

Office of Research Administration Newsletter

THE UNIVERSITY OF MISSOURI – ST. LOUIS
Volume II, Number 2 September, 2002

Our goal is to inform the campus community of grants received, to highlight the accomplishments of our faculty and students, and to share with you a calendar of important events and deadlines. Please direct any comments or questions regarding the newsletter to jchambers@umsl.edu.

Recent Externally Funded Awards (August, 2002)

James Chickos, Chemistry, awarded \$9,946 for “The Thermochemistry of High Energy Density Missile Fuels” by the National Aeronautics and Space Administration.

Ralph Garzia and Larry Davis, Optometry, awarded \$222,522 for “Every Child Ready to See and Learn” by the Centers for Disease Control and Prevention.

Alan Hauff, Continuing Education and Outreach, awarded \$12,232 for “Recycling Economic Impact Study” by the St Louis - Jefferson Solid Waste Management District.

Sharon Johnson, Social Work, awarded \$36,996 for “Psychiatric Epidemiology Training Grant” by Washington University.

Susan Kendig and Deborah Kiel, Nursing, awarded \$45,000 for “Healthy Start Education” by the March of Dimes.

Janet Lauritsen, Criminology and Criminal Justice, awarded \$68,326 for “Bureau of Justice Statistics Visiting Fellow” by the US Department of Justice.

Bette Loiselle and Patricia McDaniel, Biology, awarded \$12,584 for “Field Methods in Tropical Ecology and Conservation Training Program” by the US Department of the Interior: Fish & Wildlife Service.

Carolyn Neal, Dean’s Office, College of Education, awarded \$289,503 for “Missouri Accelerated Schools Project” by the Missouri Department of Elementary and Secondary Education.

Robert, Ricklefs, Biology, awarded \$759,332 for “The Life History-Physiology Nexus-- Constraints on the Evolutionary Diversification of Avian Life Histories” by the National Science Foundation.

Patricia Simmons, Pamela Ashmore, and Mark Pope, Division of Teaching and Learning, Anthropology, and Division of Counseling, awarded \$550,477 for “In Gear for Careers” by the US Department of Education.

Stephen Viola and **Clark Hickman**, Continuing Education and Outreach, awarded \$100,000 for “New Teacher Institute for Transition to Teaching Program” by the Missouri Department of Elementary and Secondary Education.

Total : \$2,106,918

Faculty Spotlight: Joseph Carroll

Joseph Carroll joined the UM-St. Louis faculty as an assistant professor of English in 1985. He received his Ph. D. in Comparative Literature from the University of California at Berkeley in 1981 and spent four years in the English department at the University of Denver before coming to UM-St. Louis. He currently holds the rank of professor in the English Department. He is this year’s recipient of Chancellor’s Award for Research and Creativity. Carroll’s publications include, *The Cultural Theory of Matthew Arnold* (1982), *Wallace Stevens’ Supreme Fiction: A New Romanticism* (1987), and *Evolution and Literary Theory* (1995). His heavily annotated edition of Darwin’s *Origin of Species* is now in press. Professor Carroll virtually invented the field of evolutionary literary theory and criticism, and he is universally regarded as the leading authority in this area.

In the English department at UM-St. Louis, Professor Carroll has taught courses in Victorian and modern literature and in literary theory and criticism. He has also designed a number of innovative interdisciplinary courses and has taught frequently in the Honors College.

Evolution and Literary Theory was the first significant book that integrated literary study with modern evolutionary psychology, and it remains the most important work in this now rapidly expanding field. In his next book, he will formulate a comprehensive synthesis of the theories of human nature and human cognition in the diverse areas of evolutionary psychology and evolutionary anthropology, integrate that synthesis with a theory of narrative, and use this whole theoretical framework to give an interpretive account of Victorian fiction.

When asked about his research interests, Professor Carroll explained:

“The Darwinian revolution gave shape and direction to evolutionary biology. In *The Descent of Man*, Darwin himself sought to extend that revolution to the study of human beings—their descent, their innate nature, the derivation and character of their psychological and social propensities. In the early twentieth century, a massive ideological and disciplinary reaction set in. Leading figures in psychology, anthropology, and sociology declared that human nature and human culture had cut itself loose from biology and that culture was an autonomous process not influenced by any innate dispositions. In the humanities, the combination of this culturalist ideology with lingering Romantic mysticism produced a mind-set wholly divorced from naturalistic Darwinian thinking. In 1975, with the publication of E. O. Wilson’s *Sociobiology: The New Synthesis*, a new Darwinian revolution began in the social sciences. The

proponents of the new Darwinian vision believe that human nature is grounded in biology, that human beings have a complexly structured set of psychological dispositions—of motives, feelings, and perceptual and cognitive biases and aptitudes—and that this whole complexly structured set has derived from an adaptive evolutionary process.

What I and my colleagues in Darwinian literary studies are doing is to extend this new Darwinian vision into the study of literature. Our basic claim is that the mind evolves through an adaptive process of natural selection, and that the adapted mind produces literature. People write and read literature because it satisfies a human cognitive need, and that need has a basis in the evolved structure of human behavioral systems. The whole complex set of human behavioral systems is what we call “human nature,” and human nature has been universally understood as the basis and subject of literary representation. The Darwinian revolution in the human sciences is giving scientific precision to the folk concept of human nature, and Darwinian literary scholars are assimilating that scientific information for the purpose of gaining a more adequate understanding of how literature works.

Darwinian literary scholars believe that human beings are part of nature, that nature forms a total causal web, and that human beings and their cultural and artistic products are susceptible to the same kind of causal explanations that apply to all the phenomena of the physical universe. Darwinian literary scholars must bring all the nuances and complexities of literary meaning—tone and imagery, style and artistic order—within the range of scientific understanding. To accomplish this task, Darwinian literary scholars still have to make use of whatever talent or sensitivity or intuition they have at their command, but they also have to integrate their literary responsiveness with the kind of discipline, in knowledge and causal thinking, that distinguishes the sciences.

The full extent of the Darwinian revolution in the humanities, now just beginning, will thus, necessarily, entail a basic restructuring of the curricular and disciplinary system of higher education. All professional training in the humanities eventually will have to be seriously interdisciplinary, in both content and methodology.

Darwinian literary study is a movement driven by the conviction that human nature and the products of human nature are a part of the natural order. If this conviction is correct—and I for one don't see how it could be otherwise—this movement is simply part of the scientific revolution that began in the Renaissance. It is an inevitable and necessary development of a true knowledge about the nature of the world in which we live.”

Funder News

Presidential Management Intern Program

The Presidential Management Intern Program is seeking applications from outstanding graduate students interested in careers with the Federal Government. Master's or doctoral-level students completing their graduate degree requirements between September 1, 2002 and August 31, 2003 are eligible to be nominated by their

educational institution for participation in the 2002 PMI Program. Each degree program may nominate up to 10 percent of its total number of graduates for the current academic year, or five graduates, whichever is greater.

Additional information is available at www.pmi.opm.gov. The Office of Research Administration has several application packets, and applications are also available directly from the Office of Personnel Management.

National Institutes of Health

The NIH recently announced a Small Business Biodefense Program. The program is intended to support SBIR/STTR grants to develop therapeutics, vaccines, diagnostics, adjuvants/immunostimulants, and selected resources for biodefense. The National Institute of Allergy and Infectious Diseases has identified specific products for biodefense that are of highest priority for rapid development. These products are listed at http://www.niaid.nih.gov/dmid/bioterrorism/high_priority.htm. The list may be updated regularly based on changing priorities.

Applications are due December 1, 2002. Additional information is available at <http://grants1.nih.gov/grants/guide/pa-files/PAS-02-149.html>.

NASA

The National Aeronautics and Space Administration intends to solicit proposals in support of the Earth Science Enterprise's Advanced Information Systems Technology (AIST) Program. The Earth Science Enterprise (ESE) acquires, processes, and delivers very large (gigabyte and terabyte) volumes of remote sensing and related data to public and governmental entities for use in understanding and protecting our home planet by developing a scientific understanding of the earth system and its response to natural and human induced changes, and to enable improved prediction of climate, weather, and natural hazards for present and future generations.

The program solicits both hardware and/or software technology proposals in any of the following four information system technology categories: (1) On-board satellite data processing; (2) Space-based communication networks; (3) Mission automation; (4) High end computing and technologies for modeling. More information is available at <http://research.nasa.gov>

Meetings and Internal Deadlines

Research Board applications are due October 7, 2002 and February 17, 2003.

Guidelines are posted at <http://www.system.missouri.edu/research/>

UM-SL Research Award applications are due October 21, 2002, and February 10, 2003.

Guidelines are posted at http://www.umsl.edu/services/ora/RA-GUIDE&FORM_2002.pdf

Small Grants Fund applications are due October 14, 2002 and April 14, 2003.

Guidelines are posted at http://www.umsl.edu/services/ora/RA-GUIDE&FORM_2002.pdf

IRB Fall semester meeting dates: September 26

November 21
December 19

Grant Opportunities

Huntington Library

Fellowships at the Huntington

The Huntington is an independent research center with holdings in British and American history, literature, art history, and the history of science and medicine. The Library collections range chronologically from the ninth century to the present and include 600,000 photographs, a half-million rare books, nearly five million manuscripts, and a large ephemera collection, supported by a half-million reference works. Within the general fields listed above there are many areas of special strength, including: Middle Ages, Renaissance, nineteenth- and twentieth-century literature, history of science, British drama, Colonial America, American Civil War, Western America, and California. The Art Collections contain notable British and American paintings, fine prints, photographs, and an art reference library. In the library of the Botanical Gardens is a broad collection of reference works in botany, horticulture, and gardening. The Huntington will award to scholars over one hundred fellowships for the academic year 2003-2004. These fellowships derive from a variety of funding sources and have different terms. Recipients of all fellowships are expected to be in continuous residence at the Huntington and to participate in and make a contribution to its intellectual life.

Applications are due December 16. For more information, go to <http://www.huntington.org/ResearchDiv/Fellowships.html>; e-mail cpowell@huntington.org; write to The Huntington Library, 1151 Oxford Road, San Marino, CA 91108; phone 626/405-2194; fax 626/449-5703.

National Science Foundation

Frontiers in Integrative Biological Research (FBIR)

The Frontiers in Integrative Biological Research (FBIR) Program seeks to support integrative research which addresses major questions in the biological sciences. FBIR encourages investigators to identify major under-studied or unanswered questions in biology and to develop innovative approaches to address them by integrating the scientific concepts and research tools of biology, math and the physical sciences, engineering, social sciences and the information sciences. Applicants are encouraged to focus on the biological significance of the question, to describe the integrative approaches, and to develop a research plan, which is not limited by conceptual, disciplinary, or organizational boundaries. Particularly encouraged are the inclusion of young scientists trained in an interdisciplinary environment or in non-biological disciplines, and partnerships with minority serving and primarily undergraduate institutions and community colleges. **ELIGIBILITY:** Proposals are invited from U.S. academic institutions, U.S. non-profit research institutions, and consortia of

such institutions with appropriate research and educational facilities. FUNDING: It is estimated that approximately 12 Planning Grants and up to 10 Research Grants will be made. The anticipated funding for FY 2003 awards is \$12 million. **Preliminary proposals are due November 1.** For more information, go to <http://www.nsf.gov/cgi-bin/getpub?nsf02154>; e-mail biofbir@nsf.gov; write to FBIR Program Officer, Division of Biological Infrastructure, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230; phone 703/292-8470.

National Science Foundation Computational and Algorithmic Representations of Geometric Objects (CARGO)

The Division of Computer and Communications Research (C-CR) and the Division of Mathematical Sciences (DMS) of the National Science Foundation (NSF) and the Defense Sciences Office (DSO) of the Defense Advanced Projects Research Agency (DARPA) plan to support research and development teams focusing on mathematical and computational innovations relevant to representation and computational manipulation of geometrical objects. These awards will be administered by NSF. Areas of specific interest include: (a) computational Topology and Geometry; (b) Computational and Geometric Cartography, including Spatial Statistics; (c) Geometric aspects of Graphics and Computer-Aided Design (CAD). The program particularly encourages proposals for efforts involving collaborations of experts in the mathematical and computational sciences with other scientists, engineers, and practitioners representing diverse application areas. Proposals for incremental improvements of ongoing efforts will not be selected for funding. Rather, the program seeks proposals that offer new approaches and promising significant breakthroughs. FUNDING: It is estimated that 4 to 8 Incubation Grants and 3 to 6 Team Grants will be made. The anticipated funding amount is \$3,250,000 in FY2003: up to \$100,000 total for one to two years for each incubation grant, and \$200,000 - \$300,000 per year for up to three years for each team grant, subject to the availability of funds, site visits, and/or progress reports. **Applications are due December 3.** For more information, go to <http://www.nsf.gov/cgi-bin/getpub?nsf02155>; e-mail wfrankli@nsf.gov; write to Wm. Randolph Franklin, Program Director, Numeric, Symbolic, & Geometric Computa., National Science Foundation, CISE/C-CR, 4201 Wilson Blvd. 1145S, Arlington, VA 22230; phone 703/292-8912.

National Science Foundation Digital Government (DIG GOV)

Government is a major collector and provider of data and information, provider of information-based services and user of information technologies. The research goals of the Digital Government Program are to support: 1) multi-disciplinary and multi-sector partnerships of researchers in information technologies and government agencies at all levels in order to foster collaboration among societal sectors, and 2) research on the relationships between the design and use of information technologies on : i) forms, processes, and outcomes of democracy, ii) government organizational forms, learning, and adaptation, iii) new forms of government-government collaboration, iv) citizen/

government interaction, and v) other social/political science research related to IT and government. Academic/government collaborations are expected to contribute to government strategic planning for information technologies and services (external and internal) while providing interesting and unique new research problems and data sets for the academic research community. FUNDING: The anticipated funding amount is \$8 million per year. It is estimated that 10-20 awards will be made. **Applications are due November 7.** For more information, go to http://www.interact.nsf.gov/cise/descriptions.nsf/eia_progs?OpenView or <http://www.nsf.gov/cgi-bin/getpub?nsf02156>; e-mail lbrandt@nsf.gov; write to Lawrence E. Brandt, Program Manager, Div. of Experimental and Integrative Activities, NSF, Room 1160, 4201 Wilson Blvd., Arlington, VA 22230; phone 703/292-8980.

Department of Education

NIDRR: Research Fellowships Program

The purpose of the Fellowships Program is to build research capacity by providing support to highly qualified individuals, including those who are individuals with disabilities, to conduct research about the rehabilitation of individuals with disabilities. Fellows must address problems encountered by individuals in their daily lives that are due to the presence of a disabling condition, problems associated with the provision of rehabilitation services to individuals with disabilities, and problems connected with the conduct of disability research. ELIGIBILITY: The program provides two categories of fellowships: Merit Fellowships and Distinguished Fellowships. (a) To be eligible for a Distinguished Fellowship, an individual must have seven or more years of research experience in subject areas, methods, or techniques relevant to rehabilitation research and must have a doctorate, other terminal degree, or comparable academic qualifications. (b) To be eligible for a Merit Fellowship, an individual must have either advanced professional training or independent study experience in an area that is directly pertinent to disability and rehabilitation. FUNDING: Maximum Award Amount: Merit: \$45,000; Distinguished: \$55,000. It is estimated that 10 awards will be made with project. **Applications are due October 15.** For more information, go to <http://www.ed.gov/legislation/FedRegister/>; e-mail Donna.Nangle@ed.gov; write to Donna Nangle, Department of Education, 400 Maryland Avenue, SW Room 3412, Switzer Building, Washington, DC 20202-2645; phone 202/205-5880.

Population Council

Social Sciences Fellowships Program

The Population Council Fellowships in the Social Sciences, administered by the Policy Research Division, support work leading to a doctoral degree, postdoctoral or midcareer training in the population field. Fellowships will be awarded for advanced training in population studies, including demography and public health, in combination with a social science discipline, such as economics, sociology, anthropology, or geography. Awards will be made only to applicants whose proposals deal with the developing world. ELIGIBILITY: Applications are accepted for four types of training programs in population: three levels of training at degree-granting institutions of higher

learning and one at the Population Council: (1) Predoctoral training; (2) Postdoctoral training; (3) Midcareer training; and (4) Resident training. FUNDING: Awards consist of a monthly stipend (based on type of fellowship and place of study), partial tuition payments and related fees, transportation expenses (for fellow only), allowances for books and supplies, and health insurance. Tuition at the postdoctoral and midcareer levels is not included in the award. The typical award is for 12 months, and is non-renewable. In the case of postdoctoral training, the award is made for two years. **Applications are due December 15.** For more information, go to <http://www.popcouncil.org/opportunities/>; e-mail ssfellowship@popcouncil.org; write to Fellowship Coordinator, Policy Research Division, Population Council, One Dag Hammarskjold Plaza, New York, NY 10017; phone 212/339-0671; fax 212/755-6052.

Schomburg Center for Research in Black Culture Scholars-in-Residence Program

The Schomburg Center residency program assists scholars and professionals whose research on the black experience can benefit from extended access to the Center's resources. Fellowships funded by the Center will allow recipients to spend six months or a year in residence with access to resources at the Schomburg Center and other centers of The New York Public Library. The Program is designed to (1) encourage research and writing on the history, literature, and cultures of the peoples of Africa and the African diaspora, (2) to promote and facilitate interaction among the participants including fellows funded by other sources, and (3) to facilitate the dissemination of the researchers' findings through lectures, publications, and the ongoing Schomburg Center Colloquium and Seminar Series. ELIGIBILITY: The Fellowship Program is open to scholars studying the history, literature, and culture of the peoples of African descent from a humanistic perspective and to professionals in fields related to the Schomburg Center's collections and program activities. Projects in the social sciences, science and technology, psychology, education, and religion are eligible if they utilize a humanistic approach and contribute to humanistic knowledge. FUNDING: Fellowships are awarded for continuous periods of six or twelve months at the Schomburg Center with maximum stipends of \$25,000 for six months and \$50,000 for twelve months. Fellows must devote full time to their research projects. They are expected to be in continuous residence at the Schomburg Center and to participate in the intellectual life of the Program. **Applications are due December 2.** For more information, go to <http://www.nypl.org/research/sc/scholars/index.html>; e-mail aaladawiya@nypl.org; write to Scholars-in-Residence Program, Schomburg Center for Research in Black Culture, 515 Malcolm X Boulevard, New York, NY 10037-1801; phone 212/491-2200.

Witter Bynner Foundation for Poetry Grants

The Witter Bynner Foundation is interested in promoting poetry as an important element in a balanced society. To that end, the Foundation encourages proposals which expand awareness of the possibilities of poetry in the lives of people. The Foundation supports programs that reaffirm our sense of community, respect for the natural world, and the free exchange of ideas, feelings, and concerns within the global community. Of

interest is the development of transferable, model programs which use poetry as a vehicle to deal with specific social, educational, and therapeutic concerns, and the nurturing of emerging poetic voices as well as established poets from diverse cultures. ELIGIBILITY: Grants are provided to nonprofit organizations. FUNDING: Organizations may apply for grant support from \$1,000 to \$15,000 for a maximum of three years. The foundation does not support indirect costs for grant administration, endowment funds, capital improvements, or general operating expenses. **Letter of intent is due December 1.** For more information, go to <http://www.bynnerfoundation.org/>; e-mail info@bynnerfoundation.org; write to Witter Bynner Foundation for Poetry, Inc., P.O. Box 10169, Santa Fe, NM 87504; phone 505/988-3251; fax 505/986-8222.

Woodrow Wilson National Fellowship Foundation

Woodrow Wilson Dissertation Grants in Women's Studies

The Woodrow Wilson Dissertation Grants in Women's Studies encourage original and significant research about women that crosses disciplinary, regional, or cultural boundaries. Recent winning topics include Women, Law, and the Victorian Novel; Middle East Feminists, Gender and Computer Communication; African American Women in Slave Revolts; and Women, Violence, and Visual Representation in South Africa. The Woodrow Wilson Fellowship Foundation offers both Women's Studies Dissertation Grants and WW-Johnson & Johnson Dissertation Grants in Women's Health. ELIGIBILITY: Students in doctoral programs who have completed all pre-dissertation requirements in any field of study at graduate schools in the United States. Candidates must have completed all pre-dissertation requirements, including approval of the dissertation proposal, by October 25, 2002, and expect to complete their dissertations by the summer of 2004. Candidates who are within a few months of completing their work should not apply. FUNDING: Winners will receive grants of \$3,000 to be used for expenses connected with the dissertation. These may include, but are not limited to, travel, books, microfilming, taping, and computer services. Up to fifteen awards will be announced in February 2003. **Applications are due November 4.** For more information, go to <http://www.woodrow.org/womens-studies/>; e-mail wsw@woodrow.org; write to Woodrow Wilson National Fellowship Foundation, Dept. WS CN 5281, Princeton, NJ 08543-5281; phone 609/452-7007; fax 609/452-0066.
