Pomp and circumstance
long-term campus goals

by AMANDA JENKINS
Staff Writer

Chancellor Thomas George gave a hug from UMSL System President Ellen Floyd after Floyd presented George the University action plan, marking his official inauguration as chancellor. George, who has served as University president, was formerly chancellor at University of Missouri-St. Louis.

The Action Plan is the newest plan announced by the University to outline the campus and the quality of education that students receive.

The plan outlines five long-term goals: enhancing the quality of education, improving the quality of research and the financial base of the University, admitting and enhancing academic programs, and combining the community and developing a more comprehensive IT program.

The second goal, admitting and enhancing the quality of education, aims to increase the number of regular faculty members. The first goal for the new chancellor is to strengthen the community program, enhancing the relationships with the community and developing a more comprehensive IT program.

The third goal is improving the quality of research. The first target area focused on enhancing the research environment, raising the research dollars, and achieving the average of more than $25 million in research dollars.

The fourth and final goal of the Action Plan is enhancing civic engagement and the engagement of the campus with the community around.

The Action Plan also includes the following processes, which are crucial to the achievement of the goals:

- The Action Plan will be presented in a series of deliberations for the University community and the Board of Curators.
- Thirty-one people accompanied the new chancellor and share their dreams and aspirations for the campus.
- The Action Plan will be presented to the community at a series of open forums.
- The Action Plan will be presented to the community at a series of open forums.

The Action Plan was developed through a series of deliberations and discussions with the community, including students, faculty, and staff.

In the Jan. 28 issue of The Current, student focus groups were presented by Becky Romer. Since then, the Action Plan has been revised several times to include new input from students.

The Action Plan outlines five long-term goals for the University:

1. Enhancing the quality of education.
2. Improving the quality of research.
3. Admitting and enhancing academic programs.
4. Combining the community and developing a more comprehensive IT program.
5. Enhancing civic engagement.

The Action Plan was developed through a series of deliberations and discussions with the community, including students, faculty, and staff.

Since Jan., 1, a total of 19 student vehicles have been broken into on North and South Campus. At 8 a.m. on Wednesday, campus police said one student vehicle was involved, and two auto thefts have been reported. Nine vehicles have been broken into on North Campus, and six auto thefts have been reported.

The vehicle thefts occurred on Lowell Rd., near West North Campus, leading to the Millennium Student Center. The other vehicle theft took place on J.G. Mill, near the Mill."The vehicle thefts occurred on Lowell Rd., near West North Campus, leading to the Millennium Student Center. The other vehicle theft took place on J.G. Mill, near the Mill.

The car was scuffed, the windows were broken, and the other items were missing.

Sponsored by the Current, the University of Missouri-St. Louis's student newspaper, the Current is a reader-supported, non-profit, member-owned organization dedicated to the free exchange of ideas. Under the supervision of the University, the Current is independent from the administration, the faculty and the student government. The Current is a student-run publication. University students, faculty and staff are encouraged to contribute to the Current. The Current is published weekly at 12121 Northern Avenue, St. Louis, Missouri (43210). It is distributed to the student community at campus locations, including the campus Community Office, residence halls, and the R. Pearlman Library. The Current is interested in receiving your contributions of news, features, columns, reviews, cartoons, poetry, art, other student writing and artwork, and similar material. The Current welcomes ideas that will make the newspaper more useful and interesting to the student community. The Current is an equal opportunity employer and is committed to affirmative action and equal opportunity in employment and education for its students, faculty and staff. On Friday, Career Services held the spring job fair from 9 a.m. to 5 p.m. in the Mark Twain gymnasium. The job fair was open to all students and alumni. Companies were looking for both prospective employees about to graduate, as well as mature workers to fill internship positions in all majors. Around 300 students pre-registered to attend.

Two-thirds of those who pre- registered actually attended. Teresa Balstereri, director of Career Services, said, “And with those who did show up today, we are expecting ‘100 to 200 job seekers.’

Many of the companies and organizations that were present are well known, including Alden-Beach Inc., the Missouri Department of Corrections and the Fill.

“These are 92 companies here,” that’s 18 percent,” Balstereri noted. “I’m hoping that’s a sign that the economic situation is on improving.” Balstereri said that many of the companies and organizations have been sent invitations, and many of them expect these expectations.

“We have a working relationship with many of these companies,” Balstereri said.

With the sea of students and alumni, prospective employers had many candidates to choose from. Many were accepting resumes and handing out applications. Most of the companies brought brochures and even some brought free giveaways.

Many students came to the job fair for the same reason, “It’s convenient because there are so many companies in one place, and it’s close,” Sarah Wise, senior, criminal justice, said.

Students entered the Mark Twain building and were greeted by representatives from Career Services who signed them in and gave them name tags. Students then moved into the gymnasium where the companies and organizations set up their booths. Students were free to walk around and explore the career opportunities offered by many of the companies.

Most of the job fair left the job fair feeling confident.

“It was very successful,” Wise said. “I found a few jobs that I am going to apply for.”

Students are welcome to get help with career information through Career Services. Career Services is located in the Millennium Student Center in office number 278.

Bertuzzi’s hit

I want to start off by saying you’ve been hearing about a race for the last few weeks. Congratulations to Todd Bertuzzi. He is the man left for the hockey schedule for Vancouver Canucks.

And I’m very sad to say.

Bertuzzi, a sucker punched Colorado Avalanche player Steve Moore, smiting him to the head with his hands after poor Moore, Bertuzzi then fell on top of Moore, forcing his head to the ice, cutting Moore’s face and then throwing stones in his head.

What Bertuzzi did was two things. It was two things, and it was against the regulations of the sport, and, according to his former teammate Murray Murray, not at all like Bertuzzi. However, I was seconded at the demotion of the event, so I sympathize with what happened.

Now, before I go back a bit, what is Bertuzzi was this? I’ve seen him, I have seen the large-scale orange in its current form. Nowber, defense-oriented, anti-fighting. The T.A., not understanding that for the fans to see a good fight and people really not understand the rules.

What this rule says, it is not a rule of change. This rule, you get a two-minute minor penalty on top of your player on the ice. It is 10 plus a ten-minute misconduct and you are out of the game. If you already caused a game penalty in a season, you face suspension and you get to lose that player, right, according to Captain. Campbell. Next, what does this have to do with science and fiction?

Do you know how much I hate the no fighting rule? If I hadn’t had a fighting rule, I would have been able to have the league on the ice, on the court as I have seen. I have seen the hope that the league is now. The league has cracked down on the rule, and the league has taken away the hope from the fans.

I wish I would have been able to have the league in the game, I would have been able to have the league on the ice, on the court. The league has taken away the hope from the fans. I wish I would have seen the league on the ice, the league has taken away the hope from the fans, and the league has taken away the hope from the fans.

So then I would have been able to have the league on the ice, on the court. The league has taken away the hope from the fans, and the league has taken away the hope from the fans.

What studies have been done to eliminate sleep deprivation? What does a person do to improve their sleep? How does sleep affect our daily lives? What is the significance of sleep? What are the effects of sleep deprivation? What are the effects of sleep deprivation on our health?

If you aren’t sleeping well, you may try to improve your sleep by taking a hot bath, reading a book, or listening to calming music. You may also try to improve your sleep by following a regular sleep schedule, going to bed and waking up at the same time every day. You may also try to improve your sleep by creating a comfortable sleep environment, such as a quiet, dark, and cool room.

Science and fiction

“Sleepless”

The novel was modified from research into sleep deprivation without any significant changes to its original form. The novel has been well-received and has received positive reviews from both readers and critics. The novel’s success has been attributed to its ability to capture the reader’s attention and keep them engaged throughout the story.

What is the impact of sleep deprivation on our health and well-being? How does lack of sleep affect our cognitive function, mood, and physical health? What are the long-term effects of sleep deprivation on our health and well-being? What are some strategies for improving our sleep quality and getting the rest we need for optimal health and wellness? What are some strategies for improving our sleep quality and getting the rest we need for optimal health and wellness?
Can women make more eggs in life?

In honor of St. Pat's Day, here is a tale of how some eggs led to a discovery that may overturn a fundamental concept in biology.

Every basic biological textbook that talks about reproduction will tell you that female mammals are born with a set number of eggs, which are used up over the lifespan. In humans, when a woman's eggs are gone, she goes through menopause, according to the text. But a new study from Harvard Medical School that was just published in the scientific journal *Nature* describes how researchers found that mice ovaries replenish their supply of follicles and oocytes, the package that produces mature eggs.

Their findings suggest that indeterminant germ cells give rise to new eggs in female mice, just as in germinal stem cells do in males.

Although the study only describes the observation in mice, it raises the possibility of understanding — beyond the types of oocytes that support female fertility. Stem cells are the cells that give rise to all of the cells of a certain type, while one often hears the term used to refer to embryonic stem cells, which have the potential to become any type of cell and exist as developing embryos, the adult body also has two cells types in different stages throughout the body. The most familiar of these are the bone marrow stem cells that give rise to all blood cells. Germinal stem cells are the ones that produce the immature sex cells throughout life, but support the replenishment of germ (sperm) or ovulated eggs.

Genevieve Guillemin, a Harvard Medical School researcher and one of the study's authors, said the research "gives us a new perspective on the concept of oocyte death in vertebrates, and it could lead to new insights into the mechanisms of male fertility in humans, as well as the role of stem cells in other species, such as humans."

The finding is not new to the field and has been replicated in other species, such as rats. However, this study describes how researchers found that mice ovaries replenish their supply of follicles and oocytes, indicating new production of the follicles and oocyte factories.

The team now seeks to isolate the actual stem cells that give rise to new eggs in mice. A recent study has shown that some stem cells in the ovaries of mice could be used to regenerate the ovaries in other species, such as rats. The team also hopes to develop a new method to identify these stem cells.

The study's lead author, Elisa M. Vojkovich, a postdoctoral fellow in the laboratory of Andrew W. Orrego, a professor of cell biology, said the findings "open up new avenues for the study of ovarian biology and fertility." The team is now working to identify the specific cells that give rise to new eggs in mice, with the goal of developing new methods to treat infertility.

The researchers hope their work could lead to new treatments for infertility and the ability to preserve fertility for patients undergoing chemotherapy or radiation therapy.
St. Patrick’s Day revealed

BY MELISSA McCaRHY
Features Associate

The color green, pots of gold, shamrocks, leprechauns and corned beef are all cues that “Kiss Me I’m Irish,” is a few synopses and celebratory holiday. “When I think of St. Patrick’s Day, I think of St. Patrick’s Main,” Whitney Johnson, junior, business, said. Although many people do commemorate this day by drinking green beer, eating all sorts of Irish foods, and participating in parades and drawing attention to their Irish heritage, not all people are aware of the normal St. Patrick’s Day symbols, some might not know that the holiday started today last began.

The celebration of St. Patrick’s Day dates back to March 17 in 461 A.D., when the bishop in London first began. Patrick, born with the name Maewyn, became more connected to Christianity after he was captured by a group of pirates and sold to a slave trader. He managed to escape and travelled throughout Ireland. He wanted to conduct missionary work and help establish churches and other establishments. He spent forty years in a cutthroat business and helped the poor.

The United States did not recognize St. Patrick’s Day until 1840. That’s when Irish soldiers serving in the US Army went on a binge drinking parade in New York City.

The United States did not recognize St. Patrick’s Day until 1840. That’s when Irish soldiers serving in the US Army went on a binge drinking parade in New York City.

The celebration of St. Patrick’s Day today is to celebrate the Irish and their culture.

**Gallery 210 features work of Carrie Mae Weems**

**BY STEPHANIE TAYLOR**

Carrie Mae Weems’s “May Days Long Forgotten,” an exhibition on display at U.M.-St. Louis 210 April 2004, includes works that are peaceful as beau-

In 2003, Kerry was nominated as the official democratic candidate for the 2004 Presidential election. U.M.-St. Louis students should learn about the man they will be voting for or against, in November.

Kerry was born in Denver, Co., but actually calls Massachusetts home. Kerry graduated from Yale and served in Vietnam as a swift boat officer.

In 1982, Kerry was elected for Lieutenant Governor and then moved up to the Senate in 1994. Since then Kerry has been re-elected three times, in 1994, 1998 and again in 2000.

His most recent focus as senator has been on reforming public schools, strengthening the economy, protecting the environment and advancing foreign policy initiatives.

Kerry later attended and graduated from Harvard College Law School. He became a prominent prosecutor and ended up in creating an innovative rape crisis clinic among other distinguished accomplishments.

In 2004, Kerry won the election for Lieutenant Governor and then moved up to the Senate in 1994. Since then Kerry has been re-elected three times, in 1994, 1998 and again in 2000.

Kerry later attended and graduated from Harvard College Law School. He became a prominent prosecutor and ended up in creating an innovative rape crisis clinic among other distinguished accomplishments.
Does the NBA benefit from high schoolers?

By Dave Shulman
Staff Writer

This debate would argue that the best thing that has happened to the NBA is the existence of basketball in high school. In recent years, the NBA has hosted more standout players from the college and high school levels. In the past, the NBA was not as popular and in recent years, it has become one of the most popular sports in the world.

If we are talking about high school players, we can see that there are still some problems, but overall, it has been great for the NBA. Basketball is a sport that is enjoyed by people of all ages and levels of skill. With the NBA's popularity growing, it is likely that we will see even more high school players making their way to the league in the future.

The NBA has always had a rivalry with the European leagues. Many European teams have had success in the NBA, and it is likely that this will continue in the future. With the NBA's popularity growing, it is likely that we will see even more high school players making their way to the league in the future.

In conclusion, it is clear that the NBA has benefited from high schoolers. With the NBA's popularity growing, it is likely that we will see even more high school players making their way to the league in the future.

Tennis takes first match

By Gretchen Moore

Invitational, ended the March 5-7 Rivennen a 2-2 record for the tourna­
men t. With a bit of grit on, UM-St.
Logan Hughes split games with each opponent, barely

evenly winning the second game against both Grand Valley State
and Hillsdale.

To start the week­
end, UM-St. Louis faced Grand Valley State on the diamond.
With the Rivermen's four errors in the field, Logan Hugbes
five unearned runs to
help them defeat the Rivennen 12-9. Not

right: Outfielder Logan Hughes went 4-for-9 with three runs and five RBIs during the second game of a doubleheader against Hillsdale March 7.

Johnny Depp doesn’t deliver in thriller, “Secret Window”

Johnny Depp stars as the troubled writer Mort Rainey in Columbia Pictures’ psychological thriller SECRET WINDOW.

Strata Ovenbaked offers healthy sandwiches for every taste

Strata, located in the Central West End Bid, provides an alternative to the usual egg salad, ham, cheese and tomato sandwiches. Strata gives its patrons a healthy choice with meatless-ordiner sandwiches.

Johnnie Westin

Dining In

The current film, “Secret Window,” isn’t a thriller in the literal sense of the word. It’s a psychological thriller, a film that explores the mind of a writer who is coming to grips with his own personal demons.

The film is based on the novel of the same name by What We Saw From the Cheap Seats, a book that was highly acclaimed in literary circles. The film tells the story of a writer named Mort Rainey (played by Johnny Depp), who is struggling with his career and personal life.

The film opens with a series of flashbacks, showing Rainey’s life in the early 1950s. We see him working at a diner, trying to make ends meet. He meets a woman named Laure (played by Angelina Jolie), and they fall in love. But their love is not enough to keep them together, and they soon part ways.

Years later, Rainey is still haunted by his past. He is now a successful writer, living in New York City, but he still feels like he is not living up to his potential. He is also dealing with a troubled marriage with his wife, Abigail (played by Laura Linney).

One day, a mysterious letter arrives at Rainey’s apartment. It is written by a woman named Mary (played by Maria Belon), who claims to be Rainey’s long-lost sister. Mary tells Rainey that she wants to come to New York and visit him, and Rainey is not sure if he should accept her invitation.

Mary arrives, and she is not who she seems to be. She is actually a con artist, and she has come to New York to rob Rainey. But Rainey is not so naive, and he sees through her scam.

The film is a psychological thriller, and it explores the mind of a writer who is coming to grips with his own personal demons. The film is a study of the human psyche, and it is a film that will make you think.

The film is directed by Bart Freundlich, and it is based on the novel of the same name by What We Saw From the Cheap Seats. The film is a psychological thriller, and it is a film that will make you think.

**Movie Review**

**Hidalgo**

**Hidalgo's race for wild villages**

by Catherine Mahood-

**Movie Critic**

After seeing "Hidalgo," I felt certain of one thing: Joe Johnson should not have cast the director on "Seabiscuit." If he had been, that horse whose aura would have been made into a wonderful character, a horse rather than a sports amenity in which the horse was used as a character.

The attention between the horses, and whose owner, Viggo Mortensen, makes this film succeed as a thoroughly enjoyable piece of family entertainment. "Hidalgo," based on a true story, is an action-adventure film about a Spanish Arabian horse and his rider, Hopkins, that is part of a Forbidden Western and a Spanish Western, as well as a part of the movies playing a military half-breed Indian Penny Hopkins, also a man of few words, who with his running horse moves halvhome to compete in the Arabian "Orion of Five," a 3,000-mile race across the Middle Eastern desert. The story is so classic that you can count on your fingers the number of people who have not seen Gary Cooper in this same role.

However, this is high-quality Classic Hollywood. Penny Hopkins (Viggo Mortensen) has a knack for winning races on his running horse Hidalgo, even in races against thoroughbreds, much more in those races to compare with the managers that Hopkins is charged with delivering the race film. As a race horse, "Hidalgo" is a film for selective buck and is a film that Hopkins has learned, and it is a film that Hopkins has learned, and it is a film that Hopkins has learned, and it is a film that Hopkins has learned, and it is a film that Hopkins has learned.

To see the situations and his feelings, Hopkins joins Bobbi Hall's (Ann Miller) St. Louis, a city that gives us the horse's eye view. "Hidalgo" is a film for selective buck and is a film that Hopkins has learned, and it is a film that Hopkins has learned, and it is a film that Hopkins has learned, and it is a film that Hopkins has learned, and it is a film that Hopkins has learned.

**The Interaction between the horse, Hopkins, his owner,**

**Hopkins, this makes the film as**

**a thoroughly enjoyable**

**piece of family entertainment.**

**The Face**

Director Joe Johnson did a terrific job of making this horse story come alive - particularly in capturing the horse itself as much a character. As such, from fashion on based on real events, this film takes on many of the same attributes as "Orion of Five" and tells them on the one hand. Those who are looking for historical accuracy and accuracy need to look elsewhere. However, the film moves forward on the horse's back; while taking on the beauty of being wonderfully texted with breathing, visual sweep, face-paced action and by being, as Hopkins does for new Mortensen, Mortensen's skills in animation and his ability to create a relationship with his equine partner are immensely in the enjoyable nature of this film.

Through the children's films, a horse served violent scenes that make their way to the screen. "Hidalgo" is a film that the movie's whole family can enjoy. The chief lie in this film is not in its entertainment value but in its ability to make up its mind as it wants to be a kid's movie or more grown up fare. The other problem with the film, which is true on its level, and some scenes could have been shot with a bit of editing. The film is part of a powerful western and part classic western.

I don't have a piece about the film's story line is how to make a good world from a bad one. The language of the film is how to make a good world from a bad one. The language of the film is how to make a good world from a bad one. The language of the film is how to make a good world from a bad one.

This is not surprising, considering that the director has an enormous credit in sets design and visual effects. The film's story line is how to make a good world from a bad one. The language of the film is how to make a good world from a bad one.

If Hopkins shows his feelings about his own heritage and in Jazira, who acts on this film, is not in its entertainment value but in its ability to make up its mind as it wants to be a kid's movie or more grown up fare. The other problem with the film, which is true on its level, and some scenes could have been shot with a bit of editing. The film is part of a powerful western and part classic western.

Driving accommodations may be available for an even more comfortable trip. The more you travel, the more you earn with Amtrak Guest Rewards. Call 1-800-USA-RAIL, your travel agent or visit www.amtrak.com today.
If all the supporting cast had been a bit more in-line with expectations, it could have covered the tip-offs. Unfortunately, there was just too much oddness around, and so the audience has their feelings out for proxy. Depp's performance is sometimes very funny but the humor detracts from the suspense. It seems at times as if the director was not sure if he wanted to make a thriller or a comedy. Koepp has directed both genres in the past, notably "Death Becomes Her" and "Stir of Echoes." This last film also suffers from some unevenness in focus, although in a different way. The film has enough new misses and things almost right that it is tempting to think that it had been re-edited, it might have been much more successful. Certainly, the excellent cast and the eerie visual tone of the film made me want to like the film. But a mystery has to surprise, and this film failed to walk the knife-edge.
