Coonrod named campus' newest vice chancellor

BY JASON GRANGER

We've just named our newest vice chancellor, Dr. Jerry Coonrod, to the position of campus chief of student life. He's been an integral part of our campus for the past few years, and we're excited to have him leading the way.

Nursing enrollment up by 44 students

BY KATE DROLET

We've seen a significant increase in nursing enrollment this year, up by 44 students in total. This is a great sign for the future of our healthcare system.

Corinna C. Corroon, a graduate of UM-St. Louis, has been named vice chancellor for student affairs at the University of Missouri-St. Louis. We are proud to have her on our team.

Binge drinking rate last year

UM-St. Louis had a 41.5 percent binge drinking rate last year, according to Russell. "Men have a higher percentage of body water. When men drink, less alcohol is absorbed because it's obviously diluted with more water," With females, a little bit more alcohol is absorbed because they have less body water.

The big problem college student face with alcohol is binge drinking. According to Russell, "Binge drinking is how many drinks you have in one setting. Few men, binge drinking would be five or more drinks in one setting; for females, it would be less or more. Men have a higher percentage of body water, while when women drink, less alcohol is absorbed because it's obviously diluted with more water," With females, a little bit more alcohol is absorbed because they have less body water.

**The Current**

October 18

A staff member of the Associated Students of the University of Missouri (ASUM) reported that someone stole money from her wallet that was in her backpack, which was sitting in the corner of room 370 of the MSC building.

October 20

Two students reported that their money was stolen while they were in the PW store located on the first floor of the MSC. One student reported that someone was walking past her purse, and the other said that money was stolen from the packet of her jacket, which was on one of the chairs.

October 22

The presence of an unknown person looking playful on fire on the first floor of the MSC reported. The posters were damaged, some causing an extreme fire hazard.

**Professor unlocks “Mysteries of New Orleans”**

**By SARA PORTER**

Many people, probably think the term “mystical literature” is a contradiction in terms, but Duke Law School Professor Steven Rowan believes that the term isn’t as obscure as one might think.

In his recent book, “Mysteries of New Orleans,” Rowan reinterprets the story of the city of New Orleans, focusing on the mysterious aspects of its history, including its role as a major port in the slave trade.

Rowan’s research suggests that the city was built on a network of hidden economies, both legal and illegal, that supported the city’s growth and development.

“I believe it would have been a legitimate option for the city to adopt a different name,” Rowan said. “However, it is important to remember that New Orleans was founded by a French king, and the city’s history is intimately tied to the French and Spanish colonies.”

Rowan’s book has been met with mixed reviews, both positive and negative. Some reviewers have praised Rowan’s work, while others have criticized his use of language and his interpretation of the city’s history.

“I think it is important to remember that New Orleans has always been a place of contradictions,” Rowan said. “It is a city that has been shaped by both its history and its present-day challenges.”

Rowan is currently working on a new book that focuses on the city’s role in the civil rights movement.

**Lip Sync raises money for breast cancer awareness**

**By KATE DIOLEY**

Last year, 192,000 women were diagnosed with breast cancer, 42,200 of whom were from the state of Illinois. Illinois has one of the highest rates of breast cancer in the country, according to the American Cancer Society.

The event was organized by the Illinois Breast Cancer Awareness Month, a non-profit organization that raises money for breast cancer research.

"The only thing that women that are diagnosed with breast cancer need is love, support, and knowledge," said the organization’s President, Leticia Martinez.

In addition to raising money, the event also raises awareness about the importance of early detection and treatment of breast cancer.

"We want to help women get the care they need to fight this disease," said Martinez. "We want to make sure that women have access to the resources they need to get treatment and to recovery."
**Adminstration owes students a refund... or at least an apology**

Packing is a topic that just keeps coming back to mind. UM-St. Louis. It seems as though students are forever griping about the lack of parking at this school. Whether or not they have a legitimate argument on a normal school day is undecided. What is unquestionable, however, is that last Wednesday there was a definite lack of parking for UM-St. Louis students.

To arrive at though how the Millennium Student Center would be closed to students that even during the week when the Millennium Student Center was closed to students that event would be taking place. They also forget to mention how the Millennium Student Center would be closed to students that event would be taking place. They also forget to mention how the 200 million dollar building was housing that was meant to be there. What also should be mentioned is that the Millennium Student Center would be closed to students that event would be taking place. What is also being neglected is that the Millennium Student Center would be closed to students that event would be taking place.

Senior rules as UMSL claims victory

The Riverrwomen squad swept Kentucky Wesleyan 30-19, 30-20 and 30-20 on Senior Day

UM-St. Louis Volleyball
By Joe Curtis

Shooting by tips and blocking points began Ashley Richmond's career in athletics. But, shifting her talents to volleyball gave Richmond the opportunity to assist her teammates on the sophomore. said.

UMSL made the grade

Several weeks ago, I wrote about the importance of athletics to a university. Men and women fill the stadium to cheer on the athletes who give them the power to change the way people look at a university. I mentioned these words as I watched the Missouri Tigers football team at Kansas City on Sept. 6. So as the season winds down, and the team sets the tone for the biggest event of the year on the Missouri campus and one of the biggest games of recent years, I am most interested.

Using the Missouri homecoming as an example, I see that the key is to provide the athlete support to win. We're talking about a university, not a corporation. It is possible to see the sports that UMSL-Louisiana State may improve the image of the university. However, there are some factors involved. Medieval and the athletes, coaches and athletic staff. The following is a look at what could make a successful athletic department.

1. Promotion - Getting the word out. The Missouri Tigers have a history of success in this area. To date, they have a good recruiting effort in the conference. However, there are some factors involved in the athletic department.

2. Student Organization - The Missouri Tigers have a history of success in this area. To date, they have a good recruiting effort in the conference. However, there are some factors involved. Medieval and the athletes, coaches and athletic staff. The following is a look at what could make a successful athletic department.

3. Alumni - Probably one of the biggest factors to the success of Missouri athletics has been the alumni. It is the alumni who contribute to our fundraising efforts. 4. University - Providing a great environment. There are many opportunities to do the same thing. Celebrate and enjoy the success with UMSL-Louisiana State, program using Missouri State's big programs has worked.

5. Student Organization - The Missouri Tigers have a history of success in this area. To date, they have a good recruiting effort in the conference. However, there are some factors involved. Medieval and the athletes, coaches and athletic staff. The following is a look at what could make a successful athletic department.

Sports have what it takes to help UMSL make the grade

**OK Go lights up Blueberry Hill**

by Mike Sherman
Music Editor

It sounds like the old cliché of a granddaughter learning about the gone in the familyores. "When your age was, you could..."...no, I do not kid..."

OK Go is doing for a reason.

We're seeing the same old, same old familiar, toe tapping rhythm. How are they going to break into a new sound when the fans are used to hearing the same old, same old, same old sound?

If OK Go is doing for a reason, I wonder if they are trying to break into a new sound. If they are, how are they going to break into a new sound when the fans are used to hearing the same old, same old, same old sound?

**Theater Review**

**'Ah, Wilderness!**

by Catherine Manzari-Homerow
Add Editor

For sheer fun, nothing beats a production of "Ah, Wilderness!" as a way to cap the season. The play is filled with wisecracking dialogue, crackling high-energy shows, and a host of accomplished actors. The production is a 1920s American idyll with a New England flavor, perfectly capturing the spirit of the time. From the start, the audience is drawn into the world of the play, as the characters bring to life the lives of the children of the town. The acting is superb, the set is stunning, and the play is a testament to the timeless appeal of the American idyll.

**Movie Review**

**White Oleander**

by Catherine Manzari-Homerow
Add Editor

The film is a coming-of-age story that explores the complex relationships between mother and daughter. The performances are excellent, particularly by Patricia Clarkson as the father and Michelle Pfeiffer as the mother. The direction is skillful, drawing the audience into the emotional journey of the characters. The screenplay is tight and the acting is superb. Overall, "White Oleander" is a powerful film that will leave a lasting impression on viewers.
'Heaven' is haunting tale of love and loss

by Catherine Manouk-Hometer

It is so easy to find a film like this. Thanksgiving is still 5 days away, a movie-going, character-filled, or beautiful film. Rarely do you find a film that can outdo some of these. You have a very good film but in Heaven, it has all the more reason.

With elements of both a surprise film and a love story, 'Heaven' weaves an expert and ultimately moving tale of love against a backdrop of moral choices and the modern world. After years of wishing people around our lives (and the film's world) to wake up and to save the day instead of just sitting there and watching. The film is speaking to the issues of our day and to the issues of the world.

The multi-layered film deals with multiple stories about the power of love and the love that the actions of a person really matter.

The multi-layered film deals with universal questions about the power of love to change one's life and whether the actions of a person really matter.

The mulitlayered film deals with universal questions about the power of love to change one's life and whether the actions of a person really matter.

The mulitlayered film deals with universal questions about the power of love to change one's life and whether the actions of a person really matter.

Garage undergoes repairs, structure too old for use

BY BECKY ROSNER
Staff Writer

Many parking facilities around the campus have recently undergone repairs. One of the parking garages, Garage D, was inspected and found to have problems that required immediate repairs.

"Facilities requested that we close garage D," Sgt. Bruce Gardiner of the UM-St. Louis Campus Police said. "We inspected and found problems that required immediate repairs.

The department stated that the garage and they wanted to close the two levels so they could make the repairs.

Garage D was built in the late 1960s and was intended to be a temporary parking structure. The facility however, has been in place for over 30 years.

Concert Review

Redman, Jazz at the Bistro

by Kim Silver

If natural music passion has the power of speech, Joshua Redman has discovered how to promise his listeners an enjoyable performance. The process begins with his creation of an entire book. The Berkeley, California native joined forces with Elvis Bard'of Jazz at the Bistro for a set filled with Redman’s music and his rich tenor saxophone style. The savoy downtown listening room was filled with enthusiastic listeners. The final result was an extraordinary performance filled with soulful saxophone emotion and warmth.

Joshua Redman

This month is filled with performers. With heavy hitters from house to ghettos and ghost tales, Jefferson Barracks brings Halloween spirit to the Missouri. The month of October is known for its horror stories. The story was approximately 90 minutes, and lasted until about 9 p.m. Each Lantern bearing, costumed guides led visitors on the haunted history tour. Some based on true history episodes and some on fictional stories. The history staff revealed a story told by a patient that the book is a true account. The main building is filled with an enthusiastic name and the expenditure of huge sums of money, cryptozoologists have largely failed to accumulate convincing evidence of the existence. After years of searching and the accumulation of anecdotal stories of sightings or overheard рассказов, some modern researchers have attempted to apply the latest scientific techniques to this field. Among the most famous in the United States and reports of Giant Sloth. Gordon’s sighting, the first of its kind, occurred in Idaho. It was reported to be over 20 feet in length. The same kind of creature has been found throughout Africa, lending weight to the idea that there may be other undiscovered creatures, just as there are many undiscovered mammals in the southwest.

Cryptzoologists have several theories about the ambiguous nature of these creatures. Some believe that the “bear” is actually a large salamander or a large lizard. Scientists have been unable to eliminate the possibility of a large reptile, however, the evidence suggests the existence of a large reptile, possibly a crocodile, in the cocoa.

Cryptozoologists often criticize the lack of scientific documentation of these creatures. The existence of these creatures is supported by the discovery of a large creature in the Missouri River. This creature has been documented by several scientists, including Redman. The creature is described as a large salamander with a long tail. Scientists have been unable to eliminate the possibility of a large reptile, however, the evidence suggests the existence of a large reptile, possibly a crocodile, in the cocoa.

This creature has been documented by several scientists, including Redman. The creature is described as a large salamander with a long tail. Scientists have been unable to eliminate the possibility of a large reptile, however, the evidence suggests the existence of a large reptile, possibly a crocodile, in the cocoa.

Cryptozoologists often criticize the lack of scientific documentation of these creatures. The existence of these creatures is supported by the discovery of a large creature in the Missouri River. This creature has been documented by several scientists, including Redman. The creature is described as a large salamander with a long tail. Ellis Marsalis

This is considered one of the world's premier jazz pianists. He's taught some of the world's best musicians,
Even bothered a few of his own.

But with retirement approaching, he didn't want to improve.

It's when he came to money. We worked with him on ways to make the most of his retirement
plan, so money wouldn't cut in the way of his music. After all, jazzmen
aren't supposed to play the blues.

Lay off the ideas, advice, and insults. TIA.CHEF.org or call (314) 840-2741.
