New Assistant Dean Appointed
For Continuing Education

David Kleimann has been appointed assistant dean for Continuing Education-Extension at UMSL. The appointment was promoted by Wendell Smith, dean of Continuing Education.

Kleimann has been with UMSL since 1965 and has served in the director's office for Continuing Education since 1968. He will continue to direct the coordination and management of all extended programs and all off-campus credit courses offered through UMSL.

"Kleimann's new appointment is reflection of increased recognition and growth of the needs of our continuing education programs," Smith said. "The appointment also reflects a new change, a new movement in creating and servicing continuing education needs of our information-based, high technology society.

Kleimann received his bachelor and master of science degrees in sociology from the University of Chicago while he has completed advanced courses in Education Administration at UMSL. Professionally, Kleimann's work has included association as American Association for Adult Continuing Education, Missouri Chapter of American Association for Adult Continuing Education, Missouri Association for Adult Community Education, and Main Council of Greater St. Louis.

English Department Novelist To Sign Copies Of Recent Work

David Carver, associate professor of English at UMSL and author of the popular work "Before," will sign copies of his novel on Sunday, Nov. 3, from 2 p.m. until 5 p.m. at Fatty's Books, 4886 Delmar Blvd.

Carver's other novels are "Adventures in the City" and "Invisible," which was named one of the year's ten best by American Library.
Rifkin's Book Responds To Critics

Jeremy Rifkin, author of the bestseller *The End of Work*, responds to critics who claim that his ideas are too utopian. Rifkin argues that his vision of a future where people work less and have more leisure time is not only possible but necessary for the health of our society.

STARTS NOV. 1ST AT THEATRES EVERYWHERE!
Five Years A Long Time

Five years is a long time. Some of us manage to get through college five years is for others. It took five years to get through high school. Babbling babies often are starting kindergarten within five years. A lot of things can happen in five years; a lot of things can change.

Some things, invariably, will change for the better. The East-West Gateway Coordinating Council maintains that the city and UMSL will have a light rail system in five years. An R-3 district in our region is expected to be in operation by the early 1990s, according to Douglas R. Campbell, project director.

This could be a change for the better for the university. It will have a more efficient means of transportation. The system will be built together East St. Louis, South County, and UMSL.

The light rail system is targeted to cost us approximately $200 million. A lot of things can happen in five years.

Thoughts from various sources

Campbell said: "The final design should start in September 1989. That’ll take about two years to complete, and we hope construction will start in late 1987. A lot of changes can happen in five years. Normally residents already are challenging the rail’s proposed route through National Bridge. And there also is a possibility of some afterquirking.

Five years is a challenging goal. The 200 million dollar zornak also is challenging. We’ll have to see what does and what doesn’t change in the next five years.

CPR Course Can Make A Lifesaver

Safety Representative Jim Hickerson would like for you to prove him right when he says, “you can be a lifesaver in less than eight hours.”

Hickerson and UMSL’s Office of Safety and Risk Management will offer an American Red Cross Cardiopulmonary Resuscitation course here Nov. 7 and 8. Hickerson says, “CPR works for everything from potential drownings to sexual assault, to electrocution, to drug related problems, to choking.”

CPR can save a life. It is important for persons without previous CPR training to attend the class. It is free, according to Hickerson and is limited. The number of persons signing up for the course will determine whether the instruction will be given.

The course is intended for persons with no previous CPR training. It is taught in tandem with the CPR training. That is, in turn, will widen their CPR lifesaving, a Florida part. CPR lifesaving is well documented. It works. Make it your part.

Just ask Hickerson about CPR. “You can bring (persons) back from what was judged dead.”

Letters

Letters are solicited from students, faculty, staff and alumni. Letters may be edited for clarity and brevity. Letters may not exceed four typed pages in length.

Dear Editor:

As the mother of a college student—thank God UMSL!—I am delighted that you people at UMSL aren’t the type of people that would give junk mail the book to Dean Jones and his get-off-the-backs-of-students for a week. This has got to be a real hit to a family. Not only harassed by mail, they also have a young Dean Jones that give the teaching, administrative, and educational appearance. What kind of role model for teachers and for the students he teaches.

Mrs. Charles “Pete” III

Illegible text
Paul Botsford scored UMSL's first goal early in the second half. That goal was the result of a penalty kick taken by Barry with just over five minutes left in the first half and another with just four seconds left in the second half. The win gives UMSL a record of 6-2 and moves the team up to fourth in the MIAA. The UMSL offense went on to score a second goal on a second penalty kick. Teammate Brad Harper scored the second goal on a second penalty kick. The UMSL offense went on to score a second goal on a second penalty kick. Teammate Brad Harper scored the second goal on a second penalty kick.

The victory was the second straight for the UMSL soccer team, which improved to 5-1-1 in the MIAA and 6-2 overall. The team has now scored 13 goals in its last three games and is currently ranked second in the MIAA.

Offensive player of the game was sophomore midfielder Tim Green, who scored both goals for UMSL. Goalkeeper Mark Davis recorded his 11th shutout of the season.

The UMSL defense also recorded its 11th shutout of the season, allowing just one goal in 11 games. The defense has held opponents to just two goals in the last three games.

The UMSL offense has scored 13 goals in its last three games and is currently ranked second in the MIAA. The team has scored 23 goals in its last five games.

After I caught the ball out of bounds (Dorita) on a goalkick. But the ball was out of bounds, so it didn’t count. They scored their second goal off of it, too.

Before our first goal, we pushed it deep into the Connecticut half and knocked them out of the game with both hands and the referee吹哨.

It was obvious that everything stopped moving when people couldn’t move. It would have been a penalty kick, a sure goal. We did not have a chance to win the penalty, though.

We got our own goal ($200) on the second half and it beat us.

The kids that want to win. Because I have seen the drive and the passion that the kids have in this season than ever before for me. This weekend had big ups and downs. I can’t believe that we only scored one goal and didn’t try to take the win. I wanted to do more. I wanted to fight and try to get the NCIS plays. I think most of all we didn’t want the negative momentum trip to end positively. But it did.

We have one more chance this Saturday. I hope everyone plays well, including myself, especially the kids. It will be my last collegiate home game ever. It is one of the most stable situations in my career. I want to be good. I must want to be even better. Your year after the people change, the talent changes and the coach changes. I want to have the drive and the passion and the will to play here for forty years and I want to get things into the coaching position, they will understand what I am talking about when I speak of drive when they become eastern. The best part is that sports are all about. Sometimes it is one of life’s greatest challenges.

We scored the first goal earlier in the game, and we had a chance to win this game. We did not have the chance to take the win, but we will have the chance to win next game. We will have the chance to win next season.

We will have the chance to win next season.

We will have the chance to win next season.

We will have the chance to win next season.
