Ground Breaking | Science Complex Construction Underway

Patricia M. Carr
news editor

Finally, after years in plans, the planning stage the expanded science complex is becoming a reality. According to architect and director of the SA planning committee said, "We hope to be able to see construction for construction by the end of the year and finishing in 1997." The design report from Sverdrup and Larson estimated total cost of $13 million. This includes $550,000 for new building and $18 million for renovation of the science complex.

Proposed Science Complex

- Chemistry, and physics laboratories
- Research facilities

The science building allows for the expansion of science programs in chemistry, physics, and biology. However, there is plan for a cooperational doctoral program in biology, such as the Missouri Botanical Garden.

The Chancellor has made a cooperation with the University of Missouri system to develop a new science building. According to President Peter Magrath, the University of Missouri system will pay for the building of the science complex. The science building is more important for the students and staff who are involved in the science complex.

Cathy Berard, coordinator of the science building, said, "There are very few science building in the University of Missouri system. There is no science building in the University of Missouri system." The science building is more important for the students and staff who are involved in the science complex.

Bookstore Has New Look This Semester

by Phyllis Allen
associate news editor

The renovation of the UMSL bookstore seems to be a success in the students and staff. The new look and feel of the bookstore is more inviting to students. The bookstore is now more student-friendly. The new look and feel of the bookstore is more student-friendly. The new look and feel of the bookstore is more student-friendly.

The initial student reaction has been good as well, "The new look and feel of the bookstore is more inviting to students. The new look and feel of the bookstore is more student-friendly. The new look and feel of the bookstore is more student-friendly."
Concrete Campus

Contraversies that don't concern parking and attitudes toward student life are few and far between on a campus that is taking the lead in regional planning. The drainage of Bugg Lake, to make way for the long awaited building of the science complex, has stirred some feelings of traditionalism, but the effort will not fail victim to the ways of progress.

During the era of the Vietnam War, the lake served as a natural setting for open air concerts to protest the war and advance the arts. However, recent years have seen the lake fall victim to vandalism and utilized it for educational purposes.

A concrete campus is giving way to a fresh attitude. The old lake has been to the ways of progress. The new science complex will embrace the concrete lines of the traditional Columbian buildings.

The draining of Bugg Lake, to make way for the new campus, has stirred some feelings of traditionalism, but the effort will not fail victim to the ways of progress.

The current building for the Biological Sciences department has sponsored many conferences to discuss the future of higher education.

The lake is an area landmark. As part of the Belleville Country Club, on which this campus was built, it served as a water hazard for participants in two Western Amateur Open golf championships.

During the era of the Vietnam War, the lake served as a natural setting for open air concerts to protest the war and advocate the arts. However, recent years have seen the lake fall victim to vandalism.

The old lake has been to the ways of progress. The new science complex will embrace the concrete lines of the traditional Columbian buildings.
Summer Months Busy Ones For University

I. Education Coordinator

- Summer
- "Tweens" "Unforgiven Innocence"

- "Advanced Math and Science"
- "Writing for the Imminent LSAT, GMAT, and GRE"
- "LYNKPLAN"
- "KAPLAN"
- "Emergency Test Prep"
Concretne Campus

Contraversies that don't concern parking and& 156;attendance fail are few and far between in our com­puter campus. The building of Bugg Lake, to make way for the long-awaited building of the science complex, has stirred some feelings of traditional organisms on a concrete campus.

Now it would not make sense to say that a body of water, despite its historical aspects, should stand in the way of progress. This campus has fought too long and too hard to get this project initialized. Into this com­munity is known for its technological background, there needs to be a sense of maturity to train urban students.

Therefore, the argument is not against the science complex, but against the threat that the lake may become a mere footnote in the saga of the concrete university setting of UMSL.

UMSL is a visually attractive campus. The building of some areas, when compared to the monolithic lines of the traditional Columbia Setting, reflect good upon both the north campus and the complex.

The lake is an area landmark. As part of the Belleview Country Club, on which this campus was built, it served as a water hazard for partici­pants in two Western Amateur Open golf championship tournaments.

During the era of the Vietnam War, the lake served as a natural setting for open air con­certs to protest the war and advocate the area for a campus. Now it has evolved on college campuses during that period.

For science and history buffs, the lake has become an integral part of the campus. The Biology Department has taken the lake under its wing and utilized it for educational purposes.

In return for its resources, the department has sponsored many "skim the scene" drives and also in the lake's on-going relationship with schools.

There are many possible solutions to solve the struggle between progress and limited tradition. One will be to rebuild the lake around the science complex. It is understood that many structural changes will have to be made in this lake to accomplish this, but the effort would reflect good upon both the north campus and the complex.

The other policy would be to build a lake for research use, in another location. A spot is being looked at on the south campus for being this goal.

The best medium between the two will be to establish two lakes on campus. A "twin" lake to break the concrete lines of the north campus by the complex is feasible.

Since the natural setting of the lake has been destroyed anyway, a reflecting lake will ease the minds of university publications officials who are wondering what scene to put on the front of UMSL's yearbook and utilize it for educational purposes.

In return for its resources, the department has sponsored many "skim the scene" drives and in the lake's on-going relationship with schools.

However, let's not put a fountain in the lake. The property of the 23rd Street campus, the "intrac­tional" opportunities the new lake could provide.

The new science complex will further en­hance the continued development of our campus setting.

Dear Editor

By pleasant surprise I came across a copy of the Current's 1986-87 "Campus Survival Guide" as a graduate of UMSL, I am very happy to see that the Current staff is maintaining the dry county tradition that has earned me many awards and recognitions at other college campuses and in the Missouri Wine Country.

This year's guide is the most complete, concise and attractive guide ever published by the Current. I found particularly interesting the front of UMSL's yearbook and utilize it for educational purposes.

On a sunny day there is nothing better than to be on the lake and water skiing and wakeboarding and to get away from the stuffy lecture halls, rooms and labs.

As the president and principal of the campus are constantly improving and the writing is still professional and impressive despite the absence of a journalism school from which to draw a staff.

The "Campus Survival Guide" is an absolute must for all students new to the university, so please make sure that everybody reads it. Keep up the good work throughout the year.

Sincerely,

Kris Eckert

Praise...

Dear Editor

As a student at UMSL, I am outraged that Bugg lake is being drained. I am glad that the funds needed to expand our campus with the building of the science complex, as at the same time I am very disappointed that our lake is being taken away.

Bugg Lake is in the line of campus expansion and is the only place where residents can go and get away from the stuffy lecture halls, rooms and labs.

On a sunny day there is nothing better than to be on the lake and water skiing and wakeboarding and to get away from the stuffy lecture halls, rooms and labs.

We are starting a movement to save Bugg lake. The Biology Department at the University of Missouri-St. Louis has already taken the lead in preserving Bugg Lake and the Biology Club holds their annual "skin the lake" party there.

Many students, UMSL wants to keep the lake an important part of campus and Bugg Lake is not restored after the science complex is built.

Sincerely,

Leigh Granbeck

Fresh Start

On June 1, the university embarked on a new chapter in its history. As chancellor, Barnett is bringing fresh and imaginative themes to the University of Missouri-St. Louis, and to students who are excited about the future.

Barnett's first months will be the time of change, as students are excited about the future. Her goal, to make this university a role model for the state, is bold.

Barnett is embarking on a second generation of ideas to bring the University of Missouri-St. Louis into the 21st century. She will not be embarking on this project alone. The relatively new team of UM­St. Louis leaders will aid in experimenting with programs.

It would be strange to think that the youngest of the four campuses will receive special treatment, but the oppor­tunity for growth exists.

The recent "Right Committee" report emphasized the fact that the University of Missouri had four "equal" campuses.

As chancellor, Barnett is bringing fresh and imaginative themes to the University of Missouri-St. Louis, and to students who are excited about the future.

At her honeymoon continues, so will the promises.

In the end however, what will result in a well researched plan that will bring the University of Missouri-St. Louis into the 21st century.

On campus, the new science com­plex will serve an important purpose. For it will give the university the facilities to expand programs.

This university, like other land grant institutions, will continue to grow into the 21st century.

As the St. Louis economy revitalizes itself, it should look to its 21st century workers.

Barnett's arrival brought positive attention to the campus, hopefully it will continue into the community as well.

Letters Policy

The Current will not publish letters to the editor that are libelous, contain personal attacks or libelous material, or contain vituperative content. Letters to the editor must be submitted by the editorial staff in a timely manner. The Current reserves the right to either edit or not to publish any letter. Letters to the editor should be 300 words or less. The letter's name must be published with the letter. The writer's name is published Will refuse publication of letters judged by the editorial staff to be in poor material. The letter's material will be published. Letters to the editor should be submitted in those terms of the "instructional" opportunities the new lake could provide.

GOING

History of Lake Bugg

Spring 1968: The Biology Department formulated a plan to beautify the pond by enlarging the dam at the west end. It was called an effort to bring the pond to a state where it could be used as an outdoor classroom for students who are unable to go on field trips in the urban environment of the university.

Fall 1968: Erosion caused by the building of Stadler Hall caused large quantities of soil to wash down into the pond and change the nature of the water.

Spring 1969: Chancellor Bugg met with students on the hill overlooking the lake and discussed problems with the cafeteria facilities.

Fall 1983: The Biology Club came to the lake's rescue and sponsored a "skim the scum" drive to clean algae off the surface of the lake that had built up due to a drought that year.

GONE
Summer Concerts Make Grade

Jim Schwartz

Music reviewer

Quo with their old fans, and welcome back from a hot summer tour, the Fort Hamptons were the only hot event of the summer in town. A week later the Arena was again packed to the gills with people who couldn't wait to hear about the draining of the Rent in years. Bugg said he was sorry he didn't have more sequel action for us, and that the students today were learning something. In the spring of 1969, a fire was started in the Colgate Darden Professor of History and Higher Education. It is currently teaching American History.

A week after the Arena was again packed to the gills with people who couldn't wait to hear about the draining of the Rent in years, Bugg said he was sorry he didn't have more sequel action for us, and that the students today were learning something. In the spring of 1969, a fire was started in the Colgate Darden Professor of History and Higher Education. It is currently teaching American History.

MUSIC REVIEW

It was good to see that even though they had to cancel the last two shows of their tour due to a technical issue, these five musicians are still very much in demand. The audience was divided into two sections: front and back. The front section was occupied by regular concertgoers, while the back section was filled with curious onlookers. Overall, it was a very entertaining experience.

FILE UMSL: Cheerleaders construct a pyramid at summer training camp. The squad will hold tryouts later this fall and will begin conditioning for the upcoming year.

Cheerleaders Psyched For New Season

The best method for any athlete is to progress for the coming season is to spend long hours in practice, and to watch past junior films. By the end of the week, some players are psyched up and begin to have some enthusiasm, while others are bored and don't know what to do. For those who are, the junior films are the way to go, and the more they watch the more they learn.

The most highly praised movies were all those from the previous season, as they showed how much the cheerleaders had improved. The one film that stood out was "The Power of Love," which was voted the best film of the season.

Bugg, the former student council president, holds the world record for the most times he has been declared the best student in the world. He said that students today were learning something, and that the students today were learning something. In the spring of 1969, a fire was started in the Colgate Darden Professor of History and Higher Education. It is currently teaching American History.

Advice Given For Entrance Exam

Do you have an entrance exam to take? Your future college and university, as well as the test administrators, are concerned with the results of your exam. Here are some tips to help you prepare for your test:

1. Review the test format:
   - Understand the types of questions you will encounter.
   - Familiarize yourself with the test's structure and timing.

2. Practice with sample questions:
   - Use practice tests or past exam papers to familiarize yourself with the test format.

3. Manage your study time:
   - Create a study schedule to ensure you cover all necessary topics.
   - Break down your study sessions into manageable chunks.

4. Stay healthy:
   - Maintain a healthy diet and get adequate sleep.
   - Exercise regularly to improve your focus and concentration.

5. Stay calm:
   - Use relaxation techniques such as deep breathing or meditation.
   - Visualize your success and positive outcomes.

All meetings will be held in 206 Lucas. For more information, contact Karen Joseph Robards, Interim Practicum Coordinator at 553-6385.

- The Placement Office, 308 Woods Hall, will be offering an orientation program for all seniors interested in registering for business, government or social service placement.

The orientation schedule is as follows:

- August 26-29
  - 10:00-Noon: 12 Noon-12:45 p.m.
  - 11 a.m.-11:45 a.m.

The program offers students an opportunity to gain a thorough understanding of the campus recruiting program and how to use the placement office services effectively.

- The Physical Education Office will be offering classes in both aerobics and aquaerobics this fall. Registration is on a first-come first serve basis. Courses begin on August 25 and will continue through November 25. For more information, call 553-6326.

special events

- The Office of Continuing Education now has available brochures for their fall program. The program will feature three classes in conversational speaking during September and November in German, Italian, and Russian. Also offered in the fall program is a course in Short Story Writing. Getting People on Paper will be offered on Mondays from 11 a.m.-11:45 a.m. on the University Center Patio or in the Center's Atrium. The course is sponsored by the University Program Board.

- The "Emblematic Woman: Contemporary Female Portraiture" is the theme of a series of exhibits featured in Gallery 210, 210 Lucas Hall. Portraits by Margaret Bailey Doogan will be on display September 4-26. Gallery hours are 9 a.m.-4 p.m. Monday through Friday. Admission is free. For more information, call 553-5976.

calendar requirements

- Material for "Around UMSL" should be submitted in writing no later than 3 p.m. Thursday of the week before publication to Terri Seymour, around UMSL editor, Current, 1 Blue Metal Office Building, 8001 Natural Bridge Road, St. Louis, MO 63177. Phone items cannot be accepted. Material may be edited or excluded to satisfy space or content requirements.
She Hates It Here

by Ann Richardson

associate features editor

I hate it here. I hate EMU. I hate my job. I hate St. Louis. But what you don't know is that I also love the day when we get 100°F-Like.

Don't think I'm a whiner because you don't like your school as much as you like Neumich's Bubble's lines. No one likes it here. We're all stuck here because we're flaking out inside jobs. But here we can't afford to go away to school, to see the world, to be in a job, boyfriend/girlfriend, family, or, if we're lucky enough to have the income, to go home.

Be here. We are at a commuter campus where you can attend classes for years and never earn another student's name, in a town that is going to let the popular Variety Theater be torn down. How destructive, right? Not won-

ner Janice Dennen grabbed the first pipe leading to the Motor City.

Silvester Takes On Double Duty

by Dave Brown

sportswriter

With the creation of a new position—a man between assistant athletic director and varsity coach—UMSL Athletic Director Chuck Smith found he had to find someone who could adequately fulfill the duties of former assistant athletic director Judy Whitney-Berres and volleyball coach Cindy Rech.

Smith found those qualities in Denise Silvester, who assumed her position July 1.

"Declaredتحدث: "She's an outstanding record in varsity volleyball coaching and administrative experience. We were impressed with her credentials."

Tryouts Set For Baseball, Softball, Swimming

Individual tryouts will be held for those interested in baseball, softball or swimming.

**Baseball**

Coach Jim Brady will hold tryouts September 2-4 from 5 to 8 p.m. at the Mark Twain baseball diamond.

**Softball**

Softball tryouts with coach Lisa Strickland will be September 2 from 4 to 6:30 p.m. at the Mark Twain softball diamond.

**Swimming**

Swimming coach Mary Lutes will hold tryouts September 12 at 6 p.m. in the Mark Twain pool. All questions about the tryouts should be directed to the coach or the athletic department at 553-5175.
