Campus Adopts New Policy After Spike Lee Incident

Thumbs up to the Chancellor’s Public Access Committee (PAC) which was formed after an embarrassing fiasco causing considerable bad press for the university. It happened last November when film director Spike Lee visited the UM-St. Louis campus for a lecture and turned off after five minutes into his lecture. Donn Johnson, a reporter from KTVI protested, which resulted in a showdown.

A controversy arose around the fact that in a public university did Lee, as a public figure, have the right to turn off after five minutes’ into his lecture. Donn Johnson, a reporter from KTVI protested, which resulted in a showdown.

The PAC committee has laid down specific guidelines to be followed by guests of the university who make public appearances at the university. These guidelines will hopefully ensue that the university is not ever ‘kowtowed’ to students who demand the university did Lee, as a public figure, have the right to turn off after five minutes’ into his lecture.

The issue that the officers of SGA were championing was passed without a contest. If the constitution can be suspended as will, is the suspension a question included in the constitution?

This space entitles you, our readers to voice your opinion. What do you think about the environment, the justice system, and the students and faculty who attend this campus newspaper? Write a letter to the editor. This is your newspaper and we care what you think.
One concern for freshmen is career opportunities upon completion of their educational program. UM-St. Louis has active Career Placement Services, which helps students locate employment.

In 1991, 102 employers visited the campus to interview prospective graduates. A list of these included Southwest Bell, Pepsi, Tenneco, the major and regional public accounting firms, government agencies, and school districts. Students enrolled at UM-St. Louis have an opportunity to participate in a Cooperative Education Program. This University program provides either full-time, part-time or summer employment in a position related to their major field of study. Companies hiring UM-St. Louis students through this program include: McDonnell Douglas, Mononano, FAA, Xerox, Metric, Sigma Chemical and more.

A report issued in 1992, by Career Placement Services, indicated that in 1991, UM-St. Louis graduates had an overall placement rate of 79 percent. This is based on an annual survey of graduates. Placement rates for the School of Business Administration were 74 percent, in accounting; 70 percent in management information systems; 51 percent in finance; 56 percent in marketing and 86 percent in management.

Graduates from the College of Arts and Science had a placement rate of 66 percent.

In 1991, 30 percent of the graduates from the School of Education found teaching positions. Graduates certified in reading, modern foreign languages and middle school enjoyed a 100 percent placement rate. Graduates from the School of Nursing had a placement rate of 100 percent.

Salary averages for UM-St. Louis graduates in 1991 were slightly higher than national averages. Public accounting, computer science and management information systems majors averaged $23,000 yearly; business administration and science majors averaged $25,000. Education majors averaged $22,800 yearly and at the graduate level, the average salary was $24,000. MBA's received an average $51,000, while other graduate degree averaged $50,000.

Visit the Career Placement Center, located in your college career center. For details and a career plan, Career Placement is located in 308 Woods Hall.

Three ways to beat the high cost of college.

1. The Montgomery GI Bill
2. Student loan repayment
3. Part-time income

The Army Reserve Alternative Training Program is a smart way to pay for college. The Montgomery GI Bill can provide you with up to $25,000 per year in college expenses or approved Vocational Training. Second, if you choose a qualified field of study, you can get it paid off at the rate of 15% per year or receive skill training at an Army school. You'll also earn over $1,400 for Basic Campus to interview prospective freshmen is capable of loan repayment.

Mayflower Contract Services

**ENROLLMENT**

Wright agreed. "I'm very pleased that we're only 200 hours short," he said. "I think what is important around the whole theme of stemming goals is that this is the first time we had to sit and say to ourselves. So I'm satisfied with the outcome.

Wright does not think the lower number of credit hours will affect the university's budget.

---

**FEWER from page 1**

**Institutional Research and Budgets** Planning, said that Rolla's higher retention rate was explained by the fact that many students come to Rolla now they want a degree in engineering, leaving no reason for the student to transfer to another university. According to class of 1985 statistics, within a four-year period, nine percent of the student body at UM-Rolla stood at 11 percent at UM-St. Louis, 40 percent at UM-Kansas City and 52 percent at UM-Rolla graduated within a four-year period. Allen explained, "UM-St. Louis is predominantly a part-time institution with an average student load of 150 hours," lengthening the time to obtain a degree. Allen said that for many students the length of time it takes to get a degree depends on their financial situation and that they may have to build a full-time job to compensate for lack of funds.

For example, Allen said, 15 students at UM-St. Louis who enrolled from 15 to 20 hours per week are still working on their bachelor's degree. Huddleston said that Rolla's low graduation rate may be a result of the fact that 125 hours are needed for an engineering degree, while most degrees only require 120 hours.

---

**CRIME from page 1**

program that he called "assurance and awareness." Ron Mason, chief of police at UM-Columbia, said that burglary and larceny are the crimes most often committed on his campus. He explained that larceny is a theft committed by a person who is legally in the area of the crime when they committed it, while burglary is an illegal entrance into the area where the person committed the crime.

According to Mason, UM-Columbia's campus security office helps "detect, investigation and awareness" to deter crime before it occurs. Campus Alert Network is one of those programs. All employees of the University occasionally met with some of the campus police officers to express concerns or to report crimes or to discuss crime. There are occasional bulletins are sent to inform the employees of any news involving crime on campus. Mason said that the unique system has an extensive alarm system in the police station. If it is being burglarized, it allows the other holding areas to receive the alarm.

"A Crime Prevention Program works with student groups to understand the goals of each group and find out what can be done to achieve them," Mason said. "It really is a communication breakdown that has allowed for an ongoing relationship with the campus community."

Bill Blackman, police chief at UM-Rolla, said one of his duties is to meet with campus police officers meets with the dormitory housing managers every two weeks to conduct floor meetings on dormitory housing managers every two weeks to conduct floor meetings on dormitory housing. He said, "Open door for conversations allows us to see what the needs of the students are." John Pickens, chief of police at UM-St. Louis, has 17 commissioned officers on his campus. He said, "The incident is unfortunate and we that communication between the police and the campus community will "bridge the gap", between them, allowing for more efficient and prompt handling of crime. Pickens said that the line of communication between the police and the campus community will "bridge the gap" between them, allowing for more efficient and prompt handling of crime.
From Campus To Community: Roither Does It All

BY DINA DAVIS

The winter sun was sparkling as Leslie Savan was buzzed into the UM-St. Louis International House. Savan, a student who works as a phone interviewer for a national advertisement, is one of 150 international students who can be found there at any given time. Savan was there to help her friend, Dave Roither, president of UM-St. Louis SGA, with an important project.

Roither, a senior, is making a public service announcement (PSA) for the international students on the UM-St. Louis campus. The PSA is titled "Beyond National Boundaries," and it is aimed at raising awareness about the experiences of international students. Savan, who is working on the PSA as a volunteer, is helping to make the announcement a reality.

Savan said, "I think it's really important to raise awareness about the experiences of international students. They are often left feeling isolated and alone, and it's important to recognize their contributions to our community."

Roither agreed, "It's important to recognize the contributions of international students. They are a vital part of our community, and it's important to support them."

The PSA will be released soon, and it will feature interviews with international students about their experiences on campus. Savan and Roither are hoping that it will be a success.

Roither said, "I think it's really important to raise awareness about the experiences of international students. They are often left feeling isolated and alone, and it's important to recognize their contributions to our community."

Savan agreed, "I think it's really important to raise awareness about the experiences of international students. They are often left feeling isolated and alone, and it's important to recognize their contributions to our community."

Together, Savan and Roither are making a difference on the UM-St. Louis campus. They are using their voices to raise awareness about the experiences of international students, and they are helping to create a more welcoming and supportive community for all students.

Author Leslie Savan To Speak On UMSL Campus

BY MICHELLE MCINTYRE

The International Student Organization hosted a welcome party for new international students on February 22. The event was attended by 50 students and included games, music, and food.

Savan, who is a student at UM-St. Louis, said, "It was great to meet new people and have fun. I think it's really important to support international students and help them feel welcome."

Roither, who is a member of the International Student Organization, said, "It's really important to support international students. They are often left feeling isolated and alone, and it's important to recognize their contributions to our community."

Together, Savan and Roither are making a difference on the UM-St. Louis campus. They are using their voices to raise awareness about the experiences of international students, and they are helping to create a more welcoming and supportive community for all students.

See ROITHER, page 7

International House Stretches Beyond National Boundaries

BY BRENNAN TOY

The International House president, Verkahl Pulmat, wants American students to become a part of their organization as well.

Pulmat said, "I think it's really important to raise awareness about the experiences of international students. They are often left feeling isolated and alone, and it's important to recognize their contributions to our community."

Together, Savan and Roither are making a difference on the UM-St. Louis campus. They are using their voices to raise awareness about the experiences of international students, and they are helping to create a more welcoming and supportive community for all students.

Modest Rocker Isn't Looking For Fame

BY BRAD TOYOUTH

When a musician gets three or four singles under his belt, you would expect to hear about the music. Yet, there are quite a few people who don't recognize the name John Coli with the singles. Coli's 1990 breakthrough LP, "A View," was released on January 3 and spawned three hits. "Don't You Want Me," "If I Could Have You," and "The Best Thing About Love" all made it to the Top 5 on the charts. "Bed's Too Big Tonight," Coli's hit single, won a Grammy Award for Best Male Pop Vocal Performance.

Coli, who is known for his acoustic-guitar driven pop rock sound, is currently working on his second album. The album, titled "The Best Thing About Love," will be released in the spring of 1994. The album features nine tracks, including the hit singles "Don't You Want Me," "If I Could Have You," and "The Best Thing About Love." The album is produced by Tony Chatman, who has worked with artists such as U2 and the Black Eyed Peas.

Coli's music is characterized by his acoustic-guitar driven sound and his ability to write catchy, memorable songs. Coli's music has been described as acoustic-pop, rock, and country-pop.

COLE from page 6

"I didn't want to go on the last album, mostly because of the experience. I'd had with the other bands. I kind of got lost in the dressing room and stuff. Last year I thought around the country with an acoustic guitar, and I helped me get the whole sound of being myself. Plus, now I've cleaned myself up. I don't go off the deep end, I'm married (incidently to one of Michelle Pfieffer's sisters), and it feels a lot better. I think I can understand the change of the whole show now."

"I can't afford to do anything, I was the freedom to do what I want, I really save for remodeling. It's like I said before, I really try to make the most of the time I have to hang out. I hope I don't sound as pompous as it may have come across, but really, it's my cancer. It's something that I have to hang on the wall and live with for the rest of my life. I want to be able to look back on my career and say, "Yeah, that was really solid and consistent."

Quite a lot of experience and hard work have gone into Jude Cole's career, but the efforts have finally paid off. His sound is a fresh and honest reflection of the best and worst is represented by our story. The best is that Americans are imaginative and play­ful, Wrenn laughingly notes as and how

fun. The worst is represented by our
gender, how susceptible we are to sound is a fresh and honest

"Money is a great school, but I couldn't have gotten down there," Roither said. "There seem too many things going on."

But Roither has a different problem here.

"Hey Dave," Roither said to a wait­er, "How many times do you play solitaire?"

"About 60 saying, "They're just so much fun."

"You know I'm not playing solitaire (his hammered basement door of cards all over the house, just to detract him), Roither spends a lot of his free time with what he said is his first love."

"I love to read, I'm a big reader,"

Roither said he likes to practice politics in a different sort of way. He likes to go against the grain when he sees a different way of doing some­thing.

"Try to use new techniques," Roither said. "I want to try new stuff and when I hear "you're doing the wrong way," I just want to scream, "Why not?"

Jude Cole

Roither chuckled and said "You see things."

The Co mfortable Relaxed

Facing page 6
Weather’s Cold, But Spring Sports Getting Hot

by Jack Wang

Sports editor

OK, it’s cold outside and the snow is still falling in the mountains, but don’t worry, I’m not complaining about the weather too. I’m looking forward to the beautiful days of spring that are sure to come soon.

Spring athletics here are for the 28 major league teams. Getting recreational sports involved. The spring athletic schedule for team softball, golf or tennis, I’d suggest David Rhoads, Levi and Morgan Harold for any other participation. Even the winter sports are sure to get underway. Like the major leagues, the college spring teams have been practicing and preparing for the upcoming season.

Sports reporter

The Riverwomen softball team has also been getting geared up for the 1995 season. Coach Harold has a few returning players plus his team through the usual workouts. The Riverwomen lost two of last year’s starters, pitcher, Kitty Collins.

Brady’s Bunch Ready To Start Tough 1993 Baseball Season

by Jack C. Wang

sports editor

This sound you just heard over on Riverfield is the sound of the bat hitting a baseball. On today’s head baseball coach, Jim Brady, that sounds to me like it’s time to get going.

Not a single game. The Rivermen have at least one out of their first three games to qualify for the conference regular season.

The better the teams play, the more the rainy season of this year will end. One of the twelve teams in the conference is going to try for the conference tournament, which means that the best team in the nation will qualify for the NCAA championships.

Meckfessel and Co. Lose Six Straight Games On The Road

by Mike Hayes

current sports reporter

After falling seven games to four straight losses, the Rivermen baseball team probably realized the obvious: the team is in a rut. Because they are in a rut of a six-game losing streak.

Pitching staff handed the Rivermen their most disappointing loss in school history. The Rivermen fell to a 64-8 loss at their home field, overpowered by the opposing offense that scored 47 runs in the games.

In my 25 years of coaching college baseball, I’ve never seen a game like this. The Rivermen lost 38-8, 24-10, 30-9, 30-9, 36-5 and 36-5.

The Riverwomen’s non-conference schedule marks the most consecutive losses a Riverwomen team has ended since 1950-51.

Reporters’ Notebook: Riverwomen Will Face Ranked Opponent

Surrounded by assistants Victor Jordan and Erin Thompson, head coach Bobbi Morse (center) explains her strategy to the Riverwomen.

by Cory Schroeder

assistant sports editor

There’s still a lot of things that need to be worked on and fixed. The team is still learning how to play together as a unit. We have a lot of things to work on and improve on.

One of the important things the team is working on is their hitting. The players are working hard to improve their hitting. The team is working on their hitting.

Over the course of the next few weeks, the coaching staff is running under the third baseman, the second baseman and the shortstop.

The team is having an easy time of it. You have all but the coaches are excited and looking forward to their first schedule.

But, the coaches and players are not too concerned. I must admit that I can’t wait for the spring season of ’93. Let’s hope that this year we see an improvement.

The undefeated Riverwomen have an opportunity to win their first six games.

“Terry’s the best hitter on the team. He had an opportunity to come back up for another year. He was invited to tryout for another year.”

The team is working hard to improve their hitting. The team is working on their hitting.

Next week, the team is working on their hitting. The team is working on their hitting.

The Riverwomen are looking to improve their hitting. The team is working hard to improve their hitting.

UM-St. Louis Alumni Makes It Big With The St. Louis Cardinals

by Gary Schneider
associate sports editor

Mary Hendin is being hyped as a rising star in the world of sports marketing. Hendin, a 1976 University of Missouri-St. Louis graduate, has been named the new vice-president of marketing for the St. Louis Cardinals.

Hendin, who has worked for the Cardinals for the past 10 years, will be responsible for all advertising and promotions for the team. She will also oversee the team's public relations efforts.

"Mary Hendin is a tremendous asset to our organization," said Cardinals President Peter Kuriyama. "She has a great deal of experience in sports marketing, and we are confident she will be a valuable addition to our team."
Great Fastest player
Should be team's Starter at second

by Pete Del COSI

Forget about last year's 13-30 record and all that.

This Rivern women, with Coach Peter Brumbaugh, look awfully solid this season.

"We are very excited about the multi-position players," Brumbaugh said. "There's very little depth, but that's something we should be able to damper Coach Brumbaugh's spirits.

Last year, injuries killed the Rivern women, and will likely kill the rest of the season. Brumbaugh is carrying 14 players this year, and may even play two to three positions.

"We've mixed about all our multi-position players," Brumbaugh said.

Senior pitcher Kelly Childs believes the team is deep enough.

"We have a lot of versatility. A lot of people can play many different positions," Childs said. "It will be a big key.

"The hardest part is figuring out whom to hit everyone in the order," Brumbaugh said.

"We still have so many people on base last year," Brumbaugh said.

Cut downs on running.

"Rivern women lost too many games a year ago thanks to base running."

Senior pitcher Jenny Sinclair - Consistent hitter.

"She hit well last year, we need to have more runs for a higher average," Sinclair said.

Stay away from errors.

"We need to get through the first month healthy," Brumbaugh said.

"Just want to over 30," Childs said.

"We are very excited about the multi-position players, Brumbaugh might turn third time making out his lineup.

WORKHORSE. Senior right-hander Kelly Childs is the ace of the pitching staff, with a 2.76 ERA in 52 games last year.

Very aggressive outfielder who can get to the ball, should sap slippage of work.

Stephanie Adams - Only injury-prone, junior, versatile, dangerous athlete.

"She should see plenty of action as defensive replacement and pinch-hitter.

Angie Kight - Great athlete and hard on the base, should see plenty of work.

Gail Brumback - Great athlete and hard on the base.
