Constitution Fails; Re-elections Friday Twenty-Four Senators Installed

Due to changes which the students felt should be made before the new Missouri University, St. Louis Campus Constitution could be ratified, the Constitution failed to be passed. On February 14, under the voting of 365 students, 207 for and 98 against. These changes have been made by the Election Committee of the SA and voting will take place this Friday, February 28, 1964 from 8:00 a.m. to 3:00 p.m. Main lounge for the Constitution to be ratified. This election is for the entire student body and must be passed by a 2/3 majority.

Because of the general lack of interest by the student body, the elections for senators was not held this semester. Only 24 students, 12 freshmen and 12 sophomores, filed petitions on the 24 vacancies on the Senate. The number of positions on the Senate was raised from 16 students to 24 students. This was necessitated by the increased number of students from 675 last semester to 780 this semester.

The 24 Senators installed by SA President, Bill Edghineus this semester are Debbie Spencer, Bob Madden, Charlie Plattipodis, Ann Noll, Larry Mickey, George Killenberg, Judy Forbes, Dave Zerrer, Bill Fussner, Phil Neeter, Art Jones, and Bob Suffin sophomore senators and Elaine Stamm, Linda Mueller, Allan Payne, Nancy Bland, Marsha Mc.

Circle K Club Meets March 4

The local chapter of Kiwanis International plans to introduce to this campus an affiliated service organization called the Circle K Club. College men are invited to attend and explanatory meeting at 12:00 noon on Wednesday, March 4, in room 125. The Circle K Club is both a service and social organization which offers opportunities to serve the University and the community. There would be ample occasion to come into contact with leaders in the business community and to establish associations that would contribute to self-development and to a better understanding of civic life.

At the Wednesday meeting, Mr. Richard E. Hafer, Jr., an officer of General Insurance Corporation and a member of the local Kiwanis, will discuss the purpose and opportunities of the club. Mr. Hafer has experience in the joint activities of the Kiwanis and Circle K Club and will be able to discuss this association as well as the Circle K Club as a campus organization.

Mr. Hafer will be introduced by Mr. Turner, instructor in Accounting and Statistics. All interested college men are encouraged to attend.

Mahan, Ginger Richman, Bill Price, Anita Lovan, Dave Depker, Paul Henton, Glennon Huns, Larry Timpe, freshman senators.

Timetable

TONTON... Concert Acis and Galatea, 8:00 p.m., room 108.
Basketball, league game with Logan, Home...NCJJ at Washington University, 7:30 p.m.
FEBRUARY 27...Cubs vs St. Louis Boys' Club, 8:00 p.m. Home.
FEBRUARY 28...... Constitution ratification, main lounge, 8:00 a.m. to 3:00 p.m. Basketball squad vs Christian College.
MARCH 2 & 3....Last day to pay for yearbook, room 127.
MARCH 4......First meeting of Circle K Club, 12:00 noon, room 125.

Concert Tonight, 8:00 P.M.

The St. Louis Chamber Orchestra and Chorus, Ronald Arnett conducting, will perform Handel's "Acis and Galatea" at the University of Missouri, St. Louis Campus, at 8:00 p.m. tonight in room 108. The Handel serenade to be presented is a musical narrative of the classical myth of Acis and Galatea. In the story, Polyphemus, a ridiculously passionate monster, is hopelessly in love with Galatea, a sea-symph who mocks his love. When Galatea falls in love with the handsome Prince Acis, Polyphemus kills him in a jealous rage. As a concession to Galatea's love, however, the gods change Acis into a river to assure him immortality.

"Acis and Galatea" is scored for three soloists, chorus, and orchestra. Carolee Coombs and Janet Houston have soprano parts, Herbert Bierderman, the tenor, and Henry Rhetta, the bass. All of the singing will be performed by the St. Louis Chamber Chorus, a group of twenty-five professional singers. The Chamber Orchestra is composed of members of the St. Louis Symphony.

This third concert in the University's 1963-64 season will be performed at no charge to the public on the campus.

Summer School Starts June 16

Summer school registration will be held only one day, June 15, 1964, with classes starting June 16. During the eight week semester, which ends on August 7, 31 courses will be offered. Fees for residents taking 2 credits will be $52. For residents taking fewer than 5 hours the fee will be $10 for each credit hour taken. Additional information will be available to the students in about two weeks.

Come to the Hawaiian Luau

Tired of the same old trials and tribulations of college life. Forget the epistemology, genus, species and their logical implications. Come to the tropical paradise of the Isle of Mizzouls, Dance under the swaying palms of Mizzoula and let the wild exotic sounds of Bob Kuban and the Rhythm Masters. The dress is casual; wear your grass skirts and come stay or drag. The boat from the mainland arrives at 6:00 p.m. and departs at 12 p.m. The date is March 21 and the location is Pier 108. Ticket price is 60 cents per person. Be on hand to "shave your tail feather" with one of the gay, exotic Polyvorean natives. A special surprise awaits all who board Ship for the Lual.

Region Head Speaks Here

Thursday, February 13, the Social Disorganization classes of Mrs. Irene Mathes heard Mr. Thomas Gentry, regional head of the FBI, speak on the rise of juvenile crime in the United States. Many of these crimes, he said, are difficult for the authorities to solve because they are 'hysteric' or 'unmotivated' which eliminates the usual starting point of an investigation.

Mr. Gentry cited two agencies which fall in checking early criminal tendencies: the family and the school. The family fails to teach basic morality in the home and the school fails to discussing the child's misbehavior with the parents when it occurs.

After using several stories to illustrate some of the brutal crimes that have been committed by juveniles against other persons, Mr. Gentry said he believed the age of the criminal should not keep him from being tried as one responsible for his crime. He also said a trial should be held as soon as possible after a criminal act in order to keep it before the public in this way impact of the crime would not be lost nor will the public be influenced by irrelevant circumstances.

New Personnel

Notice any changes in the office lately. Desk moved around. Don't know where to pay your parking fines?

The charming cause of this misfortune is Miss Diana Naughton, a new addition to the office staff. Miss Naughton works for the Admissions Department under Dr. H. E. Mueller and Mrs. Kathryn McGibbons, Miss Naughton will also serve as receptionist for the entire office.

Yearbook Announcement

All students who have not paid the remaining fees due on their yearbook are asked to do so Monday, March 2 and Tuesday March 3. See Bill Fussner or come to the SA Office or either of the above dates.

May 16 is the tentative date for the Yearbook to come out unless a special Yearbook "swim and sign" party materializes.
The following three articles have been submitted to the Tiger Cub by English instructors.

Money on the tables. Paper on the floor, I lost my whole life savings. Ain't sweepin' here no more. This little verse we became our school song here at S.L.U.M. Only the blind could avoid seeing the way things are in the cafeteria, “The Little Man no in the Slums”.

**Men and Computers**

Often cited as the raison d'être of empirical science is Frances Bacon's story of the medieval scholars who argued for thirteen days about the number of teeth, a horse's mouth, consulting all their books and documents and finding no answer. On the fourteenth day, the story goes, they cast out the young upstart who suggested they look into the horse's mouth to find out, and after further deliberation they agreed unanimously that the problem was incapable of solution, there being no worldly information. A quaint story, but somehow there seems to be an echo in the numerous modern arguments on the relative merits of men and machines. Aided by the potential monster he has created in the digital computer, the technological modern freza and ponderers and often seems as blind as the medieval scholar to the limitations of his method.

The digital computer as an extension of man's intricate nervous system is an awe-inspiring tool indeed. Along with other machine of the technological age, it possesses an accuracy of which man is not capable. It never misfiles information, it never miscalculates. It is never distracted by the pungent breeze of a spring day or by the smell of hay on a well-arranged face. Properly constructed, it can perceive differences and make distinctions impossible to the crude senses of man. Nor does it ever lie to cover its mistakes or its sense of inferiority to other computers. Diogenes might find his search for honest fulfillment in the digital computer as an extension of man's nervous system.

On any day when the school is open one can see anywhere from two to twenty people playing card games of some sort. It is an even guess that at least one half of these games were entered into because of the chance of material gain. Dean Bug has finally told the student body, in clear, precise, terms, that no gambling will be tolerated on this campus. All the most ignorant should have known.

**Solution...**

by Alice Hudson

Often cited as the raison d'être of empirical science is Frances Bacon's story of the medieval scholars who argued for thirteen days about the number of teeth, a horse's mouth, consulting all their books and documents and finding no answer. On the fourteenth day, the story goes, they cast out the young upstart who suggested they look into the horse's mouth to find out, and after further deliberation they agreed unanimously that the problem was incapable of solution, there being no worldly information. A quaint story, but somehow there seems to be an echo in the numerous modern arguments on the relative merits of men and machines. Aided by the potential monster he has created in the digital computer, the technological modern freza and ponderers and often seems as blind as the medieval scholar to the limitations of his method.

The digital computer as an extension of man's intricate nervous system is an awe-inspiring tool indeed. Along with other machine of the technological age, it possesses an accuracy of which man is not capable. It never misfiles information, it never miscalculates. It is never distracted by the pungent breeze of a spring day or by the smell of hay on a well-arranged face. Properly constructed, it can perceive differences and make distinctions impossible to the crude senses of man. It is an even guess that at least one half of these games were entered into because of the chance of material gain. Dean Bug has finally told the student body, in clear, precise, terms, that no gambling will be tolerated on this campus. All the most ignorant should have known.

**The Brain from the Planet Auras**

Hollywood has finally made a movie that appeals to our teenage intellect rather than our teenage emotions. In "The Brain from the Planet Auras," a spine chilling investigation of truth, two susceptible victims of that machine discover a previously unknown cave on Mountain, These two great humanitarians know every foot of the mountain and since there is no record of a recent explosion or any other explanation of the cave's presence, the two are intrigued to the suspense filled point of taking a look-see. Cautiously they enter. Before they can travel twenty feet a giant monster brain attacks them.

The power hungry Brain whose name is Gore, kills Dan then takes possession of Steve's body for the purpose of conquering the universe.

Gore and Steve's body leave the campus and go to the home of Steve's girl Sally. When Gore's strange behavior, she and her father, also a nuclear scientist, proceed to Mystery Mountain. After Steve has told her that he wants to find the answer to Steve's behavior problem upon entering the cave they meet another creature named Ball who explains that Steve is possessed by Gore. He reveals that Gore has escaped from the planet Auras and he (Ball) must take him back to prison.

Ball goes home with Sally and her dad where he takes possession of their faithful dog, George. He knows that Ball is easy for him to get close to the possessed man. Every twenty-four hours, Gore must leave Steve's body. His true friend (George) hopes to nail Gore at this time.

Gore plans his first display of power on the next Friday going to the Tenkiller test. Still unknown to anyone but Sally and her father Gore tells the military dignitaries present for the test, that he has the ability to influence a million-dollar bomb. This promptly demonstrates by starting through glassy eyes at the whole test area and demolishing it instantaneously. Then he infuses the machine with his abilities to summon a representative from each major world power within sixteen hours or he will destroy the Auras civilization.

When his wishes are granted, Steve (Gore) melts an airplane for their edification with a quick stare. He then outlines his plan to take over the world.

Then Gore returns to the laboratory to rest for a few hours, he leaves Steve's body for his supply of oxygen and chats with Sally and her father. Sally and her father watch him and suddenly screams. She then attacked by the evil brain. Just then George, man's best friend, who is still possessed by Ball saves the day and captures Gore before he can kill Sally, Steve, who is at last freed from the evil brain, embraces Sally. Gore is taken captive by Ball and is offered to Auras to be used as a weapon. The significance of this story is profound. There are two forces seeking to control man. At present the government of the United States is greed indifference to morality, and concern for the self. At the other is righteousness, morality, and selflessness. Gore's concern for the self that seeks to destroy love, and Ball, the virtuous brain strives for justice and harmony.

If this movie is any indication of things to come, we can see an end to movies emphasizing sex and physical attractiveness. At last the emphasis is on brains and their great powers. Hollywood realizes that we have truly grown up.
In and About The Campus

Since most of the new students, freshmen and transfers alike, have settled into their classroom and home room routines, it might be appropriate to indoctrinate them into the "Cafeteria Club." For those who are not aware, the cafeteria is cleverly concealed on the lowest level of the building behind some spot sales machines, four or five trash cans, a smoke screen, some broken guitars, miscellaneous other rubble. Once on the inside one must decide upon eating (is this "really" food), playing cards or singing folk songs. Since group folk singing is frowned upon by the faculty everyone is instructed to sing the same song to himself at the same time. For the cafeteria crowd a new spot sales machine is being contemplated. Upon inserting ten cents a paper cup plops into place; it is filled with cool water, immediately followed by one or two lines (routine is yours) Alka-Seltzer tablets. This machine could easily prove to be the most popular on campus.

This week's award for "a job well done" goes out to the nameless construction company that supposedly laid a short stretch of modern roadway from the edge of the building to the edge of the student parking lot: know where I mean? The students in the classroom on that side of the building had the pleasure of watching the road completely deteriorate right before their eyes. That stretch of road could serve as a tire and shock absorber testing run. If your tires are bald, better leave your bus out aside the gates. The only good purpose it serves is to wake people up for eight o'clock classes.

Whyzit? some students keep parking on the far end of the lot and block the lanes so one has to back up a block? Maybe it is too cold for the guys who give out tickets to walk that far. Anyone know?

no one celebrated the anniversary of the burning of the pagoda at the hands of some heartless pyromaniac? Has this tradition died already?

Two Hundred Attend Seminar at Harris Teachers College

The first Seminar in the College Leadership Training Program in Human Relations was held at Harris Teachers College on the evening of February 12. The Seminar was titled, "A Basic Understanding of Our Various Religions," and attracted an audience of about two hundred students from seven colleges in the Saint Louis area, including a substantial representation from St. Louis University.

Following the panel discussion, the audience divided itself into rotating discussion groups led by three clergymen representing the three best-known major religions in the Western World. Present for the panel and discussion leaderships (no questions barred) were Rabbi Martin Katzenstein, Temple Israel; Father Jerome Winkler, Newman Chapel; and Reverend G. Hugh Wilson, Compton Heights Christian Church. The subject of the panel was presented to the audience as a commitment to Human Relations.

Rabbi Katzenstein said that the Jewish view is based upon the book of Genesis which proclaims that God created man to his likeness. This should not be interpreted to mean in a "physical" sense, but rather a "spiritual" sense. "Human beings can aspire to know what is the nature of God--thus come to know the "peace of human relations."

The term "peace" is not simply the absence of war, it is its vegetation. It means creativity--the opportunity for equal involvement in the turmoil of the continuing evolution of that which began as the creation of man. We also have a responsibility to develop any community feeling that all are created in the image of God, and therefore, all men must receive from one another a preconception of nobility and respect.

As the Jewish belief changed (with Isaiah) from particularistic polytheism (the belief that God had a personal God and other groups of peoples had their persons) to monotheism (that all men have one God)--it was believed that the unity of God is the unity of mankind. Therefore, when this condition will in reality prevail, peace will prevail.

The Catholic representative to the panel, Father Jerome Winkler, spoke of the "Christian scandal of segregation." He pointed out that neither practical nor moral considerations ever exist in segregation. The "existential development" of slavery in the U.S. validates this statement.

First the Indians were enslaved; they proved too weak and sickly. Whites were used as slaves; they proved too easily seduced. Negroes made the ideal plantation slaves; they were healthy, strong and "obvious." However, "peace" was not present under slave conditions. Proceeding the Civil War there were 250,000 slaves in the Union; estimated 100,000 slaves fled to their freedom. Since the end of the Civil War and the passage of the 13th, 14th, and 15th Amendments, the United States has been in the process of implementing the Amendments. Apologies are given by the Catholic church, Father Wilker said, for its failure to take a more active part in this implementation. The basis for the Catholic viewpoint toward the betterment of human relations of justice and love is taken from the doctrine of the life of Jesus; that whatever is said about segregation must be said in light of man's common origin—the unity of man—and therefore, respect for every race and every man.

The 1964 Homecoming Festivities began Friday, February 7, with the opening of the homecoming Queen pageant. The largest group of fans ever in attendance at a game, 3,000, cheered the team on to a 86-76 victory over their long-standing rivals.

The weekend came to an exciting climax the following evening when Miss Elaine Stamm was crowned Homecoming Queen. Miss Stamm who is a graduate of Riverview Gardens High School is majoring in elementary education. She was chosen by the student body in an election held Friday, February 7, in which about one third of the students participated.

The coronation ceremonies were held Saturday evening, February 8, at the Campus's second Homecoming Dance. The "Jaguar Marching Band" provided the music for the evening. Allan Stein, Student Association Executive Chairman, introduced each of the four candidates, Charlie Flatopias, Dave Wilkens, and John Satarkis, the trip-captains of the basketball team, then crowned Miss Stamm Queen.

Each member of the Queen's court--Judy Forbes, Pat Knarr, and Judy Zahner--received silver, engraved charm bracelet as a memento of the occasion. Miss Stamm was then presented with a bouquet of long-stemmed red roses and the Queen's bracelet.
Team Effort Defeats Sanford-Brown in Key League Game, Meet Logan Tonight at N.J.H.

The Tiger Cubs boosted their league record to four wins and only one loss by belting Logan College, 93-41, at Normandy Junior High.

Coach Bob Meyers' cagers gathered the first six points of the game, and steadily increased their lead as the game progressed. The Cubs led 52-20 at the half and were on top by as many as 56 late in the game.

Every member of the St. Louis Campus squad scored at least two points, with John Sarantakis pacing all scorers with 13 markers.

The victory brought the Tiger Cubs' league record to three victories and one defeat, and gave Coach Bob Meyers' club a chance to capture their second consecutive conference title, Sanford currently leads the league with a 6-1 record.

Normalcy was the start of the second quarter, and Sanford quickly closed the gap, new players joining the lineup. The Tigers played with a 6-1 record.

Scholastic deficiencies, this season have claimed the services of several Cub basketball players.

Normally the loss of three players would greatly disturb a coach; however, Bob Meyers found several prospects scrambling for places on the team at the start of the second semes-

ter. The trials resulted in five new players joining the lineup.

Bob Brooks, Gary Clark, Rich Malter, Charlie Platipodis, John Sarantakis, Tom Theoie, and Dave Willson have added scoring power and depth.

Bob Meyers feels that these five additions will help the team. It appears that these have added scoring power and depth.

Remaining from last season are: Bob Brooks, Gary Clark, Rich Malter, Charlie Platipodis, John Sarantakis, Tom Theoie, and Dave Willson.

Bob Brooks' two free throws in the game's opening minutes on found several prospects scram-

ting for places on the team at the start of the second quarter. The Tigers played with a 6-1 record.

The St. Louis Campus squad scored 18 points in the opening minute, and raced to an 11-2 advantage. The Tigers were on top by as many as 56 late in the game.

Bob Meyers' cagers averaged two earlier defeats by handing Sanford-Brown Business College its first Greater St. Louis College Conference loss, 86-76, February 7 at Normandy Junior High.

The contest was the St. Louis Campus' second annual Homecoming game.

New players on basketball team are, kneeling, Jim Naughton and Larry Mickey; standing, Bob Crews, Ron Pipkins and Ernie Floyd.

New faces on basketball team are, kneeling, Jim Naughton and Larry Mickey; standing, Bob Crews, Ron Pipkins and Ernie Floyd.

that gambling was not allowed, but now Dr. Bug has made it clear even to them.

We have a novelty at S.L.U., M. This is the only school in the area where a student can say, "I don't live in a pig sty, but I go to school in one." By ten o'clock you can't find the floor of the cafeteria because of the new carpet of wall-to-wall trash.

The place looks like an auxiliary dump for the city of St. Louis.

Solution: Get the mone off the tables.

Get the paper off the floor. Spend my money on suitable food.

I'll start eating here once more. From page one...

The next panel member, Reverend Wilson, pointed out that Negroes were originally brought into a religious culture that was primarily Protestant. During the Civil War, there were Protestants in the North who shared the views of the North, and Protestants in the South, who shared the South's views.

U.S.M.C, Basketball Champions.

Coach Bob Myers feels that these five additions will help the team. It appears that these have added scoring power and depth.

Remaining from last season are: Bob Brooks, Gary Clark, Rich Malter, Charlie Platipodis, John Sarantakis, Tom Theoie, and Dave Willson.

Come out and see the new Cubs.
