Students killed in crash is remembered at memorial

BY PAUL HACKBARTH
News Editor

UM-St. Louis student Danielle Pinkley was killed in a single car accident Tuesday, Feb. 25 after her vehicle slid off the road, hit a tree and overturned on Natural Bridge Road near West Drive. Pinkley, junior, was bus driver for Fredericksburg, Mo. High School in the University Meadows Apartments. She was 21.

According to the Missouri Highway Patrol crash report, Pinkley was driving southbound on Natural Bridge Road when she lost control of her vehicle about noon.

Pinkley was transported to Delmar Hospital in Bridgeton, Mo., where she was pronounced dead after arrival. The Missouri Highway Patrol is investigating the cause of the accident.

Last Tuesday evening, the Rev. Bill Romp from the Catholic Newman Center had a memorial service for Pinkley in the University Meadows clubhouse. About 20 of Pinkley’s friends, concerned students and Resident Life staff members attended the memorial.

Kempf said dying is not always difficult but especially difficult at the age of 21. He said dying at a young age does not make it any easier, or saying goodbye to Pinkley any easier. “It’s the way we’re born,” he said.

Jenn Marie Schuler, graduate student, social work and organizational psychology, witnessed the accident, which occurred directly in front of University Meadows RA Megan Photos helps her lean away during the memorial service of Danielle Pinkley which was held in the Meadows clubhouse Tuesday afternoon.

Homcoming week begins after move to fall semester

BY PATRICIA LEE
Features Associate Editor

Homcoming at UM-St. Louis has traditionally been held in the winter season, but in September 2004 the Student Government Association voted to change homecoming to fall semester.

The work for planning the event was divided among the homecoming co-chairs and publicity, spirit, service, and+ drama and cheerleaders committees, who had to work on shorter timelines. The bulk of the planning took place over the summer.

“Most people are very happy, but there’s been so much excitement about others and the move from the fall to the spring of the event,” said Angelic Holidays, junior, publicity, and homecoming co-chair.

“It was stressful and confusing, but there’s been so much excitement about others and the move from the fall to the spring of the event,” said Angelic Holidays, junior, publicity, and homecoming co-chair.

“We had a completely different atmosphere to 9. People come back to school in the fall to participate in it,” said Angelic Holidays, junior, publicity, and homecoming co-chair.

One of the reasons the homecoming was made this way was to encourage more student participation and school spirit. Homecoming and many student organizations have struggled internally in recent years such as the homecoming committee and Big Man on Campus this year.

“I think the biggest thing is that homecoming is one of the few events that bring all the organizations together and more people come to see it in the spring than in the year before and see more of a campus early instead of waiting until later,” said Angelic Holidays, junior, publicity, and homecoming co-chair.

“They have to be there at a certain time to pick their children up from school before or after school. Students who have been involved in music or the arts have to be there on time,” said Angelic Holidays, junior, publicity, and homecoming co-chair.

Danielle Cooney, freshman, math and computer science, plays with her son, Jourdan, on Friday afternoon.

Storch warns of ‘radical change’ at Capitol

BY BEN SWOFFORD
Features Associate Editor

Ideology is evolving common sense in the state capitol, Democratic State Rep. Beth Storch warned at ASUM’s “Lunch with the Legislators” Monday.

“Missouri is in a period of very radical change,” Storch said. “There really is, I think, a pretty deliberate effort to invert what was the status quo. We fought this year, more specifically, about Medicaid and health care issues.”

Storch mentioned changes to Medicaid by Missouri Governor Matt Blunt, tax reform measures intended to restructure the Missouri tax code.

“Missouri is in a period of very radical change,” Storch said. “There really is, I think, a pretty deliberate effort to invert what was the status quo. We fought this year, more specifically, about Medicaid and health care issues.”

Counseling Services will offer chemistry at the University of Missouri-St. Louis. The screenings are free to students, faculty and staff. Series co-sponsored by the Missouri Baptist Medical Center's Wellness Office. For more information, call 451-8510.

Since October 7, 2023, the Missouri Baptist Medical Center's Wellness Office has invited students, faculty, and staff to participate in series of screenings. The screenings are free and open to students, faculty, and staff. Attendees are welcome to bring their lunches and drinks, and will be guided by certified counselors. All screenings are covered by most insurance companies.

On October 10, 2023, the university will host the annual "Bisexuality Basics" workshop. The workshop will be held from 3 to 5 p.m. in the Academic Conference Center. The workshop will cover the basics of bisexuality, including history, terminology, and experiences. The workshop is open to all members of the university community.

On November 7, 2023, the university will host a workshop on "Professionalism in the Classroom." The workshop will be held from 9 a.m. to 12 p.m. in the Academic Conference Center. The workshop will cover strategies for building positive relationships with students, managing difficult situations, and maintaining professionalism in the classroom.

On December 1, 2023, the university will host a workshop on "Inclusive Pedagogy." The workshop will be held from 2 to 5 p.m. in the Academic Conference Center. The workshop will cover strategies for creating an inclusive learning environment for all students, including those with disabilities, English-language learners, and students from diverse backgrounds.

The counseling services will continue to offer screenings throughout the year, with additional events planned for Spring 2024.

For more information, please contact the Missouri Baptist Medical Center's Wellness Office at 451-8510.
Floyd to talk tuition at UM-St. Louis
University of Missouri President Elson Floyd will visit the UM-St. Louis campus Wednesday, Oct. 5, to hold a forum on his proposal to implement fixed tuition for all incoming students in each of the four UM campuses. The discussion forum is open in the public and will be held at 6 p.m. in Student Center Room 450.

"If you're not really informed on exactly what's happening, it can look like everything is being centralized. However, whether or not to continue paying tuition is also being debated. Currently, only infants from UM-St. Louis and UM-Columbia are given Medicare.

"I thought it was a little better in the winter semester than the spring," Hossain said.

"Healthly Activity and Men and Women looking for Tuition Assistance? Would You Like to Study and Get Paid for it? Earn $400 - $2500"

**You May Qualify if:**
- You are a healthy adult, male or female (18 or older)
- Take no medications on a regular basis
- Have no current health problems
- Available for 24 - 48 hour stay at our facility

You can earn hundreds of dollars and help generic drugs obtain FDA approval. Channel 10 News, St. Louis has formed a research team for pharmaceutical companies for years and thousands of people have participated. To find out, call error @ 565 1943 or visit our website at gatewaymedical.com.

HOMECOMING FALL'S BIGGEST MOVE IS... 

Homecoming's fall move to semester is the right move for the UMSL campus...

BY ALEX KERFORD
Senior, Engineering Student

I was in Washington, D.C., two weekends ago for the National Student Leadership Forum. For the past 10 years, there has been a gathering of college students from across the country to come together at this nation's capital to reflect, learn and discuss what our goals and leadership roles will be for the next generation. What will this nation look like 20 years from now? 50 years? How about 100 years from now? It is difficult to think that far and beyond about many of these problems.

What if our lives? What if we are planning what this world is going to look for our kids? What if we should change the way you live your life? Would it change the way you live at all?

This is only a piece of what the National Student Leadership Forum is all about. We asked deep questions, learned from student leaders' experiences, while also receiving words of encouragement from our own U.S. Senator Jim Talent, Senator Barack Obama, and Mayor Vincent Gray.

One of the main themes this year was "servant leadership." We discussed what it means to be a leader from a position of authority rather than from a posture of power. While each achieves the same result to an end, there is a fundamental difference in these two styles.

Letters may examine great influence for a time, plus get the politics, but the latter has to have a tendency to lack in the relationship dynamic between the leader and the follower.

The leader tells people what they need to do to get things done and the power of the final leader is then compelled to work because it is the only way they have to get to a goal. People who lead from a place of authority will have the same results as the policy leader with power, but have the people that are working for this individual work because they want to and have no expectation in that leader. This authoritative leadership is said to be "servant leadership." It is discussed in leadership and person of Jesus of Nazareth throughout the entire history. Often when people hear the name of Jesus they are associated to immediately, associate with the leader and the following.

Sidney was worried about his future, was worried about offending his friends, was worried about losing his friends and his power. He was worried about being able to take care of himself, to build up his own confidence, to be able to live his life. The leader tells people what they need to do and the power of the final leader is then compelled to work because it is the only way they have to get to a goal. People who lead from a place of authority will have the same results as the policy leader with power, but have the people that are working for this individual work because they want to and have no expectation in that leader. This authoritative leadership is said to be "servant leadership." It is discussed in leadership and person of Jesus of Nazareth throughout the entire history. Often when people hear the name of Jesus they are associated to immediately, associate with the leader and the following.

Students who want to visit PETA2.com to find out what students at the University of California at Berkeley and other campus and school districts, one of every four college students vote vegan results. As a result, many ARAMARK offers dozens of vegan menu items, such as these stir-fry tofu, vegan cheese with tofu, lasagna, cookies, and more, on select campuses. Students who wear backpack options in the school cafeteria may now get free fruit, non-dairy options, and other students options, such as a diverse group of concerned individuals...

More biodiesel means more dollars for farmers

Recently, I wrote about alternate green sources beyond fossil fuels. People like to hang on to those phrases that make it really divide up the—let's face few topics. One is power sources for your home and power sources for your vehicle. Apart from all-electric car powered by the same electricity that lights up your house, nuclear power is not a solution to getting greener supplies. This means nuclear competes with wind power, solar power and other energy sources permitted in electricity for the home. Bert the developed world is moving away from the Bush-administration dictate that that reality that global warming is happening, although it's still a hot debate. Nuclear power and wind power are an affordable substitute for the same wind, and power sources have carbon emissions.

**BY CATIE MAUNORO** Science Column

A solar array on a school rooftop is being used to power the school's electricity needs. The array is part of a larger effort to reduce the school's carbon footprint and increase awareness among students about the importance of renewable energy.

**The Current**

An apology to my professors

Dear Professor,

I am sorry for my unprofessional behavior in the class. I understand my mistake and I am sorry for the inconvenience it caused. I have learned from my mistake and I promise not to repeat it in the future.

Sincerely,

[Your Name]
Keeping safe on campus:

- At night, walk in groups of at least two and keep your cell phone handy.
- Familiarize yourself with the location of emergency phones.
- Have car keys in your hand when approaching your vehicle.
- When parking, leave valuables unattended to reduce opportunities for theft.

by Brian R. Oliver

Although crime rates in America have dropped substantially in the last decade, the University of Missouri-St. Louis and its surrounding areas are not immune to crime. The University Police Department has seen an increase in theft, rape, and assault incidents on campus.

The Volunteer for Homecoming Parade

The Volunteer for Homecoming Parade is a group of volunteers who will assist in the Homecoming Parade on October 6. Volunteers will be needed to distribute water to the floats and help with other activities. Volunteers are needed from 10 a.m. to 2 p.m. on October 6. To sign up, visit the volunteer website at umslc.edu/volunteer.

How safe are you on campus?

Criminology department shows how to reduce chances of being a victim

By Kelly S. Smith

According to the University Police Department, there has been an increase in theft and assault incidents on campus. The University Police Department is working to increase public awareness and provide resources to prevent crime.

ULSI alumna shares ups and downs in job pursuit

by Stephanie Pitts, a University of Missouri-St. Louis alumna, received her degree in communications from UMSL. She is one of the radio broadcasts at KEZK.

The Roque Learner

The Roque Learner is a monthly magazine that focuses on research and education. The magazine is available online at researchreview.org.

Like every communication major, Pitts had to get an internship, preferably at a radio station. She started as an intern at KEZK before she was hired as a full-time employee. Pitts said that her experience as an intern was valuable.

"It was the best experience. I love working at radio stations," said Pitts.

After being hired, Pitts was given the opportunity to work with the research and development team.

"My favorite part of the job is getting to see the impact of my work," said Pitts.

U.S. economy:

By Ronald M. Bailey

In 1978 in an undergraduate psychology class, I wrote an essay on the components of a successful economy. I included a discussion of the role of government in the economy.

As a reference librarian, I regularly get to see what topics people are searching for on the internet. One of the most popular topics is "capital punishment." People are interested in understanding why people are put to death and what the consequences of the death penalty are.

Economists: Always good for a laugh

by Mike Johannson

In 2004, the University of Missouri-St. Louis hosted a conference on "Economics and Humor." The conference featured a panel of economists who discussed the role of humor in the discipline.

The conference featured a panel of economists who discussed the role of humor in the discipline.

"Humor is a powerful tool for understanding complex economic concepts," said one of the panelists.

"Humor helps us to see the world in a different way," said another panelist.

The conference was a great success and plans are already underway for a future conference on "Economics and Humor."
Student volunteer efforts send her to Africa

BY MELINDA MCCRARY  
Features Editor

A former UM-St. Louis student, current staff writer and acting president of the Association of Black Journalists, has decided to take a year off to complete a volunteer program in Africa. Although Shanta Davis has been involved in various community services and has participated in other volunteer events, this is the first time that she will volunteer in a third-world country.

Davis said she decided to take a gap year after she had seen films posted on the bulletin boards around UM-St. Louis campus.

"The films said ‘Volunteer in Africa.’ The program was advertised on campus, and so I filled out an application and they accepted me," Davis said. "I also thought that this would be a good opportunity for me to learn about the African culture, be productive and find out the different areas of missions."

This volunteer in Africa program is made possible through the Institute for International Cooperation and Development and the Humana People to People Movement. In their 13 years of existence, BCD has helped over 1,000 students train to be volunteers and complete service missions in Africa, North America, the Caribbean, Asia and Europe. Their primary focus is on Zimbabwe and Mozambique.

bcd volunteers help build schools, plant trees, spread awareness about HIV/AIDS, assist the elderly and educate children.

Some of the volunteer service openings include Child Aid, people who fight against poverty and help children stay safe; teacher training programs and first aid training.

Before Davis goes to Mozambique, Africa, she has to spend six months at the BCD location in Deweyville, Mich. to receive the proper volunteer training and to study global education.

"I’ll be here for six months and then I’ll go to Africa for six months," she said. "When I return, I will complete my last semester at UM-StL and receive my bachelor’s degree in mass communications."

Some of the things that she is learning at BCD include speaking Portuguese, learning about the present organization’s programs and the Humana People to People Movement, analyzing African culture and finding ways to connect with and help the community in Mozambique.

Another requirement of the first part of the program is fundraising. Each student must raise enough money to purchase a visa, pay for international travel, vaccinations, insurance and educational materials.

If you would like to sponsor Davis, contact the volunteer service office at 1-888-BUY-USCC or visit their website at getusc.com.

If communities can generate their own power, the lack of competitors means that big profits are achievable. Renewable, what are more Americans than flourishing their noses at the big guys and making out their own independent company. Curious, how about the fuel for your car? Unless we suddenly develop lots of new sources of power, you’ll need a car to get around. When I told a friend of mine about this, he pointed out the advantages of solar power as a fuel source. One of the most significant benefits of solar power is that it can be used for small or large amounts of electricity. This is one of the main reasons why solar power is so attractive. It’s clean, efficient, and inexhaustible. Solar energy is a renewable resource, which means that it will never run out. This is in contrast to fossil fuels, which are finite and will eventually run out. Solar power is also highly versatile, which means that it can be used for a wide range of applications, from heating and cooling homes to powering businesses and factories. This makes it an attractive option for a variety of different uses. Furthermore, solar power is relatively easy to install and maintain. In contrast, fossil fuels are difficult to mine and transport, and they require significant infrastructure to be used. This makes solar power a more attractive option for many people. In conclusion, solar power is a highly attractive option for a variety of reasons. It’s renewable, clean, efficient, and versatile, and it is an attractive option for a wide range of applications. Solar power is an important component of the green energy movement, which is aimed at reducing our reliance on fossil fuels and transitioning to cleaner, more sustainable sources of energy. This movement is gaining momentum, and it is likely that solar power will play an increasingly important role in the future. If you are interested in learning more about solar power, I would recommend looking into the resources available online, such as articles, videos, and podcasts. There is a wealth of information available, and there are many ways to learn about this exciting field.
She briefly for another company that hinted at a position but never came through. Her next move was at the YMCA, where she worked full-time and held various positions, including being vaccinated in front of the whole area.

I signed to work full-time, so that's how I saw the potential. The YMCA was a great place to work, and it allowed me to make more money than I had at previous jobs.

Even though I was sure I would be a success, I took my time to get everything right. I worked hard and was focused, and I wanted to get as much experience as possible before opening a business of my own. My success came along the way and cautioned the YMCA to keep an eye on me and to keep a close eye on my next move.

I started my own business, and it was successful. It was really no surprise to me when I realized that I was ready to take on a new challenge.

The next thing on my checklist, which was the most important part of my defense, was to make sure that my whole body was in top condition. I remembered that star (and actress) Jennifer Lawrence was not the only one working with new guys in her films because they wanted to look perfect for the role. Jennifer Lawrence decided to fall in love with the train to Brooklyn. As a result of this, I was sure that I was ready to be in a relationship with the right person.

I was also working on my body, and my performance as a whole was perfect. I didn’t get any salary increase, but I was happy with the work I was doing.

On my birthday, Pits said her job started immediately with the organization of a charity event involving five hospitals. "The boss said, 'I'm going on vacation.'" Pits said. "I told him, 'Oh, I have no vacation.'" However, I was happy with the work I was doing.

I was there to be a mom. I was there to be a mom. I was there to be a mom.

The next morning, after drinking three glasses of juice, I caught the train to Brooklyn. As a result of this, I was sure that I was ready to be in a relationship with the right person.

I was also working on my body, and my performance as a whole was perfect. I didn’t get any salary increase, but I was happy with the work I was doing.

On my birthday, Pits said her job started immediately with the organization of a charity event involving five hospitals. "The boss said, 'I'm going on vacation.'" Pits said. "I told him, 'Oh, I have no vacation.'" However, I was happy with the work I was doing.

I was there to be a mom. I was there to be a mom. I was there to be a mom.
The Redwalls deliver solid, if unimaginative, new album "Sarsgaard add up to a pretty line along the lines of 'De Nova.'" The song is not up to the quality of its cast and the Redwalls consist of his brother, vocalist and bassist Justin Redwalls started out as a Beatles cover band in 1983, "Puple Haze." Ruby Meyer, Logan Baren, Andrew Langer, Justin Bonen and Brandt Green make up the band Redwalls, who released "De Nova," the album in late June, is a solid album with crisp guitar and chilling melodies which make the listener want to subconsciously bob their heads. However, it falls being a great album in that it's already been out...over 30 years ago. Although it's not ready for that, it's still necessary to think of something more original. New York, Friday. Both Robertson was highly impressive in his role as conductor and here, as an exponent and very physical approach to conducting. This was characteristic and consummated a mysterious and complete way. Paul Muni's role was very well, skillfully playing manfully with a keen ear. Pau/ly Shore Proves a Better Comedian than Actor

By Zach Meyer

"I made a big mistake," said Pau/ly Shore about his new show at Thyme Table. "I thought it would be easy."

The show, which opened last week at the Thyme Table in Columbia, included a number of jokes that were not received well by the audience. Shore said he was surprised by the reaction and vowed to do better in the future.

"I thought people would like my jokes," he said. "But they didn't. I really thought they would."
Save the last Paco Poco Ria for me...

"I did not have any long term plans to get into politics," Storch said. "I say it was serendipity." Storch began her political career working on the Mel Carnivale campaign for U.S. Senator in 2000. After the election, she went to Washington, D.C. as Juan Carnivale's deputy chief of staff.

"In early 2000 I received a call that changed my career path," Storch said. The call was from Vivian Edel, director of the UMSL Silver Institute for Women in Public Life.

"I was really amazed at how energized and brought up by the Silver Institute and I would really encourage anyone who has a chance to take advantage of the resources there," Storch said. "It is an entity that is up to encourage women and really nobody to take an active part in politics, or public life. I was somebody that just transitioned." In Washington, D.C., Storch said she felt there was a real divide between Capitol Hill and the rest of the nation.

"I was a little a little uncomfortable in the federal level," Storch said. In 2003, she returned to Missouri and ran for General Assembly.

"It was almost 15 years later than I have given thought to since August," Storch said. "In 2003, the issue was still being charged and the programs and principles and protections that are important to the democratic process are necessary. The states, they are at stake, they were jeopardized. It didn't matter if it was health care, Medicaid, education, the environment, things were changing. There was this movement to... to make some very radical changes." With Legislative is a regular column sponsored by ALIM. It is a chance for students to meet face to face with their representatives and for important issues to them.

"In the time we are in small groups to discuss all of these concepts and deeply several of the best and brightest students and leaders that make up this millenial class. They are a group that we agreed that this model of serving the community and creating leaders in their own" (Sufjan Stevens, mixt of mirth and ‘Illinois’)

Up and down season continues

By ROBBIE STONE

The UM-St. Louis volleyball team suffered tough losses against conference opponents on Sept. 23 at St. Joseph’s and Sept. 24 at Indianapolis but bucked back resolutely and defeated Quincy on Sept. 27 and Kentucky Wesleyan on Sept. 30. The Riverwomen were important GLVC matches and improved their record to conference play to 3-3. UMSL had little problem with Kentucky Wesleyan, defeating them in three games. The Riverwomen cruised in the first two sets 25-10, 25-12. The third game was intense but UMSL’s Lena scored the last two points of the game after a 30-30 deadlock to hold on for the win.

Claudia Medina played at the top of her game. She scored 12 kills and added 11 digs. Preseason all-star Taylor Kuschel and Kayla Ernscheid each combined solid performance. Benjamin pounded seven kills while adding two aces. Ernscheid made her presence known with nine kills and no errors in the match. Andre Bird stated that the Riverwomen included Brinker with 23 assists and nine digs and sophomore Natalie Barnard with four assists and one dig. Nickels tallied eight kills. More opportunities to score during changes are designed to allow the players to step up when needed.

The Riverwomen started off slowly at Indianapolis but picked up the pace in the second set. The set was tied 22-22, 23-23, 24-24, 25-25 with Natalie Barnard scoring the final point to win the set 30-28. The Riverwomen recorded 12 service aces in the match, led by Medina with six and junior Michelle Blackwood and senior Tina Allignd each had three aces.

As St. Joseph’s, the Riverwomen fell in three straight sets 20-22, 18-25, 18-25. Nickels added eight kills and单身12 assists for the UMSL. Medina added seven kills along with Michelle Blackwood and sophomore Francka Breen with six kills each. The Riverwomen included Brinker with 23 assists and nine digs and sophomore Franckha Breen with six kills each in the losing effort.

The new National Hockey League rule of putting in a gold center dot in the house in recent history. The rules are concerning on-ice matters and issues such as fighting, penalties and fighting. These two changes are designed to allow the players to step up when needed. An additional rule included is the elimination of the practice of a player bouncing the hockey puck with his head along the defense in a defensive zone. This change will allow players more freedom skating in the offensive zone.

More information about the new Rockhorns, Bears and Indiana’s addition of the new NHL cooperative deal.

Hockey is back in St. Louis and back at school!

By BRADEN VOS

Staff Writer

Finally, after missing an entire season due to the COVID-19 pandemic, the St. Louis Blues welcomed back hockey fans back to Scottrade Center for the first time in over a year. Going through separation anxiety and not being able to see friends again. The Blues are showing many signs of being on track for the year. Winning 3-2 after scoring 2-0 in the second period and earning a point in the standings. The Blues have made 4-3 in their last five games. We have to see if they can continue this form with the new rule system.
