Brothers skate to victory by using their heads

Winter Storm

By Max Montgomery
associate news editor

Cold weather and icy roads failed to deter students from attending for the winter commencement activities at UM-St. Louis on Jan. 6.

The ceremony was held in the Touhill Performing Arts Center.

The ceremony was held in the Mark Twain Building, Touhill performed bachelor’s, master’s and doctoral degrees upon the candidates.

About 55 graduates, out of a total of about 100 graduates, participated in the commencement. Friends and family members of graduates overflowed the Touhill Performing Arts Center.

"You have an opportunity to come early in your life and influence the society in which you will live your lives," said Louis.

"It is a good year to be graduating," said Louis, who worked on new ideas and potential for renewal. "You won't have an opportunity to play a significant role in the lives of students and faculty. Your student's success is our success."

Touhill recently approved requests by the Missouri System Board of Curators on a new program in the Missouri System Board of Curators on the Fairfield University of the three new appointments in the UM-St. Louis Board of Curators on Fri. Jan. 6.

University of Missouri-St. Louis Academic Non-Regular Award For Excellence

This annual award recognizes outstanding achievement in teaching, research, service or other contributions to undergraduate and/or graduate education by individuals who hold full-time academic non-regular appointments. The award, including a stipend, will be presented in the spring of 1991.

Any UM-St. Louis faculty member, staff member or student (or a group thereof) may submit nominations. Nominations, in writing, should demonstrate evidence of outstanding performance, and where applicable, information concerning availability to students, creative and innovative teaching or professional methods, and other professional and/or personal attributes and contributions that merit recognition. Former nominees who were not selected may be re-nominated.

The committee will evaluate the candidates based on the following general criteria:
1. Evidence of well-rounded professional skill in teaching, service, research.
2. Evidence of candidate’s primary job was teaching, service would be evaluated on participation in committees or directing a lab, etc and the term “research” would be extended to mean course development, contributions in textbook writing, etc. If a candidate’s primary job was research or service, the term “teaching” could be extended from formal classroom teaching to any method of disseminating information (with support on this being done at UM-St. Louis).
3. Contributions Beyond Assigned Duties.
4. Evidence of substantial time tutoring students; evidence of performing services to UM-St. Louis that were clearly beyond the individual’s duties; obtaining grants; community service related to the campus; etc.

Nominations are due in the office of Lois Pierce, Associate Vice Chancellor for Academic Affairs, by February 15.
Truce

After 27 years, UM-St. Louis is finally beginning to see the light at the end of the tunnel in its quest for an undergraduate engineering program on this campus. Through an agreement made between Interim Chancellor Blanche Touhill and UM-Rolla Chancellor Martin Jischke, UM-St. Louis and UM-Rolla will combine graduate and undergraduate courses in a cooperative program which will establish a new engineering program on the UM-St. Louis campus.

For non-traditional students unable to leave the St. Louis area to pursue degrees in the engineering field, the program will fill a much needed gap in the area's educational opportunities. Providing these opportunities is what a land-grant college is all about.

UM-St. Louis and it officials should also be aware of concerns regarding the quality of existing programs as well. With all the excitement over the installation of a new program, one hopes that the needs of other programs on campus will not be forgotten. While the matter of funding for the new engineering program does not seem to directly affect the rest of the university, the commitment to keeping educational standards high must be maintained on all levels.

Providing adequate teacher-to-student ratios, upgrading the quality of advising and providing required courses on a regular basis are some of the immediate concerns that come to mind.

The addition of the new engineering program can and should fulfill a commitment to excellence in education for this university. It is a commitment that will hopefully continue in all the university's programs as well.

LETTERS TO THE EDITOR

King Rebuffs Professors Alleged Prejudice

The city's St. Louis and the University of Missouri-St. Louis have more in common than just a name. They both seem to think that the snow we recently received would improve itself from streets, sidewalks and parking lots.

Due to their great afterthought, there will hopefully continue in all the university's programs as well.

South Campus Program, Success
For the first time in the history of the South Campus all eight student organizations united in the common cause of providing holiday gifts for students in six, seventh, and eighth grade Access to Success club members in Normandy, University City, and Westview schools. The initial goal was to provide presents for at least the 40 students in Westview’s two science clubs. That goal was easily achieved. Faculty, students and friends of South Campus, contributed enough gifts for children in five of the twelve Access to Success science/math/computer clubs. Dr. Doris Trojnak, Mr. Michael D. Wilson, and Mrs. Rebecca Heney, Access to Success staff members, want to thank all who contributed.

Classes Offered at Lindbergh
College courses leading to a degree in education will be offered at Lindbergh High School by the UM-St. Louis School of Education. Classes will begin in the week of January 9 and continue through April 30. Graduate and undergraduate credit may be earned. Classes meet from 6:30 to 9:15 p.m. weekly. For information call 553-5961.

The corner store is now just around the corner from UM-St. Louis. Come to Hobson’s Laundromat/ Snack Bar and receive same day service on your laundry or come to the snack bar. At the snack bar you will find a selection of sandwiches, soda, potato chips, candy and more for those late study nights. Hobson’s is located at the corner of S. Florissant and Belleview. 531-1629

It's always an adventure. There's something new to learn every day. The philosophy of Scouting is not just limited to survival skills. It brings Scouting into the classroom. Alpha Psi Omega is a fraternity that is directly related to the Boy Scouts of America. Through the work of the fraternity, students can learn how to be better leaders. Many of the skills that the fraternity members learn can be applied to other aspects of life. Alpha Psi Omega is not just limited to college campuses. It has chapters in high schools, middle schools, and even elementary schools. The fraternity sponsors an annual convention where members from different chapters can come together to share ideas and experiences. The fraternity also offers a chapter development program to help new chapters get started and grow. In this way, the fraternity can bring the Scouting ideals into the classroom and help students develop the skills they need to be successful in all areas of life. The fraternity's goals are not just limited to developing leadership skills. It also works to improve the lives of its members and the community around them. Through its community service projects, the fraternity helps to make the world a better place. In this way, the fraternity can make a real difference in the lives of its members and the communities they serve.

The current LSAT is changing. Why? Because Stanley H. Kaplan's LSAT prep course is too effective. So effective that perfect LSAT scores have QUADEJLED over the last two years!

This June, the test makers will change the LSAT scoring scale to 10 to 48 and revise the test to make it more challenging. Before that happens, Stanley H. Kaplan wants to help you take advantage of the current "top heavy" test. By popular demand we're offering extra prep classes for the December and February LSAT test dates. Call today and get your best shot at a 48. While you still can.

Call Stanley H. Kaplan today to reserve a place in class. Everyone has the chance.
Rivermen Riding Winning Streak into Vacation

The UM-St. Louis Men's basketball team had a busy weekend of competition against Washington University, UM-St. Louis Women's Basketball, and the University of Evansville. The Rivermen brought home a 3-1 record, with a single loss to the Bears. UM-Rolla played on Friday at Rolla (UM-Rolla: 62-59). Coach Gary Moore related the competition was more traditional than annual. "The competition with all four of these schools is close, but we have trouble with traditional schools. The win against Washington University (UMSL-70, Wash. U.-41) was the first in six seasons as a coach. It was an exciting win," said Moore.

Sophomore Jeff Herron had his personal career-best with 47 points in 200-yard individual medley and 100 breaststroke. "Jeff is really excited about his times in the breaststroke and individual medley," said Liston. "All of our breaststrokes are improving.

"We won't as deep as we needed to be on the small things like start times. Mentally we were a little off. But we didn't have the game that was not there. Also, Herron swam and helped to give us a major advantage," said Liston.

Mountains of competition with men's and women's teams against Washington University, UM-St. Louis, and the University of Evansville.
