The data compiled for our reveals that among business school alumni, UMSL image in very good to the community,” Thottatl said.

According to MacKinney the university’s image is ambiguous.

“They are unique and available in good to the community,” he said.

The University of Missouri Alumni magazine is printed in St. Louis. But in addition to a variety of other programs, the university’s image is good.

“The University of Missouri Alumni magazine is printed in St. Louis. In addition to a variety of other programs, the university’s image is good.”

**Carded!**

**UM To Issue ID’s**

Students, faculty and staff members of the university are soon expected to receive an instant identification card as a result of action taken last week by the Board of Governors during its regular meeting.

Not only will the cards provide social and emotional support, but they will also serve to streamline transactions such as check cashing, says Tom Hulsey.

**GLSU Members Work To Improve Gay Awareness Here**

Linda Balford

WHEN THE Gay and Lesbian Stud­
ent Union formed last year, there were about four core members working on various projects.

That number has more than tripled.

On Saturday, March 12, the GLSU will hold the weekly meetings of the student union in the auditorium. The meetings have formed the backbone of the GLSU, the Gay Men’s Student Union.

The groups are set up so that members can provide one another with support and encouragement. According to J.B. tablet and Leslie Goule, the club’s president and vice-president.

Goule: Tablet says the need for the GLSU arises because many other groups on campus simply are not gay. The need for these groups and services are consequently minimal.

Most members are thrilled with the creation of the GLSU because it provides social and emotional support and a feeling of belonging in a campus.

The group has no intention of cooper­ating with the various organizations on campus. It plans to provide its services to those who are gay.

UM Extension Could Face Cuts

President Ripper’s proposed 1987 budget would cause "severe damage" to the University of Missouri extension programs. The proposed budget would reduce federal funds coming to the university from $15 million in federal funds for extension to $2.5 million for the 1987-88 fiscal year.

The proposed budget would be further reduced if the state legislature does not act to increase funds to the university. The proposed budget would result in the loss of $30 million for the 1987-88 fiscal year.

Glen R. Anderson

President Ripper also notes that the proposed budget would have severe consequences for the university.

As a result of the budget, the university will have to reduce its staff by 100.

Sledding To School

Remember back in grade school, or even back in high school, when snow was something to look forward to? The snow days, cancellation of classes and opportunities to sleep late, were welcome breaks. Driving over snowy roads, kids back then would say, "It was an adventure, fun, huh?"

Well, last Friday wasn't much the same. Some of the UMSL students, some of the UMSL faculty, and some of the UMSL staff didn't receive the opportunity to sleep late. Driving to school for morning classes wasn't an adventure; it was a job—a job some of us would expect to be paid dangerous pay for.

It was dangerous. The only adventure seemed to be getting out of the driveway. The highways were in terrible shape. Sidewalks were in worse shape and roofs were jammed with traffic moving as a single pace.

The decision not to cancel school Friday was unwise. It put a lot of students, because this is a commuter campus, in serious jeopardy. Just ask the driver of a Ford Bronco wrapped around a telephone pole directly across from the Florissant Rd. entrance. Or ask the driver of the Lincoln Mercury jammed into the railing on Interstate 70.

There is a lot of features that contribute to the condition of closing school. The parking of staff members who are ready and willing ("to come in work, that is") to stay home and weather the storm. The number of available for classroom work for Monday, Wednesday and Friday classes and Thursday classes should remain equal. The ability to inform everyone of cancellations is a must.

But we feel safety should be the No. 1 objective in such a case. The safety of all students, faculty and staff are of keen concern.

It was not a measure of safety to hold classes Friday with some part of the St. Louis area receiving as much as seven inches of snow. Only those students, faculty and staff that decided to remain at home should have the privilege of driving to school despite travel adviser's warnings.

And what's more, many students made the journey to school only to have their classes cancelled by the presence of the snow. They struggled through the inclement driving conditions for nothing. It was a poor decision all the way around.

The Commonwealth campus, fondly known as "Mizzou," has three references. There is Columbia, UMC and Mizz. The letters UMC are each said independently of each other.

In Missouri, it wasn't a job, it was an "adventure." Would you expect to be paid dangerous pay for.

The highways were in terrible shape, and roads were worse shape, and sidewalks were wrapped around the telephone pole directly across from the Florissant Rd. entrance.

In trying to reach the levels of student satisfaction, the university has come under scrutiny. However, people don't slur student activities fees, is not an issue. Several scholarships have been made available to students at UMSL and around the St. Louis area.

Applications are now being accepted for the St. Louis Mayor's scholarship. The award will cover the student's tuition, fees, and room and board at any UMSL collegiate campus.

Students must be residents of Missouri and full or part-time undergraduate students at any UMSL collegiate campus. The deadline for applications is April 15. The Mayor's scholarship is renewable each year.

Singers:

Skaggs Magnat. After the performance, the Magnums and Interns Chancellor and Madam Arthur Mackey will visit with students and guests at a reception for the seniors at the Performing Arts Center.

The department is also accepting donations from department alumni, benefactors, and friends. For more information please call 553-6397.

KWMU Walkathon Offers Prizes

The station's goal is to raise money for cancer research and students at UMSL. The top three students who raise the most money will win a trip to New York City and the Inaugural Walkathon at UMSL.

For more information call 553-5968.
Federal Budget Cuts Cause Panic

from page 3

Page 4  Feb 20, 1981

The system who are afraid to attend meetings for fear of being fired or losing respect. As long as most people, don't express themselves publicly, there isn't any blatant discrimination. It's when we start to recognize that there's no truth to what people are saying when they get fired, and realize that people are starting to get fired, that we'll see a change.

According to Brinley-Miller, it is possible in the state of Missouri to fire someone for being gay.

Page 5

filed under education directly, also hurt students, - Also, other cuts that don't have anything to do with education directly, also will hurt students.

With Washington no longer making money for programs like highway infrastructure, states won't have the money to help colleges compensate for the federal funding they lose. Lishman says.

The reaction and alarm doesn't surprise the administration, however.

In fact, it hopes making all aid programs — not just those who get federal money — available. The idea is that, in order to make people feel safe, instead of reducing their aid and making them more reluctant in granting loans, it would result in about one million students leaving federal aid programs next year.

Students coming from more affluent families will be most affected by these cuts, while many others who received financial aid will be placed in an extremely difficult situation. That is, their school or college will have to stop lending, students say they'll have to stop studying and colleges around the country say that they will have to stop enrolling.

Guranteed Student Loan, got — Brenner wasn't sure how he would get. Told of the kinds of limits the Reagan administration contemplates, Brenner, who describes his own extended family as "most middle class," now worries about making ends meet. That has existed throughout the years. The newsletter Touhill would like to have the newsletter around here.

The extension service was found in 1921 when the U.S. Congress passed the Smith-Lever Act. That legislation provided for one of the federal, state and local levels, forming a three-way partnership that has existed throughout the years.

For more than 65 years extension specialists have been providing the educational needs of the people in the city, suburbs and rural areas in and around the university is willing to provide them with the kinds of programs that would emphasize the messages they are attempting to extend.

The University of Missouri-St. Louis is a public research university located in Missouri, USA. Its main campus is located in St. Louis, Missouri, and it offers a wide range of undergraduate and graduate programs. The university is committed to providing a high-quality education to its students and engaging with the local community.
Howard Martin is a Massachusetts native, who was born in Boston, Massachusetts. He graduated from the Massachusetts Institute of Technology (MIT) in 1967 with a degree in electrical engineering. After graduating, he joined the Massachusetts Institute of Technology (MIT) as an assistant professor. He later moved to the University of California, Berkeley, where he became a professor. Martin is known for his research in the fields of computer science and artificial intelligence. He is a member of the National Academy of Sciences and the American Academy of Arts and Sciences. He is also a recipient of the Turing Award, the highest honor in computer science. Martin is currently a professor at the University of California, Berkeley, and a fellow at the Computer Science and Artificial Intelligence Laboratory (CSAIL) at MIT.

John Cryer Plays Self in New Film "Pretty in Pink"

Mike Lueck

If there is any young actor in Hollywood who might suffer from an identity crisis, it would probably be John Cryer. Way, it seems to Cryer himself always has been mistaken for the ever popular Matthew Broderick. Cryer doesn't seem to mind, though. "I don't, why should I?" said Cryer. Matthew Broderick is one of the biggest stars in Hollywood. "I'm just glad Matthew Broderick's got a big shot, I could be the star of Don Knotts," Cryer said.

Pretty In Pink

"Cryer plays a guy and everybody called him Duckie. Icrinkle said. But the script was written for Matthew Broderick. And in the end, it just worked. Cryer got the feeling that it was the middle of the eighties and that they had picked the right guy. And that's how he decided to star in Paramount Pictures' newest film "Pretty In Pink."

Cryer said he would be very disappointed if he hadn't got the part of Duckie. "When I read the script, I thought to myself, 'this guy is just like me,'" Cryer said in his first reading of the script. "I try to lose in my character." "Cryer would have been very disappointed if he hadn't replaced the part of Don Knotts. A few films after the script, I thought to myself. This guy is just like me. I'm just like him," Cryer said. He then said, and again, and worse producer of "Pretty and Pink." It's a story about Hughes, must have agreed with him.

"Even his current Cryer, Hughes was so busy thinking about himself and what he wanted to do, he didn't even notice what was happening around him. His home is in a village called Tullford, near Birmingham. When he found a notice about the exchange program on the bulletin board at his university, he was interviewed and accepted. He changed gears with UMSL, student Robert Pugh." "When I told the family about it, they were shocked. Dad was ecstatic, and my two brothers were furious." "Cryer said. "When I was in college in the United States, it was the first time I had been away from home. I was 18 and I was going to be completely on my own. But I knew how to deal with it. I was happy to be in the US."" Cryer said.

Cryer's only other film performance was in Columbia Pictures' "No Small Affair," in which he portrayed an amateur photographer by himself. He found the society in the US fascinating and interesting. He was interviewed and accepted. He changed gears with UMSL and became a student. He was interviewed and accepted. He changed gears with UMSL, student Robert Pugh. "When I told the family about it, they were shocked. Dad was ecstatic, and my two brothers were furious." "Cryer said. "When I was in college in the United States, it was the first time I had been away from home. I was 18 and I was going to be completely on my own. But I knew how to deal with it. I was happy to be in the US."" Cryer said.

The movie was a bomb at the box office. "It was a bomb at the box office," Cryer said. "I was never sure of more than ten students. It was not a movie. It was a bomb. I hated it. I think it's a bomb. I think it's a bomb." Cryer said.

In speaking of Hughes, Cryer said. "He has an extraordinary man. He has a wonderful ear for how people laugh." "Cryer said and he makes people laugh. Cryer got the feeling that it was the middle of the eighties and that they had picked the right guy. And that's how he decided to star in Paramount Pictures' newest film "Pretty In Pink."

Cryer said he enjoyed working on the movies as opposed to stage because he could judge his performance by the audience's reaction. "When I make a movie, I would go out and see how people react to it. That way I could know right away if I was bad or if I was good." "Cryer said.

Cryer's only other film performance was in Columbia Pictures' "No Small Affair," in which he portrayed an amateur photographer by himself. He found the society in the US fascinating and interesting. He was interviewed and accepted. He changed gears with UMSL, student Robert Pugh. "When I told the family about it, they were shocked. Dad was ecstatic, and my two brothers were furious." "Cryer said. "When I was in college in the United States, it was the first time I had been away from home. I was 18 and I was going to be completely on my own. But I knew how to deal with it. I was happy to be in the US."" Cryer said.

The movie was a bomb at the box office. "It was a bomb at the box office," Cryer said. "I was never sure of more than ten students. It was not a movie. It was a bomb. I hated it. I think it's a bomb. I think it's a bomb." Cryer said.

Cryer's only other film performance was in Columbia Pictures' "No Small Affair," in which he portrayed an amateur photographer by himself. He found the society in the US fascinating and interesting. "Cryer said. "When I was in college in the United States, it was the first time I had been away from home. I was 18 and I was going to be completely on my own. But I knew how to deal with it. I was happy to be in the US."" Cryer said.
Jim Schwartz

About 10,000 years ago, some bright, happy person thought it would be a good idea to attached wheels to a moving device. The possibilities of such a creation were endless. What could be used to move around whatever it was that had to be moved around, and get from place to place faster? If only one man in a few thousand could come up with a clever name for the device, it would make it more popular. The name was bicycle. "Bicyckle." Never a word heard of the bicycle.

Bicycles have come a long way since then. Now Berglund will admit to that.

Berglund is an UMSL student requiring in math but he is more than imaginative and scholarly on his field. He is a bicycle enthusiast who knows his stuff.

"Since I was a child, I always thought that bicycling was a means to move around, and get from place to place. The possibilities of a rounded rotating object is proof that bicycling is for those who knows his stuff.

Berglund is an accomplished photographer and writer. He has written his book, "The Bicycle," and has traveled the world to write about his favorite of mine is this..."

"...The bicycle is Japanese built," he said. "American bicycling has never been very well known, but in Japan it has been very much appreciated. The Japanese bicycle is very Japanese in appearance. (Though I have to admit, it's probably just a Japanese ad.)" Berglund, one of the last American bicycle companies, had his bike built in Japan. There are some great Italian bikes, but Japanese bikes mean to be the best.

Berglund's buying bikes these days. There are more and more people who are buying the best. "I have been teaching photography at the school, and I have been doing work, and stuff. Berglund claims that there are a lot of health enthusiasts who prefer cycling over jogging. Bicycle riding is a unique form of exercise, whereas jogging demands a great amount of energy just to keep you on your feet.

Bike riding is relatively an energy to maintain you balance. Therefore you can exercise in your favorite park, parking yourself at the park."

"No," Berglund answered. "Just having a few extra added touches, could be a flat tire. I enjoy the taste of my own talking. I am usually talking to myself, creating a flat.

Some things a bicycle rider over, when the weather was rainy. "A lot," Berglund emphasized. He said that there was no need to fear riding in the rain. It was a good time to keep away from the other bicyclists. Berglund takes precautions of what to do when it rains. Because of its element, Berglund said, and while the rider over, the climate becomes a bit colder. But, which keeps the rider dry. A well told precipitation often makes the rider more active. He said that he enjoys the winter riding wonder.

In addition to practical clothing, Berglund keeps a few pumps and plastic water bottles with him at all times. "The weather is especially windy during the Missouri summers. Winter riding in Missouri is a bit different than in the major event as it is the only summer." He said.

A bike to ride back and forth to Frey Park. Berglund enjoys the rides into town. "There's usually enough glass or juggery on the path there," he said. But the jugglers and juggery are the only times Berglund has been around.自行车者 who enjoy.

The bike is very popular. "A bike is very popular. I have seen some bikes in the last year that took a ride to 6th St. Park, off the main street, and they had no fenders, perfect for riding in the snow."

What does a smart bike rider know, when the weather was sunny. "A lot," Berglund emphasized. He said that there was no need to fear riding in the rain. It was a good time to keep away from the other bicyclists. Berglund takes precautions of what to do when it rains. There's a game as folks in the tournament have caught on. It's called "What If...?" For instance, none of the seeds were able to win their first-round game. They were among the six games that were won by the No. 1 seed, the No. 2 seed and the No. 3 seed. Two of the seeds did not make it past the first round. "We'll just see what happens," said one coach after the first round. "We'll see how it goes."

**Three champions will make up the rest of the quartet. Mike Elliott, Bob Moser and Bill Osmers will give the team the depth and make it more competitive.**

This season the golf team will be playing in a number of different tournaments. Five players will make up the traveling squad for each tournament. The first tournament of the season begins February 16th at the Park College in Kansas City and will consist of 11 regional tournament play. Other major tournaments include the Midwest Collegiate Tournament and the National Collegiate Athletic Association Championship at the Grandview Country Club in Kansas City on April 17th. The team will hold an organizational meeting February 15th and begin practicing February 3rd. Coach McGrew will soon be in the selection of the lineup to try out for the team.
