**First Chancellor's Awards' Giveaways**

**Shuttle Carried UM Work** by Paul Thompson editor

When the space shuttle Discovery was launched into orbit on Sept. 8, Robert Cabaniss had his fingers crossed. Like the rest of us, the UM-St. Louis metallurgists were cheering on the space shuttle Challenger. Cabaniss had designed the experimental payload that had been tossed aside when the Challenger exploded.

FRIDAY, OCTOBER 7

1st Annual Galaetry Debate Tournament: The UM-St. Louis Debate/Forensics team hosts the tournament, which is held in Lewis Gym, 8 a.m. to 9:30 p.m., in the Mark Twain Building. Call the Department of Communication at 553-5489 for more information.

SUNDAY, OCTOBER 9

Youth Conference on Partners in the Mystery of Redemption. The Human Rights Office of the Archdiocese of St. Louis sponsors the conference as a response to the United States' papal letter on women's concerns in "Partners in the Mystery of Redemption." To be held at Sartle Auditorium, Tegeler Hall, St. Louis University from 1 p.m. to 3 p.m.

MONDAY, OCTOBER 10

The Arden Piano Trio: The award-winning ensemble, which includes violin, piano, and cello, will perform at the Biblical Society, 801 Clayton Rd, at 8 p.m. This "Premier Performance" is sponsored by the UM-St. Louis.

Sexual Decision Making: Rosemary Petrucci, educator in human sexuality and natural family planning, will conduct the discussion from noon to 1 p.m. Sponsored by the Women's Center.

NEWSBRIEFS

The Social Work Department will be offering a series of mandatory meetings this fall for any social work students interested in taking a practice in the work field.

Meeting times are: Thursday, October 6 and Thursday, October 27, from 4:30 p.m. to 5:30 p.m. and Dec. 6, from 7 to 8 p.m. with times to be announced.

Announcements will be held in 112 Louis. For more information, contact Terry Snyder, graduate coordinator, at 553-4137.

A sports information program for children ages 5 through 12 years will be held on Saturdays, 8 a.m. to 11 a.m., during October and November in the Mark Twain Building.

The program, sponsored by the School of Education and Continuing Education-Extension, will provide instruction for children in swimming, gymnastics and tennis.

Children will receive instruction in the sports from UM-St. Louis students under the supervision of the physical education department faculty. Recently, the program has been redesigned with new coordinators and more instructors available to teach.

Registration fee is $150 for the first registrant per family and $135 for each additional sibling.

For more information, call 553-7293.

The UM-St. Louis Continuing Education-Extension is offering a seminar management skills for secretaries.

The seminar, "The Secretary as Manager," will meet from 9 a.m. to 4 p.m. on Tuesday, Oct. 11, at the Clayton Plaza hotel, 7380 Bonhomme.

Participants will learn the basic skills of planning, organizing and time management, as well as getting along with co-workers and bosses.

Fee for the course is $150.

To register, or for more information, call 553-9943.

UM-St. Louis sophomores interested in a career in government, a list of part-time public-service activities or other leadership positions, a current transcript and a 500-word essay discussing a public policy issue of their choice in Deborah A. Larson. Assistant dean of colleges arts and sciences, 363 Loose Hall, 553-7292.

Graduate Record Examination test preparation is being offered by Randy H. Kaplun Educational Center, Ltd.

Classes will be held on Wednesday evenings beginning Oct. 24 from 4 to 6 p.m. The classes are held at Kaplan Educational Center 484 Delmar Blvd. at 1-176. They will run through Dec. 2.

Starting with a diagnostic test, the students will receive customized computer print-outs showing where they are strong and weak in their major study areas. The four-hour lecture classes are taught by experienced Kaplan teachers who prepare the students for the general GRE test in areas of verbal, mathematical principles and analytical ability.

The upcoming course is in preparation for the Dec. 18 test.

For more information, call 997-7711.

West: What You Miss, You Lose

By Justin West

On a sunny afternoon last week, I was walking down campus with a friend. We were discussing our future plans and the upcoming semester. Suddenly, I felt a warm hand on my shoulder. I turned to see my friend, who had a big smile on his face.

"Hey, what's up?" he asked.

I hesitated for a moment, not sure how to respond. "Nothing," I said finally.

He chuckled. "That's too bad. But hey, I've got a great idea! Why don't we try something new?" he said.

I hesitated again, unsure of what he was suggesting.

"Like, you know, try a new hobby or something. Maybe take a class you've always wanted to take," he said.

I thought about it for a moment. "That sounds like a good idea," I said finally.

"Great! Let's do it," he said.

We spent the rest of the afternoon discussing different classes and activities we could try. In the end, we decided to enroll in a pottery class together.

I'm looking forward to trying something new and expanding my horizons. Who knows, maybe I'll discover a new talent or passion that I never knew existed.

But for now, I'm just happy to have someone to share this experience with. It's good to have a friend who understands what you're going through and is willing to support you in your endeavors.

Life is too short to miss out on opportunities. So let's go out and try something new together! Who knows what amazing things we'll discover along the way.
DONAHUE AND DISCIPLES ARE NOT THE LEAST OBJECTIONABLE

by Christopher A. Duggan features editor

I don't watch television (that often).

I believe in the 'least objectionable programming principle,' which says most people don't pick and choose the programming they watch, but have their rebellions on all the time and watch whatever they least objectionable.

I have no idea who came up with the 'least objectionable programming principle,' but it seems to be a major theme in the broadcasting class last spring.

I will say that polls show most college students are not like this. We, unlike the swarming mass, seem to gravitate to programming with cultural or artistic or educational value, as anything on channel 9, or 'Magnificent F.'

We rare unnerved masses get around to writing what have in fact that which is more easy. If you don't know what the TV says, you belong to, your chances are becoming greater of coming across some person like Donahue any little time you turn on the set.

What I mean by 'people like Donahue,' is people who have told all their friends, and their friends friends, and all the rumors of the existent issues are disseminated. For instance, a Donahue show might feature two women who have decided not to work for a man to earn a dollar. It all started rather innocently with the Donahue show, which, I hate to admit, originates in St. Louis.

Phil because Senator for the way he would stir the audience to the adoration of the producer of the show, and he is in the middle of their audience.

The show was called controversial, but this is Donahue's own fault, and none of the producers of the show have any knowledge of it.

When Walt made it really big, he wrote a book in which he wrote a lot of interesting stuff about what's the right way to be with God, what is a teacher is the need, he wrote a few Times best seller list, so it must be a good book.

Phil also moved his show to the East Coast. Phil was the only one for a long time, then along came easy show host and I call to say Donahue in drag. You might say what you say about her?

The next set of talk show women was Suzy Wyant, who had a talk show in Chicago, but actually became popular because of her Oscar-nominated performance in the movie "The Color Purple." I don't quite understand the contrast between them, it is an across or a contrast of what is supposed to make me not think of success in certain areas in most circumstances.

Similarly, most of these people seem to think they are novels as well. Please assume about Donahue's book.

This afternoon, while I was sitting in the audience, I was listening to one of God's grandest, and I was very impressed. Of this, please assume, which is a watchable feature of Donahue and Sally Jesse Raphael.

I would have changed it, but there were other people in the room who wanted to watch it. I think they must have been brainwashed.

One of the more interesting progress has been that of Geraldo Rivera, whose real name is Gordon Shriver by the way.

I have no idea who came up with the name, I am sure to gravitate to programming some of the producers of the show, seem to think they are novelists as figured out, there was nothing different between that area had some- thing on channel 9, or 'Magnificent F.'

For instance, a common Donahue What more can you say about gressions has been that of Geraldo joy in having people on his show so

'start writing about here is the fact that, about

**Hahn Sets Eyes On Optimism, Optometry**

by Michael McMurry

The transition from high school to college is an easy one, but the move from the United States to another country can be quite challenging. Stephanie Hahn, from Herkimer County, New York, and a member of the Webster Groves High School soccer team, is finding out what it means to be an American soccer player in another country.

Hahn was a key player for the Riverwomen, who faced another team that they had defeated earlier this season, the Southeast Missouri State Lady Cats. The reason for losing the first game of the season was a combination of factors, including the loss of key second half saves to keep the score 1-1 after when Joanne Hahn scored two goals to take a 3-1 lead. The team just seemed to be on top of their game.

For now, Hahn is just trying to blend in with the other players and learn as much as she can about Silvester's style of volleyball.

**Concussion, Dey Aid Men; 9-1**

by Tom Kovach

Sports Editor

Hahn's decision to play volleyball is a surprise, as she was from St. Louis. Hahn is a winner, and her presence on the team has been a positive one.

**Netters Improve to 9-6 Mark**

Michael McMurry

reporter

After dropping four straight games in the Southeast Baptist Tournament, the U-M. Lewis Women's Volleyball Team beat their toughest foe Sunday with a 3-0 sweep of the MIAA Conference Round Robins Tournament in Warrensburg, Missouri.

The Riverwomen went on to win the first of two games with a 2-1 victory over Southeast Missouri State. Much like the first time, the Netters faced a tough test in the second of two games with a 2-1 victory over Southeast Missouri State.

In the next competition for the Riverwomen, the team will travel to Evansville, Indiana to play the Miners. Game time is set for 7:30 p.m. In that contest, either Silvester or a member of the Southern Indiana Screaming Eagles could be the opponent, and the third victory in the season after Silvester's last victory will be a big step towards reaching the regional playoffs.

**Women Drop 2 Games Straight**

by Jim Wiesner

reporter

Defeat against Washington University is not the reason for losing the first game of the season, according to Head Coach Denise Silverder. "We were not prepared for the game," Silverder said. "We were not ready to play our best." The team was the Edinboro Eagles.

"I was impressed with the School of Optimism," Silverder said. "But after a long day of spiking with some of the Lady Bulldogs, the Netters had little time to prepare for the game." The Lady Bulldogs were the first of the year to keep us from scoring, and we couldn't allow them to do that.

"We played with intensity, but we didn't play with confidence," Silverder said. "We didn't play with the intensity we had in the previous game." The Lady Bulldogs were the first of the year to keep us from scoring, and we couldn't allow them to do that.

"We have a lot of good players, but we need to work on our defense," Silverder said. "We need to work on our defense." The Lady Bulldogs were the first of the year to keep us from scoring, and we couldn't allow them to do that.

"This game was a tough one for us," Silverder said. "But we need to keep working on our defense." The Lady Bulldogs were the first of the year to keep us from scoring, and we couldn't allow them to do that.

Three Vignettes On The Left And Their Lies

Biology Club Has Open Doors

To the editor:

Why did anyone in rational mind desire to participate in the Biology Club? One reason could be that the fact that we will be bringing more interesting people in to present information on a wide variety of topics ranging from black holes to vitamins to cloning to global warming to the latest technology news. All this is given to us free of charge in a beneficial avenue.

Dear Mr. Summers,

I reside in the violent heart of the American South, and a number of friends are concerned about the increase in violence in recent months.

Sincerely,
Bob Smith
How to make a hit.

The American Express Card is a hit virtually everywhere you shop, from Los Angeles to London. Whether you're planning books, travel tickets or lunch. So during college and after, it's the perfect way to pay for just about everything you'll want.

To get the Card now, go to the nearest bank or American Express office, or your campus. We believe in your potential, and we want to help students buy the things they need, even without a job or a credit history. So whether you're an underclassman, senior or graduate student, look into our automatic approval offers. Our easy-to-load, drop-in correction tape you can insert in mere seconds. There are no spools to unwind. No complicated threading. No more muttering under your breath. It's that simple.

What's just as simple is our Right Ribbon System. It simply prevents you from using the wrong combination of ribbon and correcting cassette. You'll find our Correcting Cassette and Right Ribbon System on the Smith Corona XL 2500 typewriter. You'll also find lots of other great features on the XL 2500—like the Spell Right™ 50,000 word electronic dictionary, full line correction, WordEraser® and more.

We've reformed the correction system.

Prisoners of old-fashioned correction systems, freedom is here. Smith Corona's Correcting Cassette means an end to twists, tangles and fumbles. It's an easy-to-load, drop-in correction tape you can insert in mere seconds. There are no spools to unwind. No complicated threading. No more muttering under your breath. It's that simple. What's just as simple is our Right Ribbon System. It simply prevents you from using the wrong combination of ribbon and correcting cassette. You'll find our Correcting Cassette and Right Ribbon System on the Smith Corona XL 2500 typewriter. You'll also find lots of other great features on the XL 2500—like the Spell Right™ 50,000 word electronic dictionary, full line correction, WordEraser® and more.

You might expect a typewriter this sophisticated to cost a bundle, but the XL 2500 is surprisingly affordable. All of which makes it one of the best values you can find today.

Case closed.

For more information on this product, write to Smith Corona Corporation, 65 Locus Avenue, New Canaan, CT 06840 or Smith Corona (Canada) Ltd., 440 Tapscott Road, Scarborough, Ontario Canada M1B 1Y4.

We Want You!

To Be A Reporter For The Current

We need a few good people with a reasonably good command of the English language to write news, features and sports.
