SAVE THE DATE

WHEN: March 12 - 13, 2015
WHERE: Missouri University of Science and Technology
HOST: Educational Technology

BUILDING EXPECTATIONS

Missouri S&T’s eighth annual Teaching and Learning Technology Conference is a great opportunity for instructors to see new technologies that have succeeded in improving student outcomes.

The focus for TLT 2015 will be on how to build expectations amongst students and instructors in order to create an environment that facilitates and improves learning.

For more information or to register, visit tlt.mst.edu
(registration opens at the beginning of January, 2015)

Registration is FREE for all participants!

Wimba Classroom, our former real-time online conferencing tool, is being decommissioned. Blackboard Collaborate, currently available in MyGateway, is taking its place. If you have any recorded Wimba archives and would like to keep them, you can save them as audio or video files (access this short video on our support page and/or contact the Faculty Resource Center for help)—but do hurry; time is running out! The FRC is also available to help you get started with Blackboard Collaborate—just call the Center or stop by the office; we’re located in room 105 Express Scripts Hall.

Kaltura is replacing Windows Media and Streamer as our new media tool used for uploading and managing video content, creating multimedia presentations, and interacting with students. Video content can be created and managed within a MyGateway course.

Get Started with Kaltura

1. Log into MyGateway.
2. On the MyGateway Home page, find the module named "My Media" and click the link "My Media."
3. Click "Add Media"—there are two choices: "Upload media or record from webcam" or "Record your screen."

You can upload digital files using the upload media option, whether the files are video or audio. You cannot upload data from a standard DVD. Video or audio files would have to be streamed (or in the case of audio files, ripped) in order to render them usable in Kaltura. The Faculty Resource Center will be happy to convert your DVDs/CDs/VHS tapes into digital files that can be uploaded to Kaltura.

Recording from a webcam allows you to capture yourself in an easily accessible video file. "Record your screen" is a screen capture which can also include a video or audio component.

...Students can use My Media, too!

Your students can also access Kaltura/My Media on the MyGateway home page. They will have capture and upload options.

To make the Kaltura capture/upload features available to students:

1. Go to a Content Area in MGW
2. Go to "Tools" in the Content Area and select "More Tools" at the bottom of the list
3. Select "Media Gallery" (when it appears and shows up in your course, it will be called "Course Gallery")

When students access "Course Gallery," they can make their own projects in Kaltura.

We hope you utilize Kaltura for your media creation in MyGateway.

For Kaltura support, contact the Faculty Resource Center at frc@umsl.edu or 314-516-6704. Students can receive support by contacting us as well.

Winmedia Server decommissioned

If you currently use videos in your course(s) that have links starting this way: http://winmedia.umsl.edu..., please be advised that the links will no longer work. Contact the Faculty Resource Center about reconnecting your videos using our new My Media tool.

For questions regarding any information on this page please contact me directly, (314.516.4901), email the Faculty Resource Center, or stop by 105 Express Scripts Hall.
