writing lab helps with term papers

New Computers Available For Student Use
by Cami Iray reporter and Christine McGraw associate news editor

From term papers to pruning problems to just sheer browsing the computer lab, located across from the International Center for Tropical Biology, the center will sponsor students from the International Center for Tropical Biology, the center will sponsor the Missouri Botanical Garden, the center will sponsor the Missouri Botanical Garden.

As the center will "provide a focus" for attracting grants, graduate students, and funds for UM-St. Louis, said Dr. Louis Williams, chair of the Biology Department.

"To celebrate and publicize its formation, the center will sponsor World Ecology Day on Sept. 13 at UM-St. Louis (see story)," the event will "will assist in one of the strengths of our doctoral program," Williams said.

The research facilities at the Missouri Botanical Garden are one of the world's leaders, he said, and "faculty from the Garden and our department can serve as advisors for students."

He also said that faculty from the Garden will occasionally teach courses for UM-St. Louis students.

The doctoral program, which offers a Ph.D. in biology with concentrations in ecology, evolution, and systematics, is now entering its second year. Students have attended it from all over the world.

Some of the goals of the new International Center for Tropical Biology are:

- retain foreign biologists who can return to their native countries to address deforestation problems.
- increase an intellectual atmosphere by attracting visiting scholars.
- train scientists in tropical research and in developing national policies concerning management and conservation of natural resources.
- provide multidisciplinary lectures and symposia on biological, political, and cultural issues related to tropical ecology.

Keep up the good work. Remember we are always here for you. Stick that neck out! DZ active! Racquetball opponent wanted. M-W-F 6 a.m. or T-F 3:45 or evening. Call 624-2661.
Publicity Or Benevolence?

Publicity. It can be a blessing or a curse. It can make or break a person. Many want it, yet few are granted good publicity. Even fewer are granted publicity that is positive and free.

Within the last few years, getting involved in environmental protection has become popular again. Groups like Greenpeace agitated corporations and rallied individuals into being aware of how chemical and nuclear wastes were harming their environment. The media covered these groups efforts and they received positive publicity.

Environmental protection became a popular philanthropy for the common man. Individuals tried to do their small part by recycling cans and paper. For their efforts, they were recognized as a good citizen. They got a pat on the back or a few cents for every pound of whatever they recycled.

For those in the public eye, the issue of environmental protection became a stepping stone for positive and free publicity. For those involved in government, environmental protection was put on every platform. It was a noncontroversial topic - a crowd pleaser. Singers and actors just had to make an appearance at a function that was beneficial to mother earth to receive positive and free publicity.

It would be easy to criticize those people for riding mother earth’s shirt tails to achieve their success. But why? They’re smart enough to try it while the media and public buys it hook, line and sinker.

The next time a celebrity is being publicized for being a friend of the environment, pause and think about what else he/she may have done besides making a public appearance.

Protecting the environment is much more than attending a dinner or singing a song because it’s free publicity. It’s getting involved in things like recycling or causing a ruckus when an industry destroys the air or land. Many times it’s un.rewarding and thankless.

Next week, the University of Missouri - St. Louis will honor one man and his efforts to create an environment that is pollution free. This man will receive publicity for it - but it isn’t free, it’s been hard earned and long in the making.

Letters Policy

The Current welcomes letters to the editor. The writer’s student number and phone number must accompany all letters. Non-students must also include their phone numbers. Letters should be no longer than two typed, double-spaced pages. No unsigned letters will be published, but the author’s name can be withheld by request.

The Current reserves the right to edit all letters for space and style. The Current reserves the right to refrain publication of letters.
Break In On Brokering
3 Part-Time Student Positions

Edward D. Jones, a brokerage firm with over 1600 branches nationally, is seeking to fill 3 part-time student positions with Tax Reporting responsibilities at our headquarters in St. Louis. These three temporary part-time seasonal positions will start immediately, with employment through April 15, 1991.

Prevaiseason responsibilities will include some tax research, validation of computer reports, reconciliation of records to outside sources, and other related duties. During tax season, customer service assistance through our customer Tax Service Hotline will be the primary responsibility.

Accounting or tax major required. A minimum of 20 hours per week required with additional hours available. PC-spreadsheet and prior work experience desirable. On-the-job background training provided.

Work location is at our campus site on Progress Parkway near Dorsett and South of I-44, or on the south side of campus through April 15, 1991.

We will be conducting campus interviews on October 3 and 4. We are an equal employment opportunity employer.

When you go to John Denver, it's almost like being in a real "country/entertainment" country boy by the big screen. It's as if the tickets have gone on sale as the sunshine on a Carole King and John Denver concert. With songs like "Take Me Home, Country Roads," "Rocky Mountain High," "Thank God I'm A Country Boy," and "Annie's Song," it's hard not to picture the singer/songwriter and some of the Muppets: A Christmas Special), there are no other country's military presence or observation that inspired and expresses it in some other way as possible. I'm a global citizen. I want to work in what he described as the greatest country in the world, a balance of a better quality of life for all.

MONDAY - FRI NOON SERIES IS HERE

Two other multi-cultural speakers will be highlighted in the fall: Nov. 2, Avalanche's John Denver is a political activist who was one of the most influential environmental groups in the world. His music has a message, too. Denver's music has a message, too. It's going to have to be environmentally sound for the world. Denver's music has a message, too. It's going to have to be environmentally sound for the world.

THANK GOD I'M A COUNTRY BOY: John Denver will be on the UM-St. Louis campus next Thursday to accept an award for his work with the environment.

IN OVER HIS HEAD: George C. Scott plays a detective on a beat from hell. The people who should buy this movie, though, are the script writers and the agencies of these stores for their customers who have been coming to two hours of this boring and pointless movie.

And now... something for the kiddies around UMSL:

A series of fun computer classes for children will start this fall at the University of Miami at Miami's Continuing Education office. Courses are designed for students to pre-school through the eighth grade. Kid's/Computers will start on November 17, in the West County Computer Center, 388 South County Center, near Highway 270 and Manchester. Classes are held during the times of three sessions:

5:30-6:30 p.m., 6:30-7:30 p.m., 7:30-8:30 p.m.

Office hours: 9:30 a.m. - 5:00 p.m., Monday through Friday.

KIDS' COMPUTER CLASSES will start on November 17, in the West County Computer Center, 388 South County Center, near Highway 270 and Manchester. Classes are held during the times of three sessions:

Recently, it came to light that some U.S. companies may have been selling nuclear technology to the Iraqi government. Anything goes.

How long will we stay? How long will it be before the Sandt девести becomes the predominant model for American foreign policy?
Netters Prepare For Upcoming Season

The UM-StL women's volleyball opened its 1990 season at the Jackson Festival in Panama City, Texas on August 31 and September 1. The Riverwomen started the season in rank sixth with only one and a half months to prepare for Southwestern Missouri State, a team that includes several veteran infielders. The UM-StL team will play this season with no seniors except Melissa Silvestre, who sepped Academy); fielding a young team, Hudson has

Among those players returning are jelena O'Hare and Sue Lam-Moore, who had season injuries. Hudson believes that this year's team is one of the best he has coached. "We'll be looking for a lot of returning seniors and some new faces," Hudson said. "We're hoping to make some noise this season." He also mentioned that the team has been working hard in the off-season to improve their skills.

Baseball Team To Plan Season

The baseball team, including four outstanding junior college pitchers, has signed letters of intent to play baseball with the University of Missouri-St. Louis. The Riverwomen, who were ranked 19th in the Missouri Valley Conference, will begin their season this weekend against the Bearcats from Kentucky. The team has high expectations for the upcoming season and is looking forward to making a strong impact in the conference.

Riverswomen Go For Gold In Soccer

"We're playing a lot of new faces this season," Hudson said. "We've added a few, and some of our returning players have improved. The team is in good shape, and we're ready to start the season." Hudson also pointed out that the team has a good mix of experienced and young players, which he believes will be beneficial for the upcoming season.
