Feedback Form

We invite you to let us know whether an UMSL membership in the regional TechShop will benefit your education, research and/or teaching. We value your feedback.

*Please either complete this form and return it to 341 Woods Hall or email your feedback to Tamara Wilgers at wilgerst@umsl.edu.*

1. Please select the appropriate category into which you fall:

☐ Faculty  ☐ Staff  ☐ Student

2. **NAME (please print)**

3. **DEPARTMENT**

4. **How would access to TechShop affect/benefit your education, research/commercialization, teaching, and/or your students’ educational opportunities?**
About TechShop:

TechShop is a vibrant, creative community that provides access to tools, software and space. Part fabrication and prototyping studio, part hackerspace, and part learning center, TechShop provides access to an extensive array professional equipment and software along with comprehensive instruction and expert staff.

Each TechShop facility includes laser cutters, plastics and electronics labs, a machine shop, a wood shop, a metal working shop, a textiles department, welding stations and a waterjet cutter. Members have open access to design software, featuring the entire Autodesk Design Suite. Huge project areas with large work tables are available for completing projects and collaborating with others. TechShop also offers a number of experience-driven corporate events developed specifically to bring teams together and engage them in the act of making.

Anyone may attend classes. For a monthly or annual fee, members can reserve and use TechShop's tools upon successful completion of equipment-specific Safety and Basic Use (SBU) classes. Talented staff members are available full time to help develop ideas and improve technical skills.

The St. Louis TechShop is planned for the CORTEX district in Midtown. Other TechShop facilities across the country are located in San Francisco, San Jose, Menlo Park, Pittsburgh, and several other cities from Arizona and Texas to Michigan and more. For more information on TechShop, visit www.techshop.ws/index.html.
