This story, see page 3.

Linda are to blame. See page 3.

The administration has won an important victory for students, who finance their college education with federal aid. Despite a well-publicized string of failures by the banking industry and other private lenders, the House Education Committee has agreed in principle to a new formula that student loan interest rates should be indexed. Student loan interest rates now average at about 7.8%. After July 1, a new formula is scheduled to go into effect that will reduce interest rates to an average of 7.7%. Student loan interest rates will remain significant with this new program.

To support lenders, the House Administration Committee has agreed that, while implementing an interesting formula for the new students, it must also create new student loan interest rates at a substantial taxpayer expense. The new rate will amount at about $1.7 billion over five years.

There are many other changes that are proposed for student aid that could be beneficial if they minimize the impact on the future of the country. To the education, it is more important than a lot of the national leaders have pointed out the most significant change that would be to reform the student aid program, and create a new system that would be more fair to all students.

69 Nova was missed artistic opportunity for UM-St. Louis

The article titled "Spending the 'Vernacular'" (April 13) forced me to think about missed opportunities. The Nova program has been a great opportunity for UM-St. Louis, and even more so for students who have been involved in it. However, there is a concern about whether the Nova program has been as successful as it could have been. The program has been criticized for not having enough participation from students and for not being well marketed.

The Takeaway

Our Opinion

Des' dollars yield high political returns

As you may have guessed, you ll be reading a lot of material about the nascent community. Collaboration and Public Policy. Of course, it's understandable if you don't take to the stories in leftist or leftist-leaning sources, as you do not need a political philosophy to know that is it simply not the American way. All the same, the stories tend to be those the leftmost organizations like the Progressives, who are generally associated with the Democratic party, and the Center for American Progress, which is generally associated with the Republican party.

But as we see the political realities of those three. The periphery political needs become the real story. Many of the stories are not about who gets their way, but about who gets the money. The low-level political needs are the ones that are most important to the politicians, and these are the ones that the politicians are most concerned about.

For example, the community relations director at UM-St. Louis, who has been known to use her position to influence the hiring of students, is a prime example of this. Her influence is not about who gets into a particular course, but about who gets the money. And this is not an isolated example. The community relations directors at other universities are also known to use their positions to influence the hiring of students.

Of course, this is not to say that the stories are not important. They are. But they are not the stories that are most important to the politicians. The low-level stories are the ones that are most important to the politicians, and these are the ones that the politicians are most concerned about.

On Wednesday parking. Let it be turned into a crash course from 10 a.m. to noon for 500 U.S. St. Louis students. What’s that? You’re not there? That’s right. Student Activities, Horizon Pepsi Enterprises, University Police and the National Council for Alcohol and Drug Abuse are sponsoring the Dodge/Pyro300 Newo Drain Driving Simulator car as part of the Moravian festivities. The simulator car is equipped with an onboard computer that can be programmed to simulate the reactions of alcohol- and drug-impaired drivers involved in reaction-reaction reaction-reaction reaction reaction-interaction. This can make a sober driver experience the loss of physical coordination that results from drinking alcohol. However, the course is designed so that no one will be hurt, thereby reducing the danger associated with drunk driving. The course is designed to fit inside a 150-ft. by 200-ft.

Blaire keeps it up on his tor-

Eric is a good ball player," said Riverwomen coach Jim Brady. "We have a good offense and we are getting off to a good start." But on the other hand, the team is struggling with their pitching. "Eric is a good hitter," said pitcher Diane Mooney. "We have a good defense and we are getting off to a good start." But on the other hand, the team is struggling with their offense and batting average.

The game was fun and the players played well, but the team still needs to work on their defense and pitching to improve their performance. The game was also fun and the players played well, but the team still needs to work on their defense and pitching to improve their performance. The game was fun and the players played well, but the team still needs to work on their defense and pitching to improve their performance. The game was fun and the players played well, but the team still needs to work on their defense and pitching to improve their performance.
Women share ideas, discuss issues of the male-dominated workplace

by Bill Rollers

Shelled with gender barriers and overcoming was the topic of "Successful Women in the Male-Dominated Work Environment," recently sponsored by the Office of Equal Opportunity.

Members of the panel discussed topics such as sexual harassment and women in politics with an audience of about 150 people, which was a male-dominated group.

The first panelist was Beverly Noble-Barnes, commander of the 8th District of the St. Louis Police Department, and Betty Van Uum, assistant to the chancellor for Public Affairs and chairwoman of the Board of Commissioners for the St. Louis Development Agency, Susan Barchet, associate professor in the School of Business Administration, moderated the discussion.

Noble-Barnes, the first woman and a African-American to command the 4th District, said for women to challenge women in the workplace, "they have to be among their peers - the male officers - they feel they have proven themselves - that they can do the job just as well as the man does."

When separate women from races in the police department, Noble-Barnes said, "we don't feel that we have to go out and fight in a physical fight."".

She said she relies on her mental strengths to fight equations in the work place.

But sometimes relying on her own means isn't enough. "I have formed our own female support groups where we can talk such either when we are upset and we want to talk," Noble-Barnes said.

Though sexual harassment is not something that she can get used to, Noble-Barnes said she uses it every day. She said when she was starting out in her career she wouldn't report sexual harassment because she feared she would not be allowed to advance. "I chose in my time to handle it," Noble-Barnes said.

"I don't encourage women to handle it, I encourage them to report it." However, the women at the workplace is about power. One thing people do is to reduce the amount of sexual harassment in order to "negotiate the workplace at the top," Van Uum said. She explained that having more women managers will lessen the problem of harassment. In recent years, people have become more conscious of harassment in the work environment, Van Uum said.

"I would grant there has been a decrease in sexual harassment and an increase in awareness... As women have entered the work force, I think there has been less sexual harassment because there is less tolerance," Van Uum said.

With the trend of more women gaining management positions, more women are seeking political roles. Van Uum was the first woman to be elected to the St. Louis County Council. She pointed out that a woman would be the one to get with the next three elections, and said that past women who went on the ballot were not ambitious. However, she does have hope for the future.

"I think the optimism of generations of women is very different," she said.

But added, "It is the culture that has changed and people accept women in office."

Both Van Uum and Noble-Barnes paused to advise for the new, seasoned generation of women.

"Women what they need is to be prepared to be asked to handle and to put themselves on the line," Van Uum said.

As women have entered the workforce, I think there has been less sexual harassment because there is less tolerance.

Betty Van Uum assistant to the chancellor

---

You Are Not Alone.

A member of the tennis team approaches the net in practice early in the season. The team is the best in the GLVC tournament, but was unseeded last year.

With the team number one and number two doubles, the team was very solid. Van Uum was number one, then four and singles.

With the GLVC tournament looming in the near future, the team manager planned to move to less club in the year to Southern Illinois University.

"When we win," said, "I don't think about being upset from again." Conard said, "We will play this game around.

GLVC from page 3

We have improved," Conard said.

"The players put in the time, so the girls are doing the work and we have to improve," she said. We can build our lineup. We have to improve. We can do that by taking their practice hard. They need to work hard and I believe that they can do it."

The team number one and number two doubles, the team was very solid. Van Uum was number one, then four and singles.
