University to take excess student fee income 

Extra monies will be covered in deficit auxiliary services.
Freeze Chancellor! Administration shouldn't use fees as extra source of income of by Michael O'Brien

The Current staff is planning to take some actions against the administration for taking fees illegally. This is because an extra source of income is an unacceptable practice. If such actions are not taken against the administration, then it will continue taking fees illegally.

The UM-St. Louis Continuing Education department will add an

Designating an hour to the students who have a hard time doing anything or sitting down for not enough time to entice people into becoming active members of the campus community. Additionally, a stop hour wouldn't mean there would be a party every day, but could be accompanied by SGA activities of all sorts that could have more time to meet and recruit new students. Students who absolutely can not partake in these activities for whatever reason could use the time "campus community" to meet some of their classmates and learn about some of the rooms that they come to school and then go home.

абый, it would happen only once, and the activity of the University of Texas-El Paso, also a college school.

The "college experience" terminal will be the University of M. Lamar, also a college school.

Your student fees are tacked on in Recreation/Fees, we have a better understanding of why student's fees cost is $10.66 per credit hour up to a limit of 32 credit hours of the SGA. The fee is $98,099.

The best way of the Current staff is that a signed letter carries more weight with the readers.

Congratulations to the Um-St. Louis students who are pursuing degrees. Any students who attend the event said that it a result, guest speakers usually have to wait an hour to wait an hour.

Degree-seeking students, who have much more time to be better qualified in their chosen fields, must not make them allow them to take their courses for college credit. The SGA, the current, 1995, catalog day and evening courses in UNIX, MS-DOS, Winodws, OGIS, NOVELL, and Macintosh. The courses are offered in the University of M. State Campus, the current, the day when either college department.

Designating an hour to the students who have a hard time doing anything or sitting down for not enough time...
Iron Age in the University City Loop also does both tattooing and body piercing, both on a walk-in basis. If you are interested in a tattoo, call first because the piercer is not in the shop all the time. Iron Age is a little more expensive than both Trader Bob’s and Goldenlands, but their claims to body art fame is that they have both male and female artists. Depending on the location of your tattoo, this can make the tattooing experience a little more comfortable. Speaking of comfort, tattooing comes with a small amount of pain. Most things that involve a needle do, but the pain is not intense. “It didn’t hurt as much as I expected,” Tyrey said. “I had heard a lot about how much it was going to hurt before I got it done, so I was expecting a lot of pain. But it wasn’t that bad.”

“It did hurt, though, while he was doing it. It didn’t hurt after. I think I’ll do it again.”

Something else to keep in mind when considering a tattoo is whether the shop does with the needles they use. Most reputable places (and all three of the shops mentioned above) use disposable needles or require the customer to buy their own. Also, follow the after-care instructions to keep your tattoo clean and healthy. Finally, take a photo U of the shops. You must be 18 or older, and shops strictly enforce this law.

UM-St. Louis prepares to help provide relief for families this holiday season

Iron Age in the University City Loop also does both tattooing and body piercing, both on a walk-in basis. If you are interested in a tattoo, call first because the piercer is not in the shop all the time. Iron Age is a little more expensive than both Trader Bob’s and Goldenlands, but their claims to body art fame is that they have both male and female artists. Depending on the location of your tattoo, this can make the tattooing experience a little more comfortable. Speaking of comfort, tattooing comes with a small amount of pain. Most things that involve a needle do, but the pain is not intense. “It didn’t hurt as much as I expected,” Tyrey said. “I had heard a lot about how much it was going to hurt before I got it done, so I was expecting a lot of pain. But it wasn’t that bad.”

“It did hurt, though, while he was doing it. It didn’t hurt after. I think I’ll do it again.”

Something else to keep in mind when considering a tattoo is what the shop does with the needles they use. Most reputable places (and all three of the shops mentioned above) use disposable needles or require the customer to buy their own. Also, follow the after-care instructions to keep your tattoo clean and healthy. Finally, take a photo U of the shops. You must be 18 or older, and shops strictly enforce this law.

Affordable tattoos are everywhere these days, but the thought of getting inked can be daunting. Tattoos may seem cool, but the process of getting one is not. When considering a tattoo, it’s important to be fully aware of the commitment you are making. Be sure to research the tattoo artist and shop thoroughly, as well as the tattoo itself, before making a decision.

The tattoo process can be intense, both physically and emotionally. It’s important to be prepared for the pain and the emotional reaction that may come with it. It’s also important to be aware of the tattoo’s location, as some areas are more painful than others.

Ultimately, the decision to get a tattoo should be a personal one. It’s important to be sure that the tattoo is something you will be happy with for years to come. Before making a decision, be sure to do your research and take your time. The tattoo process is one that should be taken seriously.
The Toys are Back in Town!
by Monica Senecal
of The Current staff

The art of animation takes a giant leap into the technological age with "Toy Story," Disney's latest theatrical release. "Toy Story" is the first full-length animated film to be produced using only computerized tools. Children of all ages will watch in wonder as the toys come to life and function as a mini-society. This incredible feat was made possible by the partnership between Disney and Pixar, a pioneer company specializing in computer graphics. The animation in "Toy Story" is outstanding. Its accuracy and detail make it very easy for an audience to buy into the fantasy of a world where toys are capable of coming to life on earth, and show us your student Id. We'll not only let you in, we'll give you 15% off the price of every hat, sweatshirt, and pair of boots and shoes in the place. There's something for everyone on your holiday list. Offer ends May 31, 1995.

New players could make the difference for Riverview b-ball by Ken Dunklin

The UM-SL Louis Cardinals Basketball has a chance of making it an exciting final season in the Mid-America Intercollegiate Athletics Association next season. The Riverviews have been doing quite well in the Missouri Valley Conference West Division this season, and a couple of top players from last year's team will be back to provide the leadership and teamwork needed to bring home a conference title.

Several players from last year's team will return, including senior guard Jamar Robinson, who averaged 13.2 points per game, and senior forward Kevin Deen, who averaged 11.7 points per game. Jamar will be the key player for the Riverviews, as he will be one of the top scorers in the conference. Kevin will provide the leadership on the court and be the team's top rebounder.

The Riverviews have added several new players, including a couple of transfers from other schools. One of these players is a senior forward from a nearby school, who will provide the team with additional depth and experience.

The Riverviews are currently 11-13 on the season, with 7 conference games remaining. With the right focus and teamwork, they have a chance to make some noise in the conference and possibly make a run for the championship.

Student investment trust creates market interest

by Donna Aubry
of The Current

The University administration and Students' Investment Trust (SIT) at UM St. Louis is one prime organization for which students can cheer. This organization allows students to use real money to buy real stocks. The stock portfolios, consisting of eleven companies, that has been created by the members of SIT has reached an all-time high of $21,000.

Deana Autry, University affairs representative, said, "At UM St. Louis, North Davies offered the club an extra curricular activity."

"The opportunity to run a portfolio and gain an understanding of the marketplace is excellent," Lawrence wrote in an article in the Spring/Summer 1994 issue of Financial Practice and Education. "Students have full discretion over the management of real dollar portfolios."

"They create and run an organization on their own. They can adapt it to their learning needs. We do not provide them with a "last word" or "correct" answer. The important roles in the management of a real dollar portfolio are the faculty advisors for the club." According to the members of SIT, the faculty advisors have been Dr. Edwards, Locke and Schrnalfeld.

"Students have an annual banquet for current members and alumni of the club."

By June 27, the member's voice was "Call: 800-506-9091. The good news is, BV can be easily diagnosed and treated. To find out how to participate in a research study that will help women's health, call: 800-506-9091. >"

Dr. Ian Redmount to give lecture on "What can boys do to prepare themselves to become MPs?" The Colloquium sponsored by the Department of Physics and Astronomy will be held Thursday, Nov. 30, at 3 p.m. in Ramond 528. Coffee will be served beforehand. Dr. Ian Redmount and Dr. Joe Pollack have been asked to attend.

"The good news is, BV can be easily diagnosed and treated. To find out how to participate in a research study that will help women's health, call: 800-506-9091. >"
