nobel prize or that a daily campaign of civil disobedience by members of Congress (and other legislators) been repeated. It shows that the South African embassy would bring this issue into the mainstream.

But we pressed ahead and won the first major change in the university’s investment practices in this area of the world.

We didn’t stop there — repeated opportunities at first and foremost, staff members here have the chance to associate with other college staffers and exchange ideas and information. Second, we all gain from the insights offered by professional, working journalists who will be speaking.

And finally, as hosts, we can showcase our school and our community. Missouri is a major force in the annual McNCA competition. We are competing against other schools in the same number enrollment (UMC, Saint Louis University, UMKC and others), and the entries are judged by professionals. We get direct input from them on what we’re doing right, wrong.

As editor, I’m very proud of the staff, whose entries we’ve submitted. And that’s not all — I’m also proud of all our other staff, who’ve worked hard to make a mark in each edition of the Current. They are students, not professionals, but I feel they’ve worked as professionals would.

We hope this year’s conference will be collections of staff students this year — no award or more, we’ve had fun planning the event and we should have a good time. I hope you’re forced to vote Yes on this proposal.

Dr. Ruth

contraceptive failure. She claimed that if it was made illegal then she believed that only the rich could afford to have an abortion because they could fly to another country and have one. However, for the poor it would mean having another horror story about coat hangers and the like.

Dr. Ruth emphasized her belief that "if I prevent one unwanted pregnancy by continually talking about contraceptives then I have done my job."

During the text of her lecture she told the audience that she wanted a question in reference to the "G Spot." When asked that question, she explained "that some have claimed that there is a spot in the vagina that when touched would automatically cause them to ejaculate." She also told the audience that she claimed that she had talked about the location of the "G Spot." She said that she didn't want to incorporate the topic into the text of the lecture, and consequently, she would not speak about it further.

"It means the adventure of seeing," she said.

The audience was returning to the Victorian myth circulating among the public about what is happening is that people are celibate, and there is no one doing it at all. Hence, Dr. Ruth claimed that she prevented one abortion because they were celibate.

Decres Hart's Youth service

from page 4

Dear Editor:

Last year, with Ronald Reagan in the cold war-heating popu-
larized by demagogues like Harry Truman and Joe McCarthy, in the 1940s and 1950s and Walter Mondale's head hopefully stuck in the equally discredited welfare state policies of Franklin Roosevelt from the 1930s, it was not difficult for Gary Hart to pre-
sent himself as an alternative and even as a vaguely libertarian alternative.

Yet, Hart's call for enlisting young Americans in the new and compulsory "national service," as he likes to think of it, demonstrates that he is no differ-
ent from the other welfare state liberals. In fact, in the Cur-
rent article of April 4, "Hart calls for required national youth ser-
vice," exposes the evil of the two major planks of welfare state policy: the first being that equality and uniformity are virt-
ues for their own sake. By their egalitarian reasoning, Hart and those of his ilk conclude that slavery is a good thing — so long as it applies to everyone equally.

The second is that majority or mob rule is a virtue in its own sake. Hence, the notion (exists) that slavery is good, since a Gallup Poll shows 71 percent of the public desiring to enslave young men and 54 percent desiring to enslave young women as well. What this poll really shows is the tremendous amount of hat-
red and resentment some of the older members of our society hold toward those in our ten-
der years. According to Sen. Hart, "A\n\nsystem of national service — including both military and non-
military programs — will further enrich young Americans to return some of the profits of the military investments they have received from our society."

What Hart is really advocating is a new sys-
tem of national slavery — includ-
ing those of us in our twenty-
three years. Yet, Hart manages to say it in April in a

U.S. Senate, the primary campus government. And, just last week, a petition initiated by students outside the governing structure to enlist the professional staff and experts of MoPIRG in fights for student rights (such as for financial aid) by forming a campus chapter with a refundable fee received over 200 signatures in its first day! This past weekend, I attended an UMSL fraternity party with the "We Are the World" theme. A portion of the profits was ear-
marked for the USA for Africa fund.

It's clear to me that UMSL students are really starting to see the serious role in the struc-
ture of our society, in between their lives and the world around them. It's also clear that we're reaching out to other social movements and coalition-based on shared inter-
ests and values. Black students are working with students with community groups, students with community groups, students with community groups, students with community groups, students with community groups, students with community groups, students with community groups, students with community groups, students with community groups.

If you're for support for re-
election for two reasons. First, I want to continue to build on these important developments, to nur-
ture and initiate structures which will expand student influence and protect the entity we've began to develop. And second, we have a lot of unfinished business to attend to!

Task forces are now in place and conducting research on long-
range problems. We're planning with the bookstore and the student activi-
ty fee. We are going to continue to

Thursday

The UMSL Women's Studies
program will conclude its winter semester
series on "Black Women's Perspectives" with the first "Judith
Pearson Memorial Lecture" at 7 p.m. in Room 126 J.C. Penney
Building. Carolyn Payton, Dean of Counsel-
ing and Development at Howard
University, will be the guest speaker. Her lecture, "Every Work into
Judgment," will focus on the comparable
worth issue of sex-based discrimina-
tion. Call 553-5561 for more information.

The UMSL Symphonic Band
will hold its spring concert at 8 p.m. in the
Education Auditorium, Marillac Hall, South
Campus. The band, conducted by Terry Austin, will perform such
works as "Sea Songs" by Ralph
Vaughn Williams and John Philip
Snatz's march the, "Ancient and Honorable
Artillery Company." Call 533-

5980 for more information on this
free concert.

An "International Seminar on
"U.S. and Soviet Relations: The Old
and the New" will be held at 1:30 p.m.
in the McDonnell Conference Room,
331 SSB. This week's guest speaker
will be Samuel Sharp, American
University. The seminar is sponsored by the
UMSL Center for International
Studies.

The UMSL Women's Center
will conduct a lecture on "Auto Maintenance
for Women" at noon in
Room 107A Benton Hall.

The UMSL Math Club will sponsor the film "Sorting Out Sorting" at 2 p.m.
and 7 p.m. in Room 300 Clark Hall.

Student Applications for positions
on Senate Committees are available through
April 19 in Room 262 University
Center. Applications are due on
April 19, by 5 p.m.

The UMSL Physics Club will pre-
sent a discussion on "Black Holes
and General Relativity" at 2 p.m. in
Room 504 Benton Hall. This week's
guest lecturer will be Dr. Bender,
Washington University.

The Accounting Club will meet at
1:30 p.m. in Room 216 SSB.
This week's guest speaker will be FBI
agent Steve Kettner.

The Department of Economics and
the Center for Metropolis Studies is sponsoring a discussion on "Comparing Monopoly and Competition" at 1:30 p.m. in the McDonnell Confer-
ence Room, 331 SSB. This week's
speaker will be A. Ross Sheppard,
University of Missouri-Kansas City.

The "Saturday Morning Health Talks" series being sponsored by the
UMSL Wellness Network presents a discussion on "Creative Aging" at 10 a.m. in Room 216 Mark Twain Building. This week's
speaker will be Mary Higgins.

The UMSL Program Board pre-
sents "The Big Chill" at 7:30 and
10 p.m. tonight and tomorrow in Room 101 Starlader Hall. Admission is $1 with a valid UMSL student ID and $1.50 for
general admission.

The University Program Board pre-
sents "The Big Chill" at 7:30 and 10
p.m. in the McDonnell Confer-
ence Room, 331 SSB. This week's
speaker will be A. Ross Sheppard,
University of Missouri-Kansas City.

The UMSL Peer Counselors will present a workshop on "Managing
Your Time" at 2 p.m. in Room 427
SSB. Learn how to control the use of
community coordinator of the National Kidney Foundation. Timework will be given for personal questions and
answers regarding this week's subject.

Some events will be held on cam-
pus April 15-19 in conjunction with
Disability Awareness Week. Here
are the activities being held around UMSL:

Monday, April 15
The band Horizon will perform at
11:30 a.m. in the Summit Lounge. Sue
Adrian, president of the UMSL Dis-
abled Student Union, is lead vocalist
for the group performance.

Tuesday, April 16
Disability simulations will be held from
9 a.m. to 1 p.m. During this event
able-bodied people will simulate a dis-
ability for a day by renting a wheelchair
or crutches. Equipment will be avail-
able in the J.C. Penney Building
Lobby.

The fifth annual Cross Campus Wheelchair Marathon Race will take place at 2 p.m. from the library parking
lot. This year the race will be like a
scavenger hunt, with contestants hav-
ing to pick up and bring items from dif-
ferent areas of the campus before
being able to cross the finish line. Sign
up in advance in Room 301 Woods Hall or in the J.C. Penney Lobby on
April 16.

Wednesday, April 17
A wheelchair basketball game will take
place at noon in the Mark Twain Gym. The UMSL Riverwalks will take
on the Rolling Rams.

Friday, April 19
The Meritorious Service Awards Luncheon will be held at noon in the University Center’s Hawthorn Room. Kenneth Locke, professor of business
administration, will preside over the ceremonies.

Disabled Awareness Week is spon-
sored by the UMSL Disabled Student
Union and the Division of Student
Affairs, with support from the Seven-
Up Co.

Sports
Tuesday April 16
Men’s Golf vs. St. Louis University
at 12:30 p.m. at Norwood Country
Club.

Women’s Softball vs. Linden-
wood College at 3 p.m. on the Mark
Twain Field.

Wednesday April 17
Men’s Baseball vs. SIU-
Edwardsville at 3 p.m. on the Mark
Twain Field.

Next Week
The University Players will present "Star Spangled Girl" as their spring pro-
duction at 8 p.m. on Friday, April 19, and 2 p.m. on Sunday, April 21, in the Benton Hall Theatre. "Star Spangled Girl" is a comedy about two male roommates who live next to a young girl. One of the roommates falls in love with the girl, while she falls in love with his friend. General admission to this play is $4. Call 553-5733 for more information.

Current
Last in America, lack certain continuity
Steve Kleerman

There are those among us who simply can't sit through an episode of "L.A. Law." We all know Larry's usually about to do something incredibly stupid—something that gets her into a lot of trouble. If, for some reason, Larry falls into a morass, it's a safe bet that some unfortunate bit of luck will befoul her. It's difficult watching a television show or a movie when we know bad tidings are about to be bestowed upon our protagonists.

Albert Brooks' latest film, "Lost in America," is preoccupying in that we realize within the first 15 minutes of the film that the protagonists, whom we've already grown to like, are bound for misery.

Brooks, who also stars in the film and co-wrote the screenplay, does a nice job of jabbing back at the middle-class paradigm. However, "Lost in America" concentrates more on debunking various American cultural ideals than on advocating the increasingly mainstream tendencies of the protagonists.

See "Film," page 9

LOST MOVIE: Albert Brooks stars in the new movie "Lost in America," Brooks, who plays David Howard, decides to drop out of society with his wife, Linda (Julie Hagerty).

Mattson talks about Swiss college students
Kris Schulte

"In Switzerland, young people choose between high school or entering an apprenticeship."
—Yvonne Mattson

There is generally a gap between the students in high school and those in apprenticeships. Peer pressure is also great at the high school age, said Mattson. All high school students must study two foreign languages. Students usually choose French and English in the German-speaking sector of Switzerland.

Academic studies are emphasized in the Swiss high school, Mattson added. "In a Swiss high school it is almost unheard of to have a basketball team or an art's class," she said. "The Swiss high school classes are more of a preparation for the university, therefore the classes are generally tougher than in an American high school, and some of the Swiss high school classes are actually college level classes."

After graduating from high school at age 18 or 20 the Swiss student may enter a Swiss university. "Not all students who graduate from high school go to the university, but almost all who do will stick it out and graduate from the university also," Mattson said. "Virtually all who enter the university intend to complete a particular degree, and they are more serious in their pursuit of their degree."

In the government-run universities in Switzerland, the government pays for all student tuition. The student must only pay approximately $140 per semester for student insurance and for student activities fees. There are no on-campus housing units or dormitories, so most students rent rooms near the campus or commute to school by train. Few, if any students own automobiles, but they receive discounts on train tickets. "Because most students commute to class, there is little after-school mingling," Mattson said. "There are also few after-school activities planned and therefore students generally do not stay around campus for long after classes."

"Swiss students are generally more serious and disciplined than the American students that I have been around," Mattson said. "They are also less in a hurry to finish their degree."

In Switzerland the order in which the classes are taken is not necessarily as important as it is in an American university and the number of credit hours taken each semester is also not as critical as in America. Students may choose to have a lighter course load per semester and simply extend the time of obtaining that particular degree from 4 to 5 or 6 years.

"The most popular degrees are the medical degrees. The standards for entering these programs are so high it is difficult to be accepted into these fields," Mattson said. "Most students will usually go into the liberal arts field and many will become teachers or translators," she added. Although some differences between Swiss and American universities exist, many similarities remain between Swiss and American students, she said.

A DIFFERENT LANGUAGE: Yvonne Mattson teaches German to UMSL students who attend Evening College classes.

Textbook industry has jobs for English majors
Ted Burke

"You're an English major? What kind of job do you expect to get with an English degree?"

How many times have English majors heard the above statement or something similar to it? I lost count after the first semester of my freshman year, and I must admit, I've asked myself that question numerous times. This year I found a few answers by looking to the textbook publishing industry.

One of the major health science and college textbook publishing houses is located right here in St. Louis: the C.V. Mosby Co. The company's 2,600-acre campus in St. Louis is home to authors such as Anthony Thibodeau, and Beck's "Textbook of Anatomy and Physiology," 11th edition, and Kaplan and Peache's "Clinical Chemistry," as well as other college and professional level publications, and more than 20 professional journals.

According to Mosby's internal communication manager, Jackie Dougherty, entry-level positions in textbook publishing include those of editorial assistant, manuscript editor, and copywriter. Parchman then briefly describes the responsibilities of each position.

Editorial assistants are employed in the editorial acquisition area, which is responsible for securing manuscripts the company can publish. This is done by contacting experts in a particular field (e.g. doctors, nurses, scientists, professors, etc.) and then determining if the professionals are interested in authoring and working out the details of producing a book. Clerical work such as typing and assisting the editor and assistant editor in their search is also involved in this area.

"This is a good position to start in," Parchman said, especially if one is interested in moving up to the position of assistant editor, and eventually the editor's position itself.

Parchman informed me that one way editors and assistant editors develop certain books is by contacting people who work in an up-and-coming field. She pointed out that a few years ago, plastic surgeons may have been contacted by assistant editors and editors to write books on their profession when the procedure was young.

Manuscript editors are responsible for putting a manuscript into its final, publishable form prior to typesetting. They do this by making sure that the manuscript's writing, grammar, punctuation, and logic are correct. This is important because very few changes are made after typesetting a manuscript. Copywriters are mostly responsible for writing ads and describing the features of available publications.

Elliot Easton
Change No Change

**

On "Change No Change," the versatile Cars guitarist Elliot Easton is truly exceptional, and especially the effervescent "Help Me." He pinged a heavy R&B on "Tools of Your Love," rocking in a fashion similar to that of Osvaldo Mellencamp's "Hurt So Good." Reflecting an even rougher, edgy sound, traces of X and the Romes surface in "Change" and ("She Made It) New For Me." ("Wearing Down Like a Wheel") is a singer-driven, airplane, (...) guitar work snags on a Copeland-like percussion track, a number clearly distinguished from the rest of the album.

Though not a provocative stroke of genius or an awe-inspiring masterpiece, "Change No Change" is a showcase of the innovative ability of Elliot Easton on guitar, a vastly understated element in the Cars success.

Swimming may increase level of body's energy and vitality

Kim Mueller

from page 7

What is available in this place with the warm climate? Men and women's locker rooms provide for changing into swimming attire, and towels are available in the locker rooms. You are just about ready to begin. Proceed down to the shallow end of the pool and pick a lane that is your speed. There are slow, medium and fast lanes. You don't have to worry about speed, because you're swimming can be done at any pace.

The next part is up to you. Swimming is refreshing and invigorating and a lot of fun. Hippocrates once said, "Exercise strengthens while inactivity wastes." Swimming provides special benefits of buoyancy and water resistance so that in the water you will experience a loss of 90 percent of your own body weight. This will allow you to swim laps for fitness and avoid the stiff and sore muscles from other forms of exercise. Swimming will help you build your stamina. It is one of the best forms of exercise around, because it works on almost all muscles of the body. Your muscles and joints will move with precision and this will give you a greater range of motion making swimming a comfortable exercise.

Give swimming a try. You should notice an increased level of energy and vitality after swimming, and it is relaxing. What better reasons for taking up this exercise.

Come down to the warmest place on campus. The faster you move it - the faster you lose it!

Mahfood, Rivermen kick Mules, 5-4

John Conway

Mike Mahfood hadn't been having one of his grandest days at the plate. He was 0 for 5 before his 6th-inning grand slam. McKinnon, who hit the Rivermen's second highest percent of batting average, had grounded to third in the first inning, grounded to third again in the third, and was forced to left field in the fifth, grounded to third once again in the sixth, and forced to third in the eighth. The runners were not coming up roses for Mahfood, to say the least. He flied out on the UMSL baseball diamond that evening, he would be the savior of a seven-run winning run with a single in the 10th inning to rescue a 5-4 victory that was almost lost to a not-so-good Central Missouri State University. Stranded baserunners, runnerscouts, infielders, and new costly errors prevented the Rivermen from turning their opponent, and allowed CMSU to make a contest out of what should have been an UMSL-dominated game. "We're not getting a consistent effort right now, explained Coach Jim Dit. "The team is not as aggressive as they need to be right now. Our infield needs to do this the most. There were a few errors called today that we didn't�."

For more of Mahfood's first five innings, UMSL held a tight grip on the Mules attempts to muster anything. An infield hit induced by See "Baseball," page 11

Vitale leads Golfers

Daniel A. Kimack

sports editor

UMSL Riverman golfer Jerry Vitale shot a team-leading 84 to pace UMSL into seventh place at the Riverman Invitational golf tournament held Monday afternoon.

Vitale's score was 9 shots over the medalist-winning mark of 75. As a team, UMSL shot a 347, 27 strokes off winner St. Louis University's 320. Other scores included:

Western Illinois, 312; Eastern Illinois, 326; SIU-Edwardsville, 330; Missouri-Iolla, 343; Washington University, 346; Principia, 367; Quincy, 379; Lincoln University, 392; McKendree College, 398; and Blackburn, 400.

Over the weekend, UMSL placed seventh in the Southern Illinois University-Edwardsville tournament. Vitale again was the leader at 81, while the Rivermen combined for an overall 336.

"I wasn't pleased with either of the two scores," said Coach Jim Niederkorn. "Perhaps my expectations, at least of my No. 1 and 2 players (James McNamara and Bob Cisell respectively) were a little higher than what I thought they would be.

"I guess I see things they are capable of but not reaching yet."

McNamara shot an 88 in the Riverman tournament and 84 at the Riverman Invitational and shot 85 at SIUE. "But I've been very happy with the play of Vitale," Niederkorn said. "He didn't make a lot of trips with the last team, but he is steadily improving."

Rauch leads netters past Miners, 7-2

Daniel A. Kimack

sports editor

The UMSL tennis Rivermen, soon becoming this year's Cinderella team on campus in the early season, improved to 1-3 overall last week with a 7-2 match win over the Miners of Missouri-Bolla.

UMSL won easily in its first Intercollegiate Athletics Association battle, losing only at No. 2 singles and No. 1 doubles. The Rivermen won just one conference match a year ago (against Central Missouri State) while compiling a miserable 1-15 overall record.

"We're much improved as far as the record shows," said Coach Rich Rauch. "But in my thinking we don't have that much more talent than last season. We just have more spirit, more of the intangibles. The kids believe in themselves and have a winning attitude."

Brad Compton certainly was in the right frame of mind Monday, as Greg Ramsbottom refers to the MIAA Round Robin Tournament that UMSL will host on April 12 and 13. Although the
Top doubles team leads nettles

Jim Goulden
sas. sports editor

One can accuse women's tennis coach Pam Steinmetz of being a fair-weather coach. Steinmetz is struggling through a very humbling season so far, but has refused to knock her team or make excuses.

"We don't really match up well with the other teams," Steinmetz admitted. "But we are capable of battling anyone." UMSL dropped matches to Southeast Missouri State University and Lincoln University by identical 9-6 scores.

"We lost all our games, but Anne Pearce and Ann Linkei played their No. 1 doubles team tough," Steinmetz said. Pearce and Linkei pushed the SEMO team to a 7-5, 6-3 matches before matches to Southeast Missouri with the other fallling. They battled to the final and Linkul pushed the admitted, University by identical battling very humbling season so far, but make excuses. has refused to knock her team or

Steinmetz lamented.

"We lost all our games," Steinmetz said. Pearce and Linkei played their No. 1 doubles team tough. They battled to the final. Linkul pushed the admitted, University by identical battling very humbling season so far, but make excuses. has refused to knock her team or

Steinmetz lamented.

Anne Pearce has so far shown that she is the leader of the team, and has garnered a lot of Steinmetz's attention. The problem that Steinmetz and Pearce have to contend with though is the lack of scholarships afforded the UMSL team. "We don't receive any (scholarships) and that hurts, because if I had just two we could compete with anyone in our conference," Steinmetz lamented.

"Of now it is the individual sports that are suffering the most at UMSL. They receive no scholarships, and they also have to rely on their players alone to produce results. "In the team sports you can rely on a coaching strategy or on the team sport alone," Steinmetz noted, "but in tennis there isn't much you can do, they are on their own."

Don't think, however, that Steinmetz is going to lie down and just throw in the towel. Instead she looks forward to each match and realizes that if the team does not win that something good will come out of the results. Steinmetz was as happy that Pearce was able to beat the third ranked player in the conference as she would have had the team won.

The same way last week, it would have been easy to understand Steinmetz's feelings if she was upset or frustrated with her team. But Steinmetz was pleased with the way Pearce and Linkei had battled in their match with SEMP. "I was really surprised at how well they played. They did a heck of a job," she said.

Steinmetz also admitted that there was probably enough money in her budget to schedule some out of town matches, but that would not be easy to do so right now. "It wouldn't accomplish anything if we went to Florida and couldn't compete with the teams," she said.

Despite her two sets back last week Steinmetz is looking forward to this weekend when they will take on teams from Missouri Western University and Creighton in a triangular match at St. Joseph. "We learn something each time we play so it is not time to get down on ourselves," she said.

Following that match UMSL will return to host their own quad meet April 19 and 20. Then Steinmetz and her team will not only to improve their games, but also come up with a victory.

Baseball

from page 10

The scrappy play of shortstop Ron Aiello kept the CMSU bats from landing anything in the Rivermen outfielfd during the early stages of the game.

Kim Herr, the starting hurler for the Rivermen, turned in a brilliant performance. In the first five innings for UMSL, Herr shut out the Mules allowing only one hit and walking none.

Getting on the scoreboard, though, wasn't easy for the Rivermen either. The Rivermen stranded 10 basemen during the course of the game, including three in the second inning. When UMSL finally did score, they limited themselves to just one run, scoring each of their five runs in different innings.

"It's just a question of our aggressiveness again," Dick said. "We're just not hungry enough to go out there and put teams like this away."

After 5 innings of a scoreless deadlock, the Rivermen began to rally toward the game's first run in their half of the fourth inning.

With no runners aboard and with one man already gone, Scott Hyde, who was hit on the hand on Friday, drilled a double to center. Dan Geary, the next batter, sacrificed to center, sending Hyde to third and adding another out to the inning.

Stepping up to the platter with two outs and Hyde at third, starter Mike Dix went on the offensive. Dix registered three hits on the day, doubled last Tuesday, and this past Saturday put UMSL on top 1-0 as Hyde crossed the plate.

After leaving the final two runners on base in the fourth inning, Dix threw a shutout the remainder of the game. Dix pitched in the fifth inning with only one runner - Pete Serrano - on base.

Serrano finally came home when Dave Downhour launched a deep fly ball to center. There was no need to slide on one as the first and third-baseman trodted across the plate, making UMSL's lead 2-0.

The Mules finally managed to score also. CMSU with two outs produced two doubles in the top of the sixth inning to cut the Rivermen's lead to 2-1. UMSL, however, got the runners out of their portion of the sixth off a student's choice, leaving the game at 2-0.

In the top of the seventh, Bob Simpson took the place of starting pitcher Kim Herr. Then the Mules took advantage of a rusty Simpson and rallied for three runs off five hits to lift CMSU into the lead 4-2. "I hated to have to take Herr out of there, but I had to give Simpson some playing time so he'll be ready for the big conference game in Cape Girardeau," Dix said. "But he had pitched all the way, but Simpson hadn't pitched in a long while, so you can see what happened when he goes into a game cold."

But the Rivermen as well as Simpson bounced back from the Mule's rally, and the score was 4-2 as Aiello pitched in for the final strikeout.

With one out, Serrano stepped up to the platter with two on base. Aiello dropped the batter before reaching the sixth innings.

"We've played well the past two games," Aiello said. "We've had the right stuff and the players are getting used to each other."

The Rivermen are now 14-10.

The University program board wishes to thank the following businesses for their contributions to UMSL's first all campus egg hunt:

One More Time

Free Registration of Your Talents and Interests — extra income, part-time work, career possibilities and practical experience.

Opportunities In: Sales, Marketing, Organizational Work, Travel, Mechanical, Home Repairs.

MUST ACT NOW

The Rivermen finally triumphed when Mahfood knocked in Scott Lange who had doubled earlier, making the final score 5-4 for the Rivermen.

"Games like this really bother me," Dix said. "Maybe we didn't have anything left over from the day before, in our game against Harris-Stowe."

Speaking of Harris-Stowe, the Rivermen demolished a poor team from Harris-Stowe State College Monday by the incredible score of 27-4. Bunters in the contest were sent over the fence by Ailor, Greg King and John Murphy.

Burlington freshman Kevin Blan- ton who looked outstanding picked up the victory for the Rivermen. Other freshmen including Mike Coffee and John O'Brien also made impressive appearances as the unlimited score provided an opportunity for the hitting to continue.

The Rivermen are now 14-10, and have won their last three games. They return to action this Saturday at Southeast Missouri State in a game which will decide the winner of the Missouri Intercollegiate Athletic Association. UMSL split a double header with the Rivermen.

Tryout to be held

UMSL cheerleading tryouts will be held April 13 through 19 in the Mark Twain Student Center. Interested students. Tryout selection before a committee will be April 19 at 2:30 p.m. in Mark Twain.

Cheerleaders entertain at all home football, basketball and baseball games during the season.

For further information on times, call the UMSL athletic office at 585-3461.

No. 2 doubles, and Morris and Brett Schrama past Choo and Fred Miller, 3-6, 6-4, 6-3.
The Rivermen played without the services of No. 1 singles player Mike Bryant in the match. He is resting a sore shoulder.

"We've got a long way from getting any notice," said Rauch. "But we're on the right track."

UMSL will make up the final two doubles matches of a postponed meet with Saint Louis University this week, and will also battle the Billikens in a full match. On tap for Rauch's netters this week is the Principia class. Serrano may be a step removed, though. He's a guy to root for.

Tune in next week when we look at beanballs rolling on fastballs aimed at umpire's face mask and spitting on one's batting gloves before congratulating the opposing team. All sport in themselves, but not sportsmanship

Until then, wish those Twilighters down with Diet Coke. "No Diet Coke? Diet Pepsi, then."

Softball

from page 10
Riverwomen are the hosts, the games will not be played on campus, but at Koeneman Park in Jennings.

Lewis feels that this tourney can shape the team's future performances. "This is what we have been aiming at the last couple of weeks," Lewis said. "If we do well in the tournament we might just surprise some people later on."

But for now Lewis enjoys watching her team put runs up on the board. The Riverwomen scored a miserably four runs in their first seven games, but have bounced back to score 45 runs in their last nine games. "The bats are coming around now. Eva Kennedy hit her first home run of the season against Lindenwood and you can see the other girls coming on," Lewis said.

With the offense starting to click, it is easy to see why Lewis is smiling these days. She was never worried about her pitching or fielding, but the offense left a lot to be desired. However, just last week it looked like her offense was one of the few aspects of the game UMSL had going their way. But with Gaessei's strong performance against Lindenwood, it looks like Lewis' army may be headed toward a strong finish.

Lewis doesn't make any promises though. She doesn't mention that this team could compete for a berth in the National Collegiate Athletic Association Tournament. Nor does she count her team out of it either. Automatic bids are extended to the top two teams in the season-ending tournament (not this weekend's MIAA tourney).

She only hopes that her players can play the consistent brand of softball that they are capable of playing. If that happens and if Gaessei stays healthy Lewis may find herself drawing up battle plans for some big games in the near future. But win or lose, Lewis promises one thing — there will be no waving of the white flag by her team. They will fight till the end.

Meckfessel to host camp

The first week will be for boys ages 8 through 16, and the second will be for girls ages 10 through 17.

The cost of the camp is $70 and includes a camp T-shirt, report card, and certificate.
