Small said the election Board would likely take the high road, trying to keep individual and distribute re- search funds for helping them get more money. Small added that he believed more people would have difficulty on the margin. "People are not as close to the ballot as they were in the past and their participation was not as strong," he said.

Small added that the election Board would help the students, but this would require a lot more work from the administration and more money. The possibility of a general election this year is also being considered by the University's board of trustees.

The University's president, Dr. Thomas J. Budge, said the election Board would help the students by providing more support to the overall election process.

The source said the main goal of the student Board was to make sure that the election was free and fair. The main goal was to help the students and to prevent any complications that might arise as a result of the election.

Chancellor's Office Opens Two Posts

by Shawn M. Hoppe

Chancellor's Office is seeking applications for two new positions in the University's administration, one for the position of Academic Vice President and one for the position of Associate Vice President for Student Affairs.

The Academic Vice President position is for a full-time position, reporting directly to the chancellor, and is responsible for the overall administration of the University's academic programs. The position is expected to begin as soon as possible.

The Associate Vice President for Student Affairs position is for a half-time position, reporting to the Academic Vice President, and is responsible for the overall administration of the University's student affairs programs. The position is expected to begin as soon as possible.

Applications and nominations are being accepted until positions are filled, which is anticipated to be in the fall of 2004.

More information on the positions and application procedures can be found on the University's website at: http://www.university.edu/positions

Help For Eating Disorders

by Small Products editor

Horizons Parent Counseling is offering a series of programs designed to help students deal with eating disorders.

The programs, scheduled for April 24-28, are designed to address the needs of those suffering from bulimia, anorexia nervosa, or compulsive eating disorders, letting them know they're not alone and that help is available.

In the first effort at a program on eating disorders, Small said, "We're trying to do something for students who might not be aware that they need help." He added that, if it is successful, it will likely be offered again next year.

Through the programs, the small said, "We're trying to do something for students who might not be aware that they need help."

"I think a lot of students here on campus are going through this, but just don't know how to deal with it," Small said.

The program will help them gain a better perspective on their eating habits and help them gain a better perspective on the problem.

Small said that Horizons Parent Counseling offers a program for eating disorders, and that it is run by a trained professional.

He said that Horizons Parent Counseling offers a program for eating disorders, and that it is run by a trained professional.

"It's a very difficult thing for people suffering from eating disorders," Small said. "We're trying to do something for students who might not be aware that they need help."

**MONEY IN A HURRY!**

You can get money in a hurry by simply writing a check when you have Automatic Credit at Normald Bank. Call for details today!
Handicapped Awareness Week Focuses On Educating Public

by Kevin Kleine
Managing Editor

Simple things like opening a door or picking up a dropped set of keys are not usually much thought. But for a disabled person, the sim­ple becomes the difficult.

Disabled Awareness Week has been a fixture of this campus for the last nine years to increase awareness of the needs and problems of disabled students. Keynote addresses and demonstrations helped illustrate the needs last week. "People assume that when they see someone with a dog that the per­son is blind," said Marilyn Ditto, Coordinator of Special Student Pro­grams. "That's not always the case. Many handicapped people who are not blind have a service dog." "Dis­abled Awareness week was sponsored by the Disabled Students Union and the Division of Student Affairs. Demonstrations by groups that aid the handicapped were on hand to give pointers to a glimpse of what everyday life is like for some­one with a physical impairment."

New Horizons, a hor­seback riding organization for physically and mentally-impaired people, had one of their horses and a rider for demonstrating how the riders get exercise from riding. "It's a function of this campus," said Dorothy Walker, Volun­tee Coordinator of New Horizons. "It gives them a chance to be on a horse. We teach them the parts of the horse as well as grooming. Some of our more advanced clients can even put on the saddle and bridle," she said.

Therapists come to the beginning of each of New Horizons seven week sessions to evaluate the riders and determine what exercises would be best for each individual. "We stress safety first," Walker said. "We have a lot of fun."

The participation in New Horizons' program has nearly doubled since its beginning four years ago. They hope to expand further, building motor skills so that they can operate year-round. Support dogs like the ones on campus from Support Dogs for the Handicapped help the disabled open doors, retrieve dropped objects and pull wheelchairs up ramps among many specialized tasks.

Disabled Awareness Week has had a number of events that will be ongoing later this year. Last week, the University Center with her dog Tune to explain how the dogs help the handicapped and increase the public's awareness of the dog's job.

"The undisciplined public want to play with the dogs," Webster said. "They think, 'Yes, dog, you get to play,' not actually to get to play more than most normal dogs. If I let him, he would play with everybody in the room."

Webster stresses that support dogs must not be distracted while they are working. Even though the dogs help over­come everyday obstacles, barriers such as door owners holding at allowing Webster and Tune into their homes. "We mostly have problems in res­idences," Webster said. "Especially rental ones."

The dogs perform their work out of the U. Center lounge. Webster said, "Especially rental ones."

The dogs perform their work out of the U. Center lounge. Webster said, "Especially rental ones."

"The attitude that you don't have to converse yourself with lessened handicap is partly responsible for the current situation of the Lil­Mag," he said.

Webster said he saw a parallel be­tween the recent problems of the Lil-Mag and the traditional conflict between artists and business peo­ple. There is a tendency, he said, for business people to assume that when they open a card or a door, they do not have to change their attitude that you don't have to converse yourself with lessened handicap is partly responsible for the current situation of the Lil-Mag," he said. One problem is the current situation of the Lil-Mag, he said.

Kim Wilson: That's very nice.

“Available Light”

by Loran Richard Klaus

book reviewer

Seldom has contemporary pop been as well served by the poems found in Margie Pierach's "Available Light" (Johnson Clark, 1995, $16.95, paper). It's a wonder that this woman has not been more widely recognized for her work, and I believe this book is a major step in that direction.

Ms. Pierach is a poet of our time, one who combines the best of the recent traditions with a fresh imagination. Her poems are filled with images that are both startling and arresting, and they are written with a precision and economy that is rare in contemporary poetry.

"Available Light" is a collection of poems that are rich in metaphor and symbolism. The poems explore the complexities of the human condition, and they are filled with a sense of mystery and wonder.

Ms. Pierach's use of language is masterful, and her ability to create a vivid and evocative world is remarkable. Her poems are a testament to the power of the imagination, and they are a reminder that poetry can be a powerful tool for understanding the world.

Ms. Pierach's poems are a wonderful introduction to her work, and I would highly recommend them to anyone who is interested in contemporary poetry. They are a beautiful and moving tribute to the power of the human spirit.

Baseball Team Breaks Out Of Hitting Slump

By Greg Albers

Rafter

It was a busy week for the UM-St. Louis baseball team. First, the team reached its first ever 15-0 win in the MIAA. Then they improved their record to 13-1.

Starting the week off on a high note was the game against the Missouri State University-Cape Girardeau. The Bears struggled to hit, and the Cardinals won 15-0.

On Wednesday, the Cardinals continued their strong pitching by shutting out the Rivermen 1-0. This put their record at 13-1 in the MIAA and 15-0 overall.

Confidence Conference

Cooper, Houska Determined To Be Successful

By Tom Kovach

sports editor

With an aura of confidence and determination, freshman Kim Cooper and junior Scott Houska have proven that they are the future of Missouri-Illinois-St. Louis softball.

These two-sport athletes have been in sports from a young age. Cooper, a native of Cape Girardeau, Missouri, has been playing softball since she was a child. Houska, a native of Cape Girardeau, Missouri, has been playing baseball since he was a child.

"We love working together," said Cooper.

Together, they have helped the Cardinals win many games and are expected to continue their success.

Sports Briefs

Despite defeating the St. Louis University Billikens 6-3 and sweeping Central Missouri State on the road, UM-Louis' men's tennis team Jeff Ezzell is upset over a recent match loss 6-3 last Wednesday versus Brown State Bears.

Last Friday, UM-St. Louis women's tennis team defeated Washburn University 9-0 for the second straight season. This puts their record at 12-1 and 5-2 in the MIAA.

The Cardinals defeated the Blue Jays 6-3 with strong pitching and hitting.

"We hate to see them drop out. We really miss them," said Ezzell.

The Cardinals are currently in third place in the MIAA, just one game behind the first-place University of Missouri-St. Louis. They have a strong chance of making it to the MIAA championship.

The Cardinals are expected to continue their strong performance in the remaining games of the season.

Softball Team Seeking Edge In Weekend MIAA Tournament

by Tom Kovach

sports editor

Southwestern Lady Miners coach Lisa Houska is seeking to have a successful tournament this weekend.

"I see what it takes now and it's a big part here. There's so many players doing well," said Houska.

The Lady Miners are expected to continue their strong performance in the remaining games of the season.

The Lady Miners are currently in first place in the MIAA, and they have a strong chance of making it to the MIAA championship.

The Lady Miners are expected to continue their strong performance in the remaining games of the season.
ATHLETES from page 4

"We went to the movie theaters," Houska said.

"Like Cooper, Houska also invested in sports because her father, Don Houska had coached softball and basketball.

Throughout her high school playing days, she received lots of praise for her performance. But one thing that Houska has learned is that she has to be active in order to thwart procrastination. "I wouldn't have really noticed," she said. "With playing two sports, goals are straight. I get an amphetamine against the team."

By the time she started at Herman High, she got right back into three sports — volleyball, basketball and softball.

When the family moved to Hermann, Houska wanted to play basketball for her elementary school. Since there were only 100-120 students at that school, there was no girls' basketball team. So she found herself in the boys' ranks and dominated one spot on the team. She played as a coach and a start," Houska said.

"I wanted to play. I asked the coach and the start," Houska said.

"He was going to be the number one. Even if you're not sober, you're not sober."

"He played all the games more or less. If you're still alive."

"Lisa Houska said.

"With playing the game at home, I'd say he was something I'd have to play the next game at home."

"I'm going to the movie theaters."

"We came off the driveway at their farm."

"We have excellent chance to survive the second inning."

"They scored three and five runs."

"He got an 5-4 loss."

"They scored three and five runs.

"One of the people who is still visible in the stands is the elder."

"With the family moved to Hermann."

"TNTM dinosaurs."

"When the family moved to Hermann, Houska wanted to play basketball for her elementary school."

Election Changes Needed

Last week’s Student Government Association elections were, by almost unanimous agreement, a nightmare. Campaigns and allegations of impropriety flew right and left. Were not, all the ballots are yet counted. The Student Court has been asked to conduct a recount, but no recount will be possible due to a close race between the Small/Paige and the Rothman/Adridge ticket. Senate and Student Assembly votes are still not counted, leaving would-be student leaders and their supporters in uncertainty and confusion.

According to most accounts, the problems with the elections were primarily due to lack of effective organization. Steven Bratcher, the election commissioner, was apparently asked to throw together the election on short notice. And when he couldn’t find enough people to poll and count the ballots, confusion and complications ensued.

While Rothman may have been the first to take a beating, both Rothman and Shaun McDaid let the blame rest on as much as the entire process on its premise. Jerry Bethel’s administration, which has been criticized for its organizational inefficiency in other matters throughout the years, may have played a role.

But complaining about the election does nothing to ensure a more successful one in the future. Newly-elected SGA President Terence Small says he’s got some ideas that would reform and improve the campus election system to prevent complaints of impropriety and to organize the process in a more efficient manner.

Small wants to form an Election Board, composed of seven to ten non-petition members who will be responsible for campaigning and organizing the process. This board would go on to explain some of the controversies that made the April 10-11 balloting such a mess.

If Small can begin his administration with a successful election process that will continue in the years thereafter, I think we’ll have made a great start in a promising administration.

Spring Has Sprung

Mirth Day on Wednesday seems to have marked the advent of Spring. The Fabulous Thunderbirds drew students at the Commons on Saturday evening to listen to hip-hop and rock bands, and to light up and enjoy the music and the fine warm weather of a sunny, genuinely spring day.

Spring seems to have arrived on a late start this year, but now that it’s here, we can all throw off those heavy clothes and enjoy the full effects of the season.

The University Program Board is to be congratulated for bringing off Memorial Day and for bringing the Fabulous Thunderbirds and lightening things up for a day. As for the fine weather, wait... Someone else can take credit for that.

Life During Wartime

by L.B. Hill

contributor

We need no property. Not even our own bodies. We need no one, not even ourselves. That is the way we are. That is the way we have been, and that is the way we will be always.

And the sun's another word for our own life.

The University Program Board is to be congratulated for bringing of Memorial Day and for bringing the Fabulous Thunderbirds and lightening things up for a day. As for the fine weather, wait... Someone else can take credit for that.

LETTERS POLICY

Small Nominated For "Chicken Little Award"

Mr. Small naysayer at the April 10th Student Government meeting, where he spoke out against the administration’s proposals for the future of the Fabulous Thunderbirds. Mr. Small’s comments were met with a thunderous applause from the student body.

The administration has already announced its plans for the future of the Fabulous Thunderbirds, including a new set of scheduling and marketing initiatives. However, Mr. Small’s comments have sparked a national debate on the future of college music programs.

The administration has responded to Mr. Small’s comments by stating that it is committed to maintaining the Fabulous Thunderbirds as a central part of the university community. However, some members of the student body have expressed concern that the administration’s proposals may undermine the future of the Fabulous Thunderbirds.

The administration has also announced plans to increase funding for the Fabulous Thunderbirds, with a goal of bringing in more local talent and enhancing the student experience. However, some members of the student body have expressed concern that the administration’s proposals may lead to a decrease in the quality of live music on campus.

Overall, the administration’s proposals for the future of the Fabulous Thunderbirds have sparked a lively debate on campus, with some members of the student body expressing support for the administration’s initiatives and others expressing concern about the future of the Fabulous Thunderbirds.
