BY SHelly Van Mierlo

The election year U.M. St. Louis' political action committee has decided to invest in state-wide races.

According to Luce LeLoup, chairman of USML and the political science department, the organization believes there will be more of an impact at the state level.

With the election right around the corner, USML's leadership committee has compiled a list of the candidates they plan to support.

In the Missouri senate race, the Republican incumbent, John B. Cook, said he would "just bow out." Bank will receive support from USMLPC.

Gooch, a Democrat from District 13, was elected to the Missouri Senate in 1989. As a Democrat, Gooch was honored by the Missouri NAACP for his support of civil rights legislation.

Scott, a District 3 Democrat, is currently serving as the city manager in the Senate. Bank, a Democratic senator from District 3, is currently serving as the Missouri assistant attorney general.

Our purpose is to help people who support higher public education get elected and also to keep them in office," LeLoup said.

In June, LeLoup said contributions to USMLPC were at their lowest level in the organization's four year history. In mid-June the group had raised only $18,000, several thousand dollars less than it received in previous elections.

Since then, the organization has raised an additional $2,000.

Reorganization Plan Explained

by kevin lake

The most recent change in the university's reorganization plan is the Board of Trustees' recent decision to preserve their earlier plan of a 42-member faculty senate and a smaller 12-member board.

Under the revised plan, Pescatore would become part of Normalcy. Black Jack would be absorbed into Spanish Lake and Melrose Acres split between Balliswells Farmington and Jennings.

The process plan will be submitted to the Board of Election Commissioners as a draft. If the draft does not meet the requirements of the state law, it will be voided.

The draft plan will include a detailed proposal of the new districts, as well as criteria for selecting a new district commissioner. The new districts will not be finalized until after the 1990 census.

The new districts will include a school board, a city council, a mayor, and a city manager. The school board will be responsible for all matters related to education, including the establishment of new schools.

The city council will be responsible for all matters related to local government, including the establishment of new city services.

The mayor will be responsible for all matters related to the city's overall management, including the establishment of new city policies.

The city manager will be responsible for all matters related to the day-to-day operations of the city, including the establishment of new city departments.

The new districts will be created in a way that best meets the needs of the city, and the new districts will be created in a way that best meets the needs of the people who live in the city.
The UM-St. Louis Community would like to present...

...celebrating 25 years of involvement of UM-St. Louis

Yes, it's that time again...
time to EXPOse your organization or campus service.
Its time to show what you're all about.

The FESTIVITIES will include:

Great Food
Flame Broiled Burgers, Faf Franks, Knockwurst & Kraut, and much more.
(Cafetoria will be closed from 10:00 am - 2:00pm)

Music
Face Painting
Clowns
CLASSIC CAR DISPLAY
Lots of FREE Gifts
Games
100 Organizations Involved
and much, much more!

LOOK for it all in the Alumni Circle
10:00am - 2:00pm & 4:00pm - 6:00pm
Wednesday, September 14th

Department Of Communication And University Players
Announce Auditions For
FIRST NIGHT

Written by Jack Nealy
Directed by John Grasilli

Auditions Will Be Held September 6th and 7th
2:00 p.m. - 4:00 p.m. and 6:00 p.m. - 8:00 p.m.

Smith Takes Off For Far East

by Paulie Amaro

Senior Staff Editor

On August 5, a U-M. Louis senior will be the second student to participate in the university’s international exchange program to China.

Bruce W. Smith, a history major, will be spending the next five months in Beijing, the city of Beijing (pronounced “jungling”) in Northern China, where he will be studying Chinese and doing research for his major.

Smith will not be totally appreciative of his long voyage. “I’m not a brave type of barrier. I studied Chinese for two semesters at the University, and will be on my own. But I will be guided by a host at the University.”

“All their classes are taught in Chinese,” Smith said.

At this point, Smith says he’s not quite sure what classes he needs to take. He believes he will need to take two or three.

“Outsiders”

by Loren Richard

A 30 Years of Rock and Roll

by Bill Andrews and McMeel, $8.95,

“Months before his trip to China, Smith gave him some rare coins from World War II, which sparked his interest in the coin business. After traveling to big foreign long time, Smith decided.

Although Smith was scheduled to attend Zhengzhou last year, a conflict in the university’s policy of housing children that would have required him to live in a dormitory there kept them from going.

“You do have to pay your own way over there, but once you get a taste of what life in China is all about, you start to like it.”

This will be the first trip into most of his academic career to China. The year before, he traveled to big Tokyo for three long long time.

“I was in the mechanical engineering program at the Technion-National University and also involved in the exchange.”

Smith said one reason he chose to go to China is that it’s “right in the middle of the Pacific Ocean” and the railroad makes it easy to travel around.

HIGH ROAD TO CHINA: History Major Bruce Smith is the second U-M-SL Louis student in the university’s history to go on a China exchange program between universities there and the UM system.

Well, that’s my wrap-up of the trip. May I wish you a happy journey. I look forward to your return,” Smith said.

The year before, he traveled to big Tokyo for three long long time.

“I was in the mechanical engineering program at the Technion-National University and also involved in the exchange.”

Smith said one reason he chose to go to China is that it’s “right in the middle of the Pacific Ocean” and the railroad makes it easy to travel around.

Rivermen Set To Off Season
Team Seeks 16th Bid
New Sought Out
by Steve Ward
September 3, 1988

Sports Editor

Steve M. Everyone looks forward to their 10th birthday and even more to their 21st birthday, but little do the Rivermen realize that they will be turning 15 this year. Having been founded in 1974, the team has experienced a very successful life thus far, with a total of 15 National Tournament bids, the last one coming last year. But now, after a successful season, it is unclear whether they will make the 16th bid.

Authoring that feat, however, is a challenge. Not only do they lose Bachelor, but several other key players have also left the team. In fact, the entire team took a major step in retooling for this new season.

"The last three years we have lost out number one player," said Steve M. "The men's soccer program was not able to carry the load for us. We are looking to be the man to rise up. As a result, we have brought in some fine, new help on the front line."

Statistically, senior Boyd Buchek looks to be the man to rise up. Although the men's soccer program did not have a very successful last year, Buchek was their leading scorer. As a result, he was named to the First Team NCAA Tournament all-Tournament.

This is not the first time the Rivermen have had to face a change of leadership. In fact, the team has faced many changes over the years, including a move from USM to UMSL, and a change in coaching staffs.

Despite these changes, the Rivermen have continued to succeed, and this year is no exception. With the addition of some new players, the team is hoping to carry on their tradition of success.

The team's next game is scheduled for September 1, 1988, when they will face their first challenge of the season. The game is expected to be tough, but the team is ready to face any challenge that comes their way. The team is looking forward to a successful season, and they are ready to take on the challenge of making their 16th bid.

Money: It's In The Cards
by Tom Kovacevich

This is a story about two teenagers attempting to make a career from baseball cards in the class.

Alonzo Jason, a 15-year-old from the Bronx, is trying to make a living from baseball cards. "I'm not the biggest fan of baseball," said Jason, "but I'm good at collecting cards."

Jason started collecting baseball cards when he was seven years old. "I've always been interested in sports," he said. "Baseball cards are just one of the many things I collect." He started with the basics, such as the World Series, and then moved on to more advanced collections.

Jason is not alone in his pursuit of making a living from baseball cards. He is part of a growing trend of teenagers and adults who are trying to make a living from baseball cards.

In any case, kids today are realizing that they might be more valuable in the future. "The stock market doesn't make sense to me," said Jason. "I think baseball cards are a better investment." He is not alone in this belief, as many teenagers and adults are turning to baseball cards as a way to make a living.

The card market is not without its challenges. "It's not easy," said Jason. "You have to have a good eye for collecting cards and knowing what to look for."

However, with the right eye, the possibilities are endless. "I think I can make a career out of baseball cards," said Jason. "I'm not sure if I can, but I think it's possible."
Funding Rift Should End

"We cannot reallocate our money to excellence," Chancellor Margarette B. Hay said during an interview. We must have more funding from both private and public sources.

That is what all we at UM-St. Louis can bring to a bigger share of the money to our campuses," said Jerry Berent, President of the University of Missouri System.

The Columbia campus, the largest and richest of the four campuses, contributes to the larger percentage of its budget than do the other campuses. With a student body almost twice the size of the UM-St. Louis campus, the Columbia campus has three times as many periodicals as this campus, for example. UM-St. Louis' Thomas Jefferson Library is coping with ways to keep periodicals from becoming scarce.

Most commentators on the budget disparity say that state legislators and other members of the Board of Curators play favorites with the Columbia campus. But that is not the only university in the system that needs more help.

The University of Missouri-Columbia, the University of Missouri-Kansas City, the University of Missouri-St. Louis, and UM-St. Louis, all known to be among the most difficult to remain limited.

Chancellor Barnett is committed to building a better university. She says faculty deserve higher salaries. She's proved that she can effectively raise money from private sources, as demonstrated by her Partnerships for the university.

As Barnett said in a recent interview. "We must remain limited. Our campus, Not that money from private sources, as is demonstrated by her Partnerships for the university.

Summer, as if by design, seemed to melt into a few days without a day or two being left before the long descent into winter, the timely reprieve from 106-degree heat waves. While another heat wave is bound to return before the semester began. While another heat wave is bound to return before the long descent into winter, the timely reprieve from 106-degree heat waves.

Across campus, crowds seem to be unavoidable. In the bookstore, students are looking forward to keeping alive throughout the summer drought is beaten into the soil. Among these are:

- The walkways between buildings throng with rushing to get those financial aid dollars to make their educations possible.
- The Columbia campus, the largest and richest of the four campuses, contributes to the larger percentage of its budget than do the other campuses.
- The University of Missouri-Kansas City, the University of Missouri-St. Louis, and UM-St. Louis, all known to be among the most difficult to remain limited.

Law Keeps Dioxin On Campus

The thing we want to emphasize is that we're not keeping it on campus because we want to, "said Professor Jones. "But federal and state laws prevent us from moving it until there are accepted procedures and organizations that can destroy it. We have to inventory it, training the University is at a standstill.

We have no intention of violating the laws."

Dioxin is a material that has been known to cause cancer in laboratory animals. So the question becomes whether or not the University has been storing the dioxin safely. A number of reviews have been done and every one of them has come back that the procedures on how and where the material is stored is in proper accordance with the laws.

The University is at a standstill. We have no intention of violating the laws."

We have no intention of violating the laws."

RESERVE OFFICERS' TRAINING CORPS

YOUR UNCLE WANTS TO PAY FOR COLLEGE.
BUT ONLY IF YOU'RE GOOD ENOUGH.

Army ROTC offers qualified students two- and three-year scholarships that pay for tuition and required educational fees and provide an allowance for textbooks and supplies. You'll also receive up to a $1000 grant each school year the scholarship is in effect.

So find out today if you qualify.
