The never ending story

Coonrod reverses decision; SGA president still unknown

by Becky Rosson
News Editor

After weeks of trials and tribulations, there is still no official legal decision. The executive committee has now gone to the SGA executive committee from last year, Adam Schwadron, as a result of the appeal, or another appeal, which was accepted by Adam Schwadron.

The original result was that, whether there was an appeal or not, there are some issues that need to be addressed before悬着 another election. It was the first year that the vote was online and it was thought that some students may have had trouble accessing the site.

My philosophy, whether there are issues or concerns with that (voting), each year we need to continue to work with the student government associations to make sure that things run smoothly.

Taylor Taylor was named president by the vice-chancellor. The following was taken directly from the SABC Opening Guidelines.

Chair, coordinator of Student Government Association, voting.

Seven student clubs by the Coordinator of the Student Government Association with the advice of Vice-President for Student Affairs, Vice-Student Government Association, SABC, all students serving as members of the SABC, and students serving as members of the SABC.

The Vice-Chancellor is a member of the Student Government Association. There is no indication that the number of students in the SABC Opening Guidelines.

The SABC Opening Guidelines, published, are after reason of each member of SABC must follow. The following was taken directly from the SABC Opening Guidelines.

Many contributors bought bricks and some bought seats in the auditorium. Major contributor's names are planted as you walk in the building.

Several members of the Board of Curators were present, including president Connie Silverstein. In her speech she talked about funding and all that went into the PAC. There were a total of five presidencies that worked with Touhill throughout the construction. The PAC will bring dance and theater back to the university. Music, which is currently available, will also be emphasized.

Touhill was last to speak. She spoke about how honored she was to have her name on the PAC and how a dream was made into a reality. "I know we will treasure it always," said Touhill.

After the dedication, a short reception followed. Refreshments were available to everyone as well as tours of the building.

SABC from page 1

The Student Activities Budget Committee meets in April. The committee allocates student activity fees to all campus groups and organizations. SABC members must receive approval from Vice-Chancellor of Student Affairs Curt Coonrod, then they have to be signed off on by the chancellor.

No member of SABC may vote on the budget of an organization that he/she is a member.

Along with these membership requirements, the SABC has nine funding priorities that student organizations must meet in order to receive an allocation. The following are taken directly from the SABC Operating Guidelines.

1. Provide activities designed to enhance UM-St. Louis' reputation in the community and academic circles.
2. Activities that help recruit and retain students.
3. Enhance cooperation between UM-St. Louis organizations through joint projects.
4. Promote increased faculty, staff and student interaction.
5. Promote the development of student leadership.
6. Priority given to organizations that partially support themselves through fundraising activities.
7. Priority will be given to organizations that partially support themselves through fundraising activities.
8. Priority will be given to organizations that have effectively used previous Student Activity Budget Committee allocations.
9. Priority will be given to organizations who have consistently attended Student Government Association Monthly Meetings and who have sent a representative to the Leadership Training Retreat.

SABC decisions are not final. They must first receive approval from Vice-Chancellor for Student Affairs Curt Coonrod, then they have to be signed off on by the chancellor. This year, Jerry Durham, who was acting as chancellor while Interim Chancellor Donald Driemeier was recuperating from bypass surgery, gave final approval on the allocations.

The Current is hiring for next year. Interested? Drop us a line or send a resume to 388 MSC care of Nichole LeClair, Managing Editor.

The Current, get caught up.

Look for our expanded Orientation Issue July 21.
This spectacular issue will help you get situated at UM-St. Louis and in the St. Louis area.

**Everyone's biased**

I find myself on the cringing end of an otherwise merry band of journalists these days. The bias in themedia is so flagrant, so clear, so obvious. “Oh, you’re a journalist,” someone exclaims at me, “and I know what that means — I can take it as an insult.” I now know what it means to be a journalist. The fiasco at the New York Times, the censorship of the war in Iraq, the fudging of the facts, the lies that are told, the half-truths, the myths that are spread — it’s all bias.

We introduce our own biases in the writing of our stories, and we do it for the most part without our even realizing it. We introduce our own biases in the selection of our stories, and we do it for the most part without our even realizing it. We introduce our own biases in the selection of our sources, and we do it for the most part without our even realizing it. We introduce our own biases in the selection of our facts, and we do it for the most part without our even realizing it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

The problem is, we are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it. We are all biased. And we are all responsible for it.

Weather gone wild
When will the rain stop?

BY CATHERINE MANRESS-HENWOOD
Science Columnist

Everyone is talking about the wacky weather this spring, how warming up into summer, we've been stuck in a perpetual winter weather pattern, with rain, windy and cool temperatures. While some are saying the delay of the cold could mean a less stressful year, others are noticing unusual patterns and wondering what it means for climate change. However, some experts suggest that the current weather conditions are not unusual, as they are consistent with historical trends. In fact, some studies have shown that the occurrence of extreme weather events has increased in recent years.

One of the main concerns about climate change is the potential for more frequent and severe weather events, such as hurricanes, floods, and heatwaves. Some experts argue that these events are already happening, and that they are likely to become more frequent and intense as the planet warms up. However, others point out that the current weather patterns could be a result of natural variability, rather than climate change.

Regardless of whether or not climate change is to blame, it is clear that we need to be prepared for the potential impacts of extreme weather events. This includes developing better emergency response plans, improving our infrastructure to withstand extreme conditions, and working to reduce our carbon footprint to slow down climate change.

The best album that you've never heard

This week: George Harrison’s Brainwash

BY JASON GRANGER
Editor-in-Chief

Hello and welcome to the first installment of the best albums you've never heard. In this weekly column, I will endeavor to let the faithful know that there are some gems of albums that haven't received the playing time they deserve. Our first album is a posthumous release, George Harrison's Brainwash.

George Harrison's "Brainwash" was released posthumously in 2002. While it entered the "Billboard" charts on the top ten, few people know about this amazing album.

George Harrison's "Brainwash" was released posthumously in 2002. While it entered the "Billboard" charts on the top ten, few people know about this amazing album (or compact disc for the diehard audiophiles). It's a great test of the listener's patience as he or she side-notes, "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?"

Now, you might be thinking, "Why should I buy this album?" Put simply, George Harrison shows all his skills in this album with full soundtracks, not just a simple string quartet. As with any album, however, there is some track that stands above the rest. Like "A Day in the Life," from The Beatles' "Revolver," George's "Besotted" is one of those tracks that leaves you asking, "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?"

In this way, Harrison stops about his spiritual journey and his eventual acceptance of his impending death, which by all accounts, he took much better than most people in his position would. Another wonderful track is "If I Stop." George Harrison is a master of using natural elements to make an emotional connection with the listener.

Of course, there are those that argue that this is a part of a natural trend, or a man-made effort. And there is some intriguing music that supports the idea that it's all due to OU/UV and human impact. Despite the controversy, it's clear that climate change is a complex issue.

However, it is true that we must prepare ourselves for the potential impacts of climate change. This includes developing better emergency response plans, improving our infrastructure to withstand extreme conditions, and working to reduce our carbon footprint to slow down climate change. It's a great test of the listener's patience as he or she wonders "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?" It's a great test of the listener's patience as he or she wonders "What's this album with all the words?"

Features Editor

Summer is a season that people look forward to all year. Long, white winter days make this season of light even more desirable. Unfortunately, the end of the summer season always seems to come much too quick.

To help extend the entertainment for everyone, instead of wasting the days away, we can search out new venues to explore what the city can offer.

Riding around in public transportation can make for an unique and enriching experience, and does not require a great deal of money, considering that the fees are paid and the air conditioning keeps passengers comfortable. The MetroLink runs from end to end and (practically) all of St. Louis is reachable. Observe the different generations and the passing scenery.

Bleachers, anyone? Busch Stadium, conveniently located along the river, has to offer. Instead of wasting the days away, you may choose to fish, or enjoy a day of sightseeing. The seats are padded and the air conditioning keeps passengers comfortable. The MetroLink runs from end to end and (practically) all of St. Louis is reachable.

Another place good for watching people is Lambert St. Louis International Airport. Ride the MetroLink over and observe how the river and the river and the days look and feel. Remember to step to the ticket counter to get the best view of airplane stops.

Find some friends, some food and a pickup truck or bus and spend the day outdoors in Forest Park. Roller ski-lifts and other rides, boating and fishing piers can be rented in the park to enjoy a relaxing afternoon. A trip to the Saint Louis Art Museum adds a certain culture and fun to a hot day. Wonder through the galleries and examine the traditional and non-traditional works housed in the museum. "First Pitch Free," the museum enables patrons to take advantage of extended hours from 11:00 a.m. to 5:00 p.m., and offers free admission the first Tuesday of the month.

June 20 9:00 a.m. to 6:00 p.m. at 12th and 3rd, your lovely neighbors will gather at the art museum to show off and ogle automobiles. For more information, call the museum.

The City Museum, an indoor and outdoor playground for younger people with ages, open up again on Friday and Saturday nights. For a small fee, the City Museum and explore a city that lives and, of course, a giant playground. Spend a day on the Loop. Explore the Central West End. Not only do these areas have interesting shops and galleries, they are also close to UM-St. Louis. St. Louis is known as "Athens of America" and the art museum is housed in a building that resembles an old Greek temple.

**Summer in Seton**

**by Kate Drolet**

Features Editor

During the fall and winter semesters, UM-St. Louis is a busy place, with classes, countless people pursuing different life activities. Even though the University’s residential population is relatively small, those who do live on campus know that it is a close-knit community as an active group.

One of the things that happens to students when the majority of residents move to their respective homes, anyway? So not many, according to Mike Sherwin, president of the University’s Residence Life Association. The main reason is that there’s a lot of activity going on during the holidays and the summer to welcome students back.

All UM-St. Louis summer residents are required to live in Scholar’s Hall.

"The students are always on the move," said Dr. Randy Sommers, assistant professor of the hall. "We’re always trying to accommodate as many students as possible during the summer." To do this, the hall has events throughout the summer to keep the residents active.

"We’ve got a lot of different activities," said Sommers. "We’ve got some ice cream socials, some picnics, some outdoor events, some indoor events. We’ve got what we can during the summer to keep the kids busy." To make sure the activities happen, the hall has a lot of staff and students working during the summer.

"We’ve got a very active group of students," said Sommers. "They’ve been really helpful in making sure the events happen. We’ve had some really good ideas from our students." To keep the students busy, the hall has some events throughout the summer to keep the residents active.

All UM-St. Louis summer residents are required to live in Scholar’s Hall.
Brady braves his 2003 squad can take on any conference opponent

by Steve Harrell

Despite Brady’s confidence, the Rivermen know that the conference will test them. "The conference is definitely a time for us to prepare for the GLVC championship," Brady said. "We have to use the conference as a way to prepare for the GLVC championship."

The Rivermen baseball team Jim Brady and UM-St. Louis to win the GLVC championship in 2003.

"They’ve got some good pitching and everybody knows that good pitching can stop good hitting," Brady said. "You’ve got to get out there and stop everybody."

"We’re not out to do the most of the west, but we’re going to be up to our capabilities as teams are going to be good this year," Brady said. "Because I really don’t see us being anything near a regular season:" Brady said. "According to Brady, many one way that UM-St. Louis will handle themselves is through handling their own offense. "We have a lot of stuff that we’ve been working on in the off season," Brady said. "We’ve got to be better prepared for that game against Wisconsin."

The realest story of the Mighty Ducks

U.S.M.I. defeats Hawgs in GWV

BY STEVE HANSELL
Sport Editor

Sweeping conference rival Quincy, the Rivermen scored again against their dominance in Great Lakes Valley Conference play. Louis polished off the 1-0 game in nine innings, dominating the twelve-year-old teams.

Later in the game, pitcher Kevin Sahm pitched a complete game, striking out four and walking none, improving his record to 1-0. Quincy starter Matt Redhead allowed six runs in five innings, giving up six hits, striking out four and walking four.

The effort of the Rivermen hurlers ended in their victory in the bottom of the UM-St. Louis offense in game one. The Rivermen shut out the Hawks in the first inning.

The Hawks had a chance late in the game and nearly bring it to a tie. The effort of the Rivermen hurlers ended in their victory in the bottom of the UM-St. Louis offense in game one. The Rivermen shut out the Hawks in the first inning.

For the second straight year, you men’s tennis program here at UM-St. Louis has qualified for the NCAA Division II tournament, but for the first time in school history, the Rivermen defeated the traditional powerhouse, Indiana. It was a great win, but much credit to Coach Gary Gyllenborg.

In 2003, the mighty Ducks had nothing to show for the effort, and the Great Lakes Valley Conference tournament. But in the third series, they were ready to see the next round.

I suppose you could call next year

The realest story of the Mighty Ducks

U.S.M.I. defeats Hawgs in GWV

BY STEVE HANSELL
Sport Editor

Isn’t Frozen II Life imitating art? Eleven years ago, the Mighty Ducks of Anaheim needed a win to ensure their spot in the NHL. Coach Charlie Conway (Eric Stoltz) was the team’s leader, and they were one win away from reaching the Stanley Cup finals. But the Ducks had a chance late in the game and nearly bring it to a tie. The effort of the Rivermen hurlers ended in their victory in the bottom of the UM-St. Louis offense in game one. The Rivermen shut out the Hawks in the first inning.

In 2003, the mighty Ducks had nothing to show for the effort, and the Great Lakes Valley Conference tournament. But in the third series, they were ready to see the next round.

The realest story of the Mighty Ducks

U.S.M.I. defeats Hawgs in GWV

BY STEVE HANSELL
Sport Editor

Isn’t Frozen II Life imitating art? Eleven years ago, the Mighty Ducks of Anaheim needed a win to ensure their spot in the NHL. Coach Charlie Conway (Eric Stoltz) was the team’s leader, and they were one win away from reaching the Stanley Cup finals. But the Ducks had a chance late in the game and nearly bring it to a tie. The effort of the Rivermen hurlers ended in their victory in the bottom of the UM-St. Louis offense in game one. The Rivermen shut out the Hawks in the first inning.

In 2003, the mighty Ducks had nothing to show for the effort, and the Great Lakes Valley Conference tournament. But in the third series, they were ready to see the next round.

I suppose you could call next year

**Movie Review**

**FILM:** Love & Money

**CATHERINE MANUGON-MONTEREY
Film Critic**

**Time Warner Center, St. Louis, Missouri 63110**

**Website:** ^www.filmcritic.com^ **Phone:** 314-255-5838

**Summary**

Love & Money is a film about a couple who are brought together by love but are separated by money. The story is told through the perspective of a middle-aged woman, who is in a long-term relationship with a wealthy older man. When she discovers that he has not been paying his share of the bills, she must decide whether to stay with him or leave. The film is a commentary on the role of money in relationships and the importance of communication. Overall, the film is well-acted and directed, with a strong cast that includes Annette Bening and Kevin Kline. **Rating:** 3 stars out of 5.

**Movie Info**

The film was released on June 26, 2003, and is available on DVD. It was directed by Nicole Holofcener and produced by David Anspaugh. The film's cast includes Annette Bening, Kevin Kline, and Virginia Madsen. The film's soundtrack features songs by artists such as Beck, Beck Hansen, and Beck Hansen Jr. The film was shot in Los Angeles and New York City.

SPRINGFIELD -- Summer is the time for action films and, increasingly, sequels. It’s the season that fits the special effects innovator “The Matrix” into the movie theater, a film that was apparently not warmed up. While not as groundbreaking stylistically as the first “Matrix,” Reloaded” is still worth the trip. Attendance has been great, yet don’t get your hopes up. It didn’t live up to the first one.

For those who are new to the story of “The Matrix,” the original 1999 film was set in a future where humans live in a simulated reality controlled by artificial intelligence. The film explores themes of reality, consciousness, and the nature of existence. The audience is introduced to the character of Neo, played by Keanu Reeves, who learns he is the Chosen One, destined to end the Matrix and liberate humanity.

In “Reloaded,” the story continues as Neo and his allies, including Morpheus ( Laurence Fishburne) and Trinity ( Carrie-Anne Moss), face new challenges and confrontations. The sequels delve deeper into the world of the Matrix, introducing new characters and expanding the universe.

The visual effects in “Reloaded” are impressive, with elaborate action scenes and spectacular set pieces. However, some fans felt that the sequels were not as strong as the original, with a few feeling that the story became too convoluted and the characters’ motivations less clear.

The film’s box office success continued, but reviews were mixed. Many critics praised the special effects and action sequences, but others felt that the story lacked depth and the characters were not as well-developed. The sequels, especially “Reloaded,” were criticized for their reliance on CGI and a lack of the gritty, human element that made the first film so compelling.

Despite these criticisms, “Reloaded” maintained the franchise’s popularity and set the stage for the eventual end of the series. The film’s box office success and critical acclaim inspired many sequels and spin-offs, expanding the world of “The Matrix” and its themes of reality, consciousness, and freedom.

From Olivette to North St. Louis: New PPRC exhibit shows an outsider's perspective

By Mike McMunigal Staff Writer

Susan Pittman was not born a photographer, Pittman, a retired physician, candidly admits she only started taking photography by chance. "I never had a camera in my hand until 1994 when my daughter couldn't find anything else to give her as a gift. I went from never taking a picture to being picture perfect." The venue of Pittman's lamented avocation are on display in a new exhibit titled "Bonding with a Neighborhood," features a series of color photographs of Ward 17 in north St. Louis which is bounded by Grand, Kingshighway, Olive, Forest Park Expressway and St. Louis Avenue.

Pittman, who lives in Olivette, first came to the neighborhood through a community garden plot: an ordinary event with a personal relationship and everyday life and to the people in our city - for better integration into metropolitan areas. The people were quite suspicious, and started set the camera down on the bench and there.

Although a stranger, "we started seeing her sit down and say 'Amen. Although a stranger, "she's always around us. I don't know how she real..."" Pittman says the project appealed to her because of its relevance to city residents of Ward 17, which features photographs by Susan Pittman, an Olivette native, documenting Ward 17 of north St. Louis.

According to one graduate, "it was hard to 'hear the speakers because everyone was calling their families in the stands, asking where they were.' Alumni Association annual meeting travels back in time
