The University of Missouri-St. Louis

March 22, 1990

Curator Rep Conflicts Issues

Karl Reindl

University of Missouri-St. Louis

The University Curator’s Board of Curators has been a subject of controversy in recent years. The Board, which is made up of representatives from the various universities within the system, has been accused of conflicts of interest and of not being accountable to the public. In a recent meeting, the Board was criticized for its handling of a proposed sale of a significant piece of art, which was opposed by many members of the community. The Board’s decision to go forward with the sale has been met with criticism from some members of the Board and the public alike.

Too Many Roaches Spill In Underground

by Karl Reindl

news editor

The Underground campus newspaper has published a series of articles on the issue of roaches in the facility. The articles have focused on the lack of proper maintenance and the resulting infestation of the campus. The articles have been critical of the University administration and have called for action to address the problem.

Curators Come To Campus

The University Curatorial Board of St. Louis will hold a public meeting on Friday, March 29, at 2 p.m. in the auditorium of the Administration Building. The meeting will be open to the public and will provide an opportunity for community members to voice their concerns about the university’s operations.

S.E.A. Elections In Turmoil

by Shannon Pope

The Student Environmental Action group is facing internal conflicts and challenges in its efforts to elect new leaders. The group has struggled with issues of internal power dynamics and the need for unity among its members.

Radio Days

KWMU News Director Talks about his career through these years, the Civil Rights Movement and the changes in journalism that have happened over the years. See page 5.

Homophobes Rising On Campus

by Shawn M. Pope

A review of recent incidents of homophobia on campus and the response of the administration to these incidents.

The Right Moves

Former Los Angeles Lakers and U-M-St. Louis student Olle Malmstream talked about the influence of sport on the culture of universities and the role of student-athletes in athletics and of coaches and administrators in the same way as athletic coaching. We must, he said, be alert at the start of the match in the U-M-St. Louis student-athletes.

Appointed by the governor of Missouri, the University of Missouri-St. Louis is currently serving a nine-year term as a member of the Board of Curators, the single most influential administrative body of the University of Missouri system.

The campus has long been a hotbed of activism and support for the LGBTQ+ community. In recent years, there have been several incidents of homophobia reported on campus, including hate speech and discrimination.

Student Curator Paul Matassini, right foreground, will be the fourth representative to the Board of Curators for the next two years.

I know that’s not true. I know St. Louis needs more money, but Colleen and I can’t handle this. The only thing I do is try to bring jobs to the area. We see that jobs are never enough money to be put to work. Frankfort and St. Louis are both really important. The only thing I know is that there is no right answer on crime.
B Viloations

1. Academic dishonesty - The Board of Curators recognizes that academic dishonesty can seriously damage students' educational endeavors. Faculty members have a special obligation to expect high standards of academic integrity from their students. Students also have a special obligation to adhere to such standards. In addition, academic dishonesty in any form will not be tolerated. This includes, but is not limited to, the following:

(a) Submitting another person’s published or unpublished work, including but not limited to faculty, as one’s own, or submitting one’s work as that of another person.

(b) Mutilation or attempted defacing of library materials.

(c) Intentional use or attempted use of telecommunications equipment, computing facilities, or other electronic means in an attempt to interfere with the work of any person or to gain unauthorized access to any computer or communications system, or attempting to do so.

2. Sexual harassment - The University recognizes that sexual harassment can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate any form of sexual harassment. "Sexual harassment" means any unwelcome conduct of a sexual nature that creates a hostile, intimidating, or offensive working environment, or that unreasonably interferes with an individual's ability to participate in, or progress in, a University activity or program.

3. Physical violence or fighting - The University recognizes that physical violence or fighting within the University community can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate physical violence or fighting.

4. Possession or use of a firearm, weapon, dangerous drug, or persons who cannot be otherwise restrained. This includes, but is not limited to, the following:

(a) Possession or use of a firearm, weapon, dangerous drug, or persons who cannot be otherwise restrained.

(b) Presence in any form or medium, including electronic communication means, of material that promotes or incites hatred, violence, or destruction of property.

5. Dispersal - The University recognizes that the dispersal of material that promotes or incites hatred, violence, or destruction of property can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate the dispersal of such material.

6. Encouraging, soliciting, or engaging in illegal or dangerous activities - The University recognizes that encouraging, soliciting, or engaging in illegal or dangerous activities can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate such activities.

7. Disorders or disruptive conduct - The University recognizes that disorders or disruptive conduct can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate such conduct.

8. startled. The University recognizes that startled can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate such conduct.

9. False or misleading statements or representations - The University recognizes that false or misleading statements or representations can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate such conduct.

10. Account violations - The University recognizes that account violations can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate such conduct.

11. Private property - The University recognizes that private property can seriously damage the educational, research, or professional environment of a student, faculty member, staff member, or guest. The University will not tolerate such conduct.
Engineering Obstacle

Once again, well-faded plans that would help UM-St. Louis hit a snag in the Missouri Legislature. It seems that some of the higher education that they constantly deride the rest of the state, this does seem to be the road proposal correctly for an engineering program here. The Missouri House approved $1 million for the undergraduate program, but the Missouri Senate balked at the issue, calling the proposal a duplicate of existing programs already in place throughout the state.

Two senators in particular, Thomas Wilson (D-St. Joseph) and Thomas McCarthy (R-Chesterfield), are saying that the state cannot afford to fund another engineering program. What the state does afford to is let quality higher education slip just like its fingers due to the stupidity and petty politics of the likes one mentioned above.

The UM-St. Louis engineering program would provide a degree program for students who would not be likely to attend classes on the Rolla or Columbia campuses. The program would allow many St. Louisians to continue their education while still working and would allow institutions such as McDonnell-Douglas and Monsanto to send their employees to classes to further their education. Current programs at other Universities require students to spend four years away from home and taking a full load of classes. Most students targeted for the UM-St. Louis proposal would be the ones who could not afford to spend four years away from home and also would not be able to afford financial aid.

Reason the proposal a little closer Senators.

Election Correction

A bad mistake is about to be made in the upcoming Student Government elections unless the assembly or the Missouri Senate refuses to do so and in effect veto the change. The UM-St. Louis governing board is planning to do away with the lame idea of mail-in ballots. Voter turnout is naive at best. But what is worse is that the majority of the candidates refuse to do so and in effect veto the change. The proposal a little closer Senators.

Curators Mickey-Mouse Business Not Disney

Oblivion

by Shawn M. Foppe

ALL MY CURATORS

The Plut

The Plut and the hierarchy in St. Louis city Allman, Robert, invest in a corporation known as Whispers, a wire company which owns a campus in Columbia. Cape Girardeau and Springfield. When the Plut and the hierarchy in St. Louis city Allman, Robert become elected to serve both on the Board of Curators for the University of Missouri, Springfield. It is imperative that you as a student in Springfield why the assembly should agree that they are in Springfield and today.

To think that sending students a mail-in ballot will increase voter turnout is naive at best. But what is worse is that the majority of the candidates refuse to do so and in effect veto the change. The proposal a little closer Senators.

To think that sending students a mail-in ballot will increase voter turnout is naive at best. But what is worse is that the majority of the candidates refuse to do so and in effect veto the change. The proposal a little closer Senators.

Letters to the Editor

Roaches Prompt Boycott Of Underground

I am also proposing a general boycott of the Whispers Building, who, I am sure, is in charge of the machines.

To think that sending students a mail-in ballot will increase voter turnout is naive at best. But what is worse is that the majority of the candidates refuse to do so and in effect veto the change. The proposal a little closer Senators.

White waste comes as surprise

Dear Editor,

On March 8th, an article in the Post-Dispatch discussed some of the hazardous waste products which are stored in the cafeteria. Many people believe that this product is safe to eat, and it is. However, for some reason, the public is not aware of the danger of this product.

The first step in taking control of this product is to have the cafeteria filled with these products. This article will inform the public of the hazards associated with this product.

This article will inform the public of the hazards associated with this product.

California's new law, which went into effect in January, requires that all food products contain a warning label if they contain a hazardous waste product. This law has been in effect since January and will continue to be in effect until at least 1987. It is estimated that 10,000 of these products are stored in the cafeteria.

In order to comply with this law, Whispers will have to install a machine to properly store these products. This machine will be placed in the cafeteria.

I am also proposing a general boycott of the Whispers Building, who, I am sure, is in charge of the machines.

To think that sending students a mail-in ballot will increase voter turnout is naive at best. But what is worse is that the majority of the candidates refuse to do so and in effect veto the change. The proposal a little closer Senators.

ATTENTION PRE-MED AND SCIENCE MAJORS!

St. John's Mercy Medical Center's Respiratory Care Program is offering
students with a 2.5 GPA or better a healthcare opportunity with a focus
on Respiratory Care.

We work with critically ill patients in all areas of the hospital including
neonatal, pediatric and adult intensive care units, the emergency department,
and general patient care areas. Respiratory Care Practitioners work with
physicians to provide patient education, direct pulmonary rehabilitation,
conduct research, and perform diagnostic testing.

Classes and clinical training are at
St. John's Mercy Medical Center in west St. Louis County where the program
began in 1982. Graduates, upon completing the two-year program, earn a Bachelor in Health Science Degree
from the University of Missouri-Columbia.

For more information about the Respiratory Care profession and to
obtain an admission's packet to the St. John's Mercy program, please call Paul Reading, program director, at (314) 569-6363.

Hey, graduating seniors!

CHANGING LANES:
From Student to Working Professional

This one-day program is designed to help
graduating college seniors and graduate students
make the transition from the classroom to the
workplace; from student to professional.

University of Missouri-St. Louis
Continuing Education-Extension
Saturday, April 7, 1990 - $50

Part I 8:30 - 11:30
Job Hunting: What Do I Want in a Job?
A professional career consultant will help participants
evaluate their skills and interests to
help them apply to the job search, and learn
strategies for landing the
job they want. Program will discuss job
search techniques, interviewing,
workplace issues, and
handle the job search.

Part II - 12:00 - 1:00
Dress for Success: Looking the Part
A professional image consultant will give participants
tips on choosing appropriate attire for
different types of interviews
and professional environments.

Part III - 2:00 - 3:30
Speak-Up and Get the Job: How to Handle the Interview
Participants will learn techniques for creating
a good impression during job interviews.

Part IV - 4:00 - 5:00
Write It Right: Locating Good on Paper
Participants will learn effective, up-to-date
tips for writing effective letters and resumes
that get noticed and get interviews. Participants are encour-
gaged to bring their resumes for assistance and on
site review.

Instructors: Anne L. Hesley, LPC, NCC, NCCC
Licensed Professional Counselor

Filing, Phones, and light Typing

**Loewe And Spader Make ‘Bad Influence’ Good**

by Mike Van Roo

**Novel**

_The tarter works so hard on technique and for all those pages the reader gets only two paragraphs_  
—David Carkeet

Losing a job and getting divorced is such a decided blow to the psyche that it makes one wonder if the term “ slashing the ties that bind” is appropriate. And, of course, one can’t help but think of the word “ bad influence.”

That is the actual situation in which the hero of David Michael Carkeet’s sequel to the novel _Bad Influence_ finds himself. Our protagonist, Michael Loewe, is a computer programmer, a man who has just been fired from his job and whose life is in disarray. He is struggling to find his way in the world, dealing with the aftermath of his divorce and trying to piece his life back together.

In *Bad Influence*, Michael had been a computer programmer for a large corporation. He had been happily married to a woman named Alice, but when she found out about his infidelity, she left him. Michael had to move out of his apartment and was reduced to living in a small hotel room. He had no job and no money, and he was struggling to make ends meet.

In *Bad Influence: Double Trouble*, Michael is still struggling to make ends meet. He has been fired from his job and is now living in a small hotel room. He is struggling to find his way in the world, dealing with the aftermath of his divorce and trying to piece his life back together.

Michael is now working as a freelance computer programmer, but he is still struggling to make ends meet. He is often hungry and is forced to live on a shoestring budget. He is also dealing with the aftermath of his divorce, which has left him feeling lonely and isolated.

In this novel, Michael is trying to make ends meet by working as a freelance computer programmer. He is often hungry and is forced to live on a shoestring budget. He is also dealing with the aftermath of his divorce, which has left him feeling lonely and isolated.

Michael is now working as a freelance computer programmer, but he is still struggling to make ends meet. He is often hungry and is forced to live on a shoestring budget. He is also dealing with the aftermath of his divorce, which has left him feeling lonely and isolated.

Gym Renovation On Schedule

by David Barnes

- Major renovation has begun on the Blewett Center building to improve the facilities.
- Patrons who have used the building recently will find it is closed and has reduced their use of the building. The town council and the construction company are working on the project.
- "We are excited about the progress," said Smith. "We feel that the renovation will improve the facility for future use and make it more accessible to our community."
Anyone attending a qualified 2 and 4 year accredited college, or a perfect game, or hit a hole in one in golf? What's your shoe of preference when working out or playing sports? Will Rich Gracer ever get any respect? Who may apply - Anyone attending a qualified Missouri school, and Missouri residents who are attending an out of state school.
