Twenty-five years ago, the St. Louis region did not have a comprehensive public university. Today, however, the University of Missouri-St. Louis provides educational opportunities for thousands of St. Louisans.

From its humble beginnings 25 years ago, the University of Missouri-St. Louis has grown to become an integral part of the economic revitalization of the St. Louis region.

As the campus embarks on a second generation of growth, it continues to offer accessible educational opportunities comprised of high academic standards, a quality faculty and a wide variety of social activities.

The University of Missouri-St. Louis was founded in 1963. Now the third largest university in the state, UM-St. Louis has a student body of nearly 12,000 students.

The University of Missouri system dates back to 1839. Although the youngest campus, UM-St. Louis has a proven track record. Over 80 percent of the University’s nearly 50,000 alumni live and work in the metropolitan St. Louis area and make contributions in industry, government and education.

UM-St. Louis offers seven academic divisions, 38 disciplines of study, masters degree programs in 20 fields, six preprofessional programs and five doctoral programs.

The academic quality of the UM-St. Louis campus is a matter of record. The UM Board of Curators have designated the Departments of Chemistry and Political Science as Centers of Eminence-departments designated for national prominence within the decade.

In addition, UM-St. Louis professors are recognized internationally in their fields of study. Nearly 60 percent hold doctoral degrees from some of the most prestigious universities.

As the nation enters into a transformed 21st century economy, UM-St. Louis plans to be a partner with the St. Louis community to help meet future challenges.
Welcome To UM-St. Louis

Last year at the Chancellor's Report to the Community, I made three pledges to the St. Louis community. First, I pledged this University to the continued pursuit of excellence. Second, I pledged that UM-St. Louis would be a good neighbor. And third, I pledged that we would seek to be an example of the best in urban higher education.

This report details our year's activities. Our plethora of faculty, student, and campus-wide initiatives demonstrate our institutional vigor and the intensity of our commitment to nurture excellence. Our major project, "Partnerships for Progress," is an institutionalization of our effort to be a good neighbor, to work in partnership with other organizations in the community for the benefit of the region and the state.

Through imaginative, cost-effective programs such as our joint programs in law and in dentistry with the University of Missouri-Kansas City and our effort to identify and further our community's economic vitality, we are creating unique and educational programs that I hope will be replicated elsewhere.

Activities chronicled in the University of St. Louis 1986-87 report will make clear why we believe this is "A Time of Promise" for all of us. Epictetus, the ancient Greek philosopher, observed, "No great thing is created suddenly, any more than a bunch of grapes or a fig. If you tell me you desire a fig, I answer you that there must be time. Let it first blossom, then bear fruit, then ripen."

Epictetus captures the essence of the first period in the development of the University of Missouri-St. Louis. This University is at a crucial point in its history; it is at the end of its first generation of development. During this first generation, a superb faculty was recruited, a 217-acre campus was built, and a challenging academic foundation was laid. Faculty and staff who have been on our campus for a number of years have had the experience of being part of the dynamic growth of a young campus. Now, one year before our 25th anniversary, we eagerly anticipate the challenge of the time of promise that awaits us. For it is during this next era in the University's history that we hope to work with the St. Louis community in the ground work for the University of Missouri-St. Louis realizing its potential for world-class public university stature.

Marguerite Ross Barnett
Chancellor
University of Missouri-St. Louis

L. Sandy MacLean
Vice Chancellor for Student Affairs

Kevin Edwards
Student Government Representative Board of Directors

Marguerite Ross Barnett, chancellor of University of Missouri-St. Louis, delivers the Chancellor's Report to the Community on May 15, 1987. The report details the university's year's activities and its commitment to excellence, good neighborliness, and economic vitality. The report also highlights the institution's "Time of Promise," which is anticipated during the next era of its history.

The chancellor, along with other university officials, discuss various initiatives and programs that have been implemented to achieve these goals. The report emphasizes the importance of partnerships with other organizations in the community for the benefit of the region and state. The chancellor concludes by expressing anticipation for the future and the potential of the University of Missouri-St. Louis to become a world-class public university.

This report serves as a reflection of the university's commitment to continuous improvement and its role in the development and growth of the St. Louis community.

Students Patrol Campus

The Student Patrol program at the University of Missouri, St. Louis originated in the fall of 1982. At that time it was hoped that it would prove to be a worthwhile project, benefiting both the University Police Department and the participating students. The new uniforms will benefit police personnel while on patrol. Students Patrol Campus

University Program Board

We're Not The Same

Without "U"

The University Program Board is currently seeking applications for appointments.

Applications are available in the Office of Student Activities 550 University Center

- Get Involved
- Open to all Students
- 9 Positions Available
- Opportunities for Leadership

These folks are members of the University Program Board, UM-St. Louis' only campus-wide programs and activities committee.

But there is something missing... "U!"

The University Program Board should have 15 students, and currently we have only 9. That's where "U" come in. Consider stopping by 250 University Center and picking up an application, your ticket to fame. "U" can get your picture in the campus paper, go to great places (like Peoria) and volunteer much of your time to helping select and produce programs for the University Community.

...OH! and remember these faces! These guys have been giving a lot of their time already, and need to hear your explanations and suggestions for campus activities. If you don't have any ideas, just say hi!
LOST?

Here are some simple directions on how to get to the university: From I-70, exit at 3-431A, two blocks north to back campus entrance. Drive 1.75 mi to Natural Bridge Road, about one mile east to the 2nd stop sign, left into main campus entrance. South Campus entrance one third mile further on Natural Bridge Road.

If fighting the rush hour traffic to take a bus is not your style, then the Office of Student Activities has information on car pooling and public transportation that serves the campus.

The office is located in SBI University Center. You can call between 8 a.m. and 5 p.m. Monday through Friday or visit 310-3300. Site bus schedules are also available in this office.

The Biology Club conducts investigations in the life sciences through field trips, meetings, seminars and social activities. Each year has a different focus, but the Biology Department in some way supports the Club. The Delta Sigma Phi is a co-ed business club which has sponsored large corporations for meetings and seminars, and projects for students. Members must have at least a 3.0 grade point average and a GPA of 3.2 or better.

Kappa Delta Pi is a national honor society in education, which admission requirements include professionals related to educational institutions. The society sponsors panel discussions and participates in various service activities.

The Marketing Club brings in outside speakers to discuss current marketing principles in an effort to provide a bridge between marketing theory and practice. The club also sponsors career development activities.

The Mathematics Club offers students a chance to meet others who share an interest in mathematics and participate in various service activities.

In recent years the club has sponsored a variety of different areas in industry to teach a career in physics and design through a series of films, a computer programming contest, a year of McDonald's Doughnut Information System. The Club has sponsored a number of Homecoming events.

The National Optimistic Student Association provides various service and educational programs in the general public. The association sponsors science, environmental studies, study guides, convention travel and various projects, including the Optimistic Email Project.

The Philanthropy Club has sponsored various fund raising events, have special interest in art works and seek to foster a better understanding of the contributions of the arts to society.

Student National Education Association supplements the school curriculum by providing seminars and activities of a professional nature. Events have included workshops, holiday banquets, dinners and social events. The group has sponsored or co-sponsored projects and provided volunteers for various events.

The Jazz Ensemble provides UM-St. Louis students with the opportunity to perform jazz music and plan events. They meet once a week at the University Center. The group has sponsored a number of events, including concerts, workshops, conventions, speakers, and field trips.

Student Union provides UM-St. Louis students with the opportunity to perform in various music festivals and auditions. They have a number of active groups that perform at various events. The group has sponsored a number of events including concerts, workshops, conventions, speakers, and field trips.

The Physics Club supplies exposure to the field of astrophysics through presentations, lectures, and field trips, and seeks to offer students opportunities in representation of national interest in the field of astrophysics.

The Professional Student Honor Society provides opportunities for students to gain experience and develop leadership skills. The group has sponsored a number of events including workshops, conventions, speakers, and field trips.
The Evening College of the University of Missouri-St. Louis offers 27 degree programs in Arts and Sciences, Business, Education, Engineering, and Nursing that conform to the requirements of the appropriate school or department.

One non-degree-programs in Business Administration is available for students who wish to take courses offered by the Evening College each year.

Degree offerings include the Bachelor of Arts (with 11 major options), the Bachelor of General Studies, the Bachelor of Science (with 14 major options), the Bachelor of Science in Business Administration, the Bachelor of Science in Education, the Bachelor of Science in Public Administration, the Bachelor of Science in Social Work, Master's and certificates are also offered.

Academic advisors assist new and returning students in the selection of appropriate courses and discuss transfer degree requirements. The Evening College office is open 8:00 a.m. to 5:00 p.m. Monday through Thursday and 8:00 a.m. to 12:00 noon on Friday.

The Evening College Council represents evening students in their dealings with the university. The Council is responsible for the student council's traditional activities of coordinating student events such as homecoming and concerts.

They also try to link the staff and students with the administration. They want to keep the students and faculty aware of the many opportunities the university has to offer.

The Evening College of the University of Missouri for Independent Study offers more than 100 university-level correspondence courses in subject areas ranging from math, science, and computer science to English, philosophy, and women's studies.

Important considerations include demands of one's job, family responsibilities, commitments, and personal and temporary setbacks.

The University of Missouri Center for Independent Study offers more than 100 university-level correspondence courses in subject areas ranging from math, science, and computer science to English, philosophy, and women's studies.

Call or write for a free catalog:
Center for Independent Study
136 Clark Hall Room J
Columbia, MO 65211
Phone: 314-882-2499

Note: The Center assumes no responsibility for determining the appropriateness of a course toward specific degree or certificate requirements. Please consult your advisor before enrolling.

For more information, contact the University Extension office at 718 North Grand Boulevard, Suite 700, phone 314-381-9400.
UM-ST. LOUIS IS NOT JUST CLASSES... CHECK OUT THE STUDENT SERVICES
Greek Letter

Greek life concentrates on close friendship, high scholastic ideals, personal development, and community service. Each year the campus fraternity and sorority hold dances, banquets, informal gatherings, athletic team gatherings, road trips, contests for charity, parties, appreciation dinners, and alumni dinners.

In addition to the community service activities that have included participation in the K-SHE (Kappa Sigma Phi), March of Dimes Phone-a-thon, Komen Walkathon, Material Sciences Telescope, and the I驱dorfe Center's Festival of Trees. In addition, many Greeks are active in other campus organizations as well.

Sororities

There are three National Panhellenic Conference sororities on campus. Formal rush for all groups is held starting August 17 in the J.C. Penney building. More information can be obtained from the Office of Student Activities, 350 University Center, 314-513-9238. After August 16, interested women may contact each individual sorority.

Alpha Xi Delta was the first national sorority on campus, founded locally in 1969 and nationally in 1969. Colors are blue and white. The flower is the pink Killearn rose, and the mascot is the butterfly bear.

Zeta Tau Alpha, or Zetas, were founded nationally in 1966. Colors are red and blue. The flower is the violet, the color in the pink Killearn rose, and the mascot is the butterfly bear.

Delta Zeta was founded nationally in 1965. Colors are red and green. The flower is the rose, the color in the pink Killearn rose, and the mascot is the butterfly bear.

Fraternities

Fraternities have had a different atmosphere from that of the sororities. Interested men should contact their fraternity directly for more information.

Sigma Pi was the first men's national fraternity on campus, founded in 1935. Sigma Pi currently holds the highest all-male grade point average of all the men's organizations on campus. In the fall, the fraternity held the Greek Week Cornhole Tourney for business hours in a row. Visit the fraternity house at 8655 Natural Bridge. Both parties are held every Wednesday night.

Tau Kappa Epsilon. The Kappa Epsilon chapter on campus, founded in 1986. Sigma Pi currently holds the highest all-male grade point average of all the men's organizations on campus. In the fall, the fraternity held the Greek Week Cornhole Tourney for business hours in a row. Visit the fraternity house at 8655 Natural Bridge. P Kappa Alpha, Zeta Phi chapter, established itself on campus in 1993. The Pikes have won Greek Week for the past two years and sponsored a pumpkin pie eating contest each Thanksgiving with proceeds benefiting going to the St. Vincent's Orphanage in Normandy. This year they will be sponsoring their 4th annual spring break trip to Florida.

Committees are forming now!

Applications available at 282 University Center

On behalf of the U.M.-St. Louis Student Association, welcome to the campus. The Student Association exists to provide student participation in the general administration and government of UMSL. The Student Association is working towards full student participation in university life, university affairs and policy decision in addition to encouraging students to govern themselves, and assume responsibility for their government. The Student Association achieves its objectives by working with the faculty and administration as elected representatives of the student body and is responsible for presenting student concerns to the Student Association Assembly where legislation is approved. Student action to the faculty and administration is communicated through the University Senate. Elections for membership on the Assembly and Senate are held in April. Freshman and transfer students can be elected to the Student Association Assembly in September.

Assembly meetings have been tentatively scheduled for the second Sunday of each month during the academic year and are open to all. We strongly encourage you to become involved in student government through direct election to the Assembly or Senate, through membership and participation on Assembly and Senate committees, or through membership and participation in student groups.

The Student Association maintains an office in room 262 of University Center. We are open from 9 a.m. to 3 p.m. Monday through Friday. Feel free to drop by for more information on student affairs or give us a call at 314-513-9238.

Forecasts and Debate Club

A record setting Women's basketball season which saw the UM-St. Louis' team average almost 12 more points per game than a year ago has earned the team the number seven ranking in Division III. February 19, 1987 saw the team lose to Maryville College after winning its first two games of the season. The team finished its season with a record of 15-6 overall and 11-4 in the conference. The team's progress from a 1-22 season a year ago to the number two seed in the conference tournament for this season is a testament to the hard work of the team and the coaching staff.

International Students

The UM-St. Louis International Student Organization promotes international understanding and cultural exchange for UM-St. Louis students, and represents the interests of international students to the university. The organization sponsors International Week, which features dances from many countries, cultural exhibits, and special guest speakers. The International Student Organization also sponsors International Dinner Night, where international students are asked to prepare a dish from their home country. These events are held to celebrate the diversity of the student body.

Campus Activities

The UM-St. Louis Army ROTC cadets have just completed the 1986-87 program year with a variety of significant accomplishments. The U.S. Army ROTC has recently increased the number of scholarship opportunities available to military students. The cadets have been active in various events and have contributed to the success of the campus and the community.

Attention Evening Students

Of UM-St. Louis

Early in the twentieth century Albert Einstein formulated his theory of relativity, which dealt with the relationship of energy and matter at a certain critical speed. Late that same year, the Members of the Electromagnetic Theory of Relativity, including atomic and nuclear physics, received their Nobel prizes. The theory was revolutionary and laid the foundation for modern physics.

Above: Marillac Hall on South Campus where the School of Optometry and the clinics are located.

Right: Students conducting examinations.

UM-R. Louis School of Optometry would like to invite you to visit the Optometry Clinic facility located in Marillac Hall on South Campus. The clinic is open to the public as well as to students, faculty, and staff of the University. The clinic’s primary goal is to provide patients with high quality vision care practitioners to serve the citizens of Missouri and the region is the schools overall goal. To achieve this, we have supervision by licensed optometrists and the state-of-the-art instruments.

The first step in an examination at the Primary Care Clinic is an assessment of your eye health. A comprehensive examination requires about two hours. Third and fourth year students under the supervision of clinically qualified faculty perform the exam. Two hours allows for a comprehensive examination and an accurate diagnosis.

Should you require specialized services, you will be referred to the appropriate clinic area. Clinics specialize in contact lenses fitting, low vision assessment, and specialized visual evaluation. These clinics utilize advanced equipment and techniques. They are prepared to handle patients needing care beyond the standard examination and treatment procedures offered in a general eye examination.

We strive to provide our patients with a clinical facility designed to offer highest quality vision care. Health education is an important aspect of our service. We believe you deserve to be well-informed about your vision and eye health. We provide referral services to and provide clinical services to the public as well as to students, faculty, and staff of the University and to the public in general.

We wish to invite you to visit the Optometry Clinic and observe our patients in the clinics. We are located in the School of Optometry, Marillac Hall on South Campus.

In the University Lobby on South Campus, you will find the clinic’s sign and entrance. The clinic is open to the public from 9:00 a.m. to 5:00 p.m. Monday through Thursday and from 9:00 a.m. to 5:00 p.m. on Fridays. The clinic is closed on Saturdays and Sundays.

If you would like to learn more about the services offered by the Optometry Clinic, please call 553-5131.
Thinking About Going To Law School?

LSAT Preparation Course
Saturdays, September 19 - October 10 19 a.m. - noon
University of Missouri-St. Louis J.C. Penney Building

This five-week course is designed to help prepare students for the Law School Admission Test which will be given on October 17. Fee for the course is $85 (includes test book, library card, course materials and parking).

For information, or to register, call UM-St. Louis Continuing Education - Extension at 553-5961.

Sky Watch
The UM-St. Louis Observatory will open to the public for a special open house this month. The viewing will include the planets Jupiter and Saturn and will be held on August 29, at 8 p.m. (weather permitting).

The Observatory is located on the North Campus, 5844 Natural Bridge Road, next to parking lot. Admission is free and all of the UM-St. Louis community is welcome to enjoy the sights.

Just some of the sights observers will have the opportunity to see include all the features of the first-quarter moon, various planets, whipped and other celestial objects. The University's 16-inch Celestron telescope will be set up everything into breathtaking view in the telescope's magnificent view. Planets and galaxies up to 1,000 times greater than the human eye can see.

In case of inclement weather, the open house will be rescheduled for the following evening. For more information or open houses and sky watching in view, call the UM-St. Louis Skywatch Hotline at 553-9078.

A complete listing of courses approved for Women's Studies credit is available in the Fall in the Women's Studies office.

A Certificate in Women's Studies is available to student enrolled on a full-time basis. To obtain a Certificate in Women's Studies, a student must present a student's plan of study and obtain a Certificate in Women's Studies endorsement from the Dean of the Graduate School. The Certificate in Women's Studies program is designed to provide an academic foundation for students interested in furthering their understanding of the role of women in society. The program consists of a minimum of 15 credit hours of work in Women's Studies courses, including a minimum of 9 credit hours of coursework at the 500 level or above. The Certificate in Women's Studies is available to students on a full-time or part-time basis. The Certificate in Women's Studies is offered in cooperation with the Department of Women's Studies and the College of Arts and Sciences.

The Center for Academic Development, located in the Office of the Dean, provides academic support programs for students. The Center has been in operation since 1984. The Center offers a variety of services to students, including individual and group tutoring, study skills workshops, and academic advising. The Center also provides a range of academic support services to students, including academic coaching, academic counseling, and academic advising. The Center is open to all students, regardless of academic status or major.

The Health Center provides a variety of health-related services to students, including health screenings, immunizations, and scheduled appointments. The Center also provides a variety of health-related services to students, including health screenings, immunizations, and scheduled appointments. The Center is open to all students, regardless of academic status or major.

**The Western Historical Manuscript Collection**

The Western Historical Manuscript Collection in the Thomas Jefferson Library documents St. Louis' rich cultural heritage, a lifestyle unique for the city and its people. The collection provides primary sources for research, organizational records, personal papers, oral history interviews, and video tapes to students in history, English, political science, art, business, and other disciplines. In addition to making these research materials available, the WMHC staff is on hand to suggest paper topics and possible areas of study.

The collections reflect important and often overlooked dimensions of local history. For instance, one of the country's first anti-nuclear lobbying groups, the Committee for Nuclear Information, began here, as did one of the first international halfway houses, the Dismas House. The Democratic Party first assigned a woman's suffrage plank at its 1916 convention in St. Louis. An emergency convention of the Socialist Party of America the following year voted to oppose U.S. involvement in World War I.

During the Depression, the St. Louis riverfront became the site of the country's largest Hooverville shantytown. A local social service agency called the Bureau for Men and Women served as a national model for the establishment of soup kitchens and halfway houses. A local social service agency known as the Dismas House also conducted community services and social policy research efforts of enterprising women. Several of the first correctional halfway houses in the country—such as the Dismas House—were established here, as were the first anti-nuclear organizations, the Nuclear Information, began here, as did one of the first international halfway houses, the Dismas House. The Democratic Party first assigned a woman's suffrage plank at its 1916 convention in St. Louis. An emergency convention of the Socialist Party of America the following year voted to oppose U.S. involvement in World War I.

**Attendance Information**

The collection includes free publications, reports, studies, and office files created at UMSL. Collections include fully indexed back issues of the Current, starting from 1980, when it was called the Tiger Cafe. Yearbooks, student directories, and不在乎的其他课程材料．

**Ask a 'Bugg' anyway**

If you are doing research for a super, you will have a question about UMSL, the University Archives is open from 8 a.m.-5 p.m. (and until 9 p.m. on Tuesdays). Reference service is available. At the Archives, you can find: • VDTs • Contact lenses • Eyewear Assessment • Designer Sunglasses • Eye Health Assessments • Newest Lens Designs and Fashion Frames

Athletes Look To Improve Marks In 1987-88

After successful season in 1986-87, UMSL's sports teams will be looking to improve last year's mark of 8-7-3 in 1987-88 year begins with the Rivermen celebrating their twentieth soccer season.

When the sports season takes the field Sept. 4 against Quincy College in Springfield, Ill., the Rivermen will just be starting a schedule which features many nationally ranked schools, Divisionהיסטור.

Three new teams, all area freshmen, will be playing the Riverwomen soccer team for the 1987 season and will hope to help improve last year's 5-3 mark. Included in the list of new freshmen is goalie Amy Wilkensmeyer, niece of former soccer star Scott Wilkensmeyer. The former Wilkensmeyer was a three-year starter at John P. Kennedy High School.

Volleyball, in 1987, is coming off one of its most successful seasons at UMSL. First-year coach Denise Silverstein received a Coaches of the Year honor as her team finished second in the Missouri Intercollegiate Athletic Association, 23-14 overall.

Rivermen basketball promises to be exciting in 1987-88 as coach Rich Meckfessel has all but two athletes returning. After a slow start in 1986-87, the Rivermen rallied out the rest of the season with a respectable 13-12 mark. The key to the Rivermen's success was the leadership and rebounding, locked away inside, by senior, book, the Rivermen basketball team will be looking to the future in 1987-88. The Riverwomen can only improve their 12-15 mark saw产量 play this season and will be looking to improve their 12-15 overall. The Riverwomen will be looking at adding two keys for a successful season. With an all-encompassing schedule, running the Riverwomen softball team is coming off its best finish ever in the MIAA.

The softball and golf teams will also be competing this spring and will hope to continue the success that each experienced last year. The Riverwomen softball team, led by one of UMSL's top athletes, Anyone who is interested in participating should contact the athletic department at 553-5125.

The tennis and golf teams will offer softball, bowling, badminton, or weightlifting for a variety of sports including softball, bowling, badminton, or weightlifting. These sports are offered for men, women and mixing, soccer, weightlifting

Sports

CELEBRATING: Riverman soccer kicks off its twentieth season at UMSL.

Intramural Activities Set To Begin September 9

The intramural office is again offering a variety of activities with something that should appeal to everyone. These programs promote not only competition and fitness, but a chance for everyone to participate and meet new friends. Activities include basketball, softball, touch football, tennis, volleyball, badminton, and much more.

The gymnasium in the Mark Twain Building offers a number of facilities. An Olympic-sized pool with six lanes and two diving boards is also available for a variety of sports, including swimming, water aerobics, and synchronized swimming.

One of the most interesting intramural programs in the "Swim The Missouri" club. Participants schedule their own time to use the Mark Twain pool and their own laps. They continue this until they have covered the entire length of the pool and run on the exercise equipment. In addition, a number of special events will be held this year. These will include both intramural and club competitions, as well as the Missouri Intercollegiate Athletic Association Challenge.

A recent addition to the intramural program is the Fit-Trial. The Fit-Trial is a six mile jogging course which begins in front of the Mark Twain Building. The joggers run the course and stop at each of the twenty stations to participate in various exercises. The exercises range from the boredom of jogging and promote total body fitness. It is designed for physical fitness, for beginning and advanced runners.
