

Lunch & Learn

Friday, Jan. 26, 11:30 a.m., R223e

FREE
LUNCH!

An easier way to provide your novel research reagents to other investigators

UMSL | Technology Transfer
University of Missouri–St. Louis

 **kerafast**
Reagents for the Greater Good

WHAT: An information session explaining how to facilitate access to your laboratory-made bioresearch materials including antibodies, cell lines, proteins, tissues and more. These reagents, even if they've been just sitting in your lab freezer unknown to investigators at other research institutions, could benefit research if made easily available. You'll also hear a brief overview of the services provided by your UMSL Technology Transfer Office.

WHY:

Enjoy a free lunch while learning how Kerafast can help your lab:

- Avoid the time-consuming MTA process
- Generate extra funding
- Accelerate science by facilitating access to your reagents
- Uncover interest in your reagents with free marketing
- Streamline packaging and shipping of reagents
