Science Building Proposal Nears Final Word

After many years of proposals, the University of Missouri-St. Louis is finally starting to take steps toward building a multi-million dollar science building. The project, which has been in the planning stages for over a decade, will cost the university $15 million and is expected to be completed within the next five years.

The science building proposal was approved by Gov. John Ashcroft during his recent visit to the university. The building will be located on the south end of the campus and is expected to be completed within the next five years.

The science building proposal was approved by the Board of Governors in December. The building will be constructed in phases, with the first phase scheduled to begin in 1986.

The science building will house state-of-the-art laboratories and classrooms, as well as research facilities for the university's science department. The building will be designed to meet the needs of the university's science community and will be a major asset to the university's research and educational programs.

Champion Named As Dix Replacement For UMSL

Jim Goudis

At last, it is done. Champion Baseball will be a new name for UMSL this season. Officially, the announcement that Champion would be the name of the baseball team was made by Tom McCrother, the athletic director. His decision was based on the fact that the team was consistently losing its games.

This new name is a good change for the team, as it is easier to remember and more appealing to the fans. The old name, UMSL, was too generic and did not represent the team well.

Champion is a well-known brand in the sporting goods industry, and it is expected that this will bring in more fans to the games. The team is currently preparing for the upcoming season, and everyone is excited to see how well they will do.

One of the players on the team, Mike Luczak, said, "I am thrilled with the new name. It is a good change for the team, and I am sure it will bring in more fans." He added, "We are working hard to improve our team and I am confident that we will have a successful season."
