Halpin Fighting AIDS Legislation

by Paul Thompson

URM's Louise Associate Professor of Biology Zuleyma Tang Halpin is having a fight against AIDS. "Halpin Fighting AIDS Legislation," in the House bill, said her organization has been fighting the bill, which would mandate testing for the virus.

Halpin said her organization has been fighting the bill because it would require mandatory testing for the virus.

The House bill does not provide for anonymous testing; instead, it mandates testing for the virus. Halpin said that most of the AIDS organizations that she has heard from are strongly opposed to the House bill, while failing to provide adequate information to those in their care or to ensure confidentiality of test results.

"The Senate bill still does not provide for anonymous testing," Halpin said. "It will draw the disease under cover and that will be counterproductive."

Halpin said she considered it important to react against the Senate bill, which means all that the testing agencies will be required to do is defeat it. The Senate bill was defeated, she said, the bill would not advance those tested that their names will not be reported to the state Department of Health. Halpin said that they would support the Senate bill, which would not advance people's health, and would allow for the right to be tested without being identified.

See AIDS LOB, page 3.

By Kevin Klein

The Senate's Financial Aid Task Force meets last February to hear suggestions on improving the quality of service provided by UMKC, interviewed staff, students, and others in order to make suggestions to the task force. Dietz has worked in financial aid offices at several institutions for 13 years and is considered one of the university's foremost experts on the subject.

"The complaints lodged against the financial aid system here range from poor communication between the office and students to minor inconveniences in filling out forms," said Dietz.

The next phase, said Dietz, is women as victims. "The fourth phase is women as speakers," she said. The full implications of a feminist viewpoint might be applied to science.

"The fuller implications of a feminist viewpoint might be applied to science," Rosser said. "If you can't imagine what that science might be, Rosser said. She described the first phase as "womensoriented," in which their deeds and activities were simply explained.

The next phase, which she said was "women as objects," is women who were depicted as victims.

The fourth phase is women as speakers, Rosser explained. "It is women as objects," Rosser said. "If you can't imagine what that science might be, Rosser said. She described the first phase as "womensoriented," in which their deeds and activities were simply explained.

WANTED! A Few Reliable Reps

Only two students were present at Tuesday's University Senate meeting. And, judging from the size of the student government meetings, there are only two or three senators who have bothered to attend any Senate meetings.

These meetings are not really exciting. There is no door prize and there's not life or death. But dammit, they agreed to represent student interests when they sought these elected positions. So, where are they?

For the past several years, there has been talk of reducing the number of Senate seats from 40 to 8. Only then will there be enough students to bother to attend meetings. And, according to present student activists who are concerned enough to attend procedural meetings may not be held. Perhaps a concentration of activists could offset sheer volume. If senators who care would work more effectively than they do, it's not life or death. But dammit, they agreed to represent student interests when they sought these elected positions.

Campus Enrollment Rises
Jump Attributed To More Seniors, Grad Students

UM-St. Louis student enrollment has experienced increases in the last six terms, and graduate enrollment has risen 4.9 percent, according to L. Randy MacLean, vice chancellor for student affairs.

MacLean said that a dramatic rise in the number of senior undergraduates and graduate students and doctoral students is responsible for the increase.

Senior enrollment is up 7.3 percent from the winter of 1986, and graduate enrollment is up 13.3 percent in the same period. The increase in graduate programs—both master's and doctoral—reflects the need for more graduate education.

UM-St. Louis' enrollment of black students has increased from 4.8 percent in the fall of 1986 to 8 percent in fall of 1987.

According to MacLean, the increase in black student enrollment is attributable to the university's increased exposure in the black community through participation in community events like the Union-South Fair.

Last year, the university participated in this event for the first time. The event is sponsored by the Union-South Economic Development Corporation and celebrates more than 30 years of progress in the north St. Louis neighborhood.

UM-St. Louis, as the student enrollment has increased, has raised the graduate enrollment 13.3 percent. The increase in graduate programs—both master's and doctoral—reflects the need for more graduate education.

UM-St. Louis offers a series of one-day courses for instruction in Introduction to Word Processing using Windows, a computer-based program for personal computers.

The course will be held at the Regional Introduction to Word Processing Center at 11 p.m. on Friday, March 2. The course will be taught by Monday, Tuesday, and Wednesday from 8:30 a.m. to 4 p.m. The course will include block manipulations, cut and paste, search and replace, mail merging, and other functions.

The total cost of the course is $96.

Every day thousands of college students, ready, aim, and fire their fingers down their theses, to make themselves sick. It's called raging, and while it may seem: like the easy way to look healthy, it's actually a sure way to become very ill.

Left unchecked, bulimia can cause teeth, daily vomiting, stomach or esophagus, and kidney failure. In its latter stages, it can cause the heart to skip beats, until one day it skips for good. But there is hope.

The University of Missouri-St. Louis' Mercy Medical Center can help bulimia and anorexia victims find relief from their guilt, depression, and years of loneliness. They can show them how to stop their downward spiral of nourishment instead of an obsession, and how to start feeling good about themselves again.

A 7:30 a.m. meeting on Thursdays, at St. John's Mercy Medical Center can help bulimia and anorexia victims find relief from their guilt, depression, and years of loneliness. They can show them how to stop their downward spiral of nourishment instead of an obsession, and how to start feeling good about themselves again.

**High School Women Scholarship Competition at Symposium**

by Jann Kilgore

associate news editor

For the first time in its 10-year history, UM-St. Louis' Missouri Regional Junior Science, Engineering and Humanities Symposium was by women.

The symposium, hosted at UM-St. Louis March 3-5, is designed to promote interest in mathematics, science, engineering, and humanities among high school students. It's a reward program for kids who have done well in sciences and math. And, it's an opportunity to meet with their peers from across the country.

Almost 360 students and 75 teachers from 75 high schools throughout the state participated in this year's program.

Local Writers' Guild Sponsoring Short Story Contest

The St. Louis Writers Guild is currently accepting manuscripts for the annual James Nash Memorial Writing Contest. The category is short story. Three prize will be awarded: $1,000 for first place, $750 for second place, and $500 for third place.

Eligibility and contest rules are as follows:

• Contest is open to students within 30 miles of St. Louis who are eligible.

• Stories must be 1,000 words or less.

• Manuscripts must be submitted between March 1-15.

• Manuscripts must be typed double spaced on standard 8 1/2 x 11 inch paper.

• Manuscripts must be written in English.

For a copy of guidelines, send a self-addressed stamped envelope to:

PO. Box 1986
St. Louis, MO 63166

(314) 289-0265

**Optometry Students Get Grants**

Thirty optometry students recently received grants from the Missouri Optometric Society (MOS) to attend the national American Academy of Optometry Society at the organization's 37th Annual Convention in New Orleans.

These receiving grants were selected from about 50 applicants who were accepted into MOS in 1982.

Among the six students from the midwest receiving the grants were UM-St. Louis students Barbara Willis Brown, Wesley Daniel Johnson and Diane Wirtzschmidt.

But, UM-St. Louis students have not yet submitted their paper entries, "Ocular Manifestations of Environmental Lung Disease," which address the detection of a bacterial etiology contributing to cases of pneumonitis and what to do once detection is made.

Johnson also won a $1,000 grant for her research on "Photorefractive Kornea." This technique is a way to measure the thickness of a cornea.

Werner, winner of a $1,000 grant for her research on "Contact Lens for the Aphakic Child." This paper will analyze the contact lenses being used for young children who have visual handicaps or other problems.

The Missouri Optometric Society grant program was intended to encourage students research in the context less field and to recognize outstanding efforts by the participants, according to Dr. V.J. Finkelman, board member and chairman of the Committee.

Winning papers must be submitted for publication by the students. Judges also consider overall grades and references.

**Local Writers' Guild Sponsoring Short Story Contest**

Winning manuscripts will be entered in the Missouri Regional Junior Science, Engineering and Humanities Symposium at UM-St. Louis March 3-5, 1983.

On the evening of March 4, a reception and dinner will be held at the University of Missouri-St. Louis with the announcement of winning manuscripts.

Writers must submit three copies of their work to:

The St. Louis Writers Guild
109 Zink Hall
St. Louis University
St. Louis, MO 63103

Manuscripts must be typed double spaced on standard 8 1/2 x 11 inch paper.

Sponsored by the Office of Student Activities

**NEWSBRIEFS**

A workshop for individuals who are responsible for producing newsletter for their company, church, club or other organization is being offered by the UM-St. Louis Continuing Education-Extension.

Introductions to Newsletters will begin with a brief overview of newsletter design and writing and cover the typical lead patterns used in newsletters. Many tips will be given on how to write a newsletter that is both informative and easy to read. The workshop will be taught by Dr. John M. Sturtz, professor of communication and director of the Center for Continuing Education.

Participants are invited to bring copies of newsletter they are responsible for and the newsletter will be discussed.

The fee for the course is $50. For more information, contact the Continuing Education Office, 553-5961.

Don’t Spend Spring Break Watching Old Re-Runs

by Jay Knoff

Imagine relaxing on a beach in some Florida with a cold drink in hand, not a care from school. A salty breeze, crystal blue ocean water, and a delicious drink. Sound restful, doesn’t it? At least, that’s what you’d think. But the reality is often far from what you’d think.

The majority of the us would know that before you know it, you could be stuck with a hangover, sleeping in your tent, dreaming of paper work, and wondering how the week was over before you knew it. Spring break is only a couple of weeks, but it seems like it would likely be hard to unwind without moving some substance in the blue-green eyes.

But you resist for now, content with a beer and some relaxation time, because you still have some time left for you. Spring break is a time for fun, but it seems like by the actio n. and although the bahavior of the film’s characters does go

Meet the Players and the Coach

Laurie Aldy (7) [shortstop]

program in 1986 after the team had struggled through a 10-19 season. A 27-17 mark in 1986 and a 28-12 mark in 1987 have brought a new season outlook for the team. Aldy was both a basketball and softball star for the university until she graduated in 1986 with a degree in physical education. She played every position, except for first base, and set an academic record in softball. She also held the UM-St. Louis record for most consecutive free throws made (22) until it fell in 1988.

Denise Calvin (2) [catcher/first baseman]

Tao (17) [pitcher]

WOMEN'S TENNIS TEAM (from left to right): Jean Marquart, Sandy Hammel, Laura Essick and assistant coach Carmen Nanawa. Aldy set a school record for most doubles hits in a season (20) and a career (36) and in 1987 earned a batting average of .375 with 50 hits scored in 34 games (83 percent). She was also a first team All-MIAA pick in 1987.

Sandy Hammonds (2) [pitcher]

In their first played match against William Jewell College on March 28, 1988, the Rivermen ended the 1987-88 season by finishing third all the way to the NCAA Division 11 Championships.

Shelley Wynn (3) [second base]

Grace (Casey) Masters (4) [first base]

The Rivermen will host the Missouri Tigers on March 28 and the almost always SIAA Conference team that features two 1987 NCAA Tournament teams in Southeast Missouri State and Central Missouri State. Their season opened on March 23 when they will play a double header in Florida against Bryant College and Merrimack College.

Not pictured: Lisa Nolka (12) and Linda Rogers (17).

The UM-St. Louis Tennis Team

Laurie Aldy, junior and transfer student from William Woods, and Krista Toppino, sophomore, are the team leaders in the conference with .98 and .91 winning percentages, respectively. Aldy was also a first team All-MIAA pick in 1987.

The situation looked particularly precarious for the Rivermen in the first half against Northwestern. As Hierro’s shooting skills, an almost total lack of team chemistry, and a trainwreck of a defense teamed to create an adrenaline attack.

The Rivermen jumped out to an early lead of 47-38. But the defense clamped down on the offense and slowly cut the lead to 33-31.

With 4 minutes left in the game, the Rivermen were down by three, but came back to tie the game at 33-33.

In the final minute of the game, the Rivermen took a 66-65 lead and went on to win the game.
