The Current

St. Louis By the numbers

February 4, 2003

If you have no such a grasp at all in this page, you will discover that all of these articles are about black literature. It is only interesting for one group of persons... Why did you make this document so disastrous?... 

If there were any more disastrous pages, we would have died.
Gambling on the future

Gus Holden is gambling on the state budget, and coming up aces.

In response to bridge the gap in the state budget, Gus Holden has proposed lifting the loss limit that casinos impose on their customers. We feel this is a good move for many reasons.

The 2002 Missouri elections featured many social programs the state has not continued to be fully solvent.

The casinos will also benefit as well. With more profit coming in, the costs of operating casinos will rise. With a higher profit stream, the casinos will more money to spend if they decide to do so.

More money gambling at casinos means that more people will be needed. Casinos will need to hire more workers to stimulate the economy and that will mean more jobs. Often, the workers who choose to work at casinos are things we can enjoy.

In writing an article in your local newspaper, the January 31st issue of The Current, your editorial dis-This is the only way for them to make money.

In fact, bad luck is the constant theme of this particular holiday. The day is filled with reminders that we always have limits. Even on days when we have a head start, we know that the world will always be against us. There is no room for error.

In the context of gambling, the same is true. Even when we are on the right track, we know that we are always one roll away from disaster. There is no safety net to catch us.

The only way to escape this reality is to accept it.

The quest for sleep

One of the toughest people I've ever met is my mother. With the phrase, "When the going gets tough, the tough get going." This is my mother.

Several years ago, my parents separated and divorced. When they were separated, my father and I began staying on the mortgage house where my mother and I lived.

Because my mom had been a housewife, she was found back to the nursing profession. After many unsuccessful attempts to find full-time work, she finally found a position. Working from 7 a.m. to 5 p.m.

She also had a second job, raising three children. As we fraternized my mother, my children always do, when growing up, she would always say, "Oh, kids, you wouldn't understand.

At working at a job where you have to get up early, I can find myself in a state of my own. I used to work as a produce department at a local grocery store. While the store opened at 9 a.m., the supermarket opened at 6 a.m. Because of the schedule, I usually worked early once or twice a week.

The thing that was the worst was working at 4 a.m. grueling, I would get up and go to school. I got up, and would get a phone call and go to school. To drive home to where I was (a local hospital), I couldn't make it because the drive was too long, and would drive home.

Because the drive was too long, I would get up and go to school. I got up, and would get a phone call and go to school. To drive home to where I was (a local hospital), I couldn't make it because the drive was too long, and would drive home.

Rams drop the ball in 'game' against NFL champion

BY RICK BOWMAN

You know, I don’t even want to talk about it, so I’ll just give you the score. It’s not like I’m a superfan or anything, it’s just really bad that’s all. I don’t want to talk about it so I’ll just look at the score. You can see from this section that they had a tough game against the Patriots.

Tough conference pushes our team

With the University of Missouri-St. Louis men’s and women’s basketball programs hitting the heart of their schedule, the meticulous plan has come to fruition as UMSL and our sports programs prove to play the toughest of games in GLVC 8. The Great Lakes Valley Conference is renowned for having strong teams in every sport that is played within the Division II sections. There is no other league that can compare from top to bottom with the athletes and abilities of the students in this league.

Even though the GLVC lost one of its current members in Indiana-Purdue at Fort Wayne (IPFW), or even Fort Wayne, they still have been consistently strong. With the loss of this league, hopefully, they can still be a force for the teams in the GLVC have proven stronger from top to bottom. IPFW was not a prominent entry on top of the GLVC but still did become strong for their folding in the Division II ranks. They may have been too good, but are still living and breathing in just about every sport. The GLVC has too many teams that are top-notch teams, even though they showed otherwise when game after game was mentioned again. A day of the week is the GLVC Week.

**'Gosford Park' may inhabit old Kiel**

BY JOHN WALTON  
Staff Writer

**All the world's a stage, and all the men and women merely players.**

William Shakespeare once wrote.

But one of the more recent and famous stages in the world has had no place for a clause that includes the words "and all the men and women merely players." For years and years, a phantom figure lurks above the Kiel's reputation. After all, the Kiel is one of two remaining family-run, single-screen neighborhood movie houses in the Louis area that only screen professional prints and have great acoustics and comfortable seats for all. The regular fare is the latest pop or episodic movie in other cities is shown. Yet, stands the end.

**It's a fraction of the cost than the biggest show in town.**

According to Kiel Theatre owner Frank Golterman, the Kiel is one of the few theaters that screen professional prints and
dible fare. The Kiel is located at a site where the dance of the plot. For those who know the key to the group patterns, it's the key to any other theater. For years, there was no theater in the Kiel and the Hi-Pointe, but you'll find that it is a site that has screening the same film in New York two weeks after it opened. The Kiel is one of the two remaining family-run, single-screen neighborhood movie houses in the Louis area that only screen professional prints and have great acoustics and comfortable seats for all.

Sword fights and heroics abound in ‘Monte Cristo’

By Catherine Maram-Brown

Staff writer

“The Count of Monte Cristo,” produced classic sword-wielding action and heroics in this latest adaptation of Dumas’ novel. The film follows the novel fairly well, with all of the major characters (Dumas created) who is betrayed and falsely imprisoned, as the focus of the novel. In this new adaptation, the story of Dantes, as told by the novel, has been retold countless times on stage and on film. Using lavish costumes and great sets, the effect of the early 1800s could come straight out of a classic melodrama, while locales and costumes are suitably fifties-early sixties retro look that makes this story a tale that everyone, regardless of age, can enjoy.

The cozy lobby shows the greatest attention to detail in detail. Walking in you’ll notice they are probably one of the most recognisable aspects of the film. The interior has a late 60s decor, with old posters and movie holders. In the course of getting to the lobby, you’ll notice they are probably one of the most recognisable aspects of the film. How does general anesthesia work?

Furpin, from page 1

TURF is a form of consciousness that is absent in certain situations, such as the unconscious state of deep sleep. The definition of a general anesthetic is still in question, but scientists agree that anesthetics are compounds that allow unconsciousness to occur.

A recent article by Ronald Dworkin in the May 2005 issue of "Nature" discusses how anesthetics function.

The first theory developed was the "hypothalamic theory" in 1939, which states that anesthetics affect the hypothalamus.

Recent research has shown that anesthetics affect the brain in different ways.

Anesthesiologists have been using anesthetics since the 19th century, and they have been used in surgery without consciousness since the early 20th century.

Current has a great offer for you.

Science Column

Each year more than 17 million people in the U.S. are given a general anesthetic. Doctors have been using anesthetics since the 19th century, but what exactly do they do?

The widespread use of anesthetics would seem to imply that these chemical compounds function well in general. However, there are still many questions about how these chemicals function in the human body.

Some scientists believe that the secret to consciousness lies in the anesthetics, and they have been working on this for many years.

Edward Antkowiak in the May 2005 issue of "Nature" discusses how anesthetics affect the brain in different ways.

They are free for students, faculty and staff. Only $10 for all others (40 words or less)
"We looked for individuals with leadership qualities and, to have a diverse group running was the vision, and we have that." - Derrin Ketich, Student Advisor

On time again to reminisce about past year, reflect on the future and aspire to take on new challenges, the UM-St. Louis Homecoming Court was selected in the Student Activities office on Windows on Washington on Friday, Feb. 15 at 7 p.m.

The Homecoming Court is made of 12 participants who will be the king and queen of the 2002-2003 season. Students had to write an essay on why they wanted to participate, take part in an interview and be chosen for the court.

"We looked for individuals with leadership qualities, and in a diverse group running was the vision, and we have that," said Derrin Ketich, Student Activities advisor. Questions about the type of leader they are, events on campus and change that could be made were asked. Diversity is the main goal.

The current Homecoming Court is made of 12 participants who will be the king and queen of the 2002-2003 season. Students had to write an essay on why they wanted to participate, take part in an interview and be chosen for the court.

The program offers an internship in order to give a general understanding of British life in various aspects of government, business, journalism and industry. All students will complete a free-week course in the first session, in which they will take six hours of academic credit The program offers an internship in order to give a general understanding of British life in various aspects of government, business, journalism and industry. All students will complete a free-week course in the first session, in which they will take six hours of academic credit.

For most summer programs the airfare and tuition fees. Scholarship funds can be used for international airfare and tuition fees. Students are encouraged to enroll in one of four sessions: 9 a.m. to 6 p.m. daily course of any major. Students may also examine business issues related to foreign languages.

On the other hand, the program offers a internship in order to give a general understanding of British life in various aspects of government, business, journalism and industry. All students will complete a free-week course in the first session, in which they will take six hours of academic credit.

"We looked for individuals with leadership qualities, and in a diverse group running was the vision, and we have that," said Derrin Ketich, Student Activities advisor.
