**Power surge causes electrical outage, fire**

**BY KEVIN BUCKLEY**

Senior Editor

A power surge triggered a small electrical fire that damaged a transformer and left parts of the South Campus without electricity early Tuesday morning.

Director of Utilities Robert Roeseler said that the surge occurred after a brief power outage around 11 a.m. on Monday.

"[United Electric] had a problem with their power supply and when their system went down it put us down economically," Roeseler said. "They when they charged it back up again it sent power surge to the transformer that's located in the South Campus [Classroom Building]."

Roeseler said the insulation on the transformer's wiring caught fire.

"The insulation that was wrapped around the cable that came in here and when that builds up there's a ground point that's not up as a safety precaution so that when that ground wire melts through it our power, Roeseler said."

Roeseler said the fire went out as quickly as it started.

"The fire extinguished itself," he said. "Once it burned out the insulation there was no power going to it."

"It was nothing bad," Roeseler said that the work done responded to the same quickly.

"The electricity came out and restored some of the power and we brought a generator in to back up its operation as it should be," Roeseler said.

"The Development Center was closed because they have a regulation that they have fire protection, Roeseler said.

According to Roeseler, some noise was present in the Center that morning but it was not severe quickly. The Center is directly above the basement where the fire happened.

Roeseler said the temporary generator was keeping the Center and other areas supplied with power until a new transformer could be installed. A new use was scheduled to have been in place on Saturday.

Alcohol Awareness Week hits campus

**BY KEVIN BUCKLEY**

Senior Editor

Last week, Horizon Phys Ed teacher hosted Alcohol Awareness Week to bring attention to the problems alcohol can cause. The mission of this activity was, according to Horizon Phys Ed, "To get kids to think twice, we're just telling them to do it responsibly."

Monday the events kicked off when a car traveled in an drunk-driving accident was brought onto campus. Horizon held that their information board on the University Center patio, while local radio station 105.7 The Point broadcast and the National Guard demonstrated "Fatigued Driving." On Tuesday, UM-St. Louis Police Officer Karen Haschmann gave a presentation and an anti-drunk-driving video was shown at the House College. Horizon related their information booth to the inside of the University Center for the remainder of the week.

A video about Binge Drinking was shown at the University Meadows on Wednesday.

On Thursday, the main event was a "Mocktail Party" where Horizon members, with the aid of caterers, served non-alcoholic drinks and gave tickets. The week ended Friday with just the info booth in the University Center. Throughout the week, students were instructed not to drink, be aware of their alcohol level, and other areas supplied with power until a new transformer could be installed. A new use was scheduled to have been in place on Saturday.

**E-mail problems elicit complaints, prompt meeting**

A lack of communication about a campus server outage over Labor Day weekend has some faculty members up in arms.

According to Paul Pratte, Manager of Administrative Computing, the UM-VMA server's power supply exploded around 10 a.m. on Sept. 3, destroying 13 disk and computer units and space on the server down through Sept. 7.

There are approximately 500-600 accounts on the UM-VMA server, Pratte explained, and faculty members are the primary users of the server and the server outage caused many incoming emails to be held.

"The machine was broken, so it was impossible to send e-mail," said Jennifer Segal, Coordinator of Campus Computing. "The true vulnerability was incoming e-mail received in the window of time between the last server backup and the time the server crashed."

It was several weeks before the server crash smtpd many faculty members. Timothy McBride is a member of the Faculty Liaisons Committee, whose purpose is to just along information from the computer science to the various academic departments.

"We got a letter on Sept. 24 that the server had gone down from Sept. 3 through Sept. 7, and some e-mail was lost permanently," McBride said.

McBride said had been running with Segal about the way the situation was handled.

"I don't think there was problems with the way they handled the outage itself," McBride said. "The people over there worked hard, and I know they tried real hard on the problem. It was the way it was handled after the fact that bugged me. It took them 19 days to tell us what happened."

Segal said to find that recent problems with the University portal mail service made the situation worse seen worse than it actually was.

"I think this raised some communication with some people," he said. "But the server was it was reasonably handled."

If it had happened at any other time, it would have been even more troublesome.

On Oct. 14, many concerns about the campus e-mail problems were visited in a meeting of the Faculty Senate.

Trick or treat: Halloween fun never gets old.

Autumn is absolutely the best season of all. At least, it is in Texas.

The leaves are changing, the weather is cool but not unhealthy. However, and there are so many food-friendly things to do.

Apple farms, wineries, weekend events, haunted houses, and of course, skeletons and the like. You've been anticipating this for weeks, and finally the night has arrived. But it's cold outside, or it's drizzling or whatever, so your mother makes you wear a coat over the outfit irreversibly damaged by the sprinkler. Nothing more embarrassing than月饼.

The strategy of early detection consists of mammograms and annual physical exams and monthly breast self-exams.

Breast Cancer Awareness Month aims to save lives.

BY PATRICIA FENTY

The University Health Services mammography program is currently promoting their “Save Yourself” campaign. Autmn may already be upon us, but October is nationally recognized as Breast Cancer Awareness Month.

“Breast Cancer Awareness is critically important because it gives women an opportunity to take their health seriously!” Pat Fenten, a University Health Service employee.

“Breast Cancer Awareness Week is an opportunity to highlight the mammary glands and the entire breast.” Pat Fenten, a University Health Services employee.

Talking to yourself on your computer

Technology is a wonderful thing. As a matter of fact, I have decided to take full advantage of the rapidly advancing technology by purchasing my first voice recognition software.

No joke. I hurled around for days at local computer stores, wanting to purchase the most magnificent voice recognition system possible. However, after much research, I ended up purchasing a voice recognition software called "VoiceOTHR". This voice recognition software is simply amazing. I can now talk to my computer and it will understand me. I am thrilled with my purchase.

For example, I can now dictate my letters to the editor, and the computer will transcribe them for me. This is incredibly convenient. I no longer have to type out my letters, which saves me a lot of time.

Moreover, I can now dictate my essays and research papers. This is a godsend for me, as I hate typing. I can now dictate my essays and have the computer transcribe them for me. This is a huge time-saver.

Overall, I am thrilled with my purchase. I highly recommend this voice recognition software to everyone. It is truly a game-changer.

Rivernmen stomp IUPU-Ft. Wayne 2-0

Men’s soccer snags a much-needed win after returning to full roster

BY KEN DUKEN

Rivernmen head coach Tim Redmond had a lot of reasons to smile after a 2-0 victory over the IUPU-Ft. Wayne Warriors in the MAC championship game.

The victory over the Warriors, who entered the game with a 10-4-1 record, was the Rivernmen’s first win in the conference.

Redmond said the win was important for the Rivernmen’s season.

“After a tough game against the Warriors, we were able to gain some momentum and carry it over into the next game,” Redmond said.

The Rivernmen dominated throughout the game, controlling possession and creating opportunities on both ends of the field.

Rivernmen players were pleased with the victory.

“We worked hard throughout the game and were able to capitalize on our chances,” said Rivernmen forward John Smith.

The Rivernmen’s victory over the Warriors improves their record to 9-4-1 overall and 3-0-1 in conference play.

The team will look to continue its success in upcoming conference games.

Intramural soccer teams battle for playoff victory

BY DAVE KINWORTHY

The Rivernmen’s intramural soccer team took on the IUPU-Ft. Wayne Warriors in the MAC championship game.

The Rivernmen were able to hold off the Warriors for a 2-0 victory, securing their spot in the championship game.

The Rivernmen were led by goals from Forward Joe Harris and Midfielder Sam Thompson.

The Rivernmen will face the Truman State Bulldogs in the championship game, looking to clinch their second consecutive championship.

It’s been a dominant season for the Rivernmen, who have scored 25 goals in 10 matches.

The championship game will take place on Sunday at 12 p.m. at the Rivernmen’s home field.

Intramural soccer league begins its season

The Rivernmen’s intramural soccer league began its season with a 5-0 victory over the IUPU-Ft. Wayne Warriors.

The Rivernmen were led by goals from Forward Joe Harris and Midfielder Sam Thompson.

The Rivernmen will face the Truman State Bulldogs in their next match, looking to continue their winning streak.

The intramural soccer league is open to all Rivernmen students and aims to provide a fun and competitive environment for soccer enthusiasts.

The league will continue throughout the fall season, with games scheduled for every weekend.

V-ball crushes Quincy

received numerous phone calls because someone had probably fumbled his or her spots.

"Once you take a phone from the bank, when you spin bits fast through the phonograph," Wommer said.

Wommer said he had talked to officials at the prison and sent a letter to an Ombudsman inquiring whether all campus telephone numbers were blocked from the pay phone in the prison. Telephone services have not required any appointments since then.

"To get advice I can offer, if you receive a similar telephone call to hang up and contact Telephone Service," Wommer said. "I've always recommended that people have a fast pace, where farce requires a fast pace, just as a matter of survival strategy on their part, a faster than usual for your card calling number."

Wommer said he had received no call for the bill telephone services in September. It is unknown how many could have come from the University.

**SLOW-FOOTED 'IMPOSTERS' JUST CAN'T MATCH THE CLASSICS**

The Imposter
Running Time: 1:42

Now Playing at the Hi-Point

The Imposter is a new comedy starr­
ing Oliver Platt and Stanley Tucci. This film is directed and written by Tucci. It is a story of how a bank robber becomes a movie star, and how a fan becomes his new life.

The film is set in the 1990s about two down-on-their-luck actors (Tucci and Platt) who accidentally become movie stars on a cruise ship. Among the passengers is another more successful but obsessive actor (Amed Moama) who the pair had earlier angered and now hopes to get. Tucci deals directly with the physical comedy and fame of films from the 20s, 30s, and 40s, and creates a new kind of slapstick farce.

The Imposter is a film that will have some well done slapstick farces, especially, the Marx Brothers' slapstick farces, and the way the Imposter is done, the audience is full of more successful films from the 20s, 30s, and 40s, and creates a new kind of slapstick farce.

**MUSIC REVIEW**

Rancid's show provides energy with a hard edge

Rancid

Many people would be unable to go anywhere near Mississippi Nights under the lights of a Rancid show, and with good reason. The audience was full of people who knew every word of the opening track on October 22nd, and there were those who looked to the front. The crowd filled quickly, and the show wasn't over. They put on an absolutely thrilling performance, and the audience was left speechless. The Garfields opened up the event, a young band from Florence. A little more Rancid, Rancid singer/guitarist Tim Armstrong's newfound record label, The Garfields are a band with a sound that is both raw and pop, basically a happy group of kids who have come together.

Among the passengers is another more successful but obsessive actor (Amed Moama) who the pair had earlier angered and now hopes to get. Tucci deals directly with the physical comedy and fame of films from the 20s, 30s, and 40s, and creates a new kind of slapstick farce.

The Imposter is a film that will have some well done slapstick farces, especially, the Marx Brothers' slapstick farces, and the way the Imposter is done, the audience is full of more successful films from the 20s, 30s, and 40s, and creates a new kind of slapstick farce.

The Imposter
Running Time: 1:42

Now Playing at the Hi-Point

The Imposter is a new comedy star­
ing Oliver Platt and Stanley Tucci. This film is directed and written by Tucci. It is a story of how a bank robber becomes a movie star, and how a fan becomes his new life.

The film is set in the 1990s about two down-on-their-luck actors (Tucci and Platt) who accidentally become movie stars on a cruise ship. Among the passengers is another more successful but obsessive actor (Amed Moama) who the pair had earlier angered and now hopes to get. Tucci deals directly with the physical comedy and fame of films from the 20s, 30s, and 40s, and creates a new kind of slapstick farce.
