The University of Missouri-St. Louis in the county's strategy to try to attract businesses to the area. However, the University of Missouri-St. Louis is the only one that would require a new hospital facility for another use in St. Louis County Hospital. The university is interested in operating its existing continuing education courses at the hospital and possibly establishing a weakend college. The university also has the resources to put the program together to start. Other centers of special academic interest include the St. Louis University Faculty and the University of Missouri-St. Louis.

The county is interested in either allowing the existing hospital or the new hospital to operate. The university would appeal to a larger number of people and a greater amount of money for the county. Money saved

The University of Missouri-St. Louis will receive a $500,000 grant from the United States Department of Education for the construction of the new science building.

The grant, from the academic affairs program of the United States Department of Education, has been estimated at $1.8 million.

During the hearing, the Missouri Senate Ways and Means Committee held a hearing on the construction of the new science building. The hearing was held on a 380,000 square foot building.

The estimated cost of the building is $18.5 million. The Missouri Senate Ways and Means Committee approved the project for construction at an estimated cost of $18.5 million. The cost of the building will be paid through state funds.

A number of areas required to stay open for the science building. The most important of these are membership in the national at its meeting Jan. 30. The national board used the suspension as a tool to gain control of the fraternity. I guess it worked.

Kurt Soto, former TKE president, present TKE president

"You were unjustly suspended on our campus," Soto said. "We did this in an attempt to force them to change their ways...the board used the suspension as a tool to gain control of the fraternity. I guess it worked."

Clayton Site Is A Plum

A blue ribbon tract of land is up for grabs in downtown Clayton. In a cooperative venture, the University of Missouri and the city of St. Louis is one of six potential developers who are interested in purchasing the property.

Working with the development team of Claytor-Cabot and Forbes, the university is engaged in a cooperative effort to purchase or lease the former County Hospital building.

St. Louis County is hungry for funds. The Board of County Commissioners recently cut the budget for 1986 by $11 million. Therefore, Clayton County officials are hoping that a sale of the new downtown facility will fulfill all these needs.

Note that the 3-acre tract of land is up for grabs, the university and a wide range of other developers are making presentations to the county.

County Executive Genrich has appointed a 10-member commission to evaluate the six proposal submitted to develop the property.

Besides the university and Claytor-Cabot and Forbes, there are five other developers interested in the property.

According to the chairman of the committee that is reviewing the proposals, these developers are some of the biggest and the best known.

The university is interested in moving into its continuing education courses to the Clayton site and establishing a weekend college there. Also, centers of special academic study could be moved there as well.

Other proposals for the university are less academic. The proposals range from building luxury condominiums to establishing a skilled nursing facility, or from building a corporate office for an international corporation to a world-class hotel.

Though the university's proposal will not be as flashy as others, the committee reviewing the proposals should weigh the potential services the University of Missouri could provide the community.

Of course, the biggest obstacle to overcome must be the boards of Clayton and St. Louis County. It is estimated that the university would need $11 million to build a campus and this would be paid on a yearly basis.

The university and the developers Claytor-Cabot and Forbes come into the plan. They have the money and the facilities available to put together possible investments.

Clayton Mayor Stallworth states that the city is not presently engaged in conversation with the city, however, the city is keen on finding the sale or lease of the property.

However, whatever action is taken on the matter, the Clayton-University of Missouri partnership is estimated to be involved in the process.

The Treasury Department is in the university's political game, it should be a winner. The city of Clayton, on the other hand, in the state's 4th congressional district, would only benefit from having the University of Missouri expand and grow.

Nearly 80 percent of UMSL graduates stay in the St. Louis area. It certainly a large number of them in Clayton.

In conclusion, there is a direct link to the economic revitalization of the St. Louis region. St. Louis County and Clayton County must only add to that process of growth.

LETTERS TO THE EDITOR

I thank you, Claytor-Cabot and Forbes, for your cooperation.

The Reagon Administration has again made ugly headlines with the right to be left by its friends.

Dr. Ronald Wilson Reagan's Authorization and the reality of State Bias for all over the world. The president, Mr. Reagan, should be considered a very bad influence in the United States.

The credibility of the last book, Ronald Wilson Reagan: Authorizations and the Reality of State Bias for all over the world, is no longer than today's. The book is being criticized by former civil defense officials.

This book's review, I have talked about the book, it is the shortest distance between two

UML Alumna
She Has An Office With A View

by Phyllis Allen
features editor

Carol Caruthers' typical day at the office begins at 7:30 a.m. and doesn't end until many hours later.

With her work responsibilities as the features editor of the Student, she doesn't have a lot of time for her three children or for herself.

Caruthers is a 1982 graduate of the University of Missouri-St. Louis.

"After graduation, I went to Price Waterhouse in St. Louis and worked there for five years," she said. "That was a great opportunity for me, but I was looking for something else."

Caruthers went back to school and earned her master's degree in business administration at UMSL.

"I attended classes in the evenings and taught a lot of in-service training courses," she said. "That was a great experience for me."

Caruthers is now a busy woman.

"I have been working with Price Waterhouse for about the last five years," she said. "I have been working with clients all over the country."

Caruthers enjoys her job.

"I think it's great, but I don't have a lot of leisure time," she said. "I have to work on weekends and holidays, too."

Caruthers is a busy woman.

"I have a lot of clients to work with," she said. "I have to work on weekends and holidays, too."

Caruthers has many clients.

"I have been working with clients all over the country," she said. "I have to work on weekends and holidays, too."
Rivermen Face Tough Schedule, Drop Two

by Dave Brown

A tough schedule can destroy a team's won-loss record, but it can also help a team become better. At least that was the UMsl coach Rich Meckfessel's reasoning after the Rivermen finished 3-2, and 1-1 in the Gateway Intercollegiate Athletic Association this season.

The Rivermen opened the season at home November 22 with a 91-84 win over Quincy in the first of an unprecedented four-game stretch against teams ranked in the top 15 nationally. The Rivermen jumped out to an 11-5 lead, but the Golden Eagles fought back with a three-point basket and a pair of steals to take the gap to 12-11. The Rivermen continued to lead with 6 minutes and 10 seconds left, but then committed four consecutive turnovers to let Southern Indiana come back and take the lead for good with 43.3 left in the first half. The teams had 38 points apiece in the first half.

The Rivermen continued to shoot in the second half and were down by nine with 16:41 remaining, but Love shot the ball very well and had 27 points, while Strater picked up 21 points and eight rebounds while Love led in rebounding with 13. Love, a transfer student from Cowley County Community College (Kansas), Combine and Crede Anderson, a transfer from Concordia University St. Paul, scored 27 points and six rebounds each.

The Rivermen continued to shoot well, but were outscored 29-23.

The 1986-87 Riverwomen basketball team has topped-off one of the best starts ever with a 4-1 mark in Gateway play. The Riverwomen opened the new season at home December 3 with a 79-72 win over Quincy College.

UMSL opened the new season at home November 30 with a 73-69 win over Quincy College.

UMSL's all-time leading scorer, Gina Gregory, led the Riverwomen with 16 points and 14 rebounds while Gain lead in rebounding with 14.

Center Kathy Rubach was the team's high scorer in rebounds with 13. She even went down early in the second half with a knee injury.

"The injury to Rubach hasn't been too bad, but we have to handle the adjustments, and we have the personnel to win," coach Bob Johnson said.

With Rubach sidelined for an uncertain amount of time and 6-9 junior forward Breanne Rubach and 5-9 senior Rayna Zoellner out until early January, 5-9 junior Amber Klotzer has stepped up to the plate. When the Riverwomen traveled to Evansville College in the second game of the season, she scored 14 points.

Although only one game last season, as improved Klotzer was scoring a total of 11 points and lead the team with site rebounds. Gregory was again the leading scorer for the Riverwomen with 25 points.

In another close contest, UMSL defeated Maryville College by nine and improved the record to 3-0.

With about 17 seconds left in play, UMSL trailed Maryville College by one point. After a timeout, UMSL has possession of the ball.

Rivermen Alumni Game Saturday

There will be a blust from the past in the Mark Twi'n Gym Saturday at 5 p.m. as former Rivermen will take on the Evansville basketball men before the UMSL Women's basketball game against Maryville College.

Hawkeyes. The tough schedule will be held before the first game of the year and get ready for the first of the year from these tough games we have this year. The best season ever with a 4-1 start.

The opening-game loss was the first since Meckfessel has been at UMSL. The team was 3-0 in conference play.

The third junior college transfer player, coach Mark Twain, said.

"We've just got to try to win on the road, playing these teams will go up. We just need to hang in there and learn from these tough games we've got to be a lot better. As you know, the main thing is to try to win on the road."

The Rivermen's next home game is at 7:45 p.m. Saturday against UCM in the Gateway Intercollegiate Athletic Association.

Rivermen Face Tough Schedule, Drop Two
